

Architecture of Computer

Introduction

The word 'Computer' is derived from the Latin word 'Compute' which means 'to calculate'. Therefore, the literal meaning of computer is 'calculator'.

A computer is an electronic device that receives data and control through input and displays it as an output by working on it according to the instructions given.

In other word, a Computer is an electronic device which takes some input, do some arithmetic & logical operation and produce the desired result.

It has following components

- Input unit (For accepting data & Instruction)
- Storing Data (Primary & Secondary memory)
- Processing Data (CPU)
- Output unit (displaying result & print)
- Controlling and coordinating all operations inside computer (Control unit)

Computer is a system, so all the subsystem interact with each other to achieve the goal of computer

(a) **Input**– Input device is the main component of Computer. Through this device data & instruction are inserted inside the Computer. Main input device is Keyboard, Mouse, Scanner & Trackball & Light Pen etc.

(b) **Storage**– Storage is the properties of computer where data & instructions are stored in computer. Some storage are volatile and some non-volatile. There are two types of Storage
I. Primary storage
II. Secondary storage

Primary storage– Primary memory is key fast memory. It is an electronic device so all content of memory takes equal time. Main memory is also called Random access memory (RAM). The Program and data are loaded into the primary

memory before processing. CPU directly interact With the RAM. It is volatile in nature. Primary memory is very expensive & therefore Limited in capacity.

Secondary Storage– Secondary memory is made up of magnetic material. Memory all the instruction & Data which is not going to be executed is stored in secondary memory. Secondary memory is slower and cheaper than main memory so Its capacity is large. It is characterized by low cost, large access time & large storage Capacity.

(c) **Processing**– Program is made of instruction & data. The process of performing operation on data as per the instruction specified by Program is called Processing. Data Processing is an activity where data is manipulated so that meaningful information can be achieved. Data and instruction is taken from main memory & transferred to ALU (Arithmetic Logic unit), a part of CPU, which perform every type of calculation. When all the processing completes, the final result is transferred to main memory

(d) **Output**– In output unit result is displayed. result is given through output devices like monitor, Printer etc. computer process the data in binary format & result of Processing is also in the binary form. the result can not be directly given to the user, The output device therefore convert the result in available in binary form into human readable language. before displaying it to the user.

(e) **Controlling**– The function of managing the controlling of all the component i.e Coordinating all the operation is done by control unit. Control unit fetch the instruction, decode the instruction and execute the instruction.

Computer Arithmetic Operations– ALU is mathematical Brain of computer, ALU is digital circuit that provides arithmetic & logic operations, It is the fundamental building block of the central processing unit of a computer. Most of the operations are performed by one or more ALU which load data from input register. Registers are small amount of storage available to the CPU

Central Processing Unit and Instructions

CPU Consist of arithmetic logic unit (ALU) control unit (CU) and Register the Brain of computer is known as Central Processing Unit. It carries out the actual Processing, it is known as processor of computer. It is placed on the circuit Known as integrated circuit, Integrated circuits are made up of semiconductor material. Program consist of data & instruction. These are given to CPU for execution of Program.

CPU fetches the program and data from memory and perform arithmetic and logic operation as per given instruction and stores the result back to memory. CPU has its own memory called Register. Register are part of CPU chip and they are limited in size and number. These Register are used for storing data, instruction and intermediate result.

CPU has two main component–

Arithmetic Logic Unit (ALU) and Control Unit (CU), ALU perform all kind of calculations such as arithmetic (Add, subtract, multiply divide), comparison (Less than, Greater than or Equal to) and other operation

Control unit's main function is to direct and coordinate the computer operations. It interpret the instruction and initiates action to execute them. Control Unit, Control the flow of data through the computer system & direct the ALU, input-output (I/O) devices and other units. It is also called central nervous system of the computer system In addition the CU is responsible for fetching decoding, executing instructions and storing result.

Memory Organization

A computer system require to store the data & instruction for processing, Whenever we talk about the memory of computer system we usually Talk about the main or primary memory.

Secondary memory is used to store data, instructions and result permanently for future use.

Memory Hierarchy–

Memory usually refers to random access memory typically DRAM (Dynamic RAM) and memory can also refer to other forms of data storage.

Term storage refers to storage Devices that are not directly accessible by the CPU (Secondary Storage) Example of secondary storage device are hard disk, optical disk Drives and other devices that are slower than RAM but are used to store data permanently.

CPU Register– Register are directly accessible by CPU. Registers are the fastest of all forms of computer data storage.

Cache Memory– Cache memory is located between Register and main memory. It is used to store instruction & data that are repeatedly require to execute Program. CPU first checks within the data & instruction is available in cache memory. When the same piece of data and instruction is needed, the CPU read it from cache memory instead of main memory .

Primary Memory – Primary memory (main memory or Internal memory can be directly accessed by the CPU. CPU continuously reads instruction stored in the primary memory and execute them any data that has to be operated by CPU is also store there, There are two types of primary memory RAM & ROM. RAM is usually referred to as main memory & It is faster than the secondary memory.

ROM is non-volatile, which means its contents are not lost even when the power is turned off. It is a small but faster permanent storage for the contents which are rarely changed. For Example, boot loader that loads the operating system into primary memory, is stored in ROM.

Secondary Memory– Primary memory has limited storage capacity and is either volatile (RAM) or read-only (ROM). This memory is not directly accessible by the CPU. Secondary Storage devices hold data even when the computer is switch off. An example of such a device is hard-disk.

Computer usually uses its input/output channel to access the data from secondary storage device to transfer the data in the main memory. While the CPU can read the data stored in main memory in nanoseconds, the data from these days there are secondary storage devices like SDD which support very fast data Transfer speed as compared to earlier HDD (Hard disk Drive). Data transfer between commutes has become easier and simple due to availability of small-sized and portable flash or pen drive.

Important Questions Asked in Previous Years Examinations

1. **Who controls the movement of signals between CPU and I/O?**
 (a) ALU (b) Control Unit
 (c) Memory Unit (d) Secondary stores
 (e) None of these

(SBI 2012)

Ans : (b) The Control Unit Controls the movement of signals between the CPU and I/O

2. **Which of the following CPU registers is used by ALU to store operands?**
 (a) Both program counter and accumulator
 (b) Program counter
 (c) Accumulator
 (d) Address register

RRB Bengaluru LP-2004

Ans. (c) : An accumulator is a type of register for short term, intermediate storage of arithmetic and logic data in a Computer's Central Processing unit (CPU).

3. **In Micro programmed control unit, subsequent instruction words are fetched into the.....**
 (a) Instruction Register (b) Transistor
 (c) CMOS battery (d) Program Counter

Bihar PGT TRE 2.0, 15.12.2023

AHC RO 2019 (Exam date 10.01.2020)

Ans. (a) : In micro programmed control units, subsequent instruction words are fetched into the instruction register in a normal way. However, the operation code of each instruction is not directly decoded to enable immediate control signal generation but it comprises the initial address at a micro program contained in the control store.

4. **Computer systems that store instructions and data from the same memory unit without any distinction are based on the _____ structure.**
 (a) Harvard (b) Babbage
 (c) Knuth (d) Von-Neumann

WBPS Instructor-18.09.2021

HSSC wireman Instructor -17.12.2019, Shift-I

Ans : (d) Von Neumann architecture" refers to any stored program computer, in which an instruction and a data operation cannot occur at the same time because they share their space on a 'Common Bus'.

5. **Which part of the CPU selects, interprets and monitors the execution of program instructions.**
 (a) Memory (b) Register Unit
 (c) Control Unit (d) ALU

S.S.C. C.G.L (Tier-I), 2014

Ans : (c) Control Unit considered as the central nervous system of computer obtains the instructions from the memory, interprets them and directs the operation of the computer. It selects, interprets and monitors the execution of the program instructions by generating the timing and control signals.

6. **Which bus is used to specify memory locations for the data being transferred?**
 (a) Control bus (b) Data bus
 (c) Address bus (d) I/O bus

NVS PGT 19.09.2019 (Shift-I)

Ans. (c) : It is group of conducting wires which carries address only. Address bus is unidirectional because data flow in one direction from micro processor to memory or from micro processor to input/output devices.

7. **With respect to integrated circuit, what is the full form of VLSI?**

- (a) Varied Large Scale Integration
 (b) Very Large-Scale Integration
 (c) Varied Large-Scale Interrogation
 (d) Very Large-Scale Interface

UPPCL TG-II 19-03-2021 (Shift-II)

Ans. (b) : The full form of VLSI is Very Large-Scale Integration, it is used in microprocessor, Phone's chip, graphic card etc.

8. **Which of the following transmits different commands or control signals from one component to another component of a computer system?**

- (a) Data Bus
 (b) Address Bus
 (c) Both Data Bus and Address Bus
 (d) Control Bus

(AHC RO-2016)

Ans : (d) Control bus is a group of conducting wires, which is used to generate timing and control signals to control all the associated peripherals micro processor uses control bus to process data that is what to do with selected memory location.

9. **CPU is the main component of the computer, which of the following is the full form of CPU?**

- (a) Central Programming Unit
 (b) Control Processing Unit
 (c) Computer Processing Unit
 (d) Central Processing Unit

HSSC wireman Instructor -17.12.2019, Shift-I

RRB Guwahati L.P.- 2008

Ans. (d) : A CPU (Central Processing Unit) is the primary component of a computer that performs most of the processing tasks. It executes instructions from programs and manages data within a computer's memory.

10. **The program instructions are represented in binary and stored in the _____ from which they are fetched, decoded and executed by the CPU.**

- (a) memory (b) memory and chip
 (c) chip (d) control unit

RRB Kolkata LP-2009

Ans : (a) Memory is the electronic holding place for the instruction and data a computer needs to reach quickly. Its where information is stored for immediate use. Memory is one of the basic functions of a computer, because without it a computer would not be able to function properly.

11. **Control Unit is called the..... of a computer.**

- (a) heart
 (b) nerve center or brain
 (c) Kidney
 (d) All options are correct

SSC JE Electrical (Exam date 27.01.2018) Shift-I

Ans. (b) : Central Processing Unit has three main Components- Control Unit, Memory register and Arithmetic Logic Unit. The Control Unit directs processor operation. Therefore it is called the nerve centre or brain of the computer.

12. An ALU typically uses an accumulator to store operands and results. Which of the following options correctly describes the accumulator?

(a) Register (b) Main Memory
(c) Processing Unit (d) Secondary Memory

WBPSCT Instructor-18.09.2021

Ans. (a) : The full name of ALU is Arithmetic Logic Unit. It usually uses an accumulator to store operands and results. Registers are the smallest data holding elements that are built into the processor itself. These are the memory locations that are directly accessible by the processor. It may hold an instruction, a storage address or any kind of data such as a bit sequence or individual characters.

13. Which of the following hardware components is also considered as a storage unit, though it has a very small strong capacity?

(a) Register (b) Control Unit
(c) Data Bus (d) ALU

HSSC wireman Instructor -17.12.2019, Shift-II

Ans. (a) : Register memory is fastest and most expensive memory of the computer system. Its data storage capacity is less.

14. A _____ shows how operational attributes are linked together and contributes towards realizing the computer's.

(a) component design
(b) computer architecture
(c) computer working
(d) computer organization

KPSC Jr. Instructor 22.11.2018w

Ans : (d) Computer organization so is how operational attributes are linked together and contribute to realizing the architectural specification.

15. A _____ is the conceptual design and fundamental operational structure of a computer system.

(a) computer organization
(b) component design
(c) computer working
(d) computer architecture

KPSC Instructor Electronic-25.06.2014

Ans : (d) Computer architecting is a theoretical basic process. Under which the structural of the computer is prepared.

16.tells the computer's memory, arithmetic logic unit and input and output devices how to respond to a program's instructions.

(a) Storage Unit (b) Input Device
(c) Control Unit (d) Logic Unit

(SSC 10+2 CHSL 19.01.17, 1.15 pm)

(CCC April 2015)

(Uttarakhand RO 2017)

Ans : (c) Control Unit is a component of a computers Central Processing Unit that directs the operation of the processor. It tells the computer's memory, arithmetic logic unit and input/output devices how to respond to the instruction that have been sent to the processor.

17. Which material is used to manufacture Computer Chips?

(a) Silver (b) Iron
(c) Gold (d) Semiconductor

UKSSSC Tech. Electrical Instructor-21.11.2017

Ans : (d) Silicon is the material of choice in the chip industry. Unlike the metals normally used to conduct electrical currents. Silicon is a semiconductor, meaning that its conductive properties can be increased by mixing it with other materials such as phosphorus or boron.

18. Which among the following is/are types of microcontrollers in embedded system?

A. ARM microcontroller

B. MRP microcontroller

(a) Neither A nor B (b) Only B
(c) Only A (d) Both A and B

UPPCL Technical Grade-II (Shift-II) 20.03.2021

Ans. (c) : ARM stands for Advanced Rise Machine. The most popular Microcontrollers Programming in the digital embedded system world, and most of the industries prefer only ARM microcontrollers since it consists of significant features to implement products with an excellent appearance. It is cost sensitive and high performance device, which has been used in a wide range of application such as industrial Instrument control systems, wireless networking and sensors and automotive body systems etc.

19. With reference to microcontroller, PIC stands for _____.

(a) Prefaced Internet Controller
(b) Prefaced Interface Controller
(c) Peripheral Internet Controller
(d) Peripheral Interface Controller

DSSSB Craft Instructor (ESM) 06.10.2019

RRB Bengaluru LP-2004

Ans. (d) : PIC stands for Peripheral Interface Controller, which was developed in the year 1993 by the General Instruments Microcontrollers. It is controlled by software and programmed in such as was that it performs different tasks and controls a generation line. PIC microcontrollers are used in different new application such as smart phones, audio accessories and advanced medical devices.

20. 'BUS' in computer _____

(a) Indicates a data item
(b) Information transmitting is a set of physical wires
(c) Indicates an address item.
(d) Has become a synonym for the file present in the operating system.

DSSSB Craft Instructor (ESM) 06.10.2019

MP Electrician Instructor 07.11.2016, Morning

Ans : (b) A bus is a high speed internal connection. Buses are used to send control signals and data between the processor and other components. Three types of bus are used.

1. Address bus 2. Data bus 3. Control bus

21. Which of the following facts is false regarding the control unit?

- (a) It receive instructions from memory, interprets them and directs operation of the computer
- (b) It process and stores data
- (c) It manages and coordinates all the units of the computer
- (d) It is responsible for controlling the transfer of data and instruction between other units of the computer

**GSSSB Supervisor Electronic Instructor 18.01.2014
KPSC Instructor Electronics Mech.20.07.2018**

Ans. (b) : Except option (b) all other options are true regarding to the control unit because processing and storing data is not function of the Control Unit.

22. Which of the following is an integrated component of CPU and is generally used to store data and addresses during program execution?

- (a) Arithmetic logic unit
- (b) Register
- (c) Control unit
- (d) Secondary memory

GSSSB Electronic Instructor-22.01.2017

Ans. (b) : Register is a type of computer memory used by the CPU to quickly accept, store, and transfer data and instructions that are being used immediately. The registers used by the CPU are often called processor registers is an integrated component of the CPU.

23. Which of the following statements is incorrect regarding ALU?

- (a) ALU uses CPU registers for operations
- (b) ALU is one of the main component of the CPU
- (c) ALU controls the functions of the control unit
- (d) ALU performs both arithmetic and logic operations

KPSC Jr. Instructor- 09.07.2014

Ans. (c) : Arithmetic Logic Unit (ALU) is a digital circuit that provides arithmetic and logic operations. The Control Unit (CU) is a component of a CPU that directs the operation of the processor. ALU does not control the functions of the Control Unit. Hence statement (c) is incorrect.

24. Find out whether the given statements are true or false with reference to the CPU.

(i) It is made up of register memory, control unit and arithmetic logic unit.

(ii) In modern computers, it is contained in an integrated circuit chip called the motherboard.

- (a) (i) - True, (ii) - True
- (b) (i) - True, (ii) - False
- (c) (i) - False, (ii) - False
- (d) (i) - False, (i)- True

UPPCL Technical Grade-II Shift-I, 28.03.2021

Ans. (b) : CPU (Central Processing Unit) is the computer's part that retrieves and executes information. The CPU is essentially the brain of a CAD (Computer Aided Design) system. It consists of an Arithmetic

Logic Unit (ALU), a Control Unit (CU) and various register memory. CPU is simply referred as processor, while the given statement is not correct with respect to the second CPU.

25. During execution, CPU selects and retrieves instructions from the ____.

- (a) registers
- (b) main memory
- (c) auxiliary memory
- (d) secondary memory

UPPCL Technical Grade-II (Shift-I) 20.03.2021

Ans. (b) : The Control Unit of the Central Processing Unit regulars and integrates the operations of the computer. It selects and retrieves instructions from the main memory in proper sequence and interprets then so as to activate the other functional elements of the system at the appropriate moment.

26. Which memory can be directly accessed by the CPU of the computer?

- (a) Magnetic tape
- (b) Hard disc
- (c) Memory card
- (d) Cache memory

DSSSB Craft Instructor (ESM) 06.10.2019

Ans. (d) : Cache memory is a type of high - speed volatile computer memory that provides high speed data access to a processor (CPU) and store frequently used computer programs, applications and data.

27. ALU is one of the main components of a computer's CPU. Which of the following is the full form of -

- (a) Arithmetic Logic Unit
- (b) Algorithmic Looping Unit
- (c) Arithmetic Language Unit
- (d) Algorithmic Logic Unit

RRB Gorakhpur L.P.-2008

Ans. (a) : The full form of ALU is 'Arithmetic Logic Unit'. It is a main component of the CPU. It is used to perform arithmetic and logic operations.

28. Which of the following components maintains order, directs the operation of the entire system and does not perform any actual processing on data?

- (a) Control Unit
- (b) ROM
- (c) Mother board
- (d) I/O unit

MP Electrician Instructor 07.11.2016, Morning

Ans. (a) : The control unit is the part of CPU (Central Processing Unit). It control every component of the computer and creates a sequence of all work process and completes the work. It direct the system but does not perform data processing.

29. A CPU with a clock rate of 1.8 GHz can perform clock cycles per second.

- (a) 18,000,000
- (b) 1,800,000
- (c) 180,000,000
- (d) 1,800,000,000

WBPSB Instructor-18.09.2021

Ans. (d) : Clock speed of CPU execution per second it measures the number of cycles, which is measured in gigahertz (GHz). A 'Cycle' is the basic unit that measures CPU speed. CPU with clock rate of 1.8 GHz per second can measure up to 1,800,000,000 clock cycles

30. A CPU with a memory address register (MAR) of 24 bits can address up to ____ memory (in bytes).
 (a) 16 MB (b) 8 KB
 (c) 16 KB (d) 8 MB

HSSC wireman Instructor -17.12.2019, Shift-I

Ans. (a) : Memory address register (MAR) is a CPU register whose function is to store memory addresses. A CPU with memory address register (MAR) of 24 bits can address up to 16 MB (in bytes).

31. Which of the following is the processing unit of the computer?
 (a) CPU (b) memory
 (c) Graphic Card (d) mother board

**KPSC Jr. Instructor 22.11.2018w
 Punjab Wireman instructor-07.07.2013**

Ans. (a) : A Central Processing Unit, also called a central processor main processor or just processor, is the electronic circuitry that executes instructions comprising a computer program. The CPU performs basic arithmetic, logic, controlling and input/output operations specified by the instruction in the program.

32. The size of a word in computer is
 (a) None of these
 (b) varies within the same computer
 (c) fixed in every case
 (d) fixed in a computer, but varies among different computers

KPSC Instructor Electronic-25.06.2014

Ans. (d) : Word "size" refers to the amount of data a CPU's internal data registers can hold and process at one time. Modern desktop computers have 64-bit words. Computers embedded in appliances and consumer products have word size of 8, 16 or 32 bits.

33. Accumulator is an integral component of
 (a) CPU (b) Hard Disk
 (c) RAM (d) Cache memory

(RRB SSE (Shift-III), 03.09.2015)

Ans : (a) The accumulator is a register in which intermediate arithmetic logic unit results are stored. Without a register like an accumulator, it would be necessary to write the result of each calculation to main memory, perhaps only to be read 'write' back again for use in the next operation.

34. Cache memory is a small amount of extremely fast static ____ and is located close to the ____.

- (a) RAM, CPU (b) ROM, Motherboard
 (c) RAM, Hard disc (d) ROM, CPU

**UP PCL Technical Grade-II-11.11.2016
 UPPCL Technical Grade-II (Re-exam) 16.10.2016**

Ans. (a) : Cache memory is a primary memory used by the CPU to reduce the average cost of retrieving data from main memory. This static RAM is small in size and located close to the CPU.

35. Which of the following statement is wrong?
 (a) External memory has high storage capacity and is stable.
 (b) Registers are high speed storage area located outside the CPU.

- (c) ROM is a fixed primary memory.
 (d) Cache memory is a very high speed memory between CPU and RAM.

UKSSSC Tech. Electrical Instructor-21.11.2017

Ans. (b) : Statement 'b' wrong because register memory is the inside the CPU not outside. Register memory is the smallest and fastest memory in a computer. It is not a part of main memory and is located in the CPU in the form of registers, which are the smallest data holding elements.

36. Which among the following are the components of CPU?

- (a) RAM and ROM
 (b) ALU and Memory
 (c) ALU and Registers
 (d) ALU and Control Unit

GSSSB Supervisor Electronic Instructor 18.01.2014

Ans. (d) : ALU stands for Arithmetic Logic Unit. CU stands for control unit. It performs all the arithmetic and logical operations and process user input. It controls the operations of processor, memory. ALU and other input/output devices. It is directed by control unit.

37. Which of the following is a part of the CPU of a computer?

- (a) Motherboard (b) ALU
 (c) SRAM (d) DRAM

GSSSB Electronic Instructor-22.01.2017

Ans. (b) : Central Processing Unit are-

1. Control Unit
2. Arithmetic Logic Unit
3. Memory Unit

38. All the arithmetic and logical operations in a computer are done by.....

- (a) ALU (b) CU
 (c) Register (d) None option is correct.

KPSC Jr. Instructor- 09.07.2014

Ans. (a) : ALU stands for Arithmetic Logic Unit. ALU enables computers to perform mathematical operations an binary number. They can be found of the heart of every digital computer and are one of the most important parts of CPU.

39. Which of the following storage devices directly interacts with the CPU?

- (a) Tertiary Storage (b) Secondary, Storage
 (c) Primary Storage (d) Hard Disk

RRB Bengaluru LP-2004

Ans. (c) : The CPU interacts directly with the primary memory to perform read/write operation. It is two types

- (i) RAM (Random Access Memory)
- (ii) ROM (Read only Memory)

RAM is a volatile i.e. as long as the power is supplied to the computer it retains the data in it.

40. Which of the following components of the CPU maintains and regulates the flow of information across the processor?

- (a) PC register (b) Control Unit (CU)
 (c) ALU (d) Accumulator

**DSSSB Craft Instructor (ESM) 06.10.2019
 MP Electrician Instructor 07.11.2016, Morning**

Ans. (b) : CU stands for Control Unit. It is one of the fundamental parts of the CPU. The main work of CU is to tell the most efficient method to work. It guides all the related operations to the individual parts of the processor.

41. Which of the following options is inconsistent with the remaining three?

- (a) Cache Memory
- (b) Arithmetic and Logic Unit
- (c) Instruction Decoder
- (d) Control Unit

RRB Kolkata LP-2009

HSSC wireman Instructor -17.12.2019, Shift-I

GSSSB Electronic Instructor-21.01.2014

Ans. (c) : Cache memory, Arithmetic Logic Unit and Control Unit are part of Central Processing Unit while instruction decoder of a processor is a combinatorial circuit sometimes in the form of a read-only memory, sometimes in the form of an ordinary combinatorial circuit, its purpose to translate an instruction cache into the address in the micro memory where the micro cache for the instruction starts.

42. Which of the following statement is not true about the central Processing Unit (CPU)?

- (a) Control unit is a part of CPU
- (b) CPU executes stored program instructions
- (c) CPU is also known as microprocessor.
- (d) Kernel is the core of CPU.

UPPCL TG-II (20-03-2021) (Shift-II)

Ans. (d) : Kernel is not core of CPU. Kernel is the essential center of a computer operating system. It is the core that provides basic services for all after parts of the OS. It is the main layer between the OS and hardware.

43. Where are the functions of adding, comparing and matching done in a computer?

- (a) Memory chip
- (b) CPU chip
- (c) Floppy disk
- (d) Hard disk

S.S.C. M.T.S, 2011

Ans : (b) The Central Processing Unit is the main part of the computer. CPU chip or main processor is the part in the computer which performs or executes of the instructions or programs. The CPU is a very efficient calculator.

44. With reference to the central processing unit (CPU) which of the following statements is not true?

- (a) CPU processes data and instructions
- (b) ALU is a part of CPU
- (c) CPU also has a set of registers
- (d) It performs arithmetic operations

UPPCL TG-II 27-03-2021 (Shift-II)

Ans. (a) :

The CPU can process those instructions easily control unit that knows how to interpret program instructions and an arithmetic logic unit that knows how to add numbers. With the control unit and ALU combined, the CPU can process much more complex programs than a simple calculator.

45. Which of the following provides internal storage to the CPU?

- (a) Register
- (b) Register and RAM
- (c) RAM
- (d) Hard disk

Punjab Wireman instructor-07.07.2013

Ans : (a) A processor register is one of a small set of data holding places that are part of the computer processor. A register may hold an instruction a storage address, or any kind of data. Some instructions specify registers as part of the instruction.

46. Which of the following options does the CPU memory include?

- (a) Secondary Memory
- (b) Only Scratch Pad Memory
- (c) Scratch Pad Memory and Cache Memory
- (d) Only Cache Memory

UPP Computer Operator 21-12-2018 (Batch-01)

Ans : (c) Scratchpad memory is a high speed internal memory directly connected to the CPU core and used for temporary storage to hold very small items of data for rapid retrieval and cache memory is the temporary memory officially termed CPU cache memory. This chip based feature of your computer lets you access some information more quickly than if you access it from your computers main hard drive.

47. "For computer, world consists of zeros and ones only. To store the zeros and ones,..... is placed inside a processor:

- (a) I/O device
- (b) Instruction set
- (c) Transistor
- (d) Main Memory

(UPPCL TG2 11-11-2016)

Ans : (c) For the computer the world is made of zero and one. To store these zero or one, a transistor is installed inside the processor. All the calculations in the computer are done through '0's and '1's only.

48. The four basic tasks performed by CPU are Fetch,, Manipulate and Output:

- (a) Design
- (b) Decode
- (c) Display
- (d) Regulate

(UPPCL TG-2 11-11-2016)

Ans : (b) The four primary function of a CPU are fetch, decode, execute and write back. Decoding is the process of converting code into plain text or any format that is useful for subsequent processes.

49. Which of the following represents the amount of work that the system is capable of doing per unit time?

- (a) Flow (throughput)
- (b) Load
- (c) Thread
- (d) Response time

UPPCL TG-II 20-03-2021 (Shift-I)

Ans. (a) : Throughput is a term used in information technology that indicates how many units of information can be processed in a set amount of time.

50. Most of the processing in computers takes place in _____.

- (a) Memory (b) RAM
- (c) CPU (d) Motherboard
- (e) ALU

(PNB (Clerk) 2011)
(IBPS 2011)

Ans : (c) Most of the processing in the computer takes place in the CPU. The processing speed of CPU is measured in Hertz (Hz). At present, processors with gigahertz and megahertz speeds are being used.

51. Identify the correct order of the stages of a data processing cycle.

- (a) Input stage-> Output stage-> Processing stage-> Storage stage
- (b) Input stage-> Processing stage-> Storage stage-> Output stage
- (c) Processing stage-> Input stage-> Output stage-> Storage stage
- (d) Input stage-> Processing stage-> Output stage-> Storage stage

UKSSSC Tech. Electrical Instructor-21.11.2017
KPSC Jr. Instructor- 09.07.2014

Ans : (d) The data processing cycle consists of a series of steps where raw data (input) is fed into a system to produce actionable insights (output). Each step is taken in a specific order, but the entire process is repeated in a cyclic manner.

Input stage → Processing stage → Output stage → Storage stage

52. Another name for computer chip is _____

- (a) Microchip (b) Mother board
- (c) CPU (d) Microprocessor

RRB NTPC, (Shift -2) Online, 28.03.2016

Ans : (a) A microchip (also called a chip) a computer chip, an integrated circuit on a small flat piece of silicon on the chip transistors acts as miniature electrical switches that can turn a current on or off.

53. To increase CPU throughput which of the following memories is placed between the CPU and main memory?

- (a) Secondary memory (b) Cache memory
- (c) Sequential memory (d) Auxiliary memory

KPSC Instructor Electronics Mech.20.07.2018

Ans. (b) : Throughput is the number of processes that complete execution per time unit. If the computer system completes n processes in t second time then,

$$\text{Throughput} = \frac{\text{Total number of processes completed}}{\text{Time taken by the process}} = \frac{n}{t}$$

To increase CPU throughput cache memory is placed between the CPU and main memory.

54. The CPU clock speed refers to the number of:

- (a) CPUs it can have
- (b) RAMs it can have
- (c) clocks it can have
- (d) Number of cycles CPU executes per second

DSSSB Craft Instructor (ESM) 06.10.2019

Ans. (d) : CPU processes many instructions from different programs every second. The clock speed measures the number of cycles your CPU executes per second, measured in GHz.

55. The Celeron, Pentium and Core sequence formats are:

- (a) Computer RAM
- (b) Computer Microchip
- (c) Computer Processor
- (d) All of the above

RAS/RTS (Pre) G.S., 2013

Ans : (c) A processor is the logic circuit system that responds to commands and processes the basic instructions that drive the computer to produce desired results.

56. We express the speed of the computer in microseconds. Which of the following is equal to one microsecond?

- (a) 10^{-9} second (b) 10^{-3} second
- (c) 10^{-6} second (d) 10^{-2} second

UPPCL TG-II 20-03-2021 (Shift-I)

Ans. (c) : 1 microsecond = 1×10^{-6} second

57. MIPS is a computer performance measurement method for rate of instruction execution per unit time. What is its full form?

- (a) Master instruction per second
- (b) Memory instruction per second
- (c) Metric instruction per second
- (d) Million instruction per second

UPPCL Technical Grade-II (Shift- II) 27.03.2021

Ans. (d) : MIPS stands for Million instructions per second. MIPS is an approximate measure of a computer raw processing power. MIPS figures can be misleading because measurement techniques often differ, and different computers may require different sets of instructions to perform the same activity.

58. What is MFLOPS?

- (a) It is used to measure the state of the CPU.
- (b) It is used to measure the speed of CPU.
- (c) It is a memory unit.
- (d) It is used to measure memory access time.

UPPCL TG-II 19-03-2021 (Shift-I)

Ans. (b) : MFLOPS stands for Mega Floating Point Operation Per Second, MFLOPS are a common measure of the speed of computer used to perform floating point calculations. Another common measure of computer speed are power is MIPS (Million instructions per second), which indicates integer performance.

59. Which of the following statement is/are true?

(i) GFLOPS is smaller than TFLOPS

(ii) MFLOPS is greater than GFLOPS

- (a) Only (ii) (b) Only (i)
- (c) Neither (i) nor (ii) (d) (i) and (ii) both

UPPCL TG-II 19-03-2021 (Shift-II)

Ans. (b) : Processing Speed-Flops		
Name	Unit	Value
Kilo FLOPS	KFLOPS	10^3
Mega FLOPS	MFLOPS	10^6
Giga FLOPS	GFLOPS	10^9
Tera FLOPS	TFLOPS	10^{12}
Peta FLOPS	PFLOPS	10^{15}
Exa FLOPS	EFLOPS	10^{18}
Zetta FLOPS	ZFLOPS	10^{21}
Yotta FLOPS	YFLOPS	10^{24}

60. High power micro processors are-
 (a) Pentium, Pentium pro (b) Pentium II and III
 (c) Pentium II (d) All of these
(UPSSSC JE-2016)

Ans : (d) The Pentium pro is a sixth generation *86 microprocessor and it was introduced by Intel in 1995. After the Pentium pro-processor, Pentium II was developed by Intel in 1997. Pentium II is manufactured based on P6 Micro architecture and it is a sixth generation *86 compatible microprocessors.

Pentium II after the Pentium II the next version of the Pentium processors is Pentium III. This processor was developed by Intel in 1999.

61. Which of the following is not a part of CPU.
 (a) Memory Unit (b) Arithmetic Logic Unit
 (c) Control Unit (d) Input Unit
HSSC wireman Instructor -17.12.2019, Shift-I
Punjab Wireman instructor-07.07.2013
UKSSSC Tech. Electrical Instructor-21.11.2017

Ans : (d) Memory Unit, Arithmetic Logic Unit and Control Unit are part of Central Processing Unit (CPU) while input unit is input device.

62. "For computer, world consists of zeros and ones only. To store the zeros and ones,..... is placed inside a processor:
 (a) I/O device (b) Instruction set
 (c) Transistor (d) Main Memory
(UPPCL TG2 11-11-2016)

Ans : (c) For the computer the world is made of zero and one. To store these zero or one, a transistor is installed inside the processor. All the calculations in the computer are done through '0's and '1's only.

63. Which of the following is an example of a high speed microprocessor?
 (a) Pentium (b) CD ROM
 (c) Keyboard (d) Printer
RRB Gorakhpur L.P.-2008

Ans : (a) The Pentium is a widely used personal computer microprocessor from the Intel corporation. First offered in 1993, the Pentium quickly replaced Intel's 486 microchip of choice in manufacturing a personal computer. Microprocessor sold the under brand name Pentium.

64. Computer administration refers to the _____ units and their inter relationships that implement architectural specifications.
 (a) Dynamic (b) Navigational
 (c) Stationary (d) Operational
UPPCL Technical Grade-II-02.08.2015

Ans : (d) Computer management refers to the operational units and their relationship that implement architectural specifications.

65. ALU is a part of a computer is.....
 (a) Application (b) ROM
 (c) RAM (d) Processor
ARO Alld. HC, 14.12.2021, Shift-I
(SSC 10+2 CHSL 02.02.17, 1.15 pm)

Ans : (d) A Central Processing Unit (CPU), also called a Central Processor, main processor or just processor is the electronic circuitry that executes instructions comprising a computers program. The CPU performs basic arithmetic, logic, controlling and input/output operations specified by the instruction in the program. ALU and CU together are usually referred to as a processor.

66. ALU is the part of
 (a) CPU (b) CU
 (c) Memory (d) None of these
(UPPCL TG2 Re-exam 16-10-2016)

Ans : (a) An Arithmetic Logic Unit is the part of a Central Processing Unit that carries out arithmetic and logic operations on the operands in computer instruction words.

67. What is the full form of PGA graphics card?
 (a) Professional Graphics Array
 (b) Portal Graphic Array
 (c) Personal Graphics Array
 (d) Public Giga Array
WBPSIC Instructor-18.09.2021

Ans. (a) : PGA stands for Professional Graphics Adapter or Array. PGA is a video standard developed by IBM that supports up to 640*400 resolution.

68. Which of the following provides the slot to connect graphics cards?
 (a) RAM slot (b) AGP slot
 (c) USB port (d) PCI slot
HSSC wireman Instructor -17.12.2019, Shift-I

Ans. (b) : An Accelerated Graphics Port (AGP) is a point to point channel that is used for high speed video output. This port is used to connect graphics cards to a computers motherboard.

69. What is the full form of ULSI?
 (a) Unique-Large-Scale Integration
 (b) Ultra-Large-Scale Integration
 (c) Ultra-Light-Scale Integration
 (d) Unique-Light-Scale Integration
KPSC Instructor Electronic-25.06.2014

Ans. (b) : The full form of ULSI is Ultra - Large - Scale Integration. ULSI is the process of integrating or embedding millions of transistors on a single silicon semiconductor microchip.

70. The set of wires, connecting the microprocessor and the memory, through which the data flows is called:
 (a) memory (b) data wire
 (c) database (d) data bus
GSSSB Electronic Instructor-21.01.2014

Ans : (d) Data bus is a group of conducting wires which carries data only. Data bus is bidirectional because data flow in both directions from microprocessor to memory or input/output devices and from memory or input/output devices to microprocessor.

71. In multitasking situation, semaphore is used to solve _____ and _____.

- (a) Process synchronization problem, task scheduling
- (b) CPU memory synchronization, resolution of I/O deadlocks.
- (c) Important section problem, process synchronization
- (d) Solution of booting problem critical section problem.

UPPCL ARO-15.09.2018

Ans : (c) CPU in multitasking editing situation memory synchronization (CPU memory synchronization) I/O used to resolve deadlocks.

72. What is SATA and IDE?

- (a) Palmtops
- (b) Motherboard Manufacturer
- (c) Type of hard disk drive
- (d) Type of flash drive

KPSC Jr. Instructor- 09.07.2014

Ans : (c) SATA stands for Serial Advanced Technology Attachment. SATA is a computer bus interface or standard hardware interface which connected hard drives, SSD and CD/DVD drives to the computer. IDE stands for Integrated Drive Electronics. It is an interface standard for connection of storage devices such as HDD, SSD and CD/DVD drive to the computer.

73. Without _____ a system cannot operate.

- (a) Motherboard
- (b) Keyboard
- (c) Speakers
- (d) Mouse

RRB Kolkata LP-2009

Ans : (a) Motherboard is the printed circuit board installed in most of the electronic plants such as laptop computers etc. A computer is made up of components installed in the microprocessor, main memory and motherboard. Along with this some devices are attached to control storage, video display and sound. Therefore the system can not be operated without it.

74. In computing _____ is the term given to the texture and size of a motherboard.

- (a) Form factor
- (b) CPU
- (c) ALU
- (d) Term factor

DSSSB Craft Instructor (ESM) 06.10.2019

Ans : (a) Form factor is a hardware design aspect that defines and prescribes the size, shape and other physical specific specification of components, particularly in electronics. A form factor may represent a board class of similarly sized components or it may prescribe a specific standard.

75. Electronic Numerical Integrator and Computer (ENIAC) was first binary programmable computer based on ____.

- (a) Blaise Pascal's concept
- (b) Von Neumann's architecture

(c) Charles Babbage's architecture

(d) Turing's machine concept

KPSC Instructor Electronics Mech.20.07.2018

Ans. (b) : Electronic Numerical Integrator and Computer (ENIAC) was the first binary programmable computer based on Von Neumann's architecture. ENIAC was designed by John Mauchly and J. Presper Eckert. ENIAC was completed in 1945 and first put to work for practical purpose on December 10, 1945.

76. A microprocessor with 8-bit word length can process.....bits data simultaneously.

- (a) 4
- (b) 8
- (c) 16
- (d) 32

(RRB SSE (shift-II), 02.09.2015)

Ans : (b) Word length is determined by the width of the internal data bus, registers, and ALU, among other factors. At a time, an 8-bit CPU can process 8 bit of data. Depending on the type of microcomputer, the word length might range from 4 to 64 bits.

77. With respect to microprocessors, what is the full form of VLSI?

- (a) Varying Light-Scale Integration
- (b) Very Light-Scale Integration
- (c) Very Large-Scale Integration
- (d) Varying Large-Scale Integration

Punjab Wireman instructor-07.07.2013

Ans. (c) : With respect to microprocessors, the full form of VLSI is Very Large Scale Integration. It is a type of Integrated circuit (IC). In which many transistors are engaged.

78. From the following does the actual instruction execute during data processing?

- (a) Arithmetic logic unit
- (b) Information unit
- (c) Storage unit
- (d) Output unit

AHC ARO 2019 (Exam date 24.02.2019)

Ans. (a) : It is a main component of the Central Processing Unit. It performs arithmetic and logic operation, it has the ability to perform all processes related such as addition, subtraction, including Boolean comparisons. The actual instruction is executed during data processing

79. Which of the following basic operations is/are performed by a computer?

- (a) Arithmetic operation
- (b) Logical operation
- (c) Storage and retrieval
- (d) All of these

(UPPCL TG2 Re-exam 16-10-2016)

Ans : (d) The basic operation performed by a computer are arithmetic operation, storage and retrieved and logical operation. Basically computer does five basic operations that are input, output, storing, process and controlling.

Input & Output Devices

Input Devices

The devices through which data is inputted, that is the devices from which words, data or instructions are put in memory, are called input devices.

Following are some of the major input devices.

Mouse–

It is an input device, it is used in the computer to give instructions to the computer with the help of graphics. It was invented by Douglas Engelbart. It usually has two or three buttons. It has left button, right button and scroll wheel in the middle.

Keyboard–

Keyboard is the most important device of any computer. You can enter text or numerical data in the computer from the keyboard itself. In a keyboard, all the letters are arranged in the same order as in a typewriter but it has more buttons than a typewriter.

Trackball–

A trackball is a pointing device similar to a mouse, but it consists of a ball that is controlled by rotating the fingers to control the movement of the pointer. It neither needs a flat surface nor does it need to be moved around like a mouse.

Scanner–

The scanner is used to convert the image written or printed on the paper into digital form and store it in the memory/disc of the computer and for editing. There are three types of scanners available:

1. Flat Bed Scanner
2. Hand Held Scanner
3. Drum Scanner

Joystick–

Joystick is an input device. It is a pointing device. It moves in all directions. It is used in flight simulators, computer gaming systems. It consists of a stick, which rotates on a base and reports its angle and direction to the CPU.

Light Pen–

Light pen is an electro-optical pointing input device. It uses a photosensitive detector to select objects on the display screen.

Web Camera–

This is a digital camera, which is connected with the computer. Web camera are used for online videos conferencing and chatting.

Digitizer–

Digitizer is an input device that converts analog information into digital form. Digitizer is also known as graphics tablet. It is specially used for designing images, animations and graphics. It consists of a pen and a pad.

Microphone–

It is an input device that inputs sound, which is then stored in digital form.

Magnetic Ink Character Recognition (MICR)–

Examines MICR information in the form of a matrix. It is used in banks to identify the code number and the check number printed on the check with a magnetic ink.

Bar Code Reader (BCR)–

A bar code reader is an input device used to read bar codes (data in the form of light and dark lines) printed on a paper product.

Optical Character Reader (OCR)–

OCR is an input device. Its use converts the image of hand written and typed or printed text into digital form.

Optical Mark Reader (OMR)–

OMR is an input device which is used for recognize (select one among some options) symbols made by pen or pencil.

Output Devices

An output device is a device through which the result of the work done by the CPU (processor) is obtained in the form of output such as monitor, printer etc.

Monitor–

Monitor is an output device which displays the result of the input as output on the screen.

- (i) CRT Monitor (Cathode Ray Tube)
- (ii) Flat Panel Screen Monitor LCD (Liquid Crystal Display), LED (Light Emitting Diode) & TFT (Thin Film Transistor)

Printer–

Printer is an output device, it uses the results received from the computer as a output by printing on a paper.

- (i) **Impact Printer**– This printer paper, ribbon and character prints data together on all three.
- (ii) **Non-Impact Printer**– This printer is a noise free printer, it does not hit paper, but leaves the splash of the ink on paper. They use electrostatic chemicals.

Plotter–

This is an output device, which is used in large drawing or pictures such as construction plant Auto CAD. To make drawing, the pen, pencil, marker etc. Is the use of writing tool. It provides output such as graphs and sketches.

Speakers–

This is an output device that is connected to the computer and tells the sound as the output through the speaker.

Projector–

A projector is an output device that enables the user to project output into a large surface such as a large screen or a wall. It is connected to the computer and uses light and lens to show text, pictures, videos. It is used for presentation.

Speech Synthesizer–

Speech Synthesizer is an output device, by which text message is converted into voice message and received as output.

Important Questions Asked in Previous Years Examinations

1. An 'Optical Character Reader' is an example of:

- (a) control unit
- (b) input unit
- (c) arithmetic and logic unit
- (d) output unit

UKSSSC Tech. Electrical Instructor-21.11.2017

Ans. (b) : OCR stands for Optical Character Recognition. This is input device, OCR is the process that converts an image of text into a machine-readable text format. For example, if you seen a form or a receipt. Your computer saves the scan as an image file. You can't use a text editor to edit, search or count the words in the image file. However, you can use OCR to convert the image into a text document with its contents stored as text data.

2. A device that is connected to a computer but it is NOT part of the core computer architecture is known as

- (a) Processing Device
- (b) Memory Device
- (c) Peripheral Device
- (d) On-board Device

RRB Gorakhpur L.P.-2008

Ans: (c) Peripheral device is an auxiliary device used to put information into and get information out of a computer. The term peripheral device refers to all hardware components that are attached to a computer and are controlled by the computer system, but they are not the core components of the computer such as the CPU or power supply unit.

3. Which of the following input devices is used as a personal computer peripheral or general control device consisting of a hand - held stick that rotates around a loose and moves the screen cursor around rotates?

- (a) Microphone
- (b) MICR
- (c) Biometric
- (d) Joystick

DSSSB Craft Instructor (ESM) 06.10.2019

Ans. (d) : Joystick is an input device which works like a trackball. The ball has a stick attached to it that rotates on a base and reports its angle or direction to the CPU. It is used in video games, simulator training etc.

4. Which of the following types of mouse uses laser rays for cursor movement on the computer screen?

- (a) Optical
- (b) Electrical
- (c) Gyroscopic
- (d) Mechanical

MP Electrician Instructor 07.11.2016, Morning

Ans. (a) : Optical mouse uses a laser to detect the movement of the mouse. An optical mouse uses LEDs, optical sensor, and digital signal processing in place of traditional mouse ball and electromechanical transducers.

5. Which of the following mouse actions is commonly used to start a program or open a file?

- (a) Right click
- (b) Double Click
- (c) Left click
- (d) Drag and drop

WBPSCT Instructor-18.09.2021

Ans. (b) : Double click on mouse action is usually used to start a program or open a file.

6. Select the odd option.

- (a) Joystick
- (b) Printer
- (c) Keyboard
- (d) Mouse

HSSC wireman Instructor -17.12.2019, Shift-I

Ans. (b) : Input devices are hardware components or peripherals used to provide data and commands to a computer or electronic device. They allow users to input information, interact with software, and control the device's functions. Mouse, Keyboard and Joystick are input devices, while printer is output device.

7. All of the following are examples of various input devices, EXCEPT:

- (a) Speakers
- (b) Keyboard
- (c) Mouse
- (d) Optical Scanner

HSSC wireman Instructor -17.12.2019, Shift-II

RRB Kolkata LP-2012

Ans. (a) : Input devices are hardware components that allow users to enter data or commands into a computer. Some common input devices-:

- keyboard
- Touch Screen
- Joystick
- Mouse
- Scanner
- Barcode Reader

An output device is a hardware component that displays or provides information from a computer common examples include monitor, printer, speaker and headphone.

8. The two running programs coordinates to the I/O stream is called as ____.

- (a) Cache
- (b) Pipe
- (c) Buffer
- (d) Thread

RRB Kolkata LP-2009

Ans : (b) The two running programs coordinates to the I/O stream is called as pipe. Pipe is a method of which information is passed from one program process to another program process.

9. Which of the following statements regarding input devices of a computer is incorrect?

- (a) They convert input data into digital form.
- (b) Data entered through the keyboard are directly transferred to the Memory Data Register (MDR).
- (c) Mouse is an input device.
- (d) They are used to send data to the computer.

KPSC Jr. Instructor 22.11.2018w

Ans. (b) : An input device is a computer device that allows computer users to enter data into the system and send instructions to the system to perform tasks. Following are the input devices in a computer – Braille reader, GPS device, optical mark reader etc. Hence, option a, c, d is related to computer input device and option (b) is not correct.

10. Which of the following is an input device?

- (a) Optical character reader (b) Projector
(c) Headphones (d) Inkjet printer

(UPPCL TG-2 26.06.2016)

RRB Kolkata LP-2006

Ans. (a) : The main input and output devices of the computer are as follow:

Input Devices— Keyboard, Mouse, Trackball, Barcode reader, Optical Character Reader, Joystick, Scanner, Webcam, Touchpad etc.

Output Devices— Monitor, Printer, Projector, Plotter, LCD, Projection Panel, Headphone, Speaker etc.

11. Which device sends information to a computer system for processing?

- (a) Monitor (b) Printing
(c) Input (d) Output

UPPCL-JE 31-01-2019 (Batch -01)

RRB Ajmer-2004

Ans. (c): Input device sends data to computer system which is processed by processor and after processing, result is obtained with the help of output device.

12. The device that converts a physical image into a digital one is called:

- (a) Scanner (b) Image Converter
(c) Printer (d) Recorder

RRB Gorakhpur L.P.-2008

Ans. (a) : Scanner is an input device through which we scan the hard copy data and convert that into the digital form.

13. Which of the following is not an output device?

- (a) Printer (b) Plotter
(c) Scanner (d) Speaker

Punjab Wireman instructor-07.07.2013

Ans : (c) Devices that produce or display results after processing, are called output devices such as printers, plotters and speakers while scanner is an input device that is used to convert text or images into digital form.

14. Which of the following is not a part of input stage?

- (a) Data Capture
(b) Performance of Instructions
(c) Data Collection
(d) Encoding

UPPCL Technical Grade-II-09.08.2015

Ans. (b) : The process of input takes place in several stages like data capture, data encoding, data collection but display of instructions is not a part of input stage.

15. The Insert key on the keyboard of a computer system is used to toggle between the _____ and _____ modes during data entry.

- (a) insert, overwrite
(b) backspace, overwrite
(c) delete, insert
(d) delete, overwrite

Punjab Wireman instructor-07.07.2013

Ans. (a) : The Insert key is mainly used to switch between the two modes of entering text and to toggle between the Insert and Overwrite modes during data entry.

16. The default layout of most keyboards is called -

- (a) ALPHABET (b) QWERTY
(c) ASCII (d) IEEE

KPSC Instructor Electronic-25.06.2018

Ans. (b) : The default layout of most keyboards is QWERTY. It was first designed by shells and Glidden typewriter in 1868.

17. A device that allows you to take to a computer (such as a mouse or keyboard) is a/an _____ device.

- (a) Storage (b) Process
(c) Input (d) Output

GSSSB Electronic Instructor-21.01.2014

Ans. (c) : Input devices like keyboard, Mouse, Touchpad etc. are used to give instructions to the computer.

18. Which of the following is an Input device?

- (a) Joystick (b) Plotter
(c) Coder (d) Printer

UKSSSC Tech. Electrical Instructor-21.11.20178

Ans. (a) : Joystick is an input device which works like a trackball. A stick is attached to the ball through, which it is rotated. It is used in video games, simulator training etc.

19. Which among the following input devices consists of a stick which pivots on a base and reports its angle or direction of the CPU?

- (a) Microphone (b) Light pen
(c) Keyboard (d) Joystick

UPPCL JE 2019 (Batch-02)

Ans. (d): Joystick is an input device consists of a stick which pivots on a base and reports its angle or direction of the CPU.

20. Light pen and Joystick are _____.

- (a) storage devices (b) input devices
(c) algorithms (d) output devices

HSSC wireman Instructor -17.12.2019, Shift-I

Ans. (b): Devices through which we give instructions to the computer are called as input devices. For example- Light pen, Joystick, Mouse, Keyboard etc.

21. Which of the given options is odd?

- (a) Trackball (b) Keyboard
(c) Antivirus (d) Mouse

UPPCL TG-II 25-01-2019 (Morning)

Ans : (c) Trackball, Keyboard and Mouse all these are hardware devices whereas antivirus is software.

22. A mouse, trackball and joystick are examples of

- (a) pointing devices
(b) pen input devices
(c) data collection devices
(d) multimedia devices

(UPPCL TG-2 26.06.2016)

UPPCL-JE 31-01-2019 (Batch -01)

Ans: (a) Mouse is a small hand held pointing device that basically control the two-dimensional movement of the cursor of the display screen pointing devices are the input devices that are generally used for moving the cursor to a particular location to point an object on the screen.

Some of the commonly used pointing devices are: Mouse, trackball, Light pen, Joystick, Touch screen. A pointing device is a human interface device that allows a user to input spatial data to a computer.

23. Touchpad is a good alternative to the mouse, it is an example of

- (a) Software device (b) Printing device
(c) Pointing device (d) Temporary device

(UPPCL TG2 11-11-2016)

Ans : (c) Touchpad is an input device, with the help of which we give instructions to our system just by touching the screen.

24. Which of the following statements is wrong?

- (i) The cordless mouse is not physically connected to the computer.
(ii) The cordless mouse relies on infrared or radio waves to communicate with the computer.
(a) Only (ii) (b) Both (i) and (ii)
(c) Neither (i) nor (ii) (d) Only (i)

UPPCL (TG-II) 24-01-2019 (EVENING)

Ans : (c) Cordless mouse is an input device used in computer. It is very modern mouse which does not require cable to connect. In this, infrared or radio waves are needed for transmission.

25. The technology of scanning that recognized handwritten text and printed text is

- (a) MICR (b) OMR
(c) OCR (d) BCR

UPPCL-JE 31-01-2019 (Batch -01)

Ans: (c) OCR (Optical Character Recognition) is a technology of scanning that recognizes handwritten text and printed text.

26. The technology of scanning that reads the check boxes contained inside a predefined space is

- (a) BCR (b) OCR
(c) OMR (d) MICR

UPPCL JE 2019 (Batch-02)

Ans: (c) Optical Mark Recognition (OMR) is a method of entering data into a computer system, which reads the check box in the predefined position.

27. For reading a candidate's choice in multiple choice questions which of the following input devices is generally used?

- (a) Magnetic Ink Card Reader
(b) Optical Character Reader
(c) Optical Mark Reader
(d) Bar Code Reader

UPPCL JE 2019 (Batch-01)

Ans: (c) Optical Mark Reader is an input device, which is used to read a candidate's choice in multiple choice questions.

28. Which of the following options of mouse properties is used to swap the functions of the right and left mouse buttons?

- (a) Pointer Options
(b) ClickLock
(c) Double-click speed
(d) Button configuration

KPSC Jr. Instructor 22.11.2018w

Ans. (d) : Button configuration option of mouse properties is used to swap the functions of the right and left mouse buttons, whereas pointer options change the pointer shape, ClickLock enables you to highlight or drag items without holding down the mouse button.

29. Which of the following statement(s) is/are true about changing mouse properties in Windows 10?

- (i) The function of the left button of the mouse cannot be changed.
(ii) The size of the mouse pointer can be changed.
(a) Only (ii) (b) Neither (i) nor (ii)
(c) Both (i) and (ii) (d) Only (i)

HSSC wireman Instructor -17.12.2019, Shift-II

Ans. (a) : To change the mouse properties in Windows 10, the function of the left mouse button can be changed and the size of the mouse pointer can also be changed, hence the given statement (ii) is true.

30. Which of the following statement is/are correct about changing mouse properties in windows 10.

- (i) The cursor speed of the mouse cannot be changed.
(ii) It is possible to change the function of the left mouse button to open the context menu.
(a) Both (i) and (ii) (b) Only (i)
(c) Only (ii) (d) Neither (i) Nor (ii)

UKSSSC Tech. Electrical Instructor-21.11.2017

Ans. (c) : Statement (i) is incorrect with respect to mouse properties in windows 10 because in this we can change the speed of the mouse cursor as per our requirement. Statement (ii) is true, can change the function of the left mouse button to open the context menu.

31. The Click Lock property of the mouse -

- (a) None of these
(b) Allows to prevent items from getting clicked
(c) Allows to set password for items
(d) Allows to drag without holding mouse button

**MP Electrician Instructor 07.11.2016, Morning
WBPSC Instructor-18.09.2021**

Ans : (d) The 'ClickLock' property of the mouse, enables a user to lock down the primary mouse button after a single click. This allows you to highlight or drag without holding down the primary mouse button.

32. Microphone is a/an _____ device, which receives sound as input.
- Signal Digitizing
 - Audio signal collection
 - Audio signal processing
 - Input

RRB Gorakhpur L.P.-2008

Ans : (d) A microphone is an input device. It converts sound waves into electrical signals that can be processed and recorded by a computer or other electronic devices.

33. Which input device converts analog information into digital form and can be used for doing fine works of drawing and image manipulation?
- Microphone
 - Bar Code Reader
 - Digitizer
 - Graphic Plotter

UPPCL JE 2019 (Batch-02)

Ans: (c) A digitizer is an input device or technology used to convert analog information, such as drawings, hand written notes, images into digital format that a computer can understand and manipulate. It is commonly used in graphic design, art and industries where precise input or capturing of analog data is needed.

34. Which of the following is not an input device?
- Track Ball
 - Plotter
 - Light Pen
 - Magnetic Scanner

DSSSB Craft Instructor (ESM) 06.10.2019

Ans : (b) Track ball, Light pen and magnetic scanner, all are input devices, while plotter is output device.

35. A keyboard is used
- to enter text and numbers and send commands to the computer
 - to create new keys to use with your computer
 - to open the computer
 - for all of these

(UPPCL TG2 Re-exam 16-10-2016)

Ans : (a) Keyboard is an input device. Keyboard is used to enter data in the computer. Shortcut Keys are used to give commands to the computer. The main button of the Keyboard are as bellow-

- Numeric buttons (A-Z, 0-9)
- Function button
- Cursor button
- Special button

36. Which of the following is a toggle key on a keyboard?

- Alt
- Shift
- Scroll lock
- Ctrl

UPPCL Technical Grade-II (Shift- II) 27.03.2021

Ans. (c) : Toggle 'Key' is used to turn a function off or on or to switch between two functions. There are three toggle keys in the keyboard.

- Num Lock
- Caps Lock
- Scroll Lock

Toggle key can also be turned on/off as per requirement.

37. Parallel ports usually are not used to connect _____.
- Modem
 - Scanner
 - Printer
 - CD Writer

UKSSSC Tech. Electrical Instructor-21.11.2017

Ans. (a) : Printers, Scanners, CD writers, etc. are usually connected to parallel ports while modems are connected to serial ports.

38. A combination of the keyboard and the visual display unit is called a _____.
- mouse
 - port
 - terminal
 - cable

**GSSSB Supervisor Electronic Instructor 18.01.2014
KPSC Instructor Electronics Mech.20.07.2018**

Ans : (c) A computer terminal is an electronic or electromechanical hardware device used to display or print data in a computer, a computer terminal including a keyboard and VDU are attached to each other.

39. QWERTY keyboard design was originally intended to
- Make typing harder and inefficient
 - Improve the typing accuracy
 - Make typing more efficient
 - Improve the typing speed

UPPCL JE 2019 (Batch-01)

Ans: (a) QWERTY was originally created to make typing difficult and inefficient. It was designed in 1868 by type writer inventor Christopher Shields.

40. QWERTY refers to:
- Arrangement of hardware parts of a standard computer or mobile devices
 - Arrangement of keys on a standard English computer keyboard or typewriter
 - Arrangement of only function keys on a standard English computer keyboard
 - Arrangement of only numeric keys on a standard English computer keyboard

UPPCL JE 31-01-2019 (Batch-02)

Ans: (b) QWERTY refers to arrangement of keys on a standard English computer keyboard or typewriter.

41. The wildcard character for matching any number of characters is
- Hyphen Sign
 - Ampersand Sign
 - Asterisk Sign
 - Dollar Sign

WBPS Instructor-18.09.2021

Ans : (c) Asterisk is a little star symbol which matches letters. It is located on numeric key 8 of keyboard which matches any number of characters.

42. Shift key and Print Screen key in a computer keyboard are known as
- Special purpose keys
 - Standard keys
 - Navigation keys
 - Function keys

UPPCL JE 2019 (Batch-01)

Ans: (a) In computer keyboard, shift and print screen keys are called special purpose keys.

43. Which key deletes the character to the left of the cursor?

- (a) End (b) Backspace
(c) Home (d) Delete

(UPPCL TG-2 26.06.2016)

(UPPCL TG-2 Re-exam 16-10-2016)

Ans : (b)

Backspace - Deletes the character to the left of the cursor.
Delete - Deletes the character to the right of the cursor.
Home - The home key brings cursor to the beginning of the line.
End - The end key brings cursor to the end of the line

44. The arrow keys, Home Key, End Key, Page Up and Page Down keys in a computer keyboard are classified as

- (a) Function keys (b) Special purpose keys
(c) Standard keys (d) Navigation keys

UPPCL JE 2019 (Batch-02)

Ans: (d) In computer keyboard, the arrow keys, home key, end key, page up and page down keys are kept in the category of navigation keys.

45. Ctrl, Shift and Alt are called

- (a) Adjustment keys (b) Function keys
(c) Modifier keys (d) Alphanumeric keys

(UPPCL TG-2 26.06.2016)

Ans : (c)

Function key : F₁.....F₁₂
Alphanumeric key : A.....Z, 0.....9
Modifier key : Ctrl, Alt, Shift
Adjustment key : Function key, Arrow key and as such keys by which brightness etc, are adjusted.

46. Which of the following keys work in a toggle mode in a computer keyboard?

- (a) Shift (b) Caps lock
(c) Enter (d) Ctrl

UPPCL TG-II 27-03-2021 (Shift-II)

Ans. (b) : The most commonly used toggle key is the caps lock key which alternates letters between upper case and lower case.

47. A computer keyboard generally has _____ function keys.

- (a) 11 (b) 10
(c) 16 (d) 12

UPPCL (TG-II) 24-01-2019 (Morning)

Ans : (d) The function keys or F keys are line up at the top of the keyboard and label F₁ to F₁₂. These keys act as shortcuts performing certain functions such as saving a file, printing data or refreshing a page. The number of function 'keys' is 12.

48. Which of the following is not an option in the buttons tab at the bottom of the mouse properties window of the control panel in windows 10 OS?

- (a) Clicklock
(b) Button configuration
(c) Single Click speed
(d) Double-click speed

HSSC wireman Instructor -17.12.2019, Shift-II

Ans. (c) : In windows 10 OS clicklock, buttons configuration and double click speed are found in the buttons tab under the mouse properties window of the control panel whereas single click speed is not an option available.

49. The blinking symbol on the computer screen is called

- (a) Mouse (b) hand
(c) cursor (d) logo

(UPPCL TG2 Re-exam 16-10-2016)

Ans : (c) The blinking symbol on the computer screen is called the cursor, it shows the current position, where word will typed.

50. Which of the following is used to read hand written or printed text to make a digital image that is stored in memory?

- (a) Printer (b) Laser beam
(c) Scanner (d) Touchpad

(UPPCL TG-2 26.06.2016)

Ans : (c) A scanner is a device that alternatively scans an image, printed text, hand writing or an object and converts them into a digital image and stores it in memory.

51. Which of the following is a direct input device wherein data is inputted into the computer directly by a machine or device?

- (a) Touch screen (b) Barcode scanner
(c) Microphone (d) Webcam

RRB Kolkata LP-2009

MP Electrician Instructor 07.11.2016, Morning

Ans. (b) : A barcode reader or barcode scanner is an optical scanner that can read printed barcodes, decode the data contained in the barcode to a computer.

52. Which of the following devices is used to print very large drawings or complex line art by mechanical movement of a pen or other instrument across the surface of a piece of paper?

- (a) Line Printer (b) Inkjet Printer
(c) Scanner (d) Plotter

UPSSSC JE 2018 (Exam date 16.04.2022)

Ans. (d) : Plotter is used to print very large drawings or complex line art by mechanical movement of a pen or other instrument across the surface of a piece of paper this plotters pen work on X axis and paper wrapped on the drum is moved horizontally along the X axis.

53. Which of the following scanners looks similar to a photocopier machine and it consists of a box containing a glass plate on its top and a lid that covers the glass plate?
- (a) Laser (b) Flatbed
(c) Inkjet (d) Dot matrix

UPPCL JE 31-01-2019 (Batch-02)

Ans: (b) Flatbed scanner looks like to a photocopier machine and it consists of a box containing a glass plate on its top and a lid that covers the glass plate the lid of flatbed scanners is adjustable that makes the scanning of different object such as documents and leaflets possible.

54. MICR Scanner ——— is an example of.
- (a) Control Unit (b) Input Unit
(c) Output Unit (d) Secondary Memory

KPSC Jr. Instructor 22.11.2018w

Punjab Wireman instructor-07.07.2013

Ans. (b) : Magnetic Ink Character Recognition (MICR) is an input device. It is commonly used in banks as a large number of cheques are processed every day. The bank's code number are cheque and number printed on the cheque with a special type of ink which particles are magnetic material which are machine readable.

55. Which of the following is not an output device ?
- (a) Plotter
(b) Speech synthesizer
(c) MICR
(d) Smart and intelligent terminal

HSSC wireman Instructor -17.12.2019, Shift-II

Ans. (c) : Plotter, Speech synthesizer and Smart intelligent terminal are output devices, whereas Magnetic Ink Character Recognition is an input device.

56. Which of the following types of scanner reads characters, marks and codes with the help of a light source and they are used for objective type answer papers in competitive examinations?
- (a) Optical Character Recognition
(b) Optical Mark Recognition
(c) Optical Barcode Recognition
(d) Magnetic Ink Character Recognition

UPSSSC JE 2018 (Exam date 16.04.2022)

(UPPCL TG-2 26.06.2016)

Ans. (b) : Optical Mark Recognition Scanner reads alphabets, numbers and codes with the help of light source and is used for objective type answer sheets in competitive examination.

57. _____ is a technology used by banking or other finance industries for faster processing of cheques.
- (a) OCR (b) OMR
(c) MICR (d) ISBN

(UPPCL TG-2 26.06.2016)

Ans : (c) MICR (Magnetic Ink Character Recognition) is a technology used by banking or other finance industries for faster processing of cheques.

58. The panels used in ATM machines, safe Checking Kiosks at Airports etc are examples of _____
- (a) Laser pens (b) Analog display units
(c) Touch panels (d) Projectors

UPPCL Technical Grade-II (Shift-II) 20.03.2021

Ans : (c) Touch panels is a pointing device that enables user to enter data such as text, picture, image, directly touching the screen and interact with computer system. It is used in a variety of applications such as cell phones, PDA's ATMs and games.

59. Match the following:

- | | |
|-------------------------|---------------------|
| 1. Software | A. Light pen |
| 2. Input device | B. Speaker |
| 3. Output device | C. Secondary memory |
| 4. SSD | D. Set of program |
| (a) 1- D, 2-A, 3-B, 4-C | |
| (b) 1-D, 2-C, 3-B, 4-A | |
| (c) 1-A, 2-D, 3-B, 4-C | |
| (d) 1-D, 2-A, 3-C, 4-B | |

GSSSB Electronic Instructor-21.01.2014

Ans. : (a) Matched options are as follows:

1.	Software	D	Set of program
2.	Input device	A	Light pen
3.	Output device	B	Speaker
4.	SSD	C	Secondary memory

S.N.	Main Output Device
1.	Monitor
2.	Printer
3.	Speaker
4.	Plotter
5.	Screen Image Projector

60. Which of the following statements is incorrect with reference to the visual display unit (VDU) of a computer system?

- (a) VDU creates images by arranging tiny dots known as pixels, in a rectangular pattern
(b) VDU is the primary output device of a computer
(c) VDU has differences between cathode-ray tube and flat-panel display
(d) The size of the pixel determines the clarity of the image displayed on the VDU

HSSC wireman Instructor -17.12.2019, Shift-II

Ans. (d) : The size of the pixel determines the clarity of the image displayed on the VDU.

61. Which of the following statements is correct about the output devices of a computer?

- (a) It is used to send data to the computer
(b) Mouse is an output device
(c) It converts digital data into a form understandable by humans
(d) It converts data into digital form

Punjab Wireman instructor-07.07.2013

Ans. (c) : Output devices are hardware components of a computer system that displays or presents information to the user or another machine. They convert digital data generated by computer into human - readable or machine readable form. Ex- Monitors, Printers, Speakers, Projectors, Headphones etc. Mouse is an input device. So, option (c) is correct.

62. Which of the following statements is incorrect regarding computer output devices?

- (a) It converts digital data into a form that is human understanding
- (b) It converts data into digital form
- (c) It receives data from the computer system for display
- (d) Printer is an output device

KPSC Instructor Electronic-25.06.2014

GSSSB Electronic Instructor-21.01.2014

UKSSSC Tech. Electrical Instructor-21.11.2017

Ans. (b) : Output device is a component of computer system which displays data or instructions as result after processing. Example - Monitor, Printer, Speaker, Plotter video card. It converts digital data into a form that is human understandable.

63. Which of the following is NOT a type of printer?

- (a) Drum
- (b) Daisy wheel
- (c) Laser
- (d) Switch

UPPCL Technical Grade-II (Shift-I) 19.03.2021

Ans. (d) : Drum, daisy wheel and laser printers are types of printers by which the result is obtained from computer in the form of hardcopy whereas switch is a network device that is used to segment the networks in to different subnet works called subnets or LAN segments.

64. Which of the following printers prints characters by striking a pin on an ink-ribbon?

- (a) Dot matrix
- (b) LED
- (c) Laser
- (d) Inkjet

RRB Kolkata LP-2009

Ans. (a) : Dot matrix printer is an impact printer which print character using a fixed number of pin or wires.

65. A/An _____ is an output device that produces high quality graphics using an ink pen.

- (a) Dot Matrix Printer
- (b) Plotter
- (c) VDU
- (d) Inkjet Printer

UPPCL (TG-II) 24-01-2019 (EVENING)

Ans : (b) Plotter is an output device that is used to print high quality graphics and image. It uses one or more pens to produce a high quality drawing.

66. Which output device draws pictures on a paper based on the commands given from a computer using a pen?

- (a) Scanner
- (b) Monitor
- (c) Inkjet printer
- (d) Drum plotter

UPPCL-JE 31-01-2019 (Batch -01)

Ans: (d) Drum plotter is a graphic output device that draws lines or image with a continuously moving pen on a sheet of paper rolled around a rotating drum that moves the paper in a direction perpendicular to the

motion of the pen. The plotters are divided into the following four categories on the basis of their working Drum plotter, Flatbed, Inkjet and Electrostatic etc.

67. There are two types of plotters, whose name are—

- (a) spiral and flatbed
- (b) flatbed and cone
- (c) drum and flatbed
- (d) drum and spiral

DSSSB Craft Instructor (ESM) 06.10.2019

MP Electrician Instructor 07.11.2016, Morning

Ans: (c) Plotter is a computer printer which is used to vector graphics. Mainly three types of plotters are:-

(i) Drum (ii) Flatbed (iii) Inkjet.

68. Which of the following is NOT a type of monitor?

- (a) TFT Monitor
- (b) High-Definition Multimedia Interface (HDMI)
- (c) LCD Monitor
- (d) CRT Monitor

WBPSB Instructor-18.09.2021

Ans : (b) TFT, LCD and CRT are types of monitor whereas High Definition Multimedia Interface (HDMI) is the most frequently used HD signal for transferring both high definition audio and video over signal cable.

69. Which of the following monitors is made of thick glass vacuum tube, a result of which is a smoothed screen with a coating of phosphorus on the inner surface?

- (a) Plasma
- (b) LED
- (c) CRT
- (d) LCD

HSSC wireman Instructor -17.12.2019, Shift-I

Ans. (c) : CRT is short form of Cathode Ray Tube. It is a traditional monitor made of thick glass vacuum tube. There is a coding of phosphorus on the inner surface of every CRT, which makes the monitor screen smooth.

70. Computer Display is also called

- (a) Multimedia Monitor Terminals (MMT)
- (b) Cathode Ray Tube (CRT)
- (c) Video Display Terminal (VDT)
- (d) Video Distribution Units (VDU)

UPPCL JE 31-01-2019 (Batch-02)

Ans: (c) A computer display or monitor is an electronic output device that is also known as Video Display Terminal (VDT) or a Video Display Unit (VDU). It is used to display image, text, Video and graphics information.

71. Computer monitor is also called VDU. What does VDU mean?

- (a) Vertical Dialysis Unit
- (b) Video Dialysis Unit
- (c) Vertical Display Unit
- (d) Video Display Unit

UPPCL (TG-II) 24-01-2019 (EVENING)

Ans : (d) VDU means Video Display Unit, it is a computer display or monitor that is used to display image, text, video and graphics information.

72. Computer monitor is also known as-

- (a) Video Display Unit
- (b) Vertical Dialysis Unit
- (c) Vertical Display Unit
- (d) Video Dialysis Unit

KPSC Jr. Instructor 22.11.2018w

Ans. (a) : VDU stands for "Visual Display Unit" or "Video Display Unit", it is also called monitor or screen. VDU displays images generated by a computer or other device.

73. An image is composed of

- (a) Pels
- (b) Pexels
- (c) Dots
- (d) All of these

KPSC Instructor Electronic-25.06.2014

Ans. (d) : An image is composed of pels, pixel and dots.

- Pixel is the smallest element of an image. It is also known as PELs.
- Dots are light receptor called photodiode.
1 Dot = 1 Pixel

74. Which of the given options best describes the truthfulness of the following statements?

- (i) In 1-bit images, each pixel is stored as a single byte.
 - (ii) A 1-bit image with resolution 640×480 needs a storage space of 640 + 480 bits.
- (a) (i) - False, (ii) - True
 - (b) (i) - True, (ii) - False
 - (c) (i) - True, (ii) - True
 - (d) (i) - False, (ii) - False

GSSSB Electronic Instructor-21.01.2014

Ans. (d) : In 1-bit images, each pixel is stored as a single bit i.e 0 or 1.

For 1 bit images with 640×480 resolution

$$\frac{640 \times 480}{8 \times 1024} = 37.5 \text{ KB of space will be required.}$$

Hence the above statement is false.

75. The default screen on the monitor when no other application is running is called

- (a) Login Screen
- (b) Interface
- (c) Desktop
- (d) Screensaver

UKSSSC Tech. Electrical Instructor-21.11.2017

Ans. (c) : When no other application is running on the monitor, it is called the home screen of the computer i.e. desktop.

The login screen is the screen of the web pages accessed by the user on which the user is signed in. In computing, an interface is the extent to which two parts of a computer system are in contact. User interface works between the computers and the human.

A screen saver is an animated picture that is automatically activated on a personal computer when no user activity is felt for a specific amount of time.

76. Computer output microfilm technology is used to record computer _____ film images.

- (a) Macroscopic
- (b) Bioscope
- (c) Microscopic
- (d) Laparoscopic

GSSSB Supervisor Electronic Instructor 18.01.2014

Ans : (c) Computer output microfilm technology is used to record computer microscopic film images.

77. Unit(s) used for measuring speed of printer is/are?

- A. CPM
 - B. RPM
 - C. PPM
- (a) Only A
 - (b) Only B
 - (c) Only C
 - (d) Both A & C

(UPPCL TG2 11-11-2016)

Ans : (d) The unit for measuring the speed of a printer is CPM and PPM, whereas RPM is the unit to measure the speed of a machine.

78. Printing speed of laser printers is measured in

- (a) Lines per page
- (b) Characters per hour
- (c) Characters per line
- (d) Pages per minute

UPPCL JE 2019 (Batch-02)

Ans: (d) The unit of measurement for the printing speed of a laser printer is Pages Per Minutes (PPM).

79. Which of the following options best describes the truth of the given statements?

- (i) Inkjet printers print by spraying droplets of ink on the paper.
 - (ii) Laser printer fuses ink onto paper with the help of heat.
- (a) (i) true (ii) true
 - (b) (i) true (ii) false
 - (c) (i) false (ii) false
 - (d) (i) false (ii) true

KPSC Instructor Electronics Mech.20.07.2018

Ans. (a) : Both of the above options are correct. Ink jet printers spray liquid ink onto paper with small, precise droplets. Ink housed in replaceable or refillable cartridges most of which include a print head consisting of thousands of tiny nozzles through which ink is sprayed and which are arranged together.

Laser printer is an electrostatic digital printing process. It produces high quality text and graphics by repeatedly passing a laser beam over a negative charged cylinder called a "drum" to define the differently charged image.

80. Which of the following devices is capable of producing large-format drawings like graphs and construction drawings?

- (a) Laser printer
- (b) Flat-bed printer
- (c) Inkjet printer
- (d) Dot matrix printer

GSSSB Electronic Instructor-22.01.2017

Ans : (b) A flat-bed printer is a device capable of producing large-format drawings such as graphs and construction drawings. It usually prints digital images on plastic or paperboard.

81. How does a laser printers print?

- (a) Line by Line
- (b) Pixel by Pixel
- (c) Page by Page
- (d) Character by Character

UPPCL-JE 31-01-2019 (Batch -01)

Ans: (c) Laser printer is a non-impact printer which prints page by page. It produces images with the help of a laser beam.

82. A _____ printer creates an image directly on paper by spraying ink through up to 64 small nozzles.

- (a) Daisy Wheels (b) Laser
(c) Inkjet (d) Dot Matrix

KPSC Jr. Instructor- 09.07.2014

Ans : (c) An inkjet printer creates an image directly on paper by spraying ink through up to 64 small nozzles. Inkjet printer offers a resolution of 300 dots per inch and produces high quality printouts such as graphics and image.

83. Select an incompatible device from the following options.

- (a) Scanner (b) Keyboard
(c) Webcam (d) Printer

RRB Bengaluru LP-2004

Ans : (d) Among the given options scanner, keyboard and webcam are input devices whereas printer is an output device.

84. Which one of the given options is different from the rest?

- (a) Laser Printer (b) Dot matrix printer
(c) Thermal printer (d) Inkjet printer

UPPCL TG-II 25-01-2019 (Evening)

Ans : (b) Printer is an output device, which prints the information received from the computer on paper. Printers are divided into two parts on the basis of printing, impact printers and non-impact printers. Here, dot matrix paper is an impact printer while the rest are non-impact printer.

85. Which of the following printers can use continuous paper instead of single sheet?

- (a) Inkjet printer
(b) Dot matrix printer
(c) Both Inkjet and Laser printer
(d) Laser printer

UPPCL TG-II 25-01-2019 (Evening)

Ans : (b) The print head of a dot matrix printer consists of a matrix of many pins and each pin prints a dot by touching the ribbon and paper, in this printer a continuous roll of paper takes place without applying a single sheet and this type of continuous printers are installed in bank or ticket machine or ATM etc.

86. _____ printers create text and graphics on paper without actually striking the paper.

- (a) Dot matrix (b) Daisy wheel
(c) Impact (d) Non-impact

UPPCL (TG-II) 24-01-2019 (EVENING)

Ans : (d) Non-impact printer is a type of printer it create text and graphics on paper without actually striking the paper.

87. Laser printers use _____

- (a) No toner, as they use heat sensitive paper
(b) Powdered toner in a cartridge
(c) Ribbon toner
(d) Liquid toner

MP Electrician Instructor 07.11.2016, Morning

Ans : (b) The laser printer was invented in 1969 by Gary Starkweather. Laser printers use powdered toner in the Cartridge.

88. Which type of printers uses light to produce the dots needed to form the characters to be printed on a page?

- (a) Line Printers (b) Chain Printers
(c) Laser Printers (d) Dot Matrix Printers

UPPCL-JE 31-01-2019 (Batch -01)

Ans: (c) Laser printers uses light to produce the dots needed to form the characters to be printed on a paper.

89. Which of the following printers is non-impact type?

- (a) Daisy Wheel Printer (b) Laser Printer
(c) Dot Matrix Printer (d) Line Printer

WBPSK Instructor-18.09.2021

Ans : (b) Laser Printer is an electrostatic digital printing process. It prints high quality text and graphics. This type of printer is non-impact type printer.

90. Which of the following is behind the computer case?

- (a) DVD Drive (b) Floppy Drive
(c) Zip Drive (d) Parallel or printer port

HSSC Electrician Instructor -17.12.2019

Ans : (d) The printer port is also called the parallel port which is used by the printer. The printer port is always present behind the computer casing.

91. Which of the following is output device?

- (a) Scanner (b) LCD projector
(c) Mouse (d) Light pen

Punjab Wireman instructor-07.07.2013

Ans : (b) LCD projector is an output device whereas scanner, mouse and light pen are input devices.

S.No.	Input Device
1	Keyboard
2	Mouse
3	Track ball
4	Joystick
5	Scanner
6	Microphone
7	Webcam
8	Barcode Reader
9	OCR (Optical Character Reader)
10	MICR (Magnetic Ink Character Reader)
11	OMR (Optical Mark Reader)
12	Kimball Tag Reader
13	Speech Recognition System
14	Light Pen
15	Touch Screen

3.

Storage Devices (Memory)

Memory/Storage Device

The function of computer memory/storage device is to store any instruction, information or result.
Computer memory has the following types.

Basically, computer memory are two types.

1. Primary or Main Memory
2. Secondary Memory

1. **Primary or Main Memory**– Primary memory is the memory that is directly accessed by the CPU. In this the data can't be stored for a long time as desired by the user, it is also known as internal memory. It contains the currently running data or instructions. There are two types of primary memory.
 - i. RAM (Random Access Memory)
 - ii. ROM (Read Only Memory)
- i. **RAM (Random Access Memory)**– RAM is a temporary memory, which means the memory that holds only those data or instructions for some time on which the computer is currently working.

Types of RAM Memory

- (a) SRAM (Static RAM)
- (b) DRAM (Dynamic RAM)

- ii. **ROM (Read Only Memory)**– The full name of ROM is Read Only Memory. Which means that memory can only be read but no data store. Data in this memory is only a single store. Again it can not delete or store it.

Types of ROM Memory :

- (a) PROM (Programmable Read Only Memory)
- (c) EPROM (Erasable Programmable Read Only Memory)
- (a) EEPROM (Electrically Erasable Programmable Read Only Memory)

2. **Secondary Memory**– The secondary memory is also known as external memory or Auxiliary storage. We can keep the data from the secondary memory to keep it for a long time. Before closing the computer the data can be placed permanently in secondary memory.

Magnetic Tape–

Magnetic tape is made up of a thin and long plastic strip. The magnetic layer which is climbed and the data is saved on that layer. This is a gradual access memory. Whose data can be read only by order. In this the data can be stored more than once upon the data store the old data ends itself.

Magnetic Disk–

Magnetic Disk is a secondary storage device, which is used to store data, Access data. This is a permanent (non-volatile) and assistant. Secondary storage device, which stores data and program longer.

Hard Disk Drive (HDD)–

Hard disk this magnetic disk is a main component of the personal computer. It is known as hand drive or hand disk drive. It is a permanent (non-volatile) and auxiliary, secondary storage device, which store data and programs for a long time.

Floppy Disk–

Floppy disk is a magnetic storage used to read and write data in Floppy disk. Earlier it was used to store the operating system.

Optical Disc–

Optical disc is a type of direct access secondary memory. Optical disc are made of polycarbonate plastic and they used laser beams to store or read data. It is usually flat and rounded.

Some example in below.

- (i) CD (Compact Disc)
- (ii) DVD (Digital Versatile Disc)
- (iii) Blue-Ray Disc

Pen Drive–

Pen drive is also called thumb drive, flash drive or USB drive. Pen drive is an example of EEPROM (Electrically Erasable Programmable Read Only Memory)

Memory Card–

Memory card is a device that provides a fast and easy way to store and transfer digital files. It is small card like- electronic memory device of a thin size, which is used to another modern devices such as mobile phones digital cameras, PDA, Palmtops, Smartphone's etc. It is also called multimedia card. Its use is becoming popular as Removable Storage Device.

Solid State Drive (SSD)–

SSD is a type of secondary storage. It is faster and more expensive than HDD. Flash Memory has been used in this. With its use, the speed of the computer increases slightly. Like HDD, you can also store data in it for a long time as desired.

Primary Memory and Secondary Memory

Primary Memory	Secondary Memory
1. Primary memory is temporary	1. Secondary memory is permanent.
2. Primary memory is directly accessible by processor/CPU	2. Secondary memory is not directly accessible by the CPU.
3. Nature of parts of primary memory varies, RAM - volatile in nature, ROM - Non- volatile in nature	3. It is always Non-volatile in nature.
4. The memory devices used for primary memory are semi-conductor memories.	4. The secondary memory devices are magnetic and optical memories.
5. Primary memory is also known as main memory or internal memory.	5. Secondary memory is also known as external memory or Auxiliary memory.
6. Examples - RAM, ROM, Cache memory, PROM, EPROM, Registers etc.	6. Examples - Hard Disk, Floppy Disk, magnetic, Tapes etc.

Memory Hierarchy

Memory	Access Time	Storage Capacity
ROM	1 μ Sec	4 to 8 MB
Register	1-2 ns	200 Byte
Cache Memory	3-10 ns	32 KB to 4 MB
RAM	11-60ns	16 MB to 4 GB
Magnetic Disk	10-50ms	160 GB to 1600 GB
Optical Disk	100-200 ms	700 MB to 60 GB

Memory Units or Measure–

1 Byte = 8 bit = 2 Nibble

1 KB = 1024 Byte = 8192 Bits

1 MB = 1024 KB

1 GB = 1024 MB

1 TB = 1024 GB

1 PB = 1024 TB

1 EB = 1024 PB

1 ZB = 1024 EB

1 YB = 1024 ZB

(TB = Terrabyte, PB = Petabyte, EB = Exabyte, ZB = Zettabyte, YB = Yottabyte)

Important Questions Asked in Previous Years Examinations

1. Which of the following is an OCR font based on American standards?

(a) OCR-C (b) OCR-A
(c) OCR-B and OCR-C (d) OCR-B

KPSC Jr. Instructor- 09.07.2014

Ans. (b) : OCR-A is a font created in 1968, in the early days of computer optical character recognition, when there was a need for a font that could be recognized not only by the computers of that day, but also by humans. OCR A uses simple thick strokes to form recognized characters.

2. Which of the following stores the programs and data currently executed by the

(a) Primary Memory (b) Auxiliary Memory
(c) Secondary Memory (d) Tertiary Memory

UPPCL (TG-II) 24-01-2019 (Morning)

Ans : (a) Primary memory is a segment of computer memory that can be accessed directly by the process. Primary memory have access time less than secondary memory and greater than cache memory. Primary memory has a storage capacity lesser than secondary memory and greater than cache memory.

3. Which of the following is an example of a virtual display unit (VDU)?

(a) CRT Monitor (b) Plotter
(c) Printer (d) Scanner

UPPCL TG-II 27-03-2021 (Shift-II)

Ans. (a) : CRT Monitor is example of VDU (Visual Display Unit). It may be peripheral device or may integrated with other components. At present, LED LCD and plasma technology are used as monitors.

4. Which among the following statements is/are correct with respect to types of memory?

A. Internal processor memories
B. Primary memory or main memory
C. Secondary or auxiliary memory

(a) All of the options (b) Both B and C
(c) Both A and B (d) Both C and A

GSSSB Electronic Instructor-22.01.2017

KPSC Jr. Instructor- 09.07.2014

Ans. (a) : Memory is a device in a computer where instruction and other data are stored, their types are as follows.

- Internal Processor Memory
- Primary Memory or Main Memory
- Secondary or Auxiliary Memory

Register is a type of internal processor memory while main memory is RAM, but both of them interact directly with the processor. There are two types of primary memory RAM and ROM. Secondary memory is also called auxiliary memory. In this data can be stored for a long time.

5. The main memory of a computer is made using which of the following technique?

(a) Magnetic (b) Optical
(c) Semi-conductor (d) Vacuum tube

KPSC Instructor Electronics Mech.20.07.2018

Ans. (c) : A semiconductor substance lies between the conductor and insulator. It control and manage the flow of electric current in electronic equipment and devices. As a result, it is a popular component of electronic chips made for computing components and a variety of electronic devices, including solid state storage.

6. Which of the following is an example of volatile memory?

(a) Hard drive (b) ROM
(c) RAM (d) Flash memory

(UPPCL TG2 Re-exam 16-10-2016)

Ans. (c) : Random Access Memory (RAM) is an example of volatile memory because all its data is lost when the power supply is off.

Another example of volatile memory is cache memory.

7. Which of the following statements related to primary memory of a computer is INCORRECT?

(a) RAM is a component of Arithmetic Logic Unit (ALU)
(b) The CPU interacts directly with the primary memory.
(c) Random Access Memory (RAM) is a volatile primary memory.
(d) ROM is a non-volatile primary memory.

GSSSB Supervisor Electronic Instructor 18.01.2014

Ans. (a) : RAM is a component of primary memory. Primary memory is a volatile memory and is the main memory of the computer and is also called temporary memory. The data and instruction processed by the CPU is used to store.

8. Which of the following memories needs to be refreshed continuously at certain time intervals?

(a) Cache Memory (b) Secondary
(c) SRAM (d) DRAM

UKSSSC Tech. Electrical Instructor-21.11.2017

Ans. (d) : The full form of DRAM is Dynamic Random Access Memory. It needs to be refreshed constantly to maintain the data, otherwise it will lose the data. DRAM is slower than SRAM. SRAM does not need to be refreshed frequently DRAM is cheaper than SRAM.

9. Semiconductor memory, Dynamic RAM (DRAM) stores each bit of information in a _____.

- (a) diode (b) encoder
(c) capacitor (d) resistor

GSSSB Electronic Instructor-21.01.2014

Ans. (c) : Dynamic Random Access Memory (DRAM) is a type of semiconductor memory that stores each bit of information in a capacitor. DRAM stores each bit of data in a separate passive electronic component, which is inside an integrated circuit board. A bit in every electronic component has two states (concepts) of value called 0 and 1.

10. Which of the following is widely used for implementing main memory?

- (a) Magnetic drum memory
(b) Magnetic core memory
(c) Static RAM
(d) Dynamic RAM

UKSSSC Tech. Electrical Instructor-21.11.2017

Ans. (d) : RAM is a type of memory that temporarily stores data and instructions to perform the task currently being run by the CPU. It is of two types -
(i) DRAM (ii) SRAM.

The full form of DRAM is Dynamic Random Access Memory. This is volatile memory. It is used as main memory in computers because the data of DRAM is always changing so it needs to be refreshed.

11. Which of the following statement is incorrect regarding computer memory?

- (a) Before processing, the program and data are loaded into primary memory
(b) RAM is a non - volatile memory
(c) The CPU of the computer cannot directly access the hard disk
(d) RAM is a primary memory

KPSC Instructor Electronic-25.06.2014

Ans. (b) : Computer memory is a physical device which is used to temporarily and permanently store information, instructions and data in a computer. There are mainly two type of computer memory.

- (i) Primary memory
(ii) Secondary memory.

Primary memory also two types - RAM and ROM. RAM is a volatile memory, hence option (b) statement is incorrect and all other statement are correct.

12. With respect to the computer system, the term 'cache' means :

- (a) a small but faster memory placed between the CPU and the main memory to reduce the memory access time

- (b) a way of connecting multiple functional units to the internal bus
(c) a group of physical lines meant to carry information
(d) a memory trash can

KPSC Jr. Instructor 22.11.2018w

Ans. (a) : Cache memory is a type of high-speed volatile computer memory that provides high-speed data access to a processor and stores frequently used computer programs, applications and data. It's a small but faster memory placed between the CPU and the main memory to reduce the memory access time.

13. Which among the following describes ROM?

- (a) Read Only Memory (b) Read Once Memory
(c) Read On Memory (d) Read Other Memory

HSSC Electrician Instructor -17.12.2019

RRB Bengaluru L.P.-2010

Ans. (a) : ROM is a temporary memory it is short form of Read Only Memory. It is type of non volatile memory used in computer and other electronic devices. The information is stored permanently in such memories during manufacture.

14. Which of the following sets of words best describes the characteristics of a primary storage device, like RAM?

- (a) Cheap, non-volatile, fast access
(b) Volatile, expensive, slow access
(c) Expensive, Volatile, fast access
(d) Fast access, non-volatile, cheap

WBPSA Instructor-18.09.2021

Ans. (c) : Random Access Memory (RAM) is a high speed component in device that temporarily store all information.

RAM has following characteristics:

- RAM is expensive memory.
- RAM store temporally data so its called volatile memory.
- RAM can placed very close to the CPU that why it has fast access time.

15. Which of the following is not a type of ROM (Read Only Memory)?

- (a) EEPROM (b) DROM
(c) EPROM (d) PROM

UPPCL TG-II 28-3-2021 (Shift-I)

Ans. (b) : ROM, is short form of Read Only Memory. It stores information permanently so its called non-volatile memory. Type of ROM–

PROM – Programmable Read Only Memory

EPROM – Erasable Programmable ROM

EEPROM – Electrically Erasable Programmable ROM

16. Which of the following contains very small size storage units called register?

- (a) Hard disk (b) CPU
(c) Input device (d) Output device

UPPCL Technical Grade-II-02.08.2015

Ans. (b) : Central Processing Unit is the main processor or it is electronic circuitry that executes instructions comprising a computer program.

17. Which of the following statement is wrong?

- (a) Register may contain instruction or storage address, but may not contain data.
- (b) Cache memory works very fast, but its capacity is less.
- (c) The basic input/output system (BIOS) is stored in the memory chip of Read Only Memory (ROM)
- (d) The storage capacity of the internal memory is small and it is variable.

UPPCL TG-II 27-03-2021 (Shift-I)

Ans. (a) : A CPU register is a small set of data holding process that are part of the computer process. It can hold on instruction, a storage address, or any kind of data. So statement (a) is wrong.

18. The data to be processed remains in the ____.

- (a) secondary memory unit
- (b) memory unit
- (c) read protected unit
- (d) control unit

RRB Bengaluru LP-2004

Ans. (b) : Memory unit stores all the data and the introductions required for processing.

19. Which of the following is NOT a characteristic of RAM?

- (a) Faster
- (b) Expensive
- (c) High power consumption
- (d) Smaller

DSSSB Craft Instructor (ESM) 06.10.2019

Ans. (d) : Characteristic of RAM—

- RAM is the fastest memory.
 - RAM is expensive memory and it can be accessed by directly.
 - RAM is volatile in nature, which means the data is lost when the device is switched off.
 - RAM consume high power.
- Smaller is not a characteristic of RAM.

20. What is the full form of letter 'S' in SDRAM?

- (a) Synchronous
- (b) Simple
- (c) Static
- (d) Service

UPPCL Technical Grade-II (Shift-II) 20.03.2021

Ans. (a) : Synchronous Dynamic Random Access Memory (SDRAM). Synchronous relates to the behavior of the Dynamic Random access memory type that synchronizes with the clock system of the computer, thus making it easier to manage it quicker.

21. The unit is capable of mimicking the processor and, indeed, of taking over control of the system from the processor.

- (a) Random Memory Access
- (b) Indexed sequential Memory Access
- (c) Sequential Memory Access
- (d) Direct Memory Access

KPSC Jr. Instructor 22.11.2018w
Punjab Wireman instructor-07.07.2013

Ans. (d) : Direct Memory Access (DMA) is the process of transferring data without the involvement of the processor itself. The DMA unit is capable of mimicking the processor and indeed, of taking over the control of system from the processor.

22. In a Computer RAM is

- (a) Non-volatile
- (b) Both volatile and non-volatile
- (c) None of these
- (d) Volatile

KPSC Instructor Electronic-25.06.2014
RRB Ranchi LP-2008

Ans. (d) : RAM (Random Access Memory) is an Electronic temporary memory (Volatile Memory) therefore the data stored in it remains only as long as the computer remains on.

23. A CPU interacts with ____ for data access during program execution.

- (a) RAM
- (b) ROM
- (c) hard disk
- (d) magnetic tape

UPPCL TG-II 19-03-2021 (Shift-I)

Ans. (a) : The CPU directly interacts with the RAM for data access during program execution.

24. What is the letter 'S' in SRAM?

- (a) Secure
- (b) Symmetric
- (c) Static
- (d) Synchronous

UPPCL TG-II 19-03-2021 (Shift-I)

Ans. (c) : SRAM is short form of Static Random Access Memory. It is a form of semiconductor memory widely used in microprocessor.

25. Which of the following types of memory must be continually refreshed in order to maintain the data?

- (a) PROM
- (b) SRAM
- (c) DRAM
- (d) ROM

UPPCL TG-II 19-03-2021 (Shift-I)

Ans. (c) : The full form of DRAM is Dynamic Random Access Memory. Which is used to store data, it must be refreshed several times per second.

26. Which of the following is a primary storage device?

- (a) DRAM
- (b) Compact disk
- (c) Flash drive
- (d) Pen drive

GSSSB Electronic Instructor-21.01.2014

Ans. (a) : Dynamic Random Access Memory (DRAM) is a type of random access memory that stores each bit of data in a memory cell. Usually consisting of a small capacitor and a transistor, both typically based on metal-oxide-semiconductor technology.

27. Which of the following options best describes the truth of the given statements?

- (i) SRAM needs to be refreshed periodically to preserve the data stored in it.
- (ii) The recording surfaces of a hard disk are divided into concentric circles called sectors.

- UKSSSC Tech. Electrical Instructor-21.11.2017

The recording surfaces of a hard disk are divided into concentric circles called sectors, this is true statement.

(a) SRAM (b) EEPROM
(c) EPROM (d) PROM

Ans. (a) : SRAM is type of RAM but EPROM, EEPROM and PROM are types of ROM. RAM is volatile memory but ROM is non-volatile memory.

- (a) SRAM is faster than DRAM
- (b) SRAM uses transistors and latches.
- (c) SRAM does not require refresh electrical circuitry.
- (d) SRAM is also called synchronous Random Excel memory.

Ans. (d) : SRAM is short form of Static Random Access Memory.

- (a) ROM
- (b) Hard Disk
- (c) DRAM
- (d) SRAM

Ans. (d) : SRAM (Static Random Access Memory) is types of memory that uses latching circuitry (flip-flop) to store each bit.

UPPCL TG-II 25-01-2019 (Morning)

Statement (ii) is correct because DRAM is slower than SRAM.

(c) Both (i) and (ii) (d) Only (ii)

Ans : (d) The access time of primary memory is less than the access time of secondary memory. So statement (i) is incorrect. For the same storage capacity, DRAM is cheaper than SRAM. So statement (ii) is correct.

(a) 8,256 (b) 7,128
(c) 8,257 (d) 7,256

Ans. (a) : ASCII is the acronym for American Standard code for Information Interchange. Extended ASCII uses 8 bits and provides codes for 256 characters.

(a) 7 (b) 5
(c) 4 (d) 6

Ans. (b) : The ASCII value of 4 is 52 and the ASCII value of 9 is 57. Therefore! $57 - 52 = 5$

- (a) Expanded Data Origin
- (b) Extended Dynamic Output
- (c) Expanded Dynamic
- (d) Extended Data Output

Ans : (d) In 'EDO RAM' word full form the EDO is 'Extended Data Output.'

(a) RAM (b) Cache
(c) CPU Register (d) ROM

Ans : (c) On basis of access time CPU registers are fastest memory. These are temporary memory units that store data and those are located in processor.

(d) hold the address of the next instruction

Ans. (c) : In computer science, instruction register (IR) is part of CPU's Control Unit. This register can hold the current instruction specifically the instruction register holds the OP code which define the type of instruction.

(c) Language Translator (d) Firmware

UPPCL Technical Grade-II Shift-II, 28.03.2021

Ans. (d) : Firmware is a type of system software which is inbuilt in flash drive, ROM or EPROM. It is recognized by the operating system.

39. Which of the following memory is permanent memory?

- (a) ROM (b) RDRAM
(c) SDRAM (d) RAM

RRB Gorakhpur L.P.-2008

Ans : (a) ROM is short form of Read Only Memory. It is non-volatile memory that store information permanently. In such memory the information stores during manufacture. It is also called permanent memory.

40. On which type of ROM, data can be written only once?

- (a) PROM (b) EPROM
(c) EEPROM (d) FROM

MP Electrician Instructor 07.11.2016, Morning

Ans : (a) PROM is short form of Programmable Read Only Memory. It is a computer memory chip that can be programmed once after it is created the information written in form is permanent and cannot be erased or deleted.

41. Flash memory is a special type of

- (a) EROM (b) EEPROM
(c) ERAM (d) EPROM

WBPSCT Instructor-18.09.2021

Ans : (b) Flash memory is a permanent memory that means it can store data permanently. Flash memory is a special type of EEPROM and it was invented by Japanese Engineer Masuoka Fujio.

42. Which of the following is/are the major type(s) of computer chips?

- (a) Primary memory chip
(b) Microprocessor chip
(c) a and b both
(d) None of these

(UPPCL TG2 Re-exam 16-10-2016)

Ans : (c) The two major types of computer chips are the primary memory chip and the microprocessor chip.

43. Which of the following statements is/are false?

- (i) BIOS is a firmware.
(ii) Cache memory is an example of utility software.
(a) (i) and (ii) both (b) Neither (i) nor (ii)
(c) Only (i) (d) Only (ii)

HSSC wireman Instructor -17.12.2019, Shift-II

Ans. (d) : The full form of BIOS is Basic Input Output System. With its help all the components of the computer works. BIOS is a firmware. Cache memory stores temporary data that may exist in both hardware and software but is not an example of utility software.

44. Which type of memory is mainly used to synchronise with a high-speed CPU and to improve its performance?

- (a) Tertiary memory (b) Cache memory
(c) Secondary memory (d) Primary memory

RRB Ahmadabad LP-2005

Ans. (b) : Cache memory is expansive and fastest memory among the option. It is mainly used to synchronize with a high-speed CPU and to improve its performance.

45. Which of the following represent the correct order of storage devices in increasing order of their storage sizes?

- (a) Hard Disk Drive, RAM, Cache, Register
(b) Cache, Register, Hard Disk Drive, RAM
(c) Register, Cache, RAM, Hard Disk Drive
(d) Register, Cache, Hard Disk Drive, RAM

Punjab Wireman instructor-07.07.2013

KPSC Instructor Electronic-25.06.2014

Ans : (c)

46. Which of the following stores the programs and data currently being executed by the CPU?

- (a) Tertiary memory (b) Auxiliary memory
(c) Primary memory (d) Secondary memory

UKSSSC Tech. Electrical Instructor-21.11.2017

Ans. (c) : Primary memory (Cache) stores the programs and data which are currently being executed by the CPU. Primary memory has a faster access time than secondary memory.

47. Which one of the following options is correct with respect to the increasing order of access speed?

- (a) Magnetic tape → Optical disk → Cache memory → Registers
(b) Magnetic tape → Optical disk → Cache memory → Main memory
(c) Optical disk → Magnetic tape → Cache memory → Registers
(d) Optical disk → Magnetic tape → Main memory → Cache memory

UPPCL Technical Grade-II (Shift-II) 19.03.2021

Ans. (a) :

As we move from top to bottom in the hierarchy the access time increases or the access speed decreases.

The correct order of access speed is increasing-
Magnetic Tape→Optical Disk→Cache Memory→Registers.

48. Which of the following memories has the shortest access time?

- (a) Cache Memory
- (b) Magnetic Bubble Memory
- (c) Magnetic Core Memory
- (d) Random Access Memory

RRB Bengaluru LP-2004

Ans : (a)

49. Direct Memory Access (DMA) is a technique where in the CPU:

- (a) transfers data to I/O
- (b) transfers data to the disk drive
- (c) is idle and transfer takes place through a network
- (d) is idle and does not play any role in data transfers

DSSSB Craft Instructor (ESM) 06.10.2019

Ans : (d) The full form of DMA is Direct Memory Access. It is the process of transferring data without the involvement of the processor or CPU itself.

50. Which among the following is the fastest?

- (a) ROM
- (b) Flash drive
- (c) Cache memory
- (d) RAM

MP Electrician Instructor 07.11.2016, Morning

Ans. (c) : Cache memory is expansive and fastest memory among the option. It is mainly used to synchronise with a high-speed CPU and to improve its performance.

51. Which of the following is the fastest type of memory?

- (a) Primary memory
- (b) Secondary memory
- (c) Cache memory
- (d) External memory

RRB Chandigarh L.P.-2014

Ans : (c) Cache memory is a special type of memory, which is highly uses faster Static RAM Chips. It is a very fast memory between primary memory and CPU when frequently used data and instructions are stored. Cache memory speed being fast means increasing the speed of the processor.

52. Which of the following is mainly used for cache memory?

- (a) DVD
- (b) DRAM
- (c) SRAM
- (d) Blu-ray disk

UPPCL (TG-II) 24-01-2019 (EVENING)

Ans : (c) High speed Static RAM (SRAM) are used for cache memory.

53. Select the memory unit that has the shortest access time.

- (a) ROM
- (b) Flash
- (c) RAM
- (d) Cache

KPSC Jr. Instructor 22.11.2018w

Punjab Wireman instructor-07.07.2013

Ans : (d) Cache memory is very fast memory is retrieves data at very high speed.

54. Flash Drive is a type of:

- (a) EPROM
- (b) ROM
- (c) PROM
- (d) EEPROM

KPSC Instructor Electronic-25.06.2014

Ans. (d) : A USB flash drive is a data storage device that includes flash memory with an integrated Universal Serial Bus (USB) interface. USB flash drive are typically removable and rentable and physical much smaller than an optical disc. Flash drive is a type of EEPROM.

55. Which among them is the slowest form of memory in terms of data transfer and storage rate?

- (a) Registers
- (b) Cache memory
- (c) Main Memory
- (d) Flash memory

(UPPCL TG2 11-11-2016)

Ans : (d) Flash memory is the slowest form of memory in terms of data transfer and storage rate. Flash memory are used in cellular phone, digital camera, setup box etc.

56. Which memory cannot be accessed directly by the computer?

- (a) RAM
- (b) Cache memory
- (c) ROM
- (d) Memory card

HSSC wireman Instructor -17.12.2019, Shift-II

Ans. (d) : RAM, cache memory, ROM are directly accessed by processor (C.P.U.) because these are all examples of primary memory. Hence, memory card is an example of secondary memory. These are not accessed directly by the CPU.

57. Which of the following is not a secondary storage device?

- (a) Flash Drive
- (b) Pen Drive
- (c) Compact Disc
- (d) DRAM

MP Electrician Instructor 07.11.2016, Morning

WBPS Instructor-18.09.2021

Ans. (d) : DRAM (Dynamic Random Access Memory) is a primary memory or primary storage device while other option (Flash drive, Pen drive, CDs) are example of secondary storage device.

58. Hard disc, CD and Pen drive are examples of which of the following storage?

- (a) Secondary
- (b) Sequential access
- (c) Data on convertible Plastics
- (d) Primary

UPPCL TG-II 27-03-2021 (Shift-II)

Ans. (a) : Hard disc, CD and Pen drive are example of secondary storage device.

59. Which among the following is a Sequential Access Memory?

- (a) Optic Disk
- (b) Magnetic Disk
- (c) Magnetic Drum
- (d) Magnetic Tape

RRB Gorakhpur L.P.-2008

DSSSB Craft Instructor (ESM) 06.10.2019

Ans. (d) : In magnetic tape only one side of the ribbon is used for storing data. It is sequential memory which contains thin plastic ribbon to store data and coated by magnetic oxide. So the data read write speed is slower. DRAM works on sequential order like A, B, C, D is data, we have to go through BC to go from A randomly in optical disk.

60. A CD-RW disk

- (a) Has a faster access than an internal disk
- (b) Is a form of optical disk, so it can only be written once.
- (c) Holds less data than a floppy disk
- (d) Can be erased and rewritten

(UPPCL TG-2 26.06.2016)

Ans : (d) CD-R or CD-RW drives are also called CD writers, CD burners, or CD recorders can read the same formats as CD-ROM drives CD-DA, CD-ROM, and CD-R/RW discs but can also write data to inexpensive CD-R (write - once) and CD-RW (Re-Writable) discs.

61. Which of the following statement is/are true?

- (i) Full form of VDU is Visual Display Unit and it is an example of both software and hardware.
- (ii) Interpreter is used for assembly language programs, while compiler is used for high level language programs.

- (a) Only (i)
- (b) Both (i) and (ii)
- (c) Only (ii)
- (d) Neither (i) nor (ii)

UPPCL Technical Grade-II Shift-II, 28.03.2021

Ans. (d) : The full form of VDU is Visual Display Unit and it is also called monitor. It is an output device and an example of hardware. Both compiler and Interpreter are used for language translator. Compiler translates the entire source code of the program at once whereas interpreter translates line at a time.

62. Which of the following usually possess maximum storage?

- (a) DVD
- (b) Hard drive
- (c) Flash drive
- (d) Floppy disk

RRB Kolkata LP-2009

WBPSK Instructor-18.09.2021

Ans. (b) : DVD, Flash Drive, Floppy disk all storage device store less data compare to hard disk drive.

63. Which memory uses the concept of tracks and sector?

- (a) SRAM
- (b) Hard disk
- (c) DRAM
- (d) Magnetic tape

KPSC Jr. Instructor 22.11.2018w

Ans. (b) : A hard disk drive is a non - volatile secondary storage device the recording surface of a hard disk is divided into tracks and sectors.

64. Consider a hard disk with 8 recording surfaces and 4 sectors per track. If the total number of parts is 320, how many tracks will be there recording surface.

- (a) 8
- (b) 4
- (c) 32
- (d) 10

UPPCL TG-II 19-03-2021 (Shift-II)

Ans. (d) : Recording surface = 8
per track (sector) = 4

Total number of part = 320

Tracks per recording surface = $\frac{320}{32} = 10$

65. File and folders are organized as a structure on computer hard disk

- (a) Linear list
- (b) Tree
- (c) Table
- (d) Graph

UPPCL TG-II 25-01-2019 (Evening)

Ans : (b) Files and folders are arranged in form of a free structure in the computer hard disk, in which the root directory and sub directories are followed by folders, files etc.

66. If the hard disk has 4 recording surfaces and each surface has 16 track divided into 8 sectors, then the number of cylinders in the hard disk will be?

- (a) 16
- (b) 8
- (c) 32
- (d) 4

UPPCL TG-II 20-03-2021 (Shift-I)

Ans. (a) : A hard disk is made up of several platters, and each platter has 2 recording surfaces. Each surface consists of a number of tracks divided in to a number of equal sectors.

Each platter has equally spaced tracks stored in a cylinder. Thus if there are 16 tracks in each sector then they require 16 cylinders.

67. Which of the following are wrong–

- (i) A CD-R is a re-write disc that allows you to erase previously recorded data and write new data onto it.
- (ii) The letters RW in CD-RW mean "read and write."

- (a) Only (ii)
- (b) (i) and (ii) both
- (c) Neither (i) nor (ii)
- (d) Only (i)

UPPCL TG-II 25-01-2019 (Morning)

Ans : (b) CD-R is a digital optical disc and it is a data storage format and It can be written once and read many times. Data can't be deleted from a CD-R disc and it can't formatted so statement (i) wrong.
CD-RW stands for "Compact Disc Re-Writable so statement (ii) wrong.

68. What is disk access time?

- (a) Seek time
- (b) Seek time + latency time
- (c) Rotation time
- (d) Latency time

Punjab Wireman instructor-07.07.2013

Ans : (b) Disk access time is Seek time + latency time. In the context of computes, time taken to receive data from a storage device or to obtain data from a peripheral unit is known as access time.

69. The circular disks that make up a hard drive are called

- (a) Plates
- (b) Plotters
- (c) Rings
- (d) Saucers

KPSC Instructor Electronic-25.06.2014

GSSSB Electronic Instructor-21.01.2014

Ans. (b) : Plotters is a round circle made of metal in the Hard Disc, which has a magnetic coating, it is used to keep the data safe for the future. A Hard Disc consists of several plotters (cycles) counted in a single spindle hard disk is formed by the compilation of those which are in the form of tracks and sectors.

70. Which among the following is the full form of DVD?

- (a) Digital Value Disk
- (b) Digital Versatile Disk
- (c) Dual Versatile Disk
- (d) Direct Versatile Disk

GSSSB Supervisor Electronic Instructor 18.01.2014

Ans. (b) : DVD is short form of digital versatile or Digital Video Disc. It is an optical disc storage media format. It was introduced in 1995 by Sony, Panasonic and Samsung. It's main function storage of video and data.

71. Which of the following optical storage format has been developed to enable recording, rewriting and playback of High Definition (HD) video?

- (a) Compact disc
- (b) Blue-ray disc
- (c) Hard disc
- (d) Floppy disc

UPPCL TG-II 25-01-2019 (Evening)

Ans : (b) Blue-Ray disc is an optical disc that most after used for playback of High Definition (HD) video. It is also use for enable rewrite video and other data.

72. An example is an optical disc.

- (a) ROM
- (b) Hard disc
- (c) Floppy disc
- (d) Compact disc

RRB Gorakhpur L.P.-2008

Ans : (d) A compact disc is a portable storage medium that can record, store and play back audio, video and other data in digital form.

73. Which of the following is not a part of Floppy Disks?

- (a) Actuator
- (b) Paper Ring
- (c) Magnetic Disk
- (d) Shutter

DSSSB Craft Instructor (ESM) 06.10.2019

Ans. (a) : An actuator is a device that makes something move or operate. It is not part of Floppy Disc but Paper Ring, Magnetic disc and shutter are part of Floppy Disc.

74. Which among the following is an example of Zip drives?

- (a) Pen drives
- (b) CD/DVD
- (c) Hard disk
- (d) Memory Card

(UPPCL TG2 11-11-2016)

Ans : (b) The zip drive is a removable floppy disk storage. It is advance version of floppy disc, CD and DVD both are example of zip drive.

75. Which of the following is not a type of magnetic storage system?

- (a) Floppy disk
- (b) Compact disk
- (c) Hard disk
- (d) Magnetic tape

HSSC wireman Instructor -17.12.2019, Shift-I

Ans : (b) Floppy disk, Hard disk and Magnetic tape are example of magnetic storage system but compact disk is example of optical storage device.

76. An ___ has magnetic disc called platters, which record and store data.

- (a) CD
- (b) Blu-ray disk
- (c) Hard disc drive
- (d) DVD

UPPCL (TG-II) 24-01-2019 (EVENING)

Ans : (c) In a hard disk, a platters is a circular magnetic plate that is used for storing data in a hard disk.

77. Strength of Magnetic disk depends on

- A. Number of sides
- B. Recording density
- C. Number of tracks
- (a) only A
- (b) A & C
- (c) only C
- (d) A, B & C

(UPPCL TG2 11-11-2016)

Ans : (d) Magnetic disk is a memory device, which is flat in shape and covered with magnetic coating. The power of a magnetic disk depends on the number of arms, the recording density and the number of paths.

78. Which of the following is a portable USB flash memory device that can be used to transfer data from one computer to another?

- (a) DVD
- (b) Pen drive
- (c) CD
- (d) Floppy disc

UPPCL TG-II 25-01-2019 (Morning)

Ans : (b) Pen drive is a removable secondary storage unit. It is also called portable data storage device or flash drive. Which is connected via USB (Universal Serial Bus) connector and plug-in play. With the help of pen drive we can carry data any ware.

79. Which of the following I/O devices is a block device?

- (a) Keyboard (b) Tape drive
(c) Mouse (d) USB port

UPPCL JE 31-01-2019 (Batch-02)

Ans: (b) Tape drive, Hard disk, Floppy disk and CD-ROMs are example of block devices.

Block devices are non-volatile devices which can store huge data and whose information can be accessed in any order.

80. With reference to SSHD memory, the full form of SSHD is

- (a) Silicon State Hybrid Drive
(b) Solid silicon Hybrid Drive
(c) Solid State Hybrid Drive
(d) Solid State Hybrid Dish

KPSC Instructor Electronic-25.06.2014

Ans : (c) SSHD stands for Solid-State Hybrid Drive. It is a physical storage device that combines a faster storage medium such as Solid State Drive SSD.

81. How many nibbles are there in 2 megabytes?

- (a) 2^{20} (b) 2^{10} (c) 2^{22} (d) 2^{21}

GSSSB Electronic Instructor-21.01.2014

Ans. (c) : 1 byte = 2 Nibble

1 kilobyte = 1024 byte

1024 byte = $2 \times 2^{10} = 2^{11}$ Nibble

So, 2 Megabyte = $2 \times 2^{10} = 2^{11 \times 2} \Rightarrow 2^{22}$ Nibble

82. Which of the following statements is INCORRECT about unit of computer memory?

- (a) Basic unit of computer memory is bits
(b) 1 bytes = 8 bits
(c) 1 KB (kilobyte) = 1024 bytes
(d) 1 nibble = 6 bits

UKSSSC Tech. Electrical Instructor-21.11.2017

Ans. (d) : The Basic unit of a computer is the binary digit, often referred to as a 'bit'. A bit can represent two state, typically denoted as 0 and 1, and it forms the basis of all digital data and computations in a computer.

1 Bytes = 8 bits

1 Nibble = 4 bits

1 KB = 1024 bytes.

83. Which of the following statements are correct regarding the unit of computer memory?

- (a) Basic unit of computer memory is ASCII
(b) 1 KB (kilo byte) = 1000 bytes
(c) 1 bytes = 8 bits
(d) 1 nibble=6 bits

UPPCL Technical Grade-II (Shift- II) 27.03.2021

Ans. (c) : Regarding the unit of computer memory

1 bit = 0 or 1

1 nibble = 4 bits

1 byte = 8 bits

1 kilobyte = 1024 bytes.

84. Arrange the following units of measurement of computer memory, starting from lowest to highest.

A) Yottabyte

B) Zettabyte

C) Exabyte

D) Petabyte

E) Terabyte

F) Megabyte

(a) F, E, D, C, B, A (b) F, E, D, B, C, A

(c) F, E, A, B, C, D (d) F, E, D, C, A, B

KPSC Jr. Instructor 22.11.2018w

Punjab Wireman instructor-07.07.2013

RRB Kolkata LP-2009

Ans.(a): Tabular representation of various memory sizes :

Name	Equal to	Size (in Byte)
Bit	1 Bit	1/8
Nibble	4 Bits	1/2 (rare)
Byte	8 Bits	1
Kilobyte	1024 Bytes	$1024=2^{10}$
Megabyte	1024 Kb	$10,48,576 = 2^{20}$
Gigabyte	1024 Mb	$10,73,741,824 = 2^{30}$
Terabyte	1024 Gb	$10,99,511,627,776 = 2^{40}$
Petabyte	1024 Tb	$11,25,899,906,842,624 = 2^{50}$
Exabyte	1024 Pb	$1,152,921,504,606,846,976 = 2^{60}$
Zettabyte	1024 Eb	$1,180,591,620,717,411,303,424 = 2^{70}$
Yottabyte	1024 Zb	$1,208,925,819,614,629,174,706,176 = 2^{80}$

Hence we can say that the measurement of computer memory starting from lowest to highest is option (a).

85. In computing, 1 nibble is equal to

- (a) 4 bit (b) 4 bytes
(c) 8 bytes (d) 4 kilo bytes

KPSC Instructor Electronics Mech.20.07.2018

GSSSB Electronic Instructor-22.01.2017

Ans. (a) : In computing 1 Nibble equal to 4 bit

1 bit = 0 or 1

4 bits = 1 Nibble

8 bits = 1 Byte

1024 Bytes = 1 KB

1024 KB = 1 MB

1024 MB = 1 GB

1024 GB = 1 TB

1024 TB = 1 PB

1024 PB = 1 EB

1024 EB = 1 ZB

1024 ZB = 1 YB

86. Arrange the following terms from lower to higher units of memory measurement.

- a) Gigabyte b) Petabyte
c) Terabyte d) Zettabyte
e) Exabyte

(a) a, c, b, e, d (b) a, c, b, d, e

(c) b, a, c, e, d (d) a, b, c, d, e

DSSSB Craft Instructor (ESM) 06.10.2019

MP Electrician Instructor 07.11.2016, Morning

Ans : (a) Arrange of term from lower to Gigabyte, Terabyte, Petabyte, Exabyte, Zettabyte.
 1024 MB = 1 GB
 1024 GB = 1 TB
 1024 TB = 1 PB
 1024 PB = 1 Exabyte
 1024 EB = 1 Zettabyte

87. How many bytes are there in 2 kilobytes (in binary)?
 (a) 1024 (b) 2048
 (c) 4096 (d) 512

UPPCL TG-II 19-03-2021 (Shift-II)

Ans. (b) : 1 KB = 1024 Bytes
 then 2 KB = 1024×2 bytes
 = 2048 bytes

88. What are the lowest and largest "whole" numbers that can be stored in 1-byte memory space?
Note: Whole numbers, the basic numbers of counting are 0, 1, 2, 3, 4, 5, 6,, etc.
 (a) 1,255 (b) 0,256
 (c) 0,255 (d) 1,256

UPPCL TG-II 27-03-2021 (Shift-II)

Ans. (c) : There are 8 bits in byte.
 Each bit represents two states.
 $2^8 = 256$ or (0 to 255)
 The value of first byte will be 0,
 the value of second byte is 1.
 Similarly the value of 256th byte will be 255.
 So the lowest number 0 and the maximum number 255 will be stored.

89. Which of the given options is the minimum amount of memory?
 (a) Gigabyte (b) Terabyte
 (c) Megabyte (d) Petabyte

WPSC Instructor-18.09.2021

HSSC wireman Instructor -17.12.2019, Shift-I

Ans. (c) : The minimum amount of memory is megabyte among the given option.

90. Which of the following units of measurement is the largest size?
 (a) Petabyte (PB) (b) Megabyte (MB)
 (c) Terabyte (TB) (d) Kilobyte (KB)

UPPCL Technical Grade-II-26.06.2016

Ans : (a) The increasing order of memory is as follows.
 kilobyte (KB) → Megabyte (MB) → Terabyte (TB) → Petabyte (PB)
 The Petabyte is the largest unit of measurement in size.

91. Match the following correctly.

- | | |
|---------------|-------------------------|
| a) 1 Bit | i) 4 bits |
| b) 1 Nibble | ii) 0 or 1 |
| c) 1 Byte | iii) 8 bits |
| d) 1 Gigabyte | iv) 1,048,576 Bytes |
| e) 1 Megabyte | v) 1,073,741, 824 Bytes |

- (a) a-ii, b-i, c-iii, d-iv, e-v
 (b) a-ii, b-iii, c-i, d-v, e-iv
 (c) a-ii, b-i, c-iii, d-v, e-iv
 (d) a-ii, b-iii, c-ii, d-v, e-iv

HSSC wireman Instructor -17.12.2019, Shift-II

Ans : (c) The matched options
 (a) Bit - 0 or 1 (smallest unit of data)
 (b) Nibble = 4 bit
 (c) 1 Byte = 8 bits
 (d) 1 Gigabyte = 1,073,741,824 Byte
 (e) 1 Megabyte = 1,048,576 Byte

92. How many bytes are in 4 kilobytes of memory?
 (a) 512 (b) 2048
 (c) 4096 (d) 1024

UPPCL TG-II 28-3-2021 (Shift-I)

Ans. (c) : 1 KB = 1024 Byte
 4 KB = $1024 \times 4 = 4096$ Byte

93. Which of the following options is equal to 256 nibble?
 (a) 128 bytes (b) 4 kilobytes
 (c) 512 bits (d) 1 Kilobytes

UPPCL TG-II 19-03-2021 (Shift-I)

Ans. (a) : 4 bits = 1 nibble
 1×256 nibble = 4×256 bits
 256 nibble = 1024 bits
 1 byte = 8 bits
 256 nibble = $1024/8$ bytes
 = 128 bytes

94. How many bytes are there in 32 KB?
 (a) 32768 (b) 8192
 (c) 16384 (d) 4096

UPPCL TG-II 25-01-2019 (Evening)

Ans : (a) 1024 Bytes = 1 kilobyte
 $1024 \times 32 = 32768$ Byte

95. 1024 Terabyte is equal to which of the following?
 (a) 10 Petabytes (b) 1 Gigabyte
 (c) 1 Petabyte (d) 1 Exabyte

KPSC Jr. Instructor 22.11.2018w

Ans. (c) : In computing 1 Nibble equal to 4 bit
 1 bit = 0 or 1
 4 bits = 1 Nibble
 8 bits = 1 Byte
 1024 Bytes = 1 KB
 1024 KB = 1 MB
 1024 MB = 1 GB
 1024 GB = 1 TB
 1024 TB = 1 PB
 1024 PB = 1 EB
 1024 EB = 1 ZB
 1024 ZB = 1 YB

96. What is a set of 8 bits?
 (a) petabyte (b) kilobyte
 (c) megabyte (d) byte

Punjab Wireman instructor-07.07.2013

KPSC Instructor Electronic-25.06.2014

Ans : (d)

1024 KB = 1 MB
1024 MB = 1 GB
1024 GB = 1 TB
1024 TB = 1 PB

97. The largest unit of data measurement among following is

- (a) Gigabyte (b) Terabyte
(c) Exabyte (d) Petabyte

GSSSB Electronic Instructor-21.01.2014

Ans. (c) : 1024 MB = 1 GB (Gigabyte)

1024 GB = 1 TB (Terabyte)
1024 TB = 1 PB (Petabyte)
1024 PB = 1 EB (Exabyte)
1024 EB = 1 ZB (Zettabyte)
1024 ZB = 1 YB (Yottabyte)

98. 1 Gigabyte is equal to ____.

- (a) 2^{16} bytes (b) 10^{30} bytes
(c) 8^{30} bytes (d) 2^{30} bytes

UPPCL Technical Grade-II (Shift- II) 27.03.2021

Ans. (d) : 1 GB = 1024 MB
= 1024×1024 KB
= $1024 \times 1024 \times 1024$ bytes
= $2^{10} \times 2^{10} \times 2^{10}$ bytes
 $\therefore$ 1 GB = 2^{30} bytes

99. What is the full form of BIT ____?

- (a) Bitcoin (b) Binary digit
(c) Binary terminal (d) Big digit

UPPCL Technical Grade-II (Shift-I) 19.03.2021

Ans : (b) A bit is smallest unit of data that a process and store by computer. Binary digit is full form of BIT. A bit can hold only one of two values: 0 or 1, corresponding to the electrical values of on or off, respectively.

100. _____ nibble is equal to 4 bits.

- (a) 3 (b) 2
(c) 1 (d) 4

RRB Bengaluru LP-2004

Ans : (c)

Bit - 0 or 1 (smallest unit of data)
Nibble = 4 bit
1 Byte = 8 bits
1 Gigabyte = 1073741824 Byte
1 Megabyte = 1048576 Byte

101. Which of the following is equal to 1 Kilobyte?

- (a) 512 Nibble (b) 1 Megabyte
(c) 512 Bytes (d) 8192 Bits

UPPCL TG-II 20-03-2021 (Shift-I)

DSSSB Craft Instructor (ESM) 06.10.2019

Ans. (d) : 1 KB (Kilobyte) = 1024 bytes

1 Bytes = 8 Bits
1 KB = 1024×8 Bits
= 8192 Bits

102. One MB is equal to—

- (a) the amount the RAM in every computer
(b) 1 billion bytes
(c) 1024 KB
(d) 1 thousand bytes

(UPPCL TG2 Re-exam 16-10-2016)

Ans : (c) 1 byte = 8 bit

1 kilobyte = 1024 byte
1 megabyte = 1024 kilobyte

103. "In the Memory storage unit, one Zettabyte is equal to....."

- A. 2^{70} byte**
B. 1024 Exabyte
C. 1024 Petabyte

- (a) Only A (b) Only B
(c) Both A & B (d) Only C

(UPPCL TG2 11-11-2016)

Ans : (c)

1 Petabyte = 1024 Terabyte
= 2^{50} byte
1 Exabyte = 1024 Petabyte
= 2^{60} byte
1 Zetabyte = 1024 Exabyte
= 2^{70} byte

104. How many nibbles are 1 kilobyte to memory?

- (a) 2048 (b) 512
(c) 128 (d) 256

UPPCL TG-II 27-03-2021 (Shift-II)

Ans. (a) : 1 byte = 8 bit

1 nibble = 4 byte
1 KB = 1024 bit
1 byte = 2 nibble
1 KB = 1024×2 nibble = 2048 nibble

105. One gigabyte is approximately

- (a) 1×10^3 bytes (b) 1×10^6 bytes
(c) 1×10^9 bytes (d) 1×10^5 bytes

(UPPCL TG-2 26.06.2016)

Ans : (c) 1 Byte = 8 bit

1 Megabyte = 1024 byte $\approx 10^3$ byte
1 Megabyte = $1024 \times 1024 \approx 10^6$ byte
1 Gigabyte = $1024 \times 1024 \times 1024 \approx 10^9$ byte

106. CD-ROM can store at least ____.

- (a) 800 MB (b) 1024 MB
(c) 700 MB (d) 2048 MB

WBPSB Instructor-18.09.2021

Ans : (c) CD-ROM is an optical compact disc that stores audio or other data. This device only. Its capacity is up to 700 MB.

4.

Networking

Introduction

Computer network is a group of computers connected with each other through wires, optical fibers or optical links so that various devices can interact with other through a network. The purpose of having computer network is to send and receive data, stored in other devices over the network. These devices are often referred as nodes.

There are five basic components of computer network.

- **Message** : This is data that is transferred from one device to another on a computer network.
- **Sender** : Sender is a device that sends data to another device connected to a network.
- **Receiver** : Receiver is a device that expects data from other devices on the network.
- **Transmission Media** : To transfer data from one device to another we need a medium like wire, cable radio waves etc.
- **Protocol** : A protocol is a set of rules that govern data communication with a protocol.

Component of Computer Network

- **NIC (Network Interface Card)** Network interface card is device that helps computer to communicate with another device. The NIC contains the hardware addresses, the data-link layer protocol use this address to identify the system over the network so that it transfers the data to correct device address.
- **Hub** : Hub is a central device that divides a network connection into multiple devices. When a computer sends a request to the Hub, then hub distributes the request to all interconnected computers.
- **Switches** : It is a networking device that groups all the devices on the network to transfer the data to another device. It sends the message to the device to which it belongs.

- **Cables and Connectors** : Cable is a transmission media that transmits the communication signals. There are three types of cable as – Twisted pair cable, Coaxial cable, Fiber optic cable.
- **Router** : Router is used to connect the LAN to the internet and connect multiple computers to the internet.
- **Modem** : Modem connects the computer to the internet over the existing telephone line. Modem stands for 'MODulator DEModulator'. It refers to a device used for conversion between analog signals and digital bits.

Features of Computer network :

- **Communication Speed** : Network provides us communication over the network at a fast speed, where we can do video conferencing, email, messaging etc.
- **File Sharing** : Computer Network a file sharing is a major advantage. It is used to share files from one device to another device through the network.
- **Backup and Roll-back is Easy** : Since the files are stored in the main server which is centrally located. Therefore it's easy to take the backup from the main server.
- **Software and Hardware Sharing** : We can install the applications on the main server and access any where through the network. So we do not need to install the software on every machine.
- **Security** : Network allows the security by ensuring that the user has the right to access the certain files and application.

Computer Network Architecture :

Network architecture generally refers to design of computer network or communications all of computers in network.

It is basically defined and described as physical and logical design of software, hardware, protocols, and media of data transmission.

The two type of network architectures are used :

- **Peer-to-Peer Network** :
Peer-to-Peer network in all the computer are linked together with equal privilege and responsibilities for processing the data. This type of network is useful for small environments usually up to 10 computers. Special permissions are assigned to each computer

for sharing the resources, but this can lead to a problem if the computer with the resource is down.

COMPUTER NETWORK ARCHITECTURE

Here if one computer stops working but other computer will not stop working because all computers are connected each other.

- **Client/Server Network** : It consists of two computers. Client computer and server computer. The client computer simply sends request to the

server computer, server executes the request and sends response to client computer.

It is also known as the client server architecture.

This architecture is a two tier architecture, which is divided into two layers.

The first layers located on the clients desktop and second layer is data base management layer located on the server machine.

A client/server network has a dedicated server that improve the overall performance of the whole system and also increase the speed of the sharing resources. It requires a dedicated network administrator to manage all the resources.

Evolution of Networking

Types of Computer Network:

A computer network is mainly four types :

- **Local Area Network (LAN)** Local area network is used in small area such as building, Office, which is connected to each other. LAN is used for connecting two or more personal computers through a communication medium such as twisted pair, coaxial cable etc. and the data is transferred at an extremely faster rate in local area network.

Each hosts in a LAN has an identifier, an address that uniquely defines the hosts in the LAN. A packet sent by a host to another host carries both the source host and the destination host address.

In the past, LAN network were connected through a common cable, which meant that a packet sent from one host to another was received by all host. But today, most LAN use a smart connecting switch, which is able to recognize the destination address of the packet and guide the packet to its destination without sending it to all other hosts.

- **Personal Area Network (PAN)** Personal area network is a network arranged within an individual person, typically within a range of 10 meters. This kind of network is used for connecting the computer devices of personal use is known as personal area network.

Thomas Zimmerman was the first research scientist to bring the idea of the personal area network.

Personal computer devices that are used to develop the personal area network are the laptop, mobile phone, media player and play stations.

There are two types of personal area network –

- Wireless personal area network which is used to wireless connection, low range network example – Wi-Fi, Bluetooth.
 - Wired personal area network is created by using the USB.
- **Metropolitan Area Network (MAN)** A metropolitan area network is a network that covers a larger geographic area by interconnecting a different LAN to form a larger network. The geographical

area covered by MAN is comparatively larger than LAN but smaller than WAN.

MAN is generally owned by private organizations and connected with the help of optical fibers, copper wires etc.

Government agencies use MAN to connect the citizens and private industries.

MAN is used in communication between the bank in a city, Air Line Reservation, and also used for communication in the military. The most common example of MAN is cable TV network within a city as show in Figure.

- **Wide Area Network (WAN):** WAN is a group of computers that are connected in a large area such as entire country etc., WAN is generally used for connecting two or more LANs through some medium such as leased telephone lines, microwaves, etc.

A wide area network provides a large geographical area. Suppose if the branch of our office is in a different city then we can connect with them through WAN. Which we can connect with another branch.

WAN is not limited to single location, but it spans over a large geographical area through a telephone line, fiber optic cable or satellite links.

WAN network has more security issues as compared to LAN and MAN network and WAN network needs firewall & antivirus for protect from virus.

LAN, MAN and WAN

Basis	LAN	MAN	WAN
Full-Form	LAN stands for Local Area Network	MAN stands for Metropolitan Area Network.	WAN stands for Wide Area Network.
Geographic span	Operates in small areas such as the same building or campus	Operates in large areas such as a city	Operates in larger areas such as country or continent
Ownership	LAN's ownership is private	MAN's ownership can be private or public.	While WAN also might not be owned by one organization
Transmission speed	The transmission speed of a LAN is high	While the transmission speed of a MAN is average	Whereas the transmission speed of a WAN is low.
Propagation delay	The propagation delay is short in a LAN.	There is a moderate propagation delay in a MAN	Whereas, there is a long propagation delay in a WAN
Congestion	There is less congestion in LAN	While there is more congestion in MAN	Whereas there is more congestion than MAN in WAN
Design & Maintenance	LAN's design and maintenance are easy	While MAN's design and maintenance are difficult than LAN	Whereas WAN's design and maintenance are also difficult than LAN as well MAN
Fault tolerance	There is more fault tolerance in LAN	While there is less fault tolerance	In WAN, there is also less fault tolerance

Network Topology

Network topology refers to the arrangement of computers connected in a network through some physical medium such as cable, optical fiber etc. Topology defines the structure of the network of how all the component are interconnected to each other.

The various types of network topology.

- Hierarchical Topology :** The hierarchical topology is also known as tree topology. Which is divided into different levels connected with the help of twisted pair, coaxial cable, or fiber optics. This type of topology is arranged in form of a tree structure in which top level contains parent node (root node). Which is connected with the child nodes in the second level of hierarchy with the point to point link. The second level nodes are connected to the third level nodes. Which in turn are connected to the fourth level nodes and so on. Except the top-level node each level node has a parent node.

The number of point-to-point links in the hierarchical type of topology is generally one less than the total number of nodes in structure.

The hierarchical topology is symmetrical, having a fixed branching factor associated with each node.

Tree topology is mainly used to provide broadband transmission, we can add new device to the existing network and easily managed and maintained. But some disadvantages of hierarchical topology difficult to troubleshoot the problem, devices required for broadband transmission are very costly and failure in main bus cable damage the overall network.

- Bus Topology :** Bus topology is all the nodes connected to the single cable known as a backbone cable. When a node communicates with the other nodes in the network, it simply sends a message to the common bus. It transmits the data from one end to another in a single direction.

Therefore the initial cost of installation is low because bus topology nodes are directly connected to the cable without passing through a hub. Coaxial or twisted pair cables are mainly used in bus-based networks that support up to 10 mbps and configuration of a bus topology is quite simpler as compared to other topology.

- **Star Topology :** In the star topology all nodes are connected to a common device known as hub. Nodes are connected with the help of twisted pair, coaxial cable or optical fiber.

Star topology is an arrangement of the network in which every node is connected to the central hub, or a central computer. The central computer is known as a server and the peripheral devices attached to the server know as clients. When a node wants to send the messages to the intended node. Each node in the network is connected with a point-to-point link to the centralized hub.

Star topology is most popular topology in network implementation and easy error deletion and correction, if the failure of one computer does not affect the other computers in the network. It supports a bandwidth of approx 100 mbps.

Some disadvantages of start topology like – if the central hub or switch goes down. Then all the connected node will not be able to communicate with each other, some time cable routing becomes difficult, when a significant amount of routing is required.

- **Ring Topology :** In the ring topology the node are connected in the form of a ring with help of twisted pair. Each node is connected directly to the other two nodes in the network. Ring topology is like a bus topology. The node which wants to send a message first, passes the message to its consecutive node in the network. Data is transmitted in the clockwise direction from one node to another. Each node has an equal to access other nodes in the network. Addition of new nodes does not degrade the performance of the network and easy to configure and install, but it is relatively expensive to construct the ring topology. It failure of one node in the ring topology affects the other nodes in the ring.

- **Mesh Topology :** In mesh topology each computer is connected to every other computer in point-to-point mode. There are multiple paths from one computer to another computer. It does not contain the switch, hub or any central computer, which acts as a central point of communication. Mesh topology is mainly used for 'WAN' implementations where communication failures are a critical concern. Mesh topology can be formed by using the formula Number of cables = $(n * (n - 1)) / 2$, when n is the number of node that represent the network.

Mesh topology is divided into two categories :

- (i) Fully connected mesh topology.
- (ii) Partially connected mesh topology.

In a fully connected mesh topology each computer is connected to all the available computer in the network and partially connected mesh topology, but certain computers are connected to those. Computers with which they communicate frequently.

It is very expensive to implement and difficult to configure and install.

- **Hybrid Topology :** The hybrid topology is the combination of the multiple topology. The hybrid topology is created two different network topology are inter connected.

If two ring topology are connected the resultant topology is not the hybrid topology but two or more different-different topology are connected (ring topology connected to the bus topology) then result topology is called the hybrid topology.

The hybrid topology is more effective as it uses multiple topology and contains the best and efficient features of the combined topology from constructed.

Network Transmission Mode :

Which data is transmitted from one device to another device is known as transmission or communication mode, each communication channel has a direction associated with it, and transmission media provide the direction. It is defined in the physical layer.

There are three types of transmission mode :

- (i) Simplex mode
- (ii) Half-duplex mode
- (iii) Full-duplex mode

(i) **Simplex Mode** : In simplex mode, the communication is unidirectional, the data flow in one direction. A device can only send the data but cannot receive it or it can receive the data but cannot send the data.

Keyboards and traditional monitors are example of simplex device the keyboard can only introduce input; the monitor can only accept output. Simplex mode can use the entire capacity of the channel to send data in one direction.

The simplex mode is used in the business filed as sales that do not require any corresponding reply.

(ii) **Half-duplex Mode** : In half-duplex mode, each station can both transmit and receive but not at the same time when one device is sending data then other device only can receive a walkie-talkie is an example of the half-duplex mode in Walkie-talkie if one party speaks and another party can listeners. After a pause the other speaks and first party listen in half-duplex mode. When one device is sending the data. Then another has to wait, this cause the delay in sending the data at the right time.

(iii) **Full-duplex Mode** : In full-duplex mode (also called duplex) both stations can transmit and receive simultaneously. In this mode data flow in both directions.

Full-duplex mode has two simplex channels one channel has traffic moving in one direction and another channel has traffic flowing in the opposite direction.

The most common example of full-duplex mode is telephone network, where to people are communicating with each other by telephone line, both can talk and listen at the same time.

Network Layers/Models :

The networking model describes the architecture, components, and design used to establish communication between the source and destination system. Aliases for network models include protocol stacks. Protocol suites, network stacks, and network protocols. There are 2 predominant models available.

- (i) Open systems interconnection (OSI) model
- (ii) Transmission control protocol/internet protocol (TCP/IP) model.

• **OSI Model** : OSI stands for open system interconnection. It is an open standard for establishing communication between systems. OSI is a reference model that describes how information from a software application in one computer moves through a physical medium to the software application in another computer.

OSI model was developed by the international Organization for standardization (ISO) in 1984, and it is now considered as an architectural model for the inter-computer communications.

This model consists of seven layers and each layer performs a particular network function and each layer is self-contained. So that task assigned to each layer can be performed independently.

OSI Model

The model upper layers mainly deals with the application related issues and they are implemented only in the software an upper layer refers to the layer

just above another layer and the lower layer of the OSI model deals with the data transport issues, data link layer and the physical layer are implemented in hardware and software.

- **Application Layer** : The application layer provides an interface. Through, which user can communicate and transfer data on the network.
- **Presentation Layers** : They presentation layer ensures the translation of characters from the original format in the host system to the format of the receiving system. It also adds encryption and decryption features. Data compression is handled at this layer.
- **Session Layer** : The session layer manages the communication between the computers on the network. This layer is responsible for notifying the errors. Which may have occurred in the above layers. Inclusion of this layer enables maintaining sessions during browsing and helps with implementing Authentication. Authorization Synchronization and Dialog control.
- **Transport Layer** : The transport layer is responsible for the delivery of packets in a proper sequence, it also provides proper rectification of error and manages the flow of packets over the network. Transport layer enables the following services Reliability, Flow-control, Congestion control, Multiplexing and De-multiplexing. It also ensures that data is properly delivered at the destination or not.
- **Network Layer** : The network layer is responsible for identifying the ways. Which is data transmitted over the network from one device to another device. The network layer directs the packets to the destination device based on the IP address of device. It detects the errors, which occur during the transmission of packets.
This layer is also responsible for breaking the large size packets into smaller packets when the device is unable to accepts the packets due to their large size.
- **Data Link Layer** : Data link layer main responsibility of the ensuring flow the reading of physical addresses. This layer specifies the action. Which must be performed to maintain the network communication. It collects the packets to form frames, which are transmitted over the network it also finds out and then corrects the errors. Which occur during the transmission of packets.
- **Physical Layer** : The physical layer describe all the physical requirements for the transmission of data, between devices on a network. Physical layer can specify the layout of pins, hub and cable. Network topology comes under this layer. This layer defines the relation between a single device and the transmission medium.

- **TCP/IP** : TCP/IP stands for transmission control protocol/internet protocol model. The TCP/IP model was initially developed by “US” Defence Advanced Research Projects Agency (DARPA). This model is also known as the internet reference model or DoD (Department of Defence) model. It consists of four layers.

The protocol is define in the IETF (Request for comments) EFC 791 and 793 many of the layers that we see in the OSI model are not available in the TCP/IP model.

TCP/IP model uses TCP in the transport layer and IP used in the network layer.

- **Application Layer** : In the TCP/IP model the application layer encompasses the first three layers in the OSI model, that is application layer, presentation layer, and the session layer.
The application layer is responsible for managing all the user interface requirements. Many of the protocols such as Telnet, FTP, SMTP, DNS, NFS, LPD and DHCP work on this layers.
- **Transport Layer** : This layer is the same as the one mentioned in the OSI model. Transmission control protocol (TCP) is used in this model. TCP ensures reliability and helps avoids congestion in networks. The transport layer is responsible for the delivery of packets or data grams, and it also hides the packet routing details from the upper layer.
The transport layer allows detection and correction of errors and helps to achieve end-to-end communication between devices. The transport layer connects the application layer to the network layer through two protocols TCP and UDP.
- **Network Layer** : The network layer is also known as internetworking layer or IP layer. It contains three protocols that perform different function.
 - (i) Internet Protocol (IP)
 - (ii) Internet Control Message Protocol (ICMP)
 - (iii) Address Resolution Protocol (ARP)
- (i) **Internet Protocol (IP)**: IP is a connectionless protocols that is responsible for the delivery of packets.
- (ii) **Internet Control Message Protocol (ICMP)** The ICMP protocol is responsible for reporting errors, sending, errors messages and controlling the flow of packets.

(iii) **Address Resolution Protocol (ARP)** It is responsible for determining the Media Access Control (MAC) address corresponding to an IP address.

- **Physical Layer** : The physical layer is responsible for collecting packets so that the frames, which are transmitted on the network, can be formed. It performs all the functions required to transmit the data on the network and determines the ways for accessing the medium through which data will be transmitted.

Networking Devices :

This hardware devices which are employed for establishing a connection of Fax Machines, Computers, Printers and other electronic equipment with that of the network are termed as network devices.

These devices can be either intra or interconnected type. Few of the devices are connected on the devices such as RJ45 connector and NIC cards, while few devices are installed on the devices like switches, gateway, router and others. Lets discuss all the networking devices in briefly.

- **Repeater** : A repeater Operates at the physical layer. Its job is to regenerate the signal over the same network before the signal becomes too weak or corrupted so as to extend the length to which the signal can be transmitted over the same network. Important point to be noted about repeaters is that they do not amplify the signal. When the signal becomes weak, they copy the signal bit-by-bit and regenerate it at the original strength.
- **Hub** : Hub is basically a multiport repeater, which connects multiple wires coming from different branches, for example– the connector in star topology which connects different stations. Hubs cannot filter data, so data packets are sent to all connected devices. Also, they do not have the intelligence to find out the best path for data packets which leads to inefficiencies and wastage.

Type of Hub :

- (i) **Active Hub** : These are the hubs that have their own power supply and can clean, boosts, and relay the signal along with the network. It serves both as a repeater as well as a wiring center. These are used to extend the maximum distance between nodes.
- (ii) **Intelligent Hub** : It works like active hubs and includes remote management capabilities. They also provide flexible data rates to network devices. It also enables an administrator to monitor the traffic passing through the hub and to configure each port in the hub.
- (iii) **Passive Hub** : These are the hubs that collect wiring from nodes and power supply from the active hub. These hubs relay signals on to the network without

cleaning and boosting them and can't be used to extend the distance between nodes.

- **Bridge** : A bridge, operates at the data link layer. A bridge is a repeater with add on functionality of filtering content by reading the MAC addresses of sources and destination. It is also used for interconnecting two LANS working on the same protocol.

Types of Bridges :

- (i) **Transparent Bridges** : These are the bridges in which the stations are completely unaware of the bridge's existence i.e. whether or not a bridge is added or deleted from the network, reconfiguration of the stations is unnecessary.

These bridges make use of two process i.e. bridge forwarding and bridge learning.

- (ii) **Source Routing Bridges** : In these bridges routing operation is performed by the source station and the frame specifies which route to follow. The host can discover the frame by sending a special frame called the discovery frame. Which spreads through the entire network using all possible paths to the destination.

- **Switch** : A switch is multiport bridge with buffer and a design that can boost its efficiency (a large number of ports imply less traffic) and performance. A switch is a data link layer device, that can perform error checking before forwarding data in other words, the switch divides the collision domain of hosts, but broadcast domain remains the same.
- **Routers** : Data can be forwarded and filtered based on a logical address by using a connective device called a router. A router is a device like a IP addresses. The router is mainly a network layer device, normally connect LAN's and WAN's together and have a dynamically updating routing table based on which they make decisions on routing the data packets.
- **Gateway** : A gateway, as the name suggests, is a passage to connect two network together that may work upon different networking models. They basically work as the messenger agents it, that take data from one system, interpret it, and transfer it to another system. Gateway are also called protocol converters and can operate at any network layer. Gateways are generally more complex switches or routers. Gateway is also called a protocol converter.
- **Brouter** : It also known as the bridging router, it is a device that combines features of both bridge and router. It can work either at the data link layer or a network layer.
- **NIC**: NIC stands for network interface card is a network adapter that is used to connect the computer to the network. It is installed in the computer to establish a LAN.

Data Communication Channels

Communication Channels are the medium that connects two or more workstations. Workstations can be connected by either wired media or wireless media. It is also known as a transmission medium.

Guided Media	Unguided Media
The signal energy propagates through wire in guided media.	The signal energy propagates through air in unguided media.
Guided media is used for point-to-point communication.	Unguided media is generally suited for radio broadcasting in all directions.
Discrete network topologies are formed by the guided media.	Continuous network topologies are formed by the unguided media.
Signals are in the form of voltage, current or photons in the guided media	Signals are in the form of electromagnetic waves in unguided media.
By adding more wires, the transmission capacity can be increased in guided media.	It is not possible to obtain additional capacity in unguided media.
Example of guided media are twisted pair wires, co-axial cables, optical fiber cables.	Example of unguided media are microwave or radio links and infrared light.

We can group the communication media into two categories.

(A) Guided media transmission

(B) Unguided media transmission

A. Guided Media Transmission : In this transmission medium, the physical link is created using wires or cables between two or more computers or devices, and then the data is transmitted using these cable in terms of signals. Type of guided media transmission :

(i) Twisted Pair Cable : It is used most common form of wire used in communication in a twisted pair cable, two identical wires are wrapped together in a double helix.

The twisting of the wire reduces the crosstalk. It is known as the leaking of a signal from one wire to

another due to which signal can corrupt and can cause network errors.

The twisting protects the wire from internal crosstalk as well as external forms of signal interference.

- **Unshielded Twisted Pair (UTP)** It is used in computer and telephones widely as the name suggest, there is no external shielding so it does not protect from external interference it is cheaper than STP.

- **Shielded Twisted Pair (STP)** It offers greater protection from crosstalk due to shield. Due shielding it protects from external interference. It is heavier and costlier compare to UTP.

(ii) Coaxial Cable : It consists of solid wire core that is surrounded by one or more foil or wire shields. The inner core of the coaxial cable carries ground. It is

widely used for television signals and also used by large corporations in building security systems. data transmission of this coaxial cable is better but it is expensive as compared to twisted pair.

(iii) **Optical Fibers** : Optical fibers is an important technology. It transmits large amounts of data at very high speeds due to which it is widely used in internet cables. It carries data as a light that travels inside a thin glass fiber. The fiber optic cable is made up to three pieces.

1. **Core** : Core is the piece through which light travels. It is generally created using glass or plastic.
2. **Cladding** : It is the covering of the core and reflects the light back to the core.
3. **Sheath** : It is the protective covering that protects fiber cable from the environment.

B. Unguided Media Transmission : The unguided transmission media is a transmission mode in which the signals are propagated from one device to another device wirelessly. Signals can wave through

the air. Water, or vacuum. It is generally used to transmit signals in all direction unguided media is further divided into various parts :

- **Microwave** : Microwave offers communication without the use of cables. Microwave signals are just like radio and television signals. It is used in a long-distance communication. Microwave transmission consists of a transmitter, receiver and atmosphere. In microwave communication, there are parabolic antennas that are mounted on the towers to send a beam to another antenna. The higher tower, greater the range.
- **Radio wave** : When communication is carried out by radio frequencies, then it is termed radio transmission. It offers mobility. It consists of the transmitter and the receiver, both use antennas to radiate and capture the radio signal.
- **Infrared** : It is short-distance communication and can pass through any object. It is generally used in TV remotes, wireless mouse etc.

Radio wave, Microwave and infrared waves

Basis	Radio wave	Microwave	Infrared wave
1. Direction	These are omni-directional in nature.	These are unidirectional in nature.	These are unidirectional in nature
2. Penetration	At low frequency they can penetrate through solid objects and walls but high frequency they bounce off the obstacle.	At low frequency, they can penetrate through solid objects and walls at high frequency, they cannot penetrate.	They cannot penetrate through any solid object and walls.
3. Frequency Range	Frequency range: 3 KHz to 1 GHz	Frequency range: 1 GHz to 300 GHz	Frequency range: 300 GHz to 400 GHz
4. Security	These offers poor security	These offers medium security	These offers high security.
5. Attenuation	Attenuation is high	Attenuation is variable	Attenuation is low
6. Usage Cost	Setup and usage cost is moderate	setup and usage cost is high	Usage cost is very less.

Measuring capacity of communication media

In data communication, the transmission medium is also known as channel. The capacity of a channel is the maximum amount of signals or traffic that a channel can carry. It is measured in terms of bandwidth and data transfer rate as described below.

Bandwidth- Bandwidth of a channel is the range of frequencies available for transmission of data through that channel. Bandwidth is measured in Hertz (Hz).

$$1 \text{ KHz} = 1000 \text{ Hz}$$

$$1 \text{ MHz} = 1000 \text{ KHz} = 1000000 \text{ Hz}$$

Data transfer Rate- Data transfer rate is the number of bits transmitted between source and destination in one second. It is also known as bit rate. It is measured in terms of bits per second (bps).

The higher units for data transfer rates are-

$$1 \text{ Kbps} = 2^{10} \text{ bps} = 1024 \text{ bps}$$

$$1 \text{ Mbps} = 2^{20} \text{ bps} = 1024 \text{ Kbps}$$

$$1 \text{ Gbps} = 2^{30} \text{ bps} = 1024 \text{ Mbps}$$

$$1 \text{ Tbps} = 2^{40} \text{ bps} = 1024 \text{ Gbps}$$

Important Questions Asked in Previous Years Examinations

1. Which of the following communication protocols is used to interconnect network devices on the internet?

(a) HTTP (b) FTP
(c) TCP/IP (d) WWW

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (c) : TCP/IP Transmission Control Protocol/Internet Protocol is an application layer protocol that enables application programs and Internet devices to exchange messages over a network.

2. A cell phone connected to a Bluetooth headset or a mobile computer connected to a portable Bluetooth thermal printer is an example of a _____.

(a) SAN (b) MAN
(c) PAN (d) LAN

EMRS H.W, 17.12.2023, Shift-I

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (c) : A cell phone connected to a Bluetooth headset or a mobile computer connected to a portable Bluetooth thermal printer is an example of a Personal Area Network (PAN). PAN is a computer network that is used to connect personal devices such as laptops, mobile phones, media players and play stations. This network was developed by Thomas Zimmerman. This network helps in communication.

3. Which of the following is a disadvantage of the Dial-up Internet Access method when compared with DSL and cable modem?

(a) Low speed (b) Limited perimeter
(c) Security risk (d) Expensive

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (a) : Dial-up Internet access is a low-speed Internet connection when compared with DSL (Digital Subscriber Line) and cable modem.

Dial-up connections use a standard phone line and analog modem to access the Internet at data transfer rates of up to approximately 56–64 Kbps. Dial-up connections are the cheapest way to access the Internet, but they are also the slowest connections.

4. Which of the following is a communication service provided by the internet?

(a) Gopher (b) Archie
(c) Telnet (d) FTP

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (c) : Telnet is an application layer protocol that enables one computer to connect to local computer. It is used as a standard TCP/IP protocol for virtual terminal service. It provides bi-directional text-oriented communication in the network.

5. Which of the following statements is false about HTTPS?

(a) It ensures protection against man-in-the-middle attacks
(b) Due to the use of encryption, communication between two hosts using HTTPS is secure

(c) It is more secure than HTTP
(d) It cannot be used for financial transaction

UPPCL Executive Assistant 29.11.2022, Shift-I

Ans. (d) : HTTPS is short form of Hyper Text Transfer Protocol Secure. It is secure version of the HTTP protocol which is used for communication between a web browser and a websites. HTTPS uses encryption protocols, such as SSL (Secure Sockets Layer) or its successor, TLS (Transport Layer Security) to establish a secure connection. It can be used for financial Transaction. So statement of option (d) is false about HTTPS.

6. Which one is a communication channel security protocol?

(a) SSL (b) SET
(c) S-HTTP (d) All of the above

Bihar STET Exam Date : 12.09.2023 (Shift-II)

Ans. (d) : Communication Channels Security Protocols are SSL, SET, S-HTTP. By default, the communication channels are not secure. To secure them, channels are configured to use the Secure Sockets Layer (SSL) protocol. SSL is a cryptographic protocol that provides security and data integrity for communications over TCP/IP networks. HTTP is a protocol or set of communication rules for client-server communication over any network. HTTPS is the practice of establishing a secure SSL/TLS protocol on an insecure HTTP connection. Before it connects with a website, user's browser uses TLS to check the website's TLS or SSL certificate.

7. Which layer protocol is in DNS internet architecture?

(a) Transport (b) Application
(c) Data Link (d) Network

UPPSC APS-2023, 07.01.2024

UPPCL Executive Assistant 29.11.2022, Shift-II

Ans. (b) : The full name of DNS is 'Domain Name System'. It converts domain names to IP addresses. The full name of OSI model is 'Open System Inter Connection. It was developed by ISO in 1984 and this model consists of 7 layers.

(i) Physical layer
(ii) Data link layer
(iii) Network layer
(iv) Transport layer
(v) Session layer
(vi) Presentation layer
(vii) Application layer

Protocols like HTTP, FTP, SMTP and NFS are used in the application layer. DNS is an application layer protocol in the internet architecture.

8. What does the Internet OSI Model stand for?

(a) Open System Interconnection Model
(b) Open Service International Model
(c) Open Space Internet Model
(d) Open Software Internet Model

UPPCL Asst. Account. 22.06.2023, Shift-I

Ans. (a): The OSI Stands for Open System Interconnection Model. It is a conceptual model from the International Organization for standardization (ISO) that provides a common basis for the coordination of standards development for the purpose of systems Interconnection.

9. **Protocols that require a logical connection to established between two devices before transferring data are called:**
- Connection-oriented protocols
 - Link-to-connection protocols
 - Data transfer protocols
 - Broadcasting protocols

UPPCL Assistant Accountant 22.06.2023, Shift-II

Ans. (a) : A connection-oriented protocols is a communication protocol that established a reliable/dedicated connection between two devices before transmitting data.

10. **Consider the following communication technologies:**
1. Closed-Circuit Television
 2. Radio Frequency Identification
 3. Wireless Local Area Network
- Which of the above are considered Short-Range devices/technologies?**
- 1 and 2 only
 - 2 and 3 only
 - 1 and 3 only
 - 1, 2 and 3

IAS (Pre) 05.06.2022

Ans. (d) : Closed Circuit Television (CCTV), Radio Frequency Identification and Wireless Local Area Network (WLAN) are all communication technologies. **CCTV-** It is known as video surveillance. It transmits the signal to a specific location using a video camera. **RFID-** It uses electromagnetic fields to automatically identify and track the tag attached to the object. It consists of a small radio transponder, radio, receiver and transmitter. **WLAN-** WLAN is a type of wireless local network that connects two or more devices together.

11. **Which of the following statement are correct?**
- GSM mobiles support the transmission of both data and voice.**
 - In CDMA mobiles, customer information is stored in the headset or phone**
- Only (i)
 - Both (i) and (ii)
 - Neither (i) nor (ii)
 - Only (ii)

NVS Junior Secet. Assist. 09.03.2022 (Shift-II)

Ans. (b) : GSM stands for Global System for Mobile communication. It is a digital cellular technology whose used to transmit mobile voice and data services. CDMA stands for Code Division Multiple Access. CDMA based devices do not require a SIM card, it uses an ESN (Electronic Serial Number). In CDMA mobile, the customer's information is stored in his/her headset or phone. Hence, both the given statement are correct.

12. **Which of the following statement is wrong?**
- Congestion control protocols ensure that the sender cannot send data faster than the limit on which the receiver can receive data.**
 - Flow-control protocols ensure that the sender cannot send data faster than the network can transmit data.**
- Neither (i) nor (ii)
 - Both (i) and (ii)
 - Only (ii)
 - Only (i)

UPPCL AC 2019 (Exam Date 29.01.2019)

Ans. (b) : Flow control in data communication is the process of managing the rate of data transmission between two nodes by preventing a faster sender from over whelming a slower receiver. Provides a mechanism for the receiver to control the transmission speed by which the sender is able to transmit data through the network. Cannot sent data faster than a limit. Congestion-control protocols have a problem that can occur at any time in a packet switched network. This can happen when there are too many packets in a subnet within the network. This a situation arising in the network layer where the message traffic is so high that it significantly slows down the response time of the network.

13. **Which of the following statements is/are FALSE.**
- The full form of SIM used in mobile phones is Subscriber Identity Module.**
 - The size of micro and nano SIM cards is the same.**
- Neither (i) nor (ii)
 - Both (i) and (ii)
 - Only (ii)
 - Only (i)

NVS Junior Secretariat Assistant 09.03.2022 (Shift-I)

Ans. (c) : The full form of SIM is Subscriber Identity Module. It is used in mobile phone. Micro sim card is the smaller form of regular sim card and nano sim card has the smallest size. Hence, statement (ii) is wrong.

14. **The full form of SIM is?**
- Subscriber Identity Module
 - Subscriber Identity Machine
 - Self Identity Machine
 - Self Identity Module

(U.P.P.C.S. (Pre) 2012)

Ans : (a) SIM stands for Subscriber Identity Module.

15. **Which one of the following is not from the GSM family of wireless technology?**
- EDGE
 - LTE
 - DSL
 - EDGE and LTE both

(IAS (Pre) G.S. 2010)

Ans : (c) GSM (Global System for Mobile Communication) includes both EDGE and LTE in wireless technology, while DSL is used by telephone lines to transfer data.
EDGE - Enhanced Data rate for GSM Evolution
LTE = Long Term Evolution
DSL = Digital Subscriber Line

16. **Information Technology can be defined as–**

- (a) Computers + Connectivity
- (b) Computers + Network
- (c) Hardware + Software
- (d) Connectivity + Hardware

Jharkhand PCS (Pre) G.S. Ist 2016

Ans : (d) Information technology can be defined in term of connectivity and hardware. Information technology on computer passed information system. Information technology has become an integral part of commerce and trade in the present times.

17. **Servers are computers that provide resources which are connected to a...**

- (a) Client
- (b) Network
- (c) Super Computer
- (d) Mainframe

SSC JE Civil - 29/01/2018 (Shift-I)

MPPCS (J) 2018 Shift-II

MPPCS (J) 2016

MPPCS (J) 2012

Ans. (b) : Server is a computer program or computer machine that provides various services to each computer connected to the network. The purpose of a server is to share data or hardware and software resources among its users.

18. **A device that provides functionality for other programs or devices that called client.**

- (a) Intranet
- (b) Dongle
- (c) Thermostat
- (d) Server

Cane Supervisor (31-08-2019)

Ans:(d) A Server is a computer program or device that provides a service to another computer program and its user, also known as the client.

19. **Which of these establishes communication between servers and work stations?**

- (a) Interspace
- (b) Backbone
- (c) Terminal Access Point
- (d) Gateway

UPPCL ARO-18.02.2018

Ans. (c): Terminal Access Point servers to establish connectivity between different server and work locations, so that data can be changed.

20. **In mobile device security, a/an _____ extends a private network across a public network.**

- (a) VPN (Virtual Private Network)
- (b) endpoint protection
- (c) secure web gateway
- (d) email security

UPPCL TG-2 03.11.2023, Shift-I

Ans. (a) : VPN (Virtual Private Network) Extends a private network into a public network in a mobile device security, It provides the facility to conduct online activities with privacy and security.

21. **Which of the following extends a private network to a public network?**

- (a) Wide area network
- (b) Virtual private network
- (c) Enterprise private network
- (d) Local area network

UPPCL TG-II 19-03-2021 (Shift-I)

Ans. (b) : VPN is the short form of Virtual Private Network. It is an encrypted connection from a device to a network and the internet. VPN, are an extension of a private network to a public network. This technology is widely used in the corporate environment.

22. **Which of the following terms best describes the process of interconnecting two or more networks to form a single large network?**

- (a) Merging
- (b) Intranet
- (c) Virtualization
- (d) Internetworking

UPPCL AC 2019 (Exam Date 29.01.2019)

Ans. (d) : Internetworking is made up of two words. Inter and networking which means connection between completely different nodes or segments. This connection unit is established through interconnecting devices similar to routers or get ways. This interconnection is often between public, private, commercial, industrial or government networks. Internetworking refers to the business, products and process that are connected to intermediate networking devices that act as avast network, which meets the challenge of creating and administering the internetwork.

23. **The system is designed to create or prevent unauthorized access to private networks.**

- (a) Server
- (b) Packet
- (c) Firewall
- (d) Webpage

RRB JE CBT-II 28-08-2019

(morning)

Ans. (c): Firewall systems are designed to prevent unauthorized access to a private network.

24. **What is use of ping command in computer?**

- (a) To test the power supply
- (b) To test the ability of the source computer to reach of specified destination computer.
- (c) To test for any fault in the computer hardware.
- (d) To check for network related problems.

Village development officer - 23-12-2018 (shift- II)

Ans : (b) Ping is a CMD command in a computer network to find out whether the network device is accessible or not. For this the host sends a message and sees after how much time the message is being received again.

25. **Geometric arrangement of devices on the network is called _____**

- (a) LAN
- (b) media
- (c) protocols
- (d) topology

ARO Alld. HC, 20.12.2021, Shift-II

Ans. (d) : Network topology in a network references the geometrical arrangement of real physical organization in computer and other network devices. Topology is included in devices such as switch and router software by varing based on cost and efficiency.

26. **Which of the following refers to a set of rules for routing and addressing packets of data so that they can travel across a network and reach the correct destination?**

- (a) Model (b) Topology
(c) Protocol (d) Architecture

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (c) : The Internet Protocol is a protocol or set of rules, for routing and addressing packets of data so that they can travel across networks and arrive at the correct destination.

27. Which of the following activities is not related to the way search engine work?

- (a) Ranking (b) Crawling
(c) Routing (d) Indexing

UPPCL TG-2, 17.11.2023, Shift-I

Ans. (c) : Search engine work through three primary functions crawling indexing and ranking.

During the crawling stage, search engine bots, also known as spiders, scan web pages and follow links to discover new content the next stage is indexing, After crawling, the search engine stores and organizes the content found during the crawling process ranking search engines provide the most relevant result to a user's query by ranking the indexed content while routing is the process of directing network traffic between different nodes on a network.

28. In the abbreviation HTTPS, what is the full form of the second 'T'?

- (a) Truncation (b) Termination
(c) Transition (d) Transfer

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (d) : The full form of HTTPS is Hyper Text Transfer Protocol secure. This is an extended secure version of HTTP. It is used for secure communication on computer network.

29. Which of the following statements are correct?

- (i) TCP/IP is more reliable than OSI.
(ii) TCP/IP does not have very strict boundaries between layers.

- (a) Both (i) and (ii) (b) Neither (i) nor (ii)
(c) Only (ii) (d) Only (i)

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (a) : (i) TCP/IP is more reliable than OSI.
(ii) TCP/IP does not have very strict boundaries between layers.
Hence, the both statements are correct.

30. TCP provides a _____ data stream between remote applications.

- (a) Reliable, two-way (b) Reliable, one-way
(c) Unreliable, one-way (d) Unreliable, two-way

UPPCL Executive Assistant 29.11.2022, Shift-I

Ans. (a) : TCP stands for Transmission Control Protocol. It is a group of Internet protocol. It is used for data transmission in communication networks such as the Internet. It provides a two way data stream between remote application.

31. With respect to TCP/IP, what is the full form of TFTP?

- (a) Trivial File Transfer Protocol
(b) Triangular File Transmission Protocol
(c) Trivial File Transfer Page
(d) Triangular File Transfer Protocol

UPPCL Assistant Accountant 22-02-2022 (Shift-I)

Ans. (a) : Trivial File Transfer Protocol (TFTP) is a simple protocol for exchanging files between two TCP/IP machines. TFTP servers allow connections to TFTP clients to send and receive files.

TFTP - Trivial File Transfer Protocol

TCP/IP- Transmission Control Protocol/Internet Protocol

32. IMAP protocol is used in:

- (a) E-mails (b) Image processing
(c) Encryption (d) File transfer

UPPCL Stenographer Exam-18.02.2018

Ans. (a) : IMAP (Internet Message Access Protocol) is a protocol used for retrieval and storage of emails via TCP/IP connections to email servers. It is an application layer protocol based on the OSI model.

33. Which of the following protocol (TCP/IP) handles the exchange of messages between e-mail services on a network?

- (a) FTP (b) HTTP
(c) SMTP (d) TELNET

UPPCL TG-II 19-03-2021 (Shift-I)

Ans. (c): SMTP is the short form of Simple Mail Transfer Protocol. There is a set of SMTP communication guidelines. Software that allows to transmit electronic mail over the internet allows. SMTP is used to send messages to other computer users based on e-mail addresses.

34. What is the meaning of the term TCP/IP?

- (a) Transmission Control Protocol/Internal Protocol
(b) Transmission control protocol/Internet protocol
(c) Transport control protocol/Internet protocol
(d) Transmission control permission/Internet protocol

UPPCL TG-II 28-3-2021 (Shift-I)

Ans. (b) : TCP/IP is the short form of the Transmission Control Protocol/Internet Protocol. TCP ensures end to end delivery of data to different nodes. TCP works in conjunction with IP. Before transferring data, TCP establishes a connection between the source and the destination.

35. Which of the following is not a valid IP address?

- (a) 200.200.256.200 (b) 90.90.90.90
(c) 100.100.100.100 (d) 10.10.10.10

EMRS JSA-17.12.2023

APS All India HC, 3.12.2021, Shift-I

UPPCL TG-II 28-3-2021 (Shift-I)

Ans. (a) : An IP address is a unique address that identifies a device on the internet and local network. It is string of numbers separated by a period (.). Four integers from zero to 255 are used in IP address 200.200.256.200 is an invalid IP address because 256 has been used in this which violates its rule.

36. In computing, _____ is a network security system that monitors incoming and outgoing network traffic based on predefined security rules :

- (a) Firewall (b) Network switch
(c) Router (d) Gateway

ARO Alld. HC, 06.01.2022, Shift-I
ARO Alld. HC, 14.12.2021, Shift-II

SSC JE Civil – 23/03/2021 (Shift-I)
SSC CHSL (Tier-I) –09/07/2019 (Shift-II)

Ans. (a) : A firewall is a security system that monitors and controls incoming and outgoing network traffic based on a set of predefined rules. It acts as a barrier between a trusted secure network and an untrusted network such as the internet.

There are different types of firewall.

- Packet filtering firewall
- Stateful firewall
- Application-level firewall
- Next-generation firewall (NGFW)
- virtual firewall

37. A _____ is a computer, appliance, or router that sits between the trusted and untrusted systems.

- (a) hub (b) switch
(c) firewall (d) bridge

(SSC CPO (TIER-I) 2016)

Ans : (c) See the explanation of the above question.

38. Which of the following options correctly defines a firewall (in the context of computing)?

- (a) It is a hardware device
(b) It is the name of a software
(c) It is a combination of both, software and hardware devices to permit or deny network transmission based on a set of rules
(d) It is a combination of software and hardware-based devices to permit any and every network transmission

SSC CHSL 18/03/2020 (Shift-III)

Ans. (c) : In computing, a firewall is a network security system that monitors incoming and outgoing network traffic based on predefined security rules. Firewalls are after used to prevent unauthorized Internet users from accessing private networks connected to the Internet. Firewalls can be hardware software or a combination of both.

39. Which of the following statements about firewall (in the context of computing) is incorrect?

- (a) It is a combination of both, software and hardware devices.
(b) It is frequently used to protect a computer network from unauthorised access.
(c) It is unable to permit legitimate communication to pass
(d) It permits network transmission based on a set of rules.

SSC CHSL 12/10/2020 (Shift-III)

Ans.: (c) Firewall permits the legitimate communication to pass. Hence statement of option (c) is incorrect. A firewall is a system to protect the computer, which protects all type of computers and their networks

from hackers and malware. Which secretly comes our computer and transmits all the personal details to the hackers sending that software, who take wrong advantage of it.

40. A firewall is

- (a) an established network performance reference point
(b) a network security system designed to isolate a private network from a public network
(c) a virus that infects macros
(d) a predefined encryption key used to encrypt and decrypt data transmissions

UPPCL Assist. Acct. 2016 (Exam date 20.11.2016)

Ans. (b) A firewall is a network security device that monitors incoming and outgoing network traffic and decides whether to allow or block specific traffic based on a defined set of security rules.

41. Which of the following is a low power, local area wireless communication technology?

- (a) Bluetooth (b) Wi-Max
(c) Ethernet (d) Cellular network

[UPSSSC Lower Mains 21/10/2021 Paper-I]

Ans. (a): Bluetooth is a wireless technology that allows devices to connect and work together.

It uses short-range radio waves to exchange data between devices over short distance. Inventor of Bluetooth is Jaap Haartsen. Ethernet is a family of computer networking technology that uses cables to connect devices to the internet.

42. Which of the following statements is/are true regarding data communication?

- (i) It is simply the act of sending or receiving text messages.
(ii) Protocol is set of rules which one to be followed by sender and receiver at the time of the data communication.
(a) Both (i) and (ii) (b) Neither (i) or (ii)
(c) Only (ii) (d) Only (i)

UPPCL Executive Assistant 28.11.2022, Shift-I

Ans. (c) : Data communication is a process in which digital data and analog are exchanged between two or more computers. Messages can contain text, number, picture, audio, video etc. Hence statement (ii) is true.

43. Which of the following is the transmission control protocol/Internet Protocol (TCP/IP) that specifies how computers will exchange electronic mail?

- (a) Simple Mail Transfer Protocol (SMTP)
(b) Hypertext Transfer Protocol (HTTP)
(c) User Database Protocol (UDP)
(d) File Transfer Protocol (FTP)

UPPCL TG-II 27-03-2021 (Shift-I)

Ans. (a) : SMTP (Simple Mail Transfer Protocol) is an application that is used to send, receive outgoing e-mails between sender and receiver. When an e-mail is sent, it uses the SMTP protocol. This protocol specifies the exchange of e-mail.

44. A TCP is a ____ protocol, while UDP is a ____ protocol.

- (a) Connection - oriented - connection - less
- (b) Application - layer connection - oriented
- (c) Connection - less connection - oriented
- (d) Connection - less application - layer

UPPCL Executive Assistant-21.11.2022, Shift-I

Ans. (a) : A TCP is connection - oriented protocol while UDP is connectionless protocol.

TCP is reliable for maintaining a connection between sender and receiver UDP is connection less and due this it is unreliable to transfer data.

45. In which layer of the Internet architecture do various protocols included for building Internet services?

- (a) Application
- (b) TCP
- (c) IP
- (d) Physical

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (a) : The Internet architecture is a meta-network that refers to a group of thousands of separate networks interacting with a common protocol. It is application layer which includes various protocols for building Internet services such as email (SMTP), file transfer (FTP), transfer of hypermedia pages, transfer of distributed databases (World Wide Web) etc.

46. Which layer of internet architecture includes protocols that provide services like SMTP and FTP?

- (a) Data link
- (b) IP
- (c) Application
- (d) TCP

UPPCL Executive Assistant 28.11.2022, Shift-II

Ans. (c) : Application layer is the 7th layer of the OSI model. This layer uses protocols like HTTP, FTP, SMTP and NFS etc.

47. What is TCP/IP in nature?

- (a) It is a kind of router hardware.
- (b) It is a protocol
- (c) It is a kind of router software
- (d) It is an email service

UPPCL Assistant Accountant 31.07.2023, Shift-I

Ans. (b) : TCP/IP, stands for Transmission Control Protocol/Internet Protocol, is a suite of communication protocols that underlies the internet and most local area networks. It provides the foundation for data transmission and connectivity in modern computer networks.

48. The layers of the TCP/IP protocol are:

- (a) transport layer and network layer
- (b) application layer, data link layer, transport layer and network layer
- (c) data link layer, and network layer
- (d) application layer, data link layer, transport layer, network layer and hardware layer

NVS PGT 19.09.2019 (Shift-I)

Ans. (d) : The TCP/IP suite of protocol can be understood in terms of layers (or levels). This figure shows the layers of the TCP/IP protocol. The names of the layers are application layer, Transport layer, network layer, Network interface layer and hardware.

TCP/IP defines how information travels from sender to receiver.

The network interface layer is responsible for adding or removing any link layer protocol headers that are required for the message to reach its destination the network adapter device driver controls the network adapter card. A network interface is usually associated with a network adapter.

49. Which of the following is a well - known protocol for data communication over the Internet?

- (a) HTTP
- (b) SMTP
- (c) SNMP
- (d) TCP/IP

UPPCL Executive Assistant 23.11.2022, Shift-I

Ans. (d): The full form of TCP/IP is Transmission Control Protocol/Internet Protocol. It is a set of rules and procedures that govern how the Internet works. Hyper Text Transfer Protocol (HTTP) is an application layer stateless protocol used for file transfer.

Simple Mail Transfer Protocol (SMTP) is used to send and receive e-mail. Simple Network Management (SNMP) is a popular protocol for network management.

50. What is the network byte order used in TCP/IP?

- (a) Middle Endian
- (b) Random
- (c) Big Endian
- (d) Little Endian

UPPCL Assist. Acct. 24.02.2022 (Shift-I)

Ans. (c) : The network addresses in a given network must all follow a consistent addressing convention. This convention know as network byte order, defines the bit-order of network addresses as they pass through the network. TCP/IP standard network byte order is big-Endian.

51. GPRS is basically the standard-bearer of:

- (a) 2.5G technology
- (b) 3G technology
- (c) 4G technology
- (d) 2G technology

EMRS PGT CS, 16.12.2023, Shift-II

Ans. (a) : GPRS is basically the standard bearer of 2.5G technology. It is a packet switched type of network in which the billing depends on the total data transferred. It lets its users develop a direct connection over the internet.

52. Which among the following wireless standard is used in 4G network technology?

- (a) GPRS
- (b) LTE
- (c) VPN
- (d) WAP

UPASI 05.12.2021 (Shift-II)

Ans. (b) : LTE (Long Term Evolution) wireless standard is used in 4G network technology. Which provides increased network capacity and speed for cell phones and other cellular devices as compared to 3G.

53. Which of the following technologies is the oldest?

- (a) NSFnet (b) ARPANET
(c) Interspace (d) Internet

UPPCL APS Exam-18.02.2018

Ans. (b) : ARPANET is a wide area network invented by ARPA in 1969. This is an American Institution. ARPANET was the world's first network in which TCP/IP model was used.

54. There are an established set of rules that determine how data is to be transmitted between different devices in the same network. Essentially, it allows connected devices to communicate among themselves, regardless of differences in their internal processes, structure or design?

- (a) Network Software
(b) Network Protocol
(c) Network Media
(d) Network Operating System

Com. Asst. Alld. HC, 21.12.2021, Shift-I
[UPSSSC Computer Operator 10/01/2020]

Ans. (b) : A network protocol is the set of established rules that determine how data is transmitted between different devices in the same network. The criteria used to define the method of changing data over a computer network is known as protocol.

55. Which of the following connection used phone lines which carry digital signals instead of analog signals?

- (a) DSL (b) Wi-Fi
(c) Dial-up (d) Satellite

UPPCL TG-2, 17.11.2023, Shift-I

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (a) : Digital Subscriber Line (DSL) is a communication medium which is used to transfer the digital signal through phone line.

56. Which protocol determines how to transform a stream of bytes in an IP packet while ensuring the quality of transport of this IP packet with reference to internet architecture?

- (a) IP (b) ARP
(c) TCP (d) DHCP

EMRS JSA, 17.12.2023, Shift-II

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (c) : TCP stands for Transmission Control Protocol. All networks and protocols work on the TCP/IP model. This protocol determines how to transform the stream of bytes in an IP packet while ensuring the quality of transport of IP packets in the context of the Internet architecture.

57. Which of the following statements is/are true about data communication?

- (i) It is an action of sending or receiving data.
(ii) In data communication, a protocol is a hardware that transfers messages from the sender to the receiver.

- (a) Only (i) (b) Only (ii)
(c) Both (i) and (ii) (d) Neither (i) nor (ii)

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (a) : Data communication refers to the process of transmitting and receiving data or information between two or more devices or systems using various methods and mediums. So, statements (i) is correct and Protocol is not a hardware, Therefore statements (ii) is incorrect.

58. Find out whether the given statements are true or false regarding the Internet.

(i) The effectiveness of data transmission depends greatly on the computer used to send and receive the data.

(ii) The internet can be viewed as two major components: network protocols and hardware.

- (a) (i) - False, (ii) - False
(b) (i) - True, (ii) - True
(c) (i) - False, (ii) - True
(d) (i) - True, (ii) - False

UPPCL Executive Assistant 28.11.2022, Shift-II

Ans. (c) : (i) The effectiveness of data transmission depends on delivery, accuracy, timeliness and Jitter. Hence the statement (i) is false.

(ii) The Internet can be seen as two major components. Network protocols and hardware Hence statement (ii) is true.

59. Select the INVALID type of wireless communication medium.

- (a) Optical fiber (b) Broadcast radio
(c) Satellite (d) Infrared

EMRS PGT CS, 16.12.2023, Shift-II

UPPCL Assistant Accountant 22.06.2023, Shift-II

Ans. (a) : Optical fiber is a wired communication medium optical fibers are used to connect computers and other devices in high-speed networks.

60. In an optical fiber the signal is transmitted

- (a) In a straight line path
(b) In a curved path
(c) Due to total internal reflection
(d) Due to refraction

(SSC CGL (TIER-I) 01-09-2016, 1.15 pm)

Ans : (c) In the optical fiber the signal is transmitted due to total internal reflection. Time division multiplexing is used for data transfer in the optical fiber, in which the noise is less, the bandwidth is higher, the faster speed and the faster the signals. Loss is minimum.

61. Optical fiber works on the principle of:

- (a) total internal refraction
(b) tyndall effect
(c) laser technology
(d) total internal reflection

NVS PGT 19.09.2019 (Shift-I)

Ans. (d) : See the above question explanation.

62. A set of wires through which data is transmitted from one part of the computer to another is called.

- (a) Bus (b) Add on card
(c) Port (d) Channel

S.S.C. Stenographer (grade C & D) Exam. 2012

Ans : (a) Bus is a communication system that transfer data between components inside a computer, or between computers.

63. Which among the following is used to transmit data in optical fiber?

- (a) Vibrations (b) Light
- (c) Sound (d) Electrical current

SSC JE Electrical (Exam date 29.01.2018) Shift-II

Ans. (b) : Optical fibers use light to transmit data, specifically pulses of light these pulses carry the information encoded onto them, allowing for high speed and high-bandwidth communication.

64. The full form of Wi-Fi is _____.

- (a) Wired Files (b) Wireless File
- (c) Wireless Finder (d) Wireless Fidelity

UPPCL ARO-18.02.2018

Ans. (d) : The full name of Wi-Fi is Wireless Fidelity. It is a Wireless technology through which we use internet and network connection without wire.

65. Which among the following is NOT true with reference to wireless networks?

- (a) Wireless means without wire, media that is made up of electromagnetic waves (EM Waves) or infrared waves
- (b) They are more secure and hence reliable when compared to wired networks.
- (c) Installation is quick when compared to wired networks
- (d) Slow transmission speed when compared to wired networks

UPRVUNL Asst. Acct. 15.05.2022 (Shift-II)

Ans. (b) : Wireless means without wire, Media composed of electromagnetic waves or infrared waves. Antennas or sensors will be present on all wireless devices compared to wired networks. Wireless networks have slow transmission speeds. It is less secure than wired and therefore less reliable. Wireless network installation and maintenance costs are low.

66. Which of the following cables transmits data as a light beam?

- (a) Serial cable (b) Fiber optic cable
- (c) Co-axial cable (d) Ethernet cable

(AHC RO/ARO-2014)

Ans : (b) Fiber optic cable transmits data in the form of light beam.

67. Which of the following is the fastest mediums for network communication?

- (a) Coaxial cable (b) Fiber optic cable
- (c) Twisted pair cable (d) Radio cable

UPP Computer Operator 21-12-2018 (Batch-02)

Ans: (b) An optical fiber cable is a marvel of modern technology that transmits information using pulses of light instead of electricity.

Benefits: High speed, low latency, high capacity, reliability and security.

68. Which of the following statements is NOT true about twisted pair cable?

- (a) The two wires are typically 'twisted' together in a helix to reduce interference between the two conductors.
- (b) Data rate is determined by wire thickness and length.

(c) Twisted pair can be used for both analog and digital communications.

(d) One of their most popular use is in cable TV (CATV) for the distribution of TV signals.

NVS PGT 19.09.2019 (Shift-I)

Ans. (d) : Cable television (CATV), also known as community antenna television, is a system for delivering television programming to viewers via radio frequency (RT) signals sent through coaxial cable. Twisted pair cable is a type of communications cable that consists of pairs of insulated wires twisted together. This twisting helps to reduce electromagnetic interference (EMI) and crosstalk, which can disrupt the transmission of data or voice signals.

69. Which of the following scientific principal is appropriate behind the working of optical fiber?

- (a) total internal reflection of light
- (b) total external reflection of light
- (c) total internal refraction of light
- (d) total external refraction of light

Lower-II (Re-exam) (28-07-2019)

Ans. (a) : Optical fiber is one such system of transmission. In which the information is transmit from one place to another through optical fiber through light pulses are sent as it works on the principle of total internal reflection of light.

70. Optical fiber for data communication relies on power requirements, which facilitates ultra-high-speed internet connections that are capable of handling high bandwidth.

- (a) Electricity (b) Light
- (c) Electron magnetism (d) Magnetism

[UPSSSC Computer Operator 10/01/2020]

Ans. (b) : In Optical fiber there is no transmission of electricity but transmission of light. It is based on total internal reflection.

71. Four types of channels used in data communication of LAN are twisted pair cable, coaxial cable,.....and radio waves:

- (a) ISDN cable (b) PSDN cable
- (c) X-ray waves (d) Fiber optics

(UPPCL TG2 11-11-2016)

Ans : (d) There are four system used in data transmission of LAN Twisted pair cable, Coaxial cable, Fiber optic cable (all three physical connections) and radio waves (micro web media). Optic fiber cable is the latest technology of communication media in which data is sent by laser devices at the speed of millions of bits per second.

72. In December 1977, the first installation of LAN technology was done at _____ in New York.

- (a) Chase Manhattan Bank
- (b) NYU Federal Credit Union
- (c) Capital One Bank
- (d) First Republic Bank

UPPCL TG-2, 10.11.2023, Shift-I

UPPCL TG-2, 03.11.2023, Shift-I

Ans. (a) : Local Area Network (LAN) is a network established in a local area, in which many computers and their related devices are connected to each other. In December 1977 LAN technology was first installed at Chase Manhattan Bank in New York.

73. Which is the transmission medium used to transmits internet traffic at a speed of.

- (a) Co-axial only
- (b) ISDN
- (c) Satellite Network Service
- (d) Fiber optic

UPPCL TG-II (20-03-2021) (Shift-II)

Ans. (d) : Fiber optic transmits internet traffic at the speed of light.

74. Which of the following Internet access methods uses Wi-Fi technology which enables electronic devices to connect to the internet or exchange data wirelessly through radio waves?

- (a) ISDN
- (b) Wi-fi hotspots
- (c) Cable
- (d) Dial-up

UPPCL Executive Assistant 29.11.2022, Shift-II

Ans. (b) : Hotspots utilize Wi-Fi technology, which allow electronic devices to connect to the Internet or exchange data wirelessly through radio waves.

75. Which of the following methods cannot be used for Data Transfer between two computers?

- (a) Hi-Fi
- (b) Wi-Fi
- (c) LAN Cable
- (d) Memory Stick

MPPCS (J) 2018 Shift-I

Ans. (a) : Wi-Fi, Memory stick, LAN cable etc. methods are used to transfer data between two computers, while Hi-Fi is used for high quality of sound.

76. Which of the following statements is true?

- (a) Broadband has great portability than Wi-Fi.
- (b) Broadband is more expensive than Wi-Fi.
- (c) Wi-Fi relies on the original devices that produce the internet.
- (d) More network blocking can be faced in broadband.

UPPCL Technician Electrical, 10.11.2023, Shift-II

Ans. (c) : The option (a), (b) and (d) are false because Wi-Fi has great portability and less expensive than Broadband.

Wi-Fi relies on the original devices that produce the internet. Less network blocking can be faced in broadband.

77. The network cable which is commonly used to connect one computer to another computer is.....

- (a) Crossover cable
- (b) USB cable
- (c) VGA cable
- (d) Straight-through cable

UPASI 04.12.2021 (Shift-I)

Ans. (a) : Crossover cable connects two devices of the same type like DTE-DTE or DCE- DCE.

78. CSMA is a method which was developed to decrease the chances of collisions when two or more stations start sending their signals over the data link layer. What does CSMA stand for?

- (a) Carrier Sense Multiplexed Access
- (b) Carrier Signal Modulated Access
- (c) Carrier Signal Multiplexed Access
- (d) Carrier Sense Multiple Access

UPPCL-JE 31-01-2019 (Batch -01)

Ans: (d) CSMA stand for Carrier Sense Multiple Access, which was developed to reduce the possibility of collision when two or more stations start sending their signals over the data link layer.

79. What do you call the range of frequencies contained in a composite signal?

- (a) Signal Strength
- (b) Signal Weight
- (c) Signal Width
- (d) Bandwidth

UPPCL-JE 31-01-2019 (Batch -01)

Ans: (d) The range of frequencies contained in a composite signal is called bandwidth. If you want better communication and Video, Audio than mobile then bandwidth should be hard.

80. _____ it is a measure of the amount of data that can be transmitted over a network at any given time.

- (a) Cash
- (b) Caliber
- (c) badge
- (d) Bandwidth

UPSSSC Mandi Prasad - 30-05-2019 (Shift-I) (Shift-I)

Ans : (d) Bandwidth is the measure of the data that can be transmitted over the network in a given time. Band width is measured in "bits/second". Processes data better due to higher bandwidth. Communication becomes possible because more bandwidth.

81. In a digital communication system, if you want to increase noise immunity then we need to increase.....

- (a) Signal repeater
- (b) Signal Antenna
- (c) Signal power
- (d) Battery power

UPASI 05.12.2021 Shift-I

Ans. (c) : Signal power, in order to increase the noise resistance in digital communication system, it is necessary to increase the signal power. To achieve a certain level of fidelity, the signal strength must be increased, depending on the particular type of modulation.

82. With the growth of the Internet, a wide range of _____ have transformed social relationships, education and the dissemination of information.

- (a) Information and Communication Technologies
- (b) Financial Services
- (c) Storage Services
- (d) Security Services

UPPCL APS 27-09-2018 (Evening)

Ans : (a) Information and Communication Technology (ICT) is a multi-faceted term for Information Technology (IT) that has changed social relations, education and dissemination of information with the development of the internet.

83. RS 232C asynchronous serial communication.

Which of the following option is correct?

- (a) <start-bit: 1><data Bits: 5/6/7 or 8bits><parity:1 bit><stop bit:1>
- (b) <Start-bit: 1><data Bits: 5/6/7 or 8bits> [$\frac{1}{2}$ parity: 1 bit]><stop bit: 1> or 2 bits>
- (c) <start-bit:2><data Bits: 5/6/7 or 8bits> <parity:1 bit><stop bits:1>
- (d) <start-bit:2><data Bits: 5/6/7 or 8bits><stop bit:>

UPPCL ARO-15.09.2018

Ans : (c) In case of RS 232C asynchronous sequential communication choose the following—
<Start-bit2><data bits 5/6/7 or 8 bits><parity: 1 bit><stop bits1>

84. Which of the following is not a basic component of fiber optic communication system?

- (a) Low Loss Optical Fiber
- (b) Light Detector
- (c) Compact Light Source
- (d) Fiber Splicer

UPPCL ARO-15.09.2018

Ans : (d) Fiber optic communication system is a system in which light pulse of optical fiber sends information from one place to another. Its main components are optical fiber, light detector, compact light source etc. Whereas fiber splicer is a process by which two connect the fibers together.

85. In data communication, be it data or digital could.

- (a) Electronic (b) Imaginary
- (c) Analog (d) Electrical

UPPCL Office Assistant Account 28-8-2018

Ans : (c) Data communication is a medium by which information is exchanged and in this data is transmitted in the form of web or 0, 1.

86. A.....is a basic unit of communication over a digital network.

- (a) switch (b) access points
- (c) data packet (d) router

UPASI 05.12.2021 Shift-I

Ans. (c) : A data packet is a unit of data made in a single package that travels along a given network path. Data packets are used to carry data in internet protocol transmission.

87. Which of the following internet access methods relatively involves a large setup fee and expensive equipment upfront?

- (a) Cable modem (b) Dial up
- (c) DSL (d) Satellite

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (d) : The term broadband commonly refers to high - speed internet access that is always on and faster than the traditional dial - up access.

- 1. Digital Subscriber Line (DSL)
- 2. Cable Modem
- 3. Fiber
- 4. Wireless
- 5. Satellite
- 6. Broadband over Power Lines (BPL)

Satellite - Just as satellites orbiting the earth provide necessary links for telephone and television service, they can also provide links for broadband. Satellite broadband is another form of wireless broadband and is also useful for serving remote or sparsely populated areas.

88. The _____ measures the number of lost or garbled messages as a fraction of the total sent in the sampling period.

- (a) residual error rate
- (b) transfer failure probability
- (c) connection release failure probability
- (d) More than one of the above
- (e) None of the above

Bihar PGT TRE 2.0, 15.12.2023

Ans. (a): The residual error rate measures the number of lost or garbled messages as a fraction of the total sent in the sampling period.

89. Which ZigBee device is used to transfer data between ZigBee devices?

- (a) Zigbee Coordinator device
- (b) Zigbee Router
- (c) Zigbee start device
- (d) Zigbee end device

Bihar STET Exam Date : 12.09.2023 (Shift-II)

Ans. (b) : A ZigBee Router is a device in a ZigBee network that helps in routing messages between devices. It extends the communication range by receiving and transmitting data between ZigBee end devices and the ZigBee coordinator.

90. The number of parallel wires in a computer system bus is known as .

- (a) Class of bus (b) Width of the bus
- (c) Thickness of the bus (d) Length of the bus

UPPCL Executive Assistant 29.11.2022, Shift-II

Ans. (b) : The bus is an internal combination with high speed. It is used to send control signals and data between the processor and other components. The number of identical wires in a computer system bus is known as bus width.

91. Which of the following is an INVALID transmission mode?

- (a) Full-Duplex (b) Simplex
- (c) Complex (d) Half-Duplex

UPPCL Asst. Account. 22.06.2023, Shift-I

Ans. (c) : Transmission mode means transferring data between two devices. It is also known as a communication mode. There are three types of transmission mode.

- (i) Simple Mode
 - (ii) Half Duplex Mode
 - (iii) Full Duplex Mode
- While complex mode is not transmission mode.

92. _____ A program or computer that connects to a server and requests information.

- (a) Access (b) Bridge
- (c) Client (d) Captcha

Mandi Parishad - 30-05-2019 (Shift - II)

Ans : (c) Access— Access is being able to get to (usually permission to use) particular data on computer.

Bridge— A bridge is a network device that connects multiple LANs (Local Area Networks) together to form a larger LAN.

Client— Client is computer that connects to and uses the resources of a remote computer or server.

There are three types of client.

- (i) Thick Client
- (ii) Thin Client
- (iii) Hybrid Client

Captcha— It is combination of alphabets and numbers codes are called captcha. Captcha stand for completely Automated Public Turning test to tell computers and humans apart.

93. Television transmission is an example of which of the following.

- (a) Simplex Communication
- (b) Half duplex Communication
- (c) Full duplex Communication
- (d) None of the above

Uttarakhand PSC (Pre) G.S. 2016

Ans: (a) Simplex Communication— Simplex communication is a communication channel that sends information in one direction only.

Half Duplex— The communication between sender and receiver occurs in both directions in half duplex transmission but only one at a time. The sender and receiver can both send and receive the information but only one is allowed to send at any given time. Half duplex is still considered a one way road.

Full Duplex— In full duplex transmission mode, the communication between sender and receiver can occur simultaneously. The sender and receiver can Both transmit and receive at the same time.

For example— In a telephone conversation, two people communicate and both are free to speak and listen at the same time.

94. Transmission involves transmission between a computer and a keyboard.

- (a) Simplex (b) Full duplex
- (c) Automatic (d) Half duplex

RRB JE CBT-II 31.08.2019 IIInd Shift

Ans : (a) See the above explanation of the question.

95. Which of the following options is an example of half-duplex communication device.

- (a) Radio (b) Telephone
- (c) Television (d) Walkie-Talkie

UP Police (Computer Operator)-2016

Ans : (d) In half duplex channel the flow of data happens in both the directions, but at a time only one direction of data flows example- Walkie Talkie.

96. The process of conversion to digital sound is known as

- (a) Pulse data modulation
- (b) Pulse sound modulation
- (c) Unicode formatting
- (d) Pulse code modulation

UPASI 04.12.2021 (Shift-II)

Ans. (d) : Pulse code modulation (PCM) is a method used to digitally represents sampled analog signals. It is the standard form of digital audio in computers, and other audio applications.

97. Which of the following communications is the method of communication between processes through which they interact with each other for gaining access to shared data and resources?

- (a) Inter-process
- (b) Intra-process
- (c) Multi process
- (d) Scheduling process

UPPCL Assist. Acct. 2016 (Exam date 20.11.2016)

Ans. (a) : Inter process communication is the mechanism provided by the operating system to allow processes to communicate with each other. Through this one can get access to resources and share data with them.

98. In which data transmission mode can two devices either send data or receive data but not both at the same time?

- (a) Complex (b) Simplex
- (c) Half duplex (d) Full duplex

UPPCL-JE 31-01-2019 (Batch -01)

Ans: (c) In half duplex, data transmission can send or receive data to a device. Both work cannot be done at the same time. Like Walkie Talkie etc.

99. EDGE, UMTS, FDD and TDD are _____ cellular networks.

- (a) 3G (b) 4G
- (c) 2G (d) 5G

UPPCL APS Exam-18.02.2018

Ans. (a) : EDGE, UMTS, FDD and TDD, 3G cellular network, cellular network is a mobile communication network whose the last link is wireless.

100. In which communication mode, data can be transmitted in both directions at same time?

- (a) Simplex (b) Full duplex
- (c) Half duplex (d) Multiplex

SSC JE Electrical (Exam date 23.01.2018) Shift-II

Ans. (b) : Full Duplex— In this state the data transmission is possible in both the direction i.e. We can send and receive information at the same time.

5. Operating System like Windows, Unix, Linux

Operating Systems Overview

Operating system is software that makes the computer hardware to work. Operating system is a system software that must be loaded before starting any task. Operating system is an Interface for users to communicate with the computer. We can say that operating system is control program of a computer main function of the operating system include:

- Operates CPU of the computer
- Control input/output devices that provides the interface between user and the Computer Handles the working of application programs with the hardware and other software systems
- Manages the storage and retrieval of information

For hardware functions such as input and output and memory allocations, the operating system acts as an intermediary between programs and computer Hardware. Although the application code is usually executed by the hardware and frequently makes system calls to on operating function.

Dominant general purpose personal computer operating system is Microsoft windows with market share of around 76.45% mac OS by Apple inc is in second place (17.72%) and the varieties of Linux are collectively in third place (1.73%) In the mobile sector (including Smartphone and Tablet), Android share is up to 72% in the year 2020. Linux distribution are dominant in the server and Super computing sectors.

Types of operating system

- a. Batch processing
- b. Single user single tasking
- c. Single user multi tasking
- d. Multi Processing
- e. Real time operating system

Operating System

Operating System acts as an interface between computer hardware and user. It manages and controls all the hardware and flow of data, instructions and

information to and within the system. The Operating System takes instructions from the user and directs it to CPU, which further passes the instructions to the hardware.

Operating System is one of the core software programs that run on hardware and makes is usable. The user can interact with hardware so that they can send commands and receive output. An Operating System provides an interface between user and machine. This interface can be graphical user interface (GUI) in which users. Click on screen elements to interact with Operating System or a command line interface (CLI) to tell the Operating System to do things, it also manages the computer's resource such as CPU, memory, disk drives and printers. It provides services for application software.

Types of Operating System

An Operating System performs all the basic tasks like managing files.

Some widely used Operating System are as follows :-

Batch Operating System

This type of Operating System does not interact with the computer directly. There is an operator which takes similar jobs having the same requirement and group them into batches. It is the responsibility of the operator to sort jobs with similar needs. The main characteristics of the batch Operating System is the CPU executes the jobs in the same sequence that they are sent to it by the operator, which implies. That the task sent to the CPU first will be executed first, It's also known as the 'First come, First serve'.

(a) Advantages of Batch Operating System :

- It is very difficult to guess or know the time required for any job to complete. Processes of the batch system know how long the job would be when it is in queue.
- Multiple users can share the batch systems.
- The idle time for the batch system is very less.
- It is easy to manage large work repeatedly.

(b) Disadvantages of Batch Operating System :

- Lack of interaction between the user and the job.
- Batch systems are hard to debug.
- The other jobs will have to wait for an unknown time if any job fails.

(c) Example of Batch Based Operating System :

Payroll system, Bank statements, etc.

Time Sharing Operating System

The user directly gives instructions to an OS, and the OS executes multiple tasks at a time. The computer memory stores these programs and they share a single processor. The tasks switch rapidly from one to another giving immediate response to the user. These system are also known as multitasking systems. The task can be from a single user or different users also. It uses the concept of CPU scheduling and multiprogramming so that the time of the CPU is divided equally among the tasks. This allows all the tasks to work smoothly. As the interactive I/O is slower as compared to the CPU, this OS also increases CPU utilization as there is always a spare job to execute. This OS focuses on decreasing the response time of a task. The time taken to execute a single task is called quantum. Once this time interval is over the OS switches to the next task.

(a) Advantages of Time Sharing Operating System :

- Each task receives equal time to use the CPU.
- Reduces CPU idle time.
- Fewer chances of duplication of software.

(b) Disadvantages of Time Sharing Operating System :

- Due to multiple sharing, it is unreliable.
- One must have to take care of the security and integrity of user programs and data.
- Data communication is difficult.

(c) Example of Time Sharing Operating System :

- Multics, Unix, Linux, Windows 2000 server, Windows NT server, etc.

Distributed Operating System

In this type of Operating System, multiple CPUs are used to serve multiple processes and users. All the computers have their own memory unit and CPU are

interconnected and communicate with each other over a shared communication network. The processors differ in size and function and remote access is enabled within the devices connected to network. The job of data processing is distributed among various processors which makes the job more efficient. The major benefit of working with these types of the Operating System is that it is always possible that one user can access the files or software which are not actually present on his system but some other system connected within this network i.e., remote access is enabled within the devices connected in that network.

(a) Advantages of Distributed Operating System :

- Failure of one will not affect the other network communication as all systems are independent from each other.
- Increased data exchange speed and reduced load on the host computer.
- Since resource are being shared computation is highly fast and durable.
- These systems are easily scalable as many system can be easily added to the network.

(b) Disadvantages of Distributed Operating System :

- A single system failure might not affect the entire communication but the failure of the main network can crash it.
- Languages used to establish distributed Operating Systems are not well established.
- It is not readily available as it is very expensive and complex.

(c) Example of Distributed Operating System :

- LOCUS, MICROS, IRIX, DYNIX, AIX, Solaris, Mach, OSF/1 etc.

Network Operating System

These systems run on a server and provide the capability to manage data, users, groups, security, applications and other networking functions. These types of Operating Systems allow shared access of files, printers, security, applications and other networking functions, over a small private network. One more important aspect of users are well aware of the underlying configuration of all other users within the network, their individual connections etc. and that's why these computers are popularly known as tightly coupled systems.

(a) Advantages of Network Operating System :

- It has stable and centralized servers that can handle security concerns well.
- Integration of new technologies and hardware up-gradation is easier.
- Server access is possible remotely from different locations and types of systems.

(b) Disadvantages of Network Operating System :

- Most operations could only be performed through a central location.
- It requires regular maintenance and updating.
- In this type of Operating System, the failure of any node in a system affects the whole system.

(c) Example of Network Operating System :

- Microsoft Windows Server 2003, Microsoft Windows Server 2008, UNIX, Linux, Mac OS X, Novell Netware and BSD, etc.

Real time Operating System

A real time Operating System is defined as a data processing system in which the time interval required to process and respond to inputs is so small that it controls the environment. The time taken by the system to respond to an input and display of required updated information is termed as the response time. Real time systems are used when there are time requirements on the operation of processor or the flow of data and real time Operating System can be used as a control device in a dedicated application.

There are two types of Real-time Operating System –

(i) Hard Real-time System : These Operating Systems are meant for applications where time constraints are very strict and even the shortest possible delay is not acceptable. These systems are built for saving life like automatic parachutes or airbags which are required to be readily available in case of any accident. Virtual memory is rarely found in these systems.

(ii) Soft Real-time System : They have a less strict time constraint and critical tasks are given priority above others until they are completed and have limited utility.

(a) Advantages of Real-time Operating System :

- It provides more output from all the resources as there is maximum utilization of systems.

- These Operating Systems focus more on running applications than those in the queue.
- It provides the best management of memory allocation.
- Due to the small size of programs, they can be used in embedded systems.

(b) Disadvantages of Real-time Operating System :

- Very few tasks run at the same time in order to avoid errors.
- It needs specific interrupts signals and device drivers to respond earliest to interrupts.
- In such systems we cannot set thread priority as these systems cannot switch tasks easily.

(c) Example of Real-time Operating System :

Scientific experiments, medical imaging system, industrial control systems, weapon systems, Robots, air traffic control systems, MTOS, Lynx, RTX, etc.

Most Popular Operating System

To date, many Operating System have been developed that suit different requirements of the users. Some of these Operating Systems became quite popular while others did not do well. The following are some of the popular Operating System.

Windows

Microsoft has provided many Operating Systems to cater the needs of different users. Microsoft is a well known name in the development of Operating System as well as various software applications. Initially, Microsoft introduced Windows1.x, Windows2.x and Windows386 Operating Systems. However, these Operating Systems lacked certain desirable features, such as networking and interactive users interface. Microsoft continued to work towards developing an Operating System that met the desirable features of users and come up with a new Operating System in the year 1993. Which was known as Windows NT 3.1. This Operating System was specially designed for the advanced users performing various business and scientific operations. After the release of Windows NT 3.1, several other Operating Systems user introduced by Microsoft in the successive years with their own unique features.

Name of Operating System	Date of Release	Significant Features
Windows 95	August, 1995	✓ 32 Bit File System. ✓ Multitasking. ✓ Object Linking and Embedding (OLE). ✓ Plug and Play. ✓ Optimized memory management.
Windows 98	June, 1998	✓ 32 Bit data link control (DLC) protocol. ✓ Improved GUI.

Windows 2000	February, 2000	✓ Improved online communication through various tools. Such as outlook express, personal web server and web publishing wizard. ✓ Multiple display support. ✓ Windows update. ✓ More reliable against application failure. ✓ Improved Windows explorer. ✓ Secure file system using encryption. ✓ Microsoft management console (MMC). ✓ Improved maintenance operations.	Windows 7	October, 2009	✓ Libraries to improve file access and organization. ✓ Action center for system maintenance backups, and troubles hooting. ✓ Improved networking via home group. ✓ Device stage for recognizing USB devices faster. ✓ Quick Desktop view button.
Windows ME	September, 2000	✓ System restoration against failure. ✓ Universal plug and play. ✓ Automatic updates. ✓ Image preview.	Windows 8	October, 2012	✓ Simplified Desktop for increased speed. ✓ Start menu has been replaced. ✓ Improved security. ✓ Enhanced search bar. ✓ Ribbon and Quick access toolbar in office 2007. ✓ Windows Reader is a native PDF reader.
Windows XP	October, 2001	✓ Attractive desktop and user interface. ✓ System restore. ✓ Windows firewall. ✓ Files and settings transfer wizard.	Windows 8.1	October, 2013	✓ Add start Button to the desktop. ✓ Boot directly to the Desktop. ✓ Allows Snap start screen apps. ✓ Enhanced automatically Windows update.
Windows Server 2003	April, 2003	✓ Enhanced Internet Information Service (ITS). ✓ Enhanced Microsoft Message Queuing (MSMQ). ✓ Enhanced active directory support. ✓ Watchdog timer.	Windows 10	July, 2015	✓ Enhanced New start menu. ✓ Voice-controlled digital assistant Cortana integration. ✓ Microsoft edge web browser. ✓ Multiple desktops and task view. ✓ Tablet mode. ✓ Enhanced Action Center.
Windows Vista	November, 2006	✓ Multilingual User interface. ✓ Enhanced search engine. ✓ Enhanced internet explorer. ✓ Enhanced Windows media player. ✓ Enhanced Windows update. ✓ Windows system assessment tool.	Windows 11	October, 2021	✓ Universal Apps. ✓ 5G supported. ✓ Enhanced Cortana. ✓ Microsoft edge with IE mode replaces the internet explorer 1.1. ✓ S mode available. ✓ Wallet is removed. ✓ Android Apps supported. ✓ Improved Touch keyboard.

UNIX

UNIX is an Operating System that allows several users to perform a number of tasks simultaneously. The first version of UNIX was introduced during the 1970's. however, since then, it is in constant development phase for further improving its functionality. UNIX Operating System provides a GUI that enables its users to work in a more convenient environment. UNIX is most suitable for the computers that are connected to a Local Area Network (LAN) for performing scientific and business related operations. It can also be implemented on personal computers.

The following are the core components of the UNIX Operating System.

Kernel :

It is the central part of the UNIX Operating System that manages and controls the communication between the various hardware and software components of the computer system. The other major functions performed by the kernel and are process management, memory management and device management.

Shell :

It is the user interface of the UNIX Operating System that acts as an intermediary between the user and the kernel of the Operating System. Shell is the only program in UNIX Operating System that takes the commands issued by the users and interprets them in an efficient manner to produce the desired result.

Files and Processes :

The UNIX Operating System arranges everything in terms of files and process. The directory in this Operating System is also considered as a file that is used to house other files within it. The process is usually a program executed under the UNIX Operating System. Several processes can be executed simultaneously in this Operating System and are identified by a unique Process Identifier (PID) assigned to them.

The following are some of the significant features of UNIX Operating System.

- It allows multiple users to work simultaneously.
- It allows the execution of several program and processes at the same time to ensure efficient utilization of the processor.
- It implements the concept of virtual memory in an efficient manner. This feature enables the UNIX Operating System to execute a program whose size is larger than the main memory of the computer system.

LINUX

Linux is an open-source Operating System like other Operating Systems such as Microsoft Windows, Apple, Mac OS, iOS, Google Android etc. An Operating System is software that enables the communication between computer hardware and software. The Linux Operating System was developed by Linux Torvalds in 1991, which sprouted as an idea to improve the UNIX Operating System. He suggested improvements but was rejected by UNIX designers. Therefore, he thought of launching an Operating System, designed in a way that could be modified by its users. Linux is a freeware and has many different versions each with different look and feel e.g Ubuntu, Mint, Fedora, Debian etc.

LINUX COMMANDS LIST

COMMAND	Description
Pwd	The 'Pwd' command is used to display the location of current working directory.
Mkdir	The 'mkdir' command is used to create a new directory under any directory.
Rmdir	The 'rmdir' command is used to delete a directory.
Is	The 'Is' command is used to display a list of content of directory.
CD	The 'cd' command is used to change the current directory.
Touch	The 'touch' command is used to create empty files. We can create multiple empty files by executing it once.

Cat	The 'Cat' command is a multi-purpose utility in the Linux system. It can be used to create a file, display context of the file, copy the context of one file to another file, and more.
RM	The 'rm' command is used to remove a file.
CP	The 'cp' command is used to copy a file or directory.
MV	The 'mv' command is used to move a file or a directory from one location to another location.
Rename	The 'rename' command is used to rename files. It is useful for renaming a large group of files.
Head	The 'head' command is used to display the context of a file. It displays the first 10 lines of a file.
Tail	The 'tail' command is similar to the 'head' command. It displays the last 10 lines of the file context and also useful for reading the error message
Tac	The 'tac' command is the reverse of 'cat' command. It displays the file context in reverse order.
SU	The 'Su' command provides administrative access to another user.
ID	The 'id' command is used to display the user ID (UID) and group ID (GID).
Useradd	The 'useradd' command is used to add or remove a user on a Linux server.
Passwd	The 'passwd' command is used to create and change the password for a user.
CUT	The 'Cut' command is used to select a specific column of a file.
Grep	The 'grep' command is useful for searching the context from a file. Generally, it is used with the pipe.
Comm	The 'comm' command is used to compare two files or streams. By default, it displays three columns
Sed	The 'sed' command is also known as stream editor. It is used to edit files using a regular expression.
tee	The 'tee' command is quite similar to the 'cat' command. The only difference between both filters is that is put standard input on standard output and also write them into a file.

tr	The 'tr' command is used to translate the file context like from lower case to upper case.
Uniq	The 'uniq' command is used to from a sorted list in which every word will occur only once.
Wc	The 'wc' command is used to count the lines, words and characters in a file.
Od	The 'Od' command is used to display the context of a file in different, such as hexadecimal, octal and ASCII characters.
Sort	The 'Sort' command is used to sort files in alphabetical order.
gzip	The 'gzip' command is used to truncate the file size. It is a compressing tool
gunzip	The 'gunzip' command is used to decompress of file. It is a reverse operation of 'gzip' command.
Find	The 'find' command is used to find a particular file within a directory.
Locate	The 'locate' command is used to search a file by file name.
Date	The 'date' command is used to display date, time, time zone, and more.
Cal	The 'cal' command is used to display the current month's calendar with the current date highlighted.
Sleep	The 'sleep' command is used to hold the terminal by the specified amount of time. By default, it takes time in seconds.
Time	The 'time' command is used to display the time to execute a command.
Zcat	The 'zcat' command is used to display the compressed files.
df	The 'df' command is used to display disk space used in the file system.
mount	The 'mount' command is used to connect an external device file system to the system's file system.
Exit	Linux 'exit' command is used to exit from the current shell.
Clear	Linux 'clear' command is used to clear the terminal screen.

IP	The 'IP' command is an updated version of the ipconfig command. It is used to assign an IP address, initialize an interface, disable an interface.
SSH	Linux 'ssh' command is used to create a remote connection through the 'ssh' protocol.
mail	The 'mail' command is used to sent mails from the command line.
Ping	The 'ping' command is used to check the connectivity between two nodes that is whether the server is connected. It is a short form of 'Packet Internet Groper.'
host	The 'host' command is used to display the IP address for a given domain name and vice versa.
man	The 'man' command is used to display the user manual of any command that we can run on the terminal.
Echo	The 'echo' command is used to display line of text/string that are passed as an argument.
Chmod	The 'Chmod' command is used to change the access permissions of file system objects (files and directories) sometimes known as modes.
tar	The 'tar' stands for tape archive, is used to create archive and extract the archive files.

Functions of an Operating System

Some typical Operating System functions may include managing memory, files, processes, I/O system and devices, security etc.

Following are the main functions of Operating System.

1. Memory Management :

Memory management refer to management of primary memory or Main Memory. Main Memory is a large array of words or bytes where each word or byte has its own address.

An Operating System does the following activities for memory management –

- Keeps tracks of primary memory, what part of it is in use and by which program.
- Deciding which process will get how much memory and when especially in a multiprogramming environment.
- Allocating the memory when a process request it to do so.
- de-allocates the memory when a process no longer needs it or has been terminated.

2. Process Management

Process is the execution of a program that performs the actions specified in that program It can be defined as an execution unit where a program runs. The operating system helps you to create, schedule and terminates the processes which is used by CPU. A process created by main process is called child process.

Process operations can be easily controlled with the help of PCB (Process Control Block). You can consider it as the brain of process which contains all the crucial information related to processing like Process id, priority, state, CPU register etc.

Process Architecture–

Here, is an architecture of the process

Stack–

Stack stores temporary data like function parameters, return addresses and local variables.

Heap–

Allocates memory, which may be processed during its run time.

Data–

It contains the variable

Text–

Text section includes the current activity which is represented by the value of the program counter.

Process Control blocks– (PCB)

It is a data structure that is maintained by the operating system for every process. PCB should be identified by integer Process ID (PID). It helps you to store all the information required to keep track of all the running processes.

It is also accountable for storing the content of processor registers, they are saved when the process moves from the running state and then returns back to it. The information is quickly updated in the PCB by the OS as soon as process make the state transitions.

Process States–

3. File Management :

A file system is made up into directories form for improving its efficiency and better usage. These types of directories may contain another sub directories and files. It monitors all activates related to where all information is saved, user access setting, all status of each file, and more. So this type of process is known as ‘file system’. The Operating System keeps records of the status and locations of files.

4. Device Management :

An Operating System manages devices communication via their respective drivers. It does the following activities for device management.

- Keeps tracks of all devices. Program responsible for this task is known as the I/O controller.
- Decides which process gets the device when and for how much time.
- Allocates and De-allocates the devices.

5. Input/Output Management :

What output will come from the input given by the user, the Operating System runs this program. This management involves coordinating various input and output devices. It assigns the functions of those devices where one or more applications are executed.

6. Secondary Storage Management :

System have several levels of storage which includes primary storage, secondary storage, and cache storage. Instructions and data must be stored in primary storage or cache so that a running program can reference it.

7. Security :

The Operating System used password protection to protect user data and similar other techniques. It also prevents unauthorized access to programs and user data. Computer security is a very important aspect of any Operating System. The reliability of an Operating System is determined by how much better security it provides us. Modern Operating System use a firewall for security. A firewall is a security system that monitors every activity happening in the computer and blocks that activity in case of any threat.

8. Command Interpretation :

Command interpreter is one of the part of Operating System which reads the commands that use users types in at a terminal, interprets, them and translate them into a detailed sets of instructions that the computer hardware can understands. It varies widely from one OS to other OS. Every OS must provide command interpreter for its operation.

9. Networking :

A distributed system is a group of processors which do not share memory hardware devices or a clock. The processors communicate with one another through the network.

10. Communication Management :

Coordination and assignment of compilers, interpreters and another software resources of the various users of the computer systems.

11. Job Accounting :

Operating System keeps track of time and resources used by various tasks and users, this information can be used to track resource usage for a particular user or group of users.

Process Management

A program in execution is called a process. In order to accomplish its task process needs the computer resources. There may exist more than one process in the system which may require the same resource at the same time. Therefore operating system has to manage all the processes and the resource in a convenient and efficient way. Some resources may need to executed by one process at one time to maintain the consistency otherwise the system can become inconsistent and deadlock may occur.

Operating system has to perform the following function regarding the process management:

1. Scheduling processes and threads on the CPU
2. Creating and deleting both user and system processes
3. Suspending & Resuming process
4. Providing mechanism for process synchronization
5. Providing mechanism for process communication

Attribute of Process–

To create the PCB of process following attribute of process is required.

1. Process ID
2. Program counter (PC)
3. Process state
4. Priority
5. General purpose registers
6. List of open files
7. List of open devices
8. Accounting information

When execution switch from one process to another process, this event is known as content switching. All the information of a process which is stored in PCB will be saved. It is depicted in following figure.

Process1

Process can be categorized as follow–

1. CPU bound
2. Input/Output bound
3. Interactive

Process Schedulers–

Operating system uses following schedulers for process scheduling.

Long Term Scheduler–

This scheduler is known as job scheduler. It select the process from pool which is located in secondary memory and keeps them in ready queue in primary memory. It controls the degree of multi-programming. The purpose of long scheduler is to select the mix of CPU bound & Input/Output bound processes among the job present in the pool.

Short Term Scheduler–

Short term schedulers is also known as CPU scheduler. It chooses one job from ready queue and dispatch it to CPU for execution. If selected job require long CPU burst time then other job in ready queue have to wait for a long time this problem is known as starvation.

Medium Term Scheduler–

Some process needs Input/Output operation. So they are put into suspended state or swapped out queue medium term scheduler take care of swapped out processes. It removes the process from running state to make room for the other processes. Such processes are swapped out processes and this procedure is called swapping. Medium term scheduler is responsible for suspending & resuming the processes.

Various Time Related to Process–

Completion time – Arrival time = Waiting time + Burst time

Turnaround time = Completion time – Arrival time

Waiting time = Turnaround time – Burst time

Scheduling and Performance Criteria–

There are various algorithm which are used by operating system to schedule the processes on the processor in an efficient way. Purpose of scheduling algorithm is as follows.

- I. Maximum CPU Utilization
- II. Fair Allocation of CPU
- III. Maximum Throughput
- IV. Minimum Turnaround Time
- V. Minimum Waiting Time
- VI. Minimum Response Time

Scheduling Algorithm–

Scheduling algorithm can be divided into two parts:

1. Preemptive Scheduling
2. Non-preemptive Scheduling

In Preemptive scheduling algorithm CPU can be taken away, when a priority jobs come in the queue then CPU can be taken away. Basically this type of algorithm is related to real time operating system.

In non-preemptive algorithm, CPU cannot be taken away.

There are following algorithms which can be used to schedule the jobs.

1. **First Come First Serve**– It is non-preemptive scheduling algorithm. Process with minimum arrival time will get the CPU first. Here component utilization is low and system throughput is also low. Here shorter jobs may suffer considerable turnaround delays and waiting time when CPU has been allocated to longer burst time.
2. **Round Robin**– There a quantum of 10-100 millisecond is allocated to process. As the time slice get exhausted, process goes to end of ready queue to await the next allocation. It is preemptive scheduling.
3. **Shortest Job First (SJF)**– SJF may be implemented in non-preemptive or preemptive manner. When this algorithm works then it searches the shortest CPU burst time. STF scheduling is an optimal scheduling algorithm in terms of minimizing average waiting time of given set of processes.

Consider a situation where shorter jobs comes in system continuously and system is implementing STF scheduling algorithm then larger job not getting the CPU and its waiting time will increase. This situation is known as starvation.

Priority Bases Scheduling–

Here priority of job will be consider in allocating the processor. Here priority is assigned to each process and scheduler always picks the highest priority process from ready queue. Equal priority process will be treated as FCFS basis. Here low priority process is blocked by higher priority process this blockage problem is solved by aging priority in this the priority of a process is gradually increases that wait in the system for a long time finally process will get the CPU for execution.

Multilevel Queue Scheduling–

Here processes are grouped according to their characteristic. For example interactive process are placed in foreground & batch processes are placed in background could be considered as two types of processes, because their response time requirement is different. Multiqueue scheduling algorithm partition the queue into separate queues. Each queue has its separate scheduling algorithm. Interactive queue might be scheduling by round robin and batch queue will follow FCFS.

Interprocess Communication–

Concurrent process executing in the operating system may be independent process or cooperating process. A process is independent if it cannot effect or affected by another process executing in the system. Any process that does not share any data with any other process is independent. A process is cooperating if it can affect or be affected by process is a cooperative process.

Advantage of cooperating process is as follows:

1. **Information Sharing–** Several users may be interested in same piece of information
2. **Computation Speed-up–** If we want that any task run faster. We break this task into subtask, each of which will be executing in parallel with others.
3. **Modularity–** Dividing the system function into separate process or threads.
4. **Convenience–** Even an individual user may have many task on which to work at one time. Processes can communicate by passing information to each other via shared memory or message passing.

In shared memory model they do so by entering & retrieving data from a single block of physical memory that designated as shared by all of them each process has direct access to this block of memory.

In message passing processes communicated by sending & receiving packets of information called messages. These messages may be communicated indirectly or directly. Indirect message passing is done via a mail box and direct message passing is done via a link between the two communicating processes. Message passing is useful for exchanging smaller amount of data.

Process Synchronization–

In order to cooperate several processes must communicate and synchronize. If several processes accessing some piece of data and outcome depends on particular order of execution of processes. This is known as race condition.

Consider n processes executing in a system and each process have some piece of code known as critical section. These code can be accessed by only one process at any time. If one process is executing in its critical section, no other process can enter the critical section.

repeat

entry section

critical section

exit section

remainder section

Until false

Semaphore– A semaphore is an integer variable that is accessed only through two standard atomic operation wait and signal. Operations were originally termed P (For wait) and V (For signal).

Classical definition of wait is

wait (s)

```
{
    while (s <= 0)
    {
        /* do nothing
    }
    s = s-1;
}
```

signal (s)

```
{
    s = s+1;
}
```

Example– Critical section for n process shared variables, semaphore mutex

mutex = 1

process P₂

do

```
{
    wait (mutex)
    critical section
    signal (mutex)
    remainder section
}
while (True)
```

Deadlock– Two or more processes are waiting indefinitely for an event that can because one of the waiting processes.

Example– Let two processes P₀ & P₁ each accessing two s and q set to value 1:

P ₀	P ₁
wait (s);	wait (s);
wait (q);	wait (q);
signal (s);	signal (s);
signal (q);	signal (q);

Suppose that P₀ execute wait (s) and then P₁ execute wait (q). It must wait until P₁ execute signal (q). Similarly when P₁ execute wait (s). It must wait until P₀ execute signal (s) since these signal operation cannot be executed P₀ and P₁ are deadlocked.

Important Questions Asked in Previous Years Examinations

1. Which of the following options best describes the correctness of the following statements?
- (i) The windows taskbar normally appears as a horizontal line at the bottom of the screen.
- (ii) The windows to taskbar contains a search box that can be used to browse both the computer and the web.
- (a) (i) True (ii) False (b) (i) False (ii) True
(c) (i) False (ii) True (d) (i) True (ii) True

UPPCL TG-2, 10.11.2023, Shift-I

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (d) : Both the above statements are true regarding windows taskbar.

The taskbar is the area between the start menu and the icon of the left of the clock. Normally the taskbar is at the bottom of the desktop, but you can move it to either side (right/left) or up/down of the desktop as your requirement.

2. Which of the following is the very first screen/component that you will see once the Windows operating system has loaded?
- (a) Calendar (b) Calculator
(c) Desktop (d) Control Panel

UPPCL TG-2, 10.11.2023, Shift-I

Ans. (c) : The first screen that appears on the monitor after the Windows operating system is loaded is the desktop. As soon as we turn on the computer, Welcome Windows appears on the screen which fills the monitor screen with many small graphics.

3. Which of the following can be used to change the desktop background in a windows 10 operating system?
- (a) Double click anywhere on the desktop
(b) Right click and select 'personalize' option
(c) Triple click anywhere on the desktop
(d) Right click on the desktop and select 'New' option

UPPCL TG-2, 17.11.2023, Shift-I

UPPCL TG-2, 07.11.2023, Shift-I

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (b) : To change the desktop background in windows 10 operating system, the following procedure - Select Start → Setting → Personalization → Background.
or Right click on the desktop and select personalize option.

4. Which of the following options best describes the truth of the given statements?
- (i) Type "Winword.exe" without question marks in the run dialogue box and click 'OK'.
- (ii) In the Run dialogue box - type "word.exe without the question marks and click 'OK'
- (a) (i) True (ii) True (b) (i) False (ii) False
(c) (i) False (ii) True (d) (i) True (ii) False
- UPPCL Executive Assistant 21.11.2022, Shift-I**

Ans. (d) : In the above question statement (i) is true, because to launch MS Word in MS Office type winword.exe in run dialogue box to and click ok. Hence statement (ii) is false.

5. Which of the following is the file extension for PC batch file in windows operation system?
- (a) DBF (b) BMP
(c) BAT (d) CSV

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (c) : BAT file is a DOS batch file which is used with windows command prompt (cmd.exe) to execute commands. It consists of a series of line commands in plain text that are executed to perform various tasks, such as starting programs or running maintenance utilities with in windows.

6. Which of the following is the latest version of windows operating system?
- (a) Windows 10 (b) Windows Vista
(c) Windows 11 (d) Windows 8

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (c) : The latest version of windows operating system is windows 11.

7. Which of the following features of control panel can be selected to uninstall or change a program on windows 11?
- (a) Programs and Features
(b) Devices and Printers
(c) Device Manager
(d) Default Programs

UPPCL TG-2, 07.11.2023, Shift-II

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (a) : To uninstall or change a program on windows 11, select program and features in control panel. You can also uninstall any program installed from the programs and features option in windows 11.

8. Which of the following statements is incorrect about the Windows operating system?
- (a) Windows NT was developed by Oracle and marketed by Microsoft.
(b) Windows 10 was released in 2015.
(c) Windows 1.0 was an extension of the Windows 10 operating system.
(d) Windows NT supports active (preemptive) multitasking.

UPPCL Executive Assistant 22.11.2022, Shift-II

ARO Alld. HC, 19.12.2021, Shift-I

Ans. (a) : The full form of Windows NT is Windows New Technology. It was developed by Microsoft. Windows NT Server is a preemptive multitasking network operating system. The first version of Windows NT was released on July 27, 1993.

9. Which of the following statements is false regarding windows system?
- (a) A folder can contain both files and folders
(b) A folder can contain many folders

- (c) A folder can contain folders and files with the same name
- (d) A folder cannot contain both PDF and ZIP files together

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (d) : A folder can contain both PDF and ZIP files together. ZIP is an archive file format that supports lossless data compression.

Zipped (compressed) files take up less storage space.

10. Which of the following sequence of steps is used to set the time and time zone in Windows 10?

- (a) Start->Settings-> Update & Security-> Date & time
- (b) Start-> Setting-> Network & Internet-> Date & time
- (c) Start-> Settings-> System-> Date & time
- (d) Start-> Settings-> Time & language-> Date & time

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (d) : To set the time and time zone in Windows 10, Start → Settings → Time and Language → Date and Time sequence is used.

11. Which of the following statements is FALSE with reference to task bar in the Windows 10 OS?

- (a) Locking the taskbar is handy to ensure it remains the way it is set up.
- (b) By default, the taskbar is at the bottom of the desktop.
- (c) It cannot be moved to either the side or the top of the desktop.
- (d) The lock and unlock the taskbar section can be used to find out if it is locked.

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (c) : The bar at the bottom of the windows desktop screen is called the taskbar. In this icons of some commonly used application date & time, battery status network and connectivity etc. are visible. It can be moved to any side or on top of the desktop hence statement (c) is incorrect.

12. Which of the following is not an option in Date & Time setting in the Windows 10 OS?

- (a) Language
- (b) Speech
- (c) Region
- (d) Continent

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (d) : Windows 10 OS has language, speech and region options in date and time whereas continent is not.

13. Identify whether the given statements are True or False.

I. Windows OS provides users with a graphical user interface (GUI) and multitasking capabilities.

II. Windows operating system is developed by Google.

- (a) (i) - False, (ii)- True
- (b) (i)- True, (ii)- False
- (c) (i)- False, (ii)- False
- (d) (i)- True, (ii)- True

UPPCL Executive Assistant 25.11.2022, Shift-I

Ans. (b) : In this question statement (i) is true windows OS provides the user with graphical user interface and multitasking ability windows operating system developed by Microsoft.

14. In windows, to run a program or application, one can double-click the ____.

- (a) Batch file
- (b) System file
- (c) Object file
- (d) Executable file

UPPCL TG-2, 17.11.2023, Shift-II

UPPCL Executive Assistant 28.11.2022, Shift-II

Ans. (d) : An executable file, is a type of computer file that contains a program or software application that can be run or executed by a computer in operating system when you double - click or launch an executable file, it initiates the execution of a specific program or process, allowing it to perform its intended functions.

15. Which of the following is a portable network graphics file format supported by the windows OS?

- (a) ppt
- (b) pdf
- (c) png
- (d) pot

UPPCL Executive Assistant 28.11.2022, Shift-II

Ans. (c) : PNG is a portable network graphics file format supported by the windows operating system.

16. In Windows OS, if a windows screen is maximized, the maximize button will be temporarily replaced with the ____ button.

- (a) Restore
- (b) Undo
- (c) Close
- (d) Minimize

UPPCL Executive Assistant 28.11.2022, Shift-II

Ans. (a): In Windows OS, if a windows screen is maximized, the maximize button will be temporarily replaced with the Restore button.

17. Select the option that represents the correct matching of the below list.

List-1	List-2
(I) File	(A) Part of storage medium is virtually separate from the rest of the storage.
(II) Directory	(B) Logical unit of information created by processes.
(III) Partition	(C) Given information of the purpose of and information in the file.
(VI) File Extension	(D) Location on storage that stores several files within itself.

- (a) (I)-(B), (II)-(D), (III)-(A), (IV)-(C)
- (b) (I)-(D), (II)-(B), (III)-(A), (IV)-(C)
- (c) (I)-(A), (II)-(D), (III)-(C), (IV)-(B)
- (d) (I)-(B), (II)-(A), (III)-(D), (IV)-(C)

UPPCL TG-2, 17.11.2023, Shift-I

Ans. (a) : The right matching of the list is as:

List -1	List -2
(I) File	Logical unit of information created by processes.

(II) Directory	Location on storage that stores several files within itself.
(III) Partition	Part of storage medium is virtually separate from the rest of the storage.
(VI) File Extension	Given information of the purpose of and information in the file.

18. Match the following columns-

List -A	List- B
(i) File Explorer	(a) Default storage location for files
(ii) My document	(b) Displays the networking connectivity
(iii) My Network Places	(c) Manages files and folders

- (a) (i)- (b), (ii)-(c), (iii)-(a)
 (b) (i)- (c), (ii)-(a), (iii)-(b)
 (c) (i)- (b), (ii) - (a), (iii)-(c)
 (d) (i)- (c), (ii)- (b), (iii)- (a)

UPPCL Executive Assistant 29.11.2022, Shift-I

Ans. (b) : Following are the matched options -		
List-(A)	List - (B)	
(i)	File Explorer	Manage files and folders
(ii)	My Document	Default storage location for files
(iii)	My Network Places	Displays the networking connectivity

19. The built-in browser in Windows 10 is called:

- (a) Internet Explorer
 (b) Bing
 (c) Microsoft Outlook
 (d) Microsoft Edge

UPPCL ARO-18.02.2018 Shift-I

Ans. (d) : Microsoft Edge is a cross platform web browser created and developed by Microsoft. It was first bundled with Windows 10 in 2015.

20. What is the keyboard shortcut to open Windows Explorer (or file explorer) in windows operating system?

- (a) Windows key + F (b) Windows key + E
 (c) Windows key + W (d) Alt + Ctrl + F

UPPCL TG-II 20-03-2021 (Shift-I)

Ans. (b) : In Windows operating system to open Windows explorer shortcut is Windows + E.

21. In which year was Windows 10 released

- (a) 2015 (b) 2018
 (c) 2017 (d) 2010

UPPCL TG-II 19-03-2021 (Shift-I)

Ans. (a) : Windows 10 is a major release of Microsoft's Windows NT operating system. It is the direct successor to Windows 8.1. Windows 10 was released to manufacturing on 15 July, 2015 and later to retail on 29 July 2015.

22. As of May 2019, what is the latest version of Windows operating system

- (a) Windows 16 (b) Windows 8
 (c) Windows 10 (d) Windows 7

UPPCL TG-II 19-03-2021 (Shift-I)

UPPCL ARO-15.09.2018

Ans. (c) : The most recent version of Windows operating system PCs and tablets is Windows 11, version "21 H2". It was launched on 5 October 2021. As of May 2019, the latest version of Windows operating system is Windows 10.

23. The First Version of Window was launched in

- (a) 1990 (b) 1987
 (c) 1984 (d) 1985

UPPCL ARO-18.02.2018

Ans. (d) : The first version of Windows, released in 1985, was simply a GUI offered as an extension of Microsoft existing disk operating system or MS-DOS.

24. Which of the following statements is incorrect about Windows operating system?

- (a) Windows NT, Multitasking is not supported
 (b) Windows 10 was released in 2015
 (c) Windows NT was developed by Microsoft
 (d) Windows 10 operating system is part of the Windows NT category

UPPCL TG-2, 07.11.2023, Shift-I

UPPCL Executive Assistant 28.11.2022, Shift-I

Ans. (a) : Windows is a GUI (Graphical User Interface) operating system. Windows 10 operating system was developed by a famous IT company Microsoft in 2015. It is a part of the windows NT family. It acts as an interface between the hardware and other software on the computer. This operating system is available for both 32 Bit and 64 Bit platforms.

25. Which of the following statements related to the operating system is/are true?

- (i) It provides an environment in which users and application software can do work.
 (ii) It manages resources of the computer and allocates them to different users or tasks whenever required, efficiently.
 (a) Both (i) and (ii) (b) Neither (i) nor (ii)
 (c) Only (ii) (d) Only (i)

NVS Junior Secretariat Assit. 09.03.2022 (Shift-I)

Ans. (a) : An operating system is a software that acts as an interface between a computer component and a user. The purpose of an operating system is to provide an environment in which the user and application software can function efficiently. The main functions of operating system are resource management, process management and memory management etc.

26. The order of files and directories in Windows Explorer is -

- (a) Sequentially (b) Hierarchically
 (c) Serially (d) Alphabetically

UPPSC APS-2023, 07.01.2024

Ans. (d) : In Windows Explorer, files and directories (folders) are typically displayed in alphabetical order by default. This means that items are sorted based on their names, arranged in ascending order from A to Z.

27. **DEL command is used to:**

- (a) delete files (b) delete directory
(c) delete labels (d) Both (1) and (2)

ARO All. HC, 19.12.2021, Shift-II

Ans. (d) : DEL command is a command-line tool that is used to delete files and directory in Windows. It is an internal command.

28. **FAT partitions are limited in size to a maximum of _____ under Windows NT and _____ in MS-DOS.**

- (a) 4 GB, 2 GB (b) 8 GB, 4 GB
(c) 2 GB, 4 GB (d) 6 GB, 4 GB

NVS Junior Secretariat Assistant 09.03.2022 (Shift-II)

Ans. (a) : FAT partitions are limited in size to a maximum of 4 GB under Windows NT 2 GB in MS-DOS.

29. **Windows operating system was developed by**

- (a) Microsoft (b) IBM
(c) AT & T (d) HP

UPPCL TG-2, 09.11.2023, Shift-II

APS All. HC, 22.12.2021, Shift-I

Uttarakhand UDA/LDA (M) 2007

Ans : (a) Windows is a group of several proprietary graphical operating system families developed and marketed by Microsoft. Microsoft introduced an operating environment named Windows on 20 November, 1985, as a graphical operating system shell for MS-DOS in response to the growing interest in graphical user interfaces (GUIs).

30. **Which of the following is a/are GUI based operating system(s)?**

GUI

- (a) MS DOS (b) MS Windows
(c) Unix (d) All of these

(UPPCL RO/ARO-2014)

Ans : (b) GUI stands for Graphical User Interface. It is a visual representation of communication presented to the user for easy interaction with the machine. The actions in a GUI are usually performed through direct manipulation of graphical elements like buttons and icons. Communication can be performed by interacting with these icons rather than the usual text-based or command-based communication. The different types of the operating system based on GUI are MS Windows, Linux, Android, Apple iOS and Mac OS.

31. **Which of the following is NOT an operating system?**

- (a) Microsoft Office (b) iOS
(c) Ubuntu (d) Android

UPPCL TG-2, 07.11.2023, Shift-I

Ans. (a) : Android, iOS, Ubuntu, all these are operating systems whereas Microsoft Office is an application software which includes applications like Word, Excel, PowerPoint and Outlook.

32. **'Windows' is an example of which of the following**

- (a) Operating System (b) Hardware
(c) Active Desktop (d) None of these

Uttarakhand Lower (Pre) 2016

Ans : (a) Microsoft Windows is one of the most common GUI based operating systems. It is developed and marketed by Microsoft. The current version of Microsoft Windows is Windows 11.

33. **Windows is a :**

- (a) Programming language
(b) Graphics User Interface
(c) Operating system
(d) Data transfer protocol

(ISRO Electronics Mechanics 2016)

Ans : (c) See the explanation of the above question.

34. **Which of the following versions of windows 7 does not support multiple monitors?**

- (a) Starter (b) Home Premium
(c) Professional (d) Home Basic

UPPCL Assistant Accountant 22-02-2022 (Shift-I)

Ans. (a) : There is no multi-monitor support on Windows 7 starter edition, while other editions of Windows 7 support multiple monitors.

35. **Windows 7 has _____ editions.**

- (a) 8 (b) 7
(c) 5 (d) 6

UPPCL Assistant Accountant 22-02-2022 (Shift-I)

Ans. (d) : Windows 7 editions come in 6 editions: Starter, Home Basic, Home Premium, Professional, Enterprise and Ultimate.

36. **Windows 7 was the immediate successor of ____.**

- (a) Windows Vista (b) Windows XP
(c) Windows 95 (d) Windows 2000

UPPCL Assistant Accountant 22-02-2022 (Shift-I)

Ans. (a) : Windows 7 is the Microsoft Windows Operating System (OS) released commercially in October 2009 as the successor to Windows Vista.

37. **Which of the following is NOT a video conferencing tool?**

- (a) Go To Meeting (b) Cisco WebEx
(c) Skype (d) Azure

UPPCL ARO-18.02.2018

Ans. (d) : Go To Meeting, Cisco WebEx and Skype are video conferencing tools. Azure is also known as Windows Azure.

38. **Four options have been given, out of which three are alike in some manner and one is different. Select the one that is different.**

- (a) MS-Word (b) MS-Windows
(c) MS-PowerPoint (d) MS-Paint

UPPCL Assistant Accountant 24-02-2022 (Shift-II)

Ans. (b) : MS Word is a word processing software, MS-PowerPoint is a presentation software and MS Paint is a graphics software. These are applications of Microsoft Office, while MS-Windows is an operating system that provides a platform to other software.

39. **Windows is an _____ which was designed by Microsoft**

- (a) Operating System
(b) Utility Program
(c) Interpreter
(d) Application software

UPPCL Office Assistant Account 28-8-2018

Ans : (a) Windows is an operating system designed by Microsoft. An operating system (OS) is system software that manages computer hardware, software resources and provides common services for computer programs.

40. If Bill Gates had his way, by what name was Windows OS planned to be released?

- (a) Calculator (b) Control Panel
(c) Interface Manager (d) Clipboard Viewer

RRB NTPC 10.01.2021 (Shift-II) Stage Ist

Ans. (c) : If Bill Gates was to be believed, there was a plan to release the Windows operating system under the name 'Interface manager'. Windows operating system based on Graphical User Interface.

41. Which of the following group of home tab in MS - Word 365 includes bullets and Numbering feature?

- (a) Paragraph (b) Clipboard
(c) Editor (d) Styles

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (a) : MS- Word 365 includes the Bullets and Numbering feature in the paragraph group of the Home tab. The clipboard group includes cut, copy, paste and format painter features.

42. Which of the following is a real-time operating system?

- (a) Mac OS X (b) Linux
(c) Windows 7 (d) Windows CE

**ARO Alld. HC, 15.12.2021, Shift-II
(RRB JE (Shift 1), 26.8.2015)**

Ans : (d) Real-time Operating Systems (RTOS) are used in environments where a large number of events, mostly external to the computer system, must be accepted and processed in a short time or within certain deadlines. Such applications are industrial control, telephone switching equipment, flight control and real-time simulations. Windows CE (Windows Embedded Compact) is a real time operating system.

43. Which of the following types of files in Linux contain of various content types such as text, script, image videos, etc.

- (a) Regular (b) Socket
(c) Directory (d) Block

UPPCL TG-2, 17.11.2023, Shift-II

Ans. (a) : In Linux, there are several types of files, including regular files, directory files, link files, character special files, block special files, socket files and named pipe files. Regular files store data of various content types such as text, audio, video, images, scripts and program.

44. Windows 95, Windows 98 and Windows NT are known as ____?

- (a) Processor (b) Domain name
(c) Modem (d) Operating system
(e) None of these

(Ald. Bank (Clerk)2011)

Ans : (d) An operating system is a program that controls the execution of application programs and acts as an interface between the user of a computer and the computer hardware. Examples of operating system are Windows 95, Windows 98, Windows NT, Windows XP, Windows 7, Linux, Unix, Android etc.

45. Which of the following are features of Windows 10 operating system

- (i) Real-time
(ii) Batch Processing
(iii) Multitasking
(iv) Multiprogramming

- (a) (iii) and (iv) (b) (i) and (iv)
(c) (i), (ii) and (iii) (d) (ii) and (iv)

NVS Junior Secretariat Assistant 09.03.2022 (Shift-II)

Ans. (a) : Windows 10 operating system is a multitasking, multi-user and multiprogramming operating system. In multiprogramming, multiple programs are executed at the same time on the same device whereas in multitasking, the same resource is used to process multiple tasks.

46. Windows 8 OS was followed by ____.

- (a) Windows 10 (b) Windows XP
(c) Windows Vista (d) Windows 98

UPPCL Stenographer Exam-18.02.2018

Ans. (a) : Windows 8 is an operating system produced by Microsoft for use on personal computers, including name and business desktops, laptops and tablets. It is part of the Windows NT family of operating systems, succeeds Windows 8.1 and Window 10.

47. To exit the program without leaving the application?

- (a) File (b) Edit
(c) Copy (d) Close
(e) None of these

(Punjab & Sind Bank 2010)

Ans : (d) The exit from any program without leaving the application is called close. In which your first program is open and you can open the second program as well.

48. Lets you leave a screen or program ____?

- (a) Boot (b) Programs
(c) Exit (d) Folder
(e) None of these

(Punjab & Sind (Bank) 2010)

Ans : (c) In computer, the exit method stops all running message loops on all threads and leave a screen or program and closes all Windows of the application.

49. Considering the file naming restriction in Windows OS, which of the following characters CANNOT be used in a file name?

- (a) Plus (+) (b) Underscore ()
(c) Asterisk (*) (d) Minus (-)

UPPCL Assistant Accountant 24-02-2022 (Shift-II)

Ans. (c) : There are some illegal characters in Windows OS which we cannot use while creating files like, \, /, :, ", <, >, |, *, ?
* and ? reserved for as wild card characters.

50. Windows 7, the latest operating system from Microsoft corporation has _____ Indian language fonts.

- (a) 14 (b) 26
(c) 37 (d) 49

S.S.C. CGL 2010

Ans : (d) Windows 7 is the first version of windows to ship with more fonts for non-Latin scripts than for Latin based scripts. One major area of improvement is for the languages of India. There are 49 Indian language fonts in Windows 7.

51. Microsoft corporation was established in the year 1975

- (a) Bellevue, Washington, United states of America.
(b) Cupertino, California, United states of America.
(c) Albuquerque, New Mexico, United states of America.
(d) Nihonbashi, Tokyo, Japan.

RRB NTPC 23.07.2021 (Shift-II) Stage Ist

Ans. (c) : Microsoft is a multinational computer technology corporation. Microsoft was founded on April 4, 1975, By Bill Gates and Paul Allen in Albuquerque, New Mexico, United States of America (USA). Its current best-selling products are the Microsoft Windows Operating system, Microsoft Office, a suite of productivity software; a line of entertainment of games, music and video and Microsoft Azure, a cloud service platform.

52. Which of the following is a cloud storage service provided by Microsoft?

- (a) iCloud (b) OneDrive
(c) IDrive (d) Dropbox

UPPCL JE 2019 (Batch-01)

Ans: (b) OneDrive is a file hosting service operated by Microsoft. First launched in August 2007, it enables registered users to share and synchronize their files. OneDrive also works as the storage backend of the web version of Microsoft Office.

53. Which of the following is not a system tool?

- (a) Scandisk
(b) Format
(c) Folder
(d) More than one of the above
(e) None of the above

Bihar PGT TRE 2.0 2.0, 15.12.2023

Ans. (c): Folder is not a system tool, because folder is a structure of file storage and it does not replace any special system tool.

54. Which of the following work can NOT be done via Disk Cleanup?

- (a) Remove temporary web files
(b) Remove temporary Windows files
(c) Empty the Recycle Bin
(d) Change Power options

ARO Alld. HC, 16.12.2021, Shift-I

UPPCL Stenographer Exam-18.02.2018

Ans. (d) : Disk Cleanup is a system tool, with its help, the disk is scanned and unnecessary files are removed from it. It removes temporary web files, temporary Windows files and Recycle Bin files. Changing power options is not a function of Disk Cleanup.

55.is a full volume encryption feature included with Microsoft Windows versions.

- (a) Registry editor (b) Task Scheduler
(c) BitLocker (d) Defender

UPASI 04.12.2021 (Shift-II)

Ans. (c): BitLocker is a full volume encryption feature included with Microsoft Windows versions starting with Windows Vista. It is designed to protect data by providing encryption for entire volumes. By default, it uses the AES encryption algorithm in Cipher Block Chaining (CBC) or XTS mode with a 128-bit or 256-bit key. CBC is not used over the whole disk. it is applied to each individual sector.

56. What is Cortana?

- (a) Tonal quality checker
(b) A voice-based personal assistance for Windows 10
(c) Stands for corneal tonal assistance
(d) S/W for drawing cartoons in Windows

UPPCL Assistant Accountant 24-02-2022 (Shift-II)

Ans. (b): Cortana was virtual assistant developed by Microsoft that uses the Bing search engine to perform tasks such as setting reminders and answering questions for the user. It is a voice-based personal assistance for Windows 10 and Windows 11.

57. Which of the following control panel items in Windows 10 allows users to uninstall programs already installed on the computer?

- (a) Program
(b) System and security
(c) Hardware and sound
(d) User Account

UPPCL TG-II 25-01-2019 (Evening)

Ans : (a) Program dialog in control panel allows the users to uninstall and change existing software packages, as well as indicating how much space individual programs take and how frequently they are used.

58. In Windows 7 which shortcut keys display the shortcut menu for the selected item.

- (a) Shift + F4 (b) Ctrl + F10
(c) Shift + F10 (d) Alt + F12

UPPCL Office Assistant Account 28-8-2018

Ans : (c) In Windows 7 the shortcut keys Shift + F10 is used for the display the shortcut menu for the selected item.

59. In Windows 8, the shortcut key 'Windows key + X' is used to display pop-up menu that include _____?

- (a) Create (b) View
(c) Control Panel (d) Open

UPPCL Office Assistant Account 28-8-2018

Ans : (c) In Windows 8, the shortcut key 'Windows key + X' is used to display pop-up menu that included control panel.

60. Match the following actions with their result in Windows 8.

- | | |
|----------------------------------|-----------------------|
| (a) Right-click on desktop | (i) Close or sign out |
| (b) Right-click on Taskbar | (ii) Refresh |
| (c) Right-click on Windows start | (iii) Properties |
- (a) a - i, b - ii, c - iii (b) a - ii, b - iii, c - i
(c) a - iii, b - ii, c - i (d) a - ii, b - i, c - iii

UPPCL Office Assistant Account 28-8-2018

Ans : (b) The sequence of the following actions in Windows 8 is as follows.

- (a) Right-click on desktop for refresh.
(b) Right-click on the taskbar for go to properties
(c) Right-click on windows start button is used to shut down the system or sign out.

61. The Shutdown Windows, you need to selectoptions from the start menu and then select shut down.

- (a) Account (b) Settings
(c) Power (d) Control Panel

ARO Alld. HC, 19.12.2021, Shift-I
UPASI 04.12.2021 (Shift-I)

Ans. (c) : To shutdown windows, you have to go to the start menu, then select power options and then select shut down. The shortcut key (alt + F4) is used to shut down windows.

62. Which of the following versions of Windows is not released by Microsoft.

- (a) Windows 10 (b) Windows 8
(c) Windows 9 (d) Windows 7

UPPCL Office Assistant Account 28-8-2018

Ans : (c) Microsoft Windows is a major computer operating system developed by Microsoft. List of Microsoft Windows versions are Windows XP, Windows Vista, Windows 7, Windows 8, Windows 8.1, Windows 10 and Windows 11. Windows 9 is not released by Microsoft.

63. Which of the following is the latest version of windows operating system released in the year 2021?

- (a) Windows 7 (b) Windows 8
(c) Windows 10 (d) Windows 11

UPPCL Technician Electrical, 03.11.2023, Shift-II

UPPCL Executive Assistant, 25.11.2022, Shift-I

Ans. (d) : Windows 11 is the latest operating system developed by Microsoft, succeeding windows 10. It was officially announced in June 2021.

64. Which of the following Windows versions supports an additional feature called 'virtual desktop', that allows you to have multiple desktop screens where you can keep open Windows organized?

- (a) Windows Vista (b) Windows XP
(c) Windows 10 (d) Windows 8

UPPCL Technician Electrical, 03.11.2023, Shift-II

Ans. (c) : The Windows 10 multiple desktop features gives workers the feel of using multiple monitors on the same screen, which can increase productivity for users that keep many windows open at once, and includes several new features and design changes, such as a centered start menu, redesigned taskbar, improved virtual desktops and enhanced gaming capabilities.

65. Which of the following windows operating system is not valid versions?

- (a) Windows XP (b) Windows 10
(c) Windows 7 (d) Windows 11

UPPCL TG-II 28-3-2021 (Shift-I)

Ans. (d) : In the above question option 'd' is correct because windows 11 was not launched at the question time.

66. What key combination must be used to delete the selected item and move it to the recycle bin in Windows 7

- (a) Ctrl + X (b) Shift + Delete
(c) Ctrl + D (d) Alt + Delete

UPPCL TG-2, 10.11.2023, Shift-I

UPPCL Office Assistant Account 28-8-2018

Ans: (c) In Windows 7, the shortcut key Ctrl + D combination is used to delete the selected item and move it to the Recycle Bin. In other words, when you delete an item from any of the drives on your computer by making use of the Delete key or even by simply right-clicking and selecting the 'Delete' option, the file is moved to Recycle Bin in the Windows OS. Ctrl + X shortcut key is used to cut the selected item and the shortcut key shift + delete is used to permanently delete the selected item without sending it to the Recycle Bin.

67. When you delete an item from any of the drives on your computer by making use of the Delete key or even by simply right-clicking and selecting the 'Delete' option, the file is moved to _____ in the Windows OS.

- (a) Taskbar (b) Control Panel
(c) Start menu (d) Recycle Bin

UPPCL Technician Electrical, 03.11.2023, Shift-II

Ans. (d) : See the above question explanation.

68. The screen saver setting in Windows 8 includes _____ tab.

- (a) Two (b) Four
(c) Three (d) One

UPPCL Office Assistant Account 28-8-2018

Ans : (d) Windows 8 is developed by Microsoft and has been available in the market since 26 October 2012. A screen saver is an image that fills the screen whenever the computer is left idle for some time. Screen saver settings in Windows 8 includes only One Tab.

69. A _____ is an image that fills the screen whenever the computer is left idle for some time.

- (a) shortcut menu (b) wallpaper
(c) system tray (d) screen saver

UPPCL Technician Electrical, 03.11.2023, Shift-II

Ans. (d) : See the above question explanation.

70. Screensaver wait time in Windows 8 is in ____ ?

- (a) Minutes (b) Hours
(c) Seconds (d) Nano-seconds

UPPCL Office Assistant Account 28-8-2018

Ans : (a) Screensaver wait time in Windows 8 is in minutes.

71. Who owns the Windows operating system?

- (a) Intel (b) IBM
(c) Apple (d) Microsoft

(UPPCL TG-2 26.06.2016)

Ans : (d) Company	– Product
Microsoft	– Windows Operating System
Apple	– Macintosh Operating System
Intel	– Microprocessors
IBM	– Computer Hardware

72. Windows 3.0 version was released in ____ ?

- (a) 1990 (b) 1991
(c) 1992 (d) 1993

(Utt/Clerk/2008)

Ans : (a) Windows 3.0 is the third release of Microsoft Windows, launched in 1990. It features a new Graphical User Interface (GUI) where applications are represented as clickable icons, as opposed to the list of file names seen in its predecessors.

73. Which of the following is not an accessory program in Windows?

- (a) WordPad (b) VLC Player
(c) Paint (d) Notepad

UPPSC APS-2023, 07.01.2024

UPPCL Stenographer Exam-18.02.2018

Ans. (b) : Windows accessory includes WordPad, Paint and Notepad, which are inbuilt in Windows. Whereas VLC player is a media player software that needs to be installed separately.

74. Windows user interfaces are developed using ____ ?

- (a) GUI (b) Open GL
(c) X-Windows (d) Window-Graphics

UPPCL ARO 13-09-2018

Ans : (c) The X Window system provides the base technology for developing graphical user interfaces. At a very basic level, X draws the elements of the GUI on the user's screen and build in methods for sending user interactions back to the application.

75. The operating system hides the function of the ____ from the user.

- (a) CPU (b) Input/Output Device
(c) Hardware (d) Software

UPPCL TG-II 27-03-2021 (Shift-I)

Ans. (d) : The operating system operates the devices connected to the computer as well as provides an interface for the user to perform tasks easily. Whatever happens between the operating system and the hardware is hidden from the user. That is, the user cannot directly see the work of the operating system.

76. Which of the following tabs of the mouse component in control panel should be used to select the pointer speed of the mouse in windows 10?

- (a) Pointer options (b) Hardware
(c) Buttons (d) Pointers

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (a) : The pointer options tab of the mouse component in control panel should be used to select the pointer speed of the mouse in windows 10.

The size of the mouse pointer can be changed through the pointers tab. Double click speed and click lock are set by the buttons tab.

Information about the mouse is available through the hardware tab.

77. The sequence of steps to change mouse speed is:

- (a) Setting → Devices → Mouse → Cursor speed slider and change the setting to the desired speed
(b) Mouse → Devices → Settings → Cursor speed slider and change the setting to the desired speed
(c) Devices → Settings → Mouse → Cursor speed slider and change the setting to the desired speed
(d) Setting → Mouse → Devices → Cursor speed slider and change the setting to the desired speed

UPPCL Technician Electrical, 10.11.2023, Shift-II

Ans. (a) : The sequence of steps to change mouse speed is: Setting → Devices → Mouse → Cursor speed slider and change the setting to the desired speed

78. Which of the following options in the control panel in Windows 10 OS should be used to select the program you want to open for Windows web browsing, photo editing, sending e-mails and use for activities like playing music?

- (a) File Explorer Options
(b) Devices and Printers
(c) Device Manager
(d) Default Programs

25.11.2022, Shift-I

Ans. (d) : A default program that Windows runs when you use a particular type of file such as web browsing, photo editing, sending emails and playing music.

79. To add or remove printers using Windows OS, click on the printers icon from the ____.

- (a) Control Panel
(b) Printer Management
(c) Task Bar
(d) Printer Folder

UPPCL TG-II 27-03-2021 (Shift-I)

Ans. (a) : Control panel is used to add or remove any hardware or software in a computer system. To add or remove a printer, click the printer icon in the control panel.

80. What are the steps to add a printer in Windows 10?

- (a) Devices → Setting → Printers & Scanners → Add a printer
- (b) Start → Devices → Settings → Printers & Scanners → Add a printer
- (c) Start → Setting → Devices → Printers & Scanners → Add a printer
- (d) Start → Settings → Printers & Scanners → Add a printer

UPPCL Technician Electrical, 10.11.2023, Shift-II

Ans. (c) : Select the Start button, then select Settings > Devices > Printers & scanners > Add a printer or scanner.

81. Which of the following are all methods except for creating a new folder in Windows 10?

- (a) Creating a folder from the Ribbon menu or Windows explorer.
- (b) Pressing Ctrl + Shift + N where you want to create a new folder
- (c) Right clicking and selecting New folder.
- (d) To create a new folder, press the Ctrl key and double click on an existing folder.

UPPCL Office Assistant III 17-10-2018 (Morning)

Ans. (d) : To create a new folder in windows 10, a new folder can be created from the ribbon menu on the window explorer and by pressing Ctrl + Shift + N, a new folder is also created by right-clicking with the mouse. Whereas pressing the Ctrl key and double clicking on a folder is not created.

82. Moving an object around by clicking on it with a mouse is called—

- (a) Clicking
- (b) Dragging
- (c) Shifting
- (d) Dropping

UPPCL Stenographer Exam-18.02.2018

Ans. (b) : Dragging is used to move an object from one position to another position on the computer screen. To drag any other object, first of all, we have to select the object that we want to move on the screen by holding the mouse button down. As cursor moved on the screen, the object is also moved with the cursor position. When the cursor reached the desired position, the button is released.

83. Which of the following is used to send commands to the computer system through icons?

- (a) Graphical User Interface (GUI)
- (b) Application Program Interface (API)
- (c) Command Interface

- (d) System Interface
- (e) None of these

(SBI(PO)2008)

Ans. (a) : Graphical User Interface (GUI) is an operating software. It acts as an intermediary between the user and the computer, as well as provides a platform for application software. The graphical interface has an environment similar to MS Windows. It has desktop area icons, file and folder management. Given commands to the computer system using tools like icons, menus, radio buttons etc. in the graphical user interface. which makes it easier to work. Examples of GUI are Apple's Mac, Windows, Linux etc.

84. Graphical picture representing applications, files, and parts of Windows operating System are called ____.

- (a) Programs
- (b) Callouts
- (c) WordArt
- (d) Icons

UPPCL TG-2, 17.11.2023, Shift-II

ARO Alld. HC, 06.01.2022, Shift-I

APS Alld. HC, 22.12.2021, Shift-I

Ans. (d) : Icon is a graphic image, small picture or object that represents any file, program, web page or command. Icon helps to execute commands, open program or documents easily.

85. Which of the following is called windows user Interface?

- (a) CUI
- (b) GUI
- (c) WUI
- (d) MUI

UPPCL (Ste.) 28-08-2018 (Morning)

Ans. (b) : The main component of the user interface of the windows operating system is the Graphical User Interface (GUI). All MS Windows versions use GUI for communication.

86. Which of the following statements regarding GUI is incorrect?

- (a) GUI is the short form of Graphical User Interface
- (b) An OS that supports GUI may also have a text based command line interface.
- (c) Not all OS may support GUI
- (d) A text based command line interface more user friendly than GUI.

UPPCL Assistant Accountant 24.02.2022 (Shift-I)

Ans. (d) : The full name of GUI is Graphical User Interface. It is a form of user interface that allows users to interact with electronic device through graphical icons and audio indicator such as primary notation, instead of text-based user interface, typed command labels or text navigation.

87. Which of the following operating systems does NOT support GUI?

- (a) Android
- (b) iOS
- (c) Mac
- (d) DOS

UPPCL (Office Assistant III) 23-09-2018

Ans : (d) A DOS (Disk Operating System) is an Operating system that runs from a disk drive. DOS system used a command line interface. A program is started by entering its filename at the command prompt. DOS operating systems does not support GUI.

88. What is it like to shrink a window to an icon?

- (a) Opening the group window
- (b) Minimizing the window
- (c) Maximizing the window
- (d) Restoring the window
- (e) None of these

(Ald.Bank (Clerk) 2010)

Ans : (b) Microsoft windows is a Graphical user interface operating system. Windows uses icons and tools to simplify the complex operations of the computer. When we are using multitask, we shrink the window in the icon which is called minimization.

89. If you want to temporarily exit the screen without closing a window, click the _____

- (a) minimize button
- (b) scroll bar
- (c) maximize button
- (d) status bar

UPPCL TG-II 19-03-2021 (Shift-I)

Ans. (a) : If you want to temporarily exit the window without closing the screen. You must use the minimize button. It reduces the size of your screen.

90. The Windows Explorer user _____ in parts interface is divided.

- (a) Two
- (b) Six
- (c) Five
- (d) Three

UPPCL Office Assistant III 24-10-2018 (Evening)

Ans : (a) The arrangement for establishing inter connection between the computer and the user is called user interface. Interface is used to execute programs, run applications and connect devices. There are mainly two types of interfaces–

- (i) Command Line Interface.
- (ii) Graphical User Interface

91. GUI is not present in

- (a) Calculators
- (b) Laptops
- (c) Smart phones
- (d) MP3 players

UPPCL Accountant 10-02-2018

Ans : (a) GUI (Graphical User Interface) allows the user to interact with the electronic device through the graphical icons. GUI is not present in the calculator.

92. What is the full form of GUI in computer class terminology.

- (a) Graphical User Interconnection
- (b) Graphical User Interface
- (c) Graphical Unique Interface
- (d) Gopher User Interface

UPPCL TG-II 25-01-2019 (Evening)

UPPCL ARO-15.09.2018

Ans : (b) The extended form of GUI is graphical user interface. This system, there is a graphical interface between the computer and user, it includes graphical elements such as Icon, Menus, Button etc. in this various units are shown on the screen in the form of pictures.

93. Full form of GUI is

- (a) Google usual internet
- (b) Guide
- (c) Graphical user Interface
- (d) Global user Internet

MPPCS (J) 2017

Ans. (c) : See the explanation of the above question.

94. Which of the following GUI components allows users to select one option at a time

- (a) Check Box
- (b) Radio Button
- (c) Text Box
- (d) List Box

UPPCL TG-II 25-01-2019 (Evening)

Ans : (b) Radio button is a graphic control element that allows a user to select only one of a range of interactively given options.

95. Which of the following GUI components allow users to select one or more options from a set.

- (a) Radio button
- (b) Drop down list
- (c) Check box
- (d) Text box

UPPCL TG-II 25-01-2019 (Evening)

Ans : (c) Check box is a GUI (Graphical User Interface) component which allows the user to select one or more options. This is different from a radio button where the user can select only one option.

96. The Windows operating system would be a failure without a _____ interface.

- (a) Scanner
- (b) modem
- (c) mouse
- (d) webcam

UPPCL ARO 13-09-2018

Ans : (c) Mouse Interface is an essential peripheral device in Windows operating system. It is difficult to operate a computer system without a mouse. Touch pads are used to some other devices such as laptops.

97. The keyboard shortcut for the undo function is

- (a) Ctrl + Z
- (b) Ctrl + V
- (c) Ctrl + C
- (d) Ctrl + U

Forest Guard - 02-12-2018 (shift- I)

Ans. (a) : The keyboard shortcut for the undo function is Ctrl + Z while.

Ctrl + V → Paste

Ctrl + C → Copy

Ctrl + U → Underline text

98. Following device aids in a GUI-based OS

- (a) Keyboard
- (b) Touchpad
- (c) All of these
- (d) Mouse

UPPCL Asst. Accountant Exam-09.02.2018

Ans. (c) : GUI full form is Graphical User Interface. Operating system (OS) based on GUI helps to operate the computer hardware in user friendly manner. Mouse, Keyboard, Touch pad all these devices support GUI based operating system.

99. Which brand of computers first used the combination of GUI and mouse together?

- (a) IBM Computers
- (b) Babbage computers
- (c) Macintosh
- (d) Microsoft Windows

UPPCL Asst. Accountant Exam-09.02.2018

UPPCL Accountant 10-02-2018

Ans. (c) : Macintosh is the first category of personal computer that was introduced by a company called apple launched in the market in January 1984. The Macintosh was the first commercially successful PC (Personal Computer). which mouse and GUI were made available for the first time. Microsoft Windows is a series of software operating system and graphical user interface produced by Microsoft this GUI was added to MS-DOS in 1985.

100. Which of the following have a faster learning curve?

- (a) Text-based user interface
- (b) Graphical user interface
- (c) Command Line Interface
- (d) Command Prompt

UPPCL Asst. Accountant Exam-09.02.2018

Ans. (b) : Graphical user interface is a faster learning curve. Text-based user interfaces are also called terminal user interfaces. It can be used to control the screen and can accept mouse and other inputs. The user interacts with electronic devices such as computer, hand-held device, and other devices through graphical user interface. Command-line interface is interacting with computer program. Where are the user command-line interpreter applications found in most windows operating systems. It is an input field that serves as a text-based user for an operating system or program.

101. The small pictorial representation of software on the screen is called:

- (a) Tool
- (b) Map
- (c) Logos
- (d) Icons

UPPCL Asst. Accountant Exam-09.02.2018

Ans. (d) : A small graphical representation of software on the screen is called an icon. To access the program or data, can serve as an electronic hyperlink or file shortcut. User can activate icons using Mouse, Pointer finger or more recently voice commands. Tool is the name of a menu in MS Word. This implementation is done to facilitate a certain type of work level. Marking the position of places, cities, countries, mountains, rivers etc. in miniature on paper with the help of a scale is called mapping. Logo is a graphic image. Chosen to represent a company or organization.

102. In Windows, if an icon has a slightly curved arrow on it, it represents _____

- (a) Shortcut icon
- (b) Slider
- (c) Folder icon
- (d) Dialog box

UPPCL TG-II 19-03-2021 (Shift-II)

Ans. (a) : In Windows, the shortcut icon resembles a curved arrow that opens when you double-click it. Shortcut icons provide easy access to certain objects on our systems, such as a program document or printer.

103. The purpose of the Eyedropper Tool is :

- (a) copying and transferring a text
- (b) copying and transferring a colour
- (c) copying and transferring a Clip Art
- (d) copying and transferring a shape

UPPCL Assistant Accountant 25.02.2022 (Shift-I)

Ans. (b) : Eye dropper tool is used to pick a color from an image or a Photoshop document or in other words, The eye dropper tool is used to sample a color from a given image and use that color the way whatever you want.

104. _____ are graphical objects. Which represent commonly used applications

- (a) GUI
- (b) driver
- (c) windows
- (d) application
- (e) Icon

(Ald. Bank (Clerk) 2011)

Ans. (e) Icon is a graphical object that represents a file or program on your monitor. There are different types of computer desktop icons like.

1. System icons– The left side of the screen is automatically created by windows during installations.

2. Shortcut icon– An arrow is made in their lower left corner. It provides easy access to some object like program, document or printer etc.

3. Folder and document, icon– This is a non-system icon, which there are no arrows, they explain the object for which they are made.

105. Those graphical pictures which represent objects like files, folders etc. they are _____

- (a) task bar
- (b) windows
- (c) desktop
- (d) icon
- (e) None of these

RRB NTPC 26.04.2016 Online (Shift-III)

(RBI (Office Assi-2012)

Ans : (d) See the explanation of the above question.

106. An/A _____ is a pictorial representation of objects, important not only for aesthetic reasons but also as part of the visual identity of a program.

- (a) Pictures
- (b) Icon
- (c) Shortcut
- (d) Menu

UPPCL (Office Assistant III) 23-09-2018

Ans : (b) Icon is used to give visual identity to any program. Icon is a pictorial representation.

107. To change the desktop background, screen saver etc., in Windows 10, one can:

- (a) double click anywhere on the desktop
- (b) right click on the desktop and select 'New'
- (c) right click on desktop and select 'Personalize'
- (d) left click on the desktop and select 'Personalize'

UPPCL Assistant Accountant 24-02-2022 (Shift-II)

Ans. (c) : To change desktop background, screen saver etc. In window 10, right click on desktop and select personalize option. Other way–

Go to setting personalization lock screen and select screen saver setting and this setting select screen saver from the drop down list.

108. The Windows operating system has _____ standard icons.

- (a) 4
- (b) 5
- (c) 6
- (d) 7

UPPCL (Office Assistant III) 23-09-2018

Ans : (a) There are four standard icons in the windows operating system. (i) Documents (ii) Applications (iii) Toolbars (iv) Menu bars

109. If you want to move an icon on your desktop. It is called

- (a) Double clicking
- (b) Highlighting
- (c) Dragging
- (d) Pointing
- (e) None of these

(Ald.Bank (Clerk) 2010)

Ans : (c) To move an icon on your desktop, move the mouse cursor over it. Then the right click mouse button to move it, then this action is called dragging.

110. Consider the statements given below and choose the correct option accordingly.

S1 Deleting the shortcut only the icon/button that loads the original program will be deleted. But the original program will not be destroyed and will remain in your computer.

S2 When you drag and drop a file above the Recycle Bin the file is deleted from its original location

- (a) Both the statements are correct
- (b) Both the statements are wrong
- (c) Only S1 is correct
- (d) Only S2 is correct

UPPCL Office Assistant III 17-10-2018 (Morning)

Ans : (a) When we delete the shortcut icon of a file only icon is deleted. The original file or program is not deleted. But when we delete the main file, the icon is also deleted along with the file. When the file is dragged on the recycle bin icon, the file gets deleted from the original location. Hence the statements S1 and S2 in the above are true.

111. A small push/button like object with image thumbnail which loads your files with quick double click with mouse is called.

- (a) Screensaver
- (b) Desktop
- (c) Icon
- (d) Wallpaper

UPPCL Office Assistant III 17-10-2018 (Morning)

Ans : (c) Icon is a small graphical representation of a program or file. When you double click an icon, the associated file or program will open.

112. Which of the following best describes the process of renaming a file in a window system does the option.

- (a) Double click on the file icon and select copy option.
- (b) Right click on the file icon and select copy option.
- (c) Left click on the file icon and select rename option.
- (d) Right click on the file icon and select the option rename.

UPPCL (TG-II) 24-01-2019 (EVENING)

Ans : (d) To rename a file in Windows system, right click on the file icon and select rename option.

113. Arrange the following steps in the correct sequence to create a folder in Windows 7.

- a) Click or tap the 'File Explorer' icon on the taskbar.
- b) Click or tap the 'New folder' button on the Home tab.
- c) Open the drive or folder where you want to create a folder.
- d) Press Enter or tap in a blank area.
- e) With the New Folder name selected, type a new name.

- (a) d, a, c, b, e
- (b) a, c, e, b, d
- (c) a, c, b, e, d
- (d) c, a, b, e, d

UPPCL (Office Assistant III) 23-09-2018

Ans : (c) The correct sequence to create the folder in windows 7 is follows.

- (a) Tap the 'File Explorer' icon on the taskbar.
- (c) Open the drive or folder where you want to create a folder.
- (b) Click or tap the 'New folder' button on the Home tab.
- (e) With the New Folder name selected, type a new name.
- (d) Press Enter or tap in a blank area.

114. Which of the following Windows 7 features help you to stack windows open by any mouse gesture as per your wish?

- (i) Aero Snap
- (ii) Aero Shake
- (a) Only (ii)
- (b) Only (i)
- (c) Neither (i) nor (ii)
- (d) Both (i) and (ii)

UPPCL Assistant Accountant 22-02-2022 (Shift-I)

Ans. (b) : Aero snap is a new Window management feature in windows 7. The goal of this Aero snap feature is to provide the user with an easy way to position (resize) your open windows any way they want with minimal clicks and effort.

Aero shake lets you easily drag the title bar of the Windows to the left and right side.

115. Which of the following is the keyboard shortcut to open file explorer in windows 10 OS.

- (a) Windows logo key + E
- (b) Ctrl + E
- (c) Ctrl + S
- (d) Windows logo key + S

UPPCL Executive Assistant 29.11.2022, Shift-I

Ans. (a) : The keyboard shortcut to open file explorer in windows 10 is "windows logo key + E".

116. In Windows Explorer, Which of the following includes Change Icon View?

- (a) Address bar
- (b) Title bar
- (c) Navigation pane
- (d) Menu bar

UPPCL (Office Assistant III) 23-09-2018

Ans : (d) The initial name of file explorer was Window Explorer. It is a part of the operating system itself, which presents many user interface items on the monitor. To change the view of the icon inside it use the Menu bar. Menu bar have drop down list many option such that extra large icons, large icons, medium icons, small icons etc.

117. Which of the following button is not found in the upper right corner of almost every window?

- (a) Close (b) Maximize
(c) Open (d) Minimize

UPPCL Office Assistant Account 28-8-2018

Ans : (c) The open button is not in the top right corner of almost every window.

118. In Window XP, where is the recycle bin icon.

- (a) In the shortcut Menu
(b) On the desktop
(c) On the status bar
(d) In the properties dialog box

UPPCL Office Assistant Account 28-8-2018

Ans : (b) If a record is deleted; it gets stored in the Recycle Bin. In Windows XP, it is on the desktop.

119. Substitute the question mark with the appropriate option. In Window 10, where must you go to add icons like. This PC, Recycle bin etc. Your desktop to start > settings > personalization > ? > desktop icon settings

- (a) Themes (b) start
(c) background (d) colors

UPPCL Office Assistant Account 28-8-2018

Ans : (a) Windows 10 is the latest version of Windows. In this following steps to add icons like recycle bin etc. Let's follow-

Start > Setting > Personalization themes desktop icons > Setting.

120. In Windows are a small picture used to open a program or documents

- (a) Button (b) Icon
(c) Shortcut key (d) Menu

UPPCL Office Assistant Account 28-8-2018

Ans : (b) An icon is a small graphical representation of a program or file. When we double-click on an icon the associated file or program opens.

121. Which part of the window contains Forward and backward buttons?

- (a) Menu bar (b) Title bar
(c) Navigation pane (d) Address bar

UPPCL (Office Assistant III) 23-09-2018

Ans : (d) The Window address bar has forward and backward buttons, through which you can see the next page and the previous page.

122. Which of the following is the first screen displayed after the booting process of a windows system?

- (a) Status bar (b) Menu bar
(c) Desktop (d) Icon

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (c) : After the completion of the booting process, the first screen that appears on the monitor in a windows system is known as the desktop.

123. Which of the following categories of computers are larger and not meant to be portable?

- (a) Notepads (b) Palmtops
(c) Laptops (d) Desktops

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (d) : Desktop categories of computers are large, due to which they are not portable, whereas notepads, Palmtops and laptops are small in size and easy to portable.

124. To change the size of your text and apps in Windows 10, which one of the following options from display in settings is selected?

- (a) Display resolution
(b) Calibrate display color
(c) Scale and layout
(d) Display orientation

UPPCL TG-2, 17.11.2023, Shift-II

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (c) : To change the size of text and apps in Windows 10, select the Scale and layout option of the display in Settings in which scale, display resolution, display orientation, multiple displays are available.

125. In Windows 10, which of the following options of Display in Settings is to be selected to change the screen resolution?

- (a) Calibrate display color
(b) Display orientation
(c) Display resolution
(d) Scale and layout

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (c) : In the display resolution row, select the list and choose an option. It's usually best to stick with the one that's marked.

Screen resolution represents the number of dots or pixels in an image. It occurs in a computer monitor, television or any other display device.

126. Which of the following statements is incorrect regarding changing the text size of a windows 10?

- (a) In the Scale and Layout section, change the size of text, apps and other items field is present
(b) The recommended value for the change the size of text, apps and other items field is 100%
(c) Start → Settings → System → Display is used to open the display setting window
(d) Selecting an option from the drop-down menu of the change the size of text, apps and the other items field

UPPCL Executive Assistant 28.11.2022, Shift-I

Ans. (b) : To change the text size of the windows 10, first of all Start → Setting → System → Display is used to open the display setting windows. Hence option (b) statement is false.

127. _____ is the first screen that appear after the booting process of the windows operating system is complete.

- (a) folder (b) desktop
(c) icon (d) palmtop

UPPCL Executive Assistant 30.11.2022, Shift-I

Ans. (b) : After the completion of the booting process, the first screen which appears on the monitor in a windows system is known as a desktop.

128. The first screen that appears after completion of the booting process of a Windows system is called _____.

- (a) Desktop (b) Dialogue box
(c) Home page (d) Status bar

**UPPCL Assistant Accountant 22-02-2022 (Shift-I)
UPPCL (TG-II) 24-01-2019 (Morning)**

Ans. (a) : The first screen that appears when Windows loads after the Windows booting process is complete is called the desktop. When we open the computer, we get the welcome Window on the screen, which displays many small pictures on the screen of the Monitor. This screen itself is called the desktop. The small picture on the screen are known as icons.

129. In Windows 10, When you right-click on 'This PC' icon on the desktop, how many options are displayed in the pop-up menu?

- (a) 10 (b) 7
(c) 8 (d) 5

UPPCL (Office Assistant III) 23-09-2018

Ans : (a) In Window 10 when right click on PC, then 10 types of option open up.

130. When a Windows application is minimized. It is appears as a small icon on the top of the windows operating system.

- (a) Menu bar (b) Taskbar
(c) Title bar (d) Screen bar

UPPCL TG-II 25-01-2019 (Morning)

Ans : (b) The taskbar is located in the form of a horizontal blue bar at the lowest part of the computer screen. In which minimized any application appears as a small icon.

131. The default screen on the monitor when no other application is running is called-

- (a) Login Screen (b) Interface
(c) Desktop (d) Screensaver

UPPCL Accountant 10-02-2018

Ans : (c) Desktop is the main screen area, which you see after starting your computer and logging on to Windows. This keeps all the icons organized on the screen.

132. Which of the following statements are True/false with respect to Windows systems.

(i) Related to deleting shortcuts an application program is also deleted.

(ii) Shortcut cannot be created for folders

- (a) (i) – True (ii) – False
(b) (i) – True (ii) – True
(c) (i) – False (ii) – True
(d) (i) – False (ii) – False

UPPCL TG-II 19-03-2021 (Shift-II)

Ans. (d) : Deleting the shortcut of any application in Windows system does not delete any program. Unless uninstalled from there in the control panel. Shortcut can also be made for any files or folders. For this right click on the desired file or folder and click on create shortcut.

133. The main screen area that appears after logging on to Windows is called _____

- (a) Menu (b) Task bar
(c) Mouse (d) Desktop

Lower-II (Re-exam) (28-07-2019)

Ans. (d) : The main screen area visible after logging on the Window is called desktop. This is the background of all program and the instructions needs to access them.

134. Which of the following keyboard shortcuts represent the start menu in windows operating system.

- (a) Ctrl + Z (b) Alt + Spacebar
(c) Ctrl + Esc (d) Alt + Enter

**Com. Asst. Alld. HC, 21.12.2021, Shift-I
Lower Exam – 01-10-2019 (Shift-I)**

Ans. (c):

Shortcut button	Works
Ctrl + Z	– Undo the work done earlier.
Alt + Spacebar	– To open the window menu of the program.
Ctrl + Esc	– Open the start menu
Alt + Enter	– Open the properties of the selected them
Ctrl + C	– Copy the selected item
Ctrl + X	– Cut the selected item

135. In Windows 10, to open the Start menu, one must press the _____ key on the keyboard.

- (a) Windows (b) Esc
(c) Home (d) Backspace

UPPCL Technician Electrical, 03.11.2023, Shift-II

Ans. (a) : To open the Start menu, do either of the following:

On the left end of the taskbar, select the Start icon.
Press the Windows logo key on your keyboard.
Press Ctrl + Esc combination key.

136. By default, all the user-made files in Windows are stored in:

- (a) My Files (b) My Documents
(c) Local Drive (d) Desktop

UPPCL Stenographer Exam-18.02.2018

Ans. (b) : My Documents– This is the system folder of the computer. When we create a file and save it directly, it gets saved in my Documents by default. Folder like my music, my picture, my videos etc. reside in this by default.

137. Data stored on your Windows system in a fixed format is called:

- (a) File (b) Database
(c) Register (d) Cluster

UPPCL Stenographer Exam-18.02.2018

Ans. (a) : Data stored on your Windows system in a fixed format is called file.

138. Given below are the steps for creating a desktop shortcut for a file or folder in Windows. One of the steps is missing. Replace the question mark with the appropriate option. Navigate to the file or folder on your computer ->?-> A menu will appear, Scroll down the

menu that appears -> Left – click the 'Send To' item on the list-> Left-click the 'Desktop' Icon shortcut item on the list -> Close or minimize all open windows.

- (a) Right-click on the file or folder
- (b) Left-click on the file or folder
- (c) Select file or folder
- (d) Double-click on the file or folder

UPPCL (Office Assistant III) 23-09-2018

Ans : (a) In this situation we always right click on the file or folder.

139. When does page fault occur.

- (a) When there is an error in a specific page.
- (b) When a program reaches a page that is open at that time do not be in memory
- (c) When the program accesses the page or main memory
- (d) When a program accesses another program's page

(SSC CGL (TIER-1) 27-10-2016, 10 am)

Ans : (b) A page fault occurs in a computer system. When a program accesses a page that is not in the main memory at that time.

140. In Windows XP, which combination of keys is used for deleting a file permanently from a computer?

- (a) Shift + Ctrl
- (b) Shift + Delete
- (c) Alt + Ctrl
- (d) Alt + Delete

UPPCL JE 31-01-2019 (Batch-02)

Ans: (b) In Window XP, Shift + Delete is used to permanently delete a file from the computer.

141. When you select file or directory icon in windows and press the shift and delete keys. What will happen if you press together.

- (a) The file or directory will be moved to the archive folder
- (b) A dialog box will appear to confirm whether you want to permanently delete the file or directory.
- (c) The file or directory will be moved to the my documents folder.
- (d) The file or directory will be moved to the Recycle bin

UPPCL TG-II 25-01-2019 (Morning)

Ans : (b) In Windows, when we want to permanently delete a file or directory icon. We press with shift and delete buttons simultaneously, which displays a dialog box and gives the option Yes/No if the file is to be deleted. So we choose the Yes/No.

142. Keyboard shortcut for navigating across multiple open windows is:

- (a) Ctrl + Tab
- (b) Alt + Shift
- (c) Ctrl + Shift
- (d) Alt + Tab

UPPCL Stenographer Exam-18.02.2018

Ans. (d) : When we keep more than one window open in the computer and switch between them from one window to another. If you want to do this, then use the Alt + Tab key from the keyboard.

143. That place is called which the user can create to store the files?

- (a) Cursor
- (b) Text
- (c) Folder
- (d) Boat
- (e) None of these

(Punjab & Sind (Bank) 2010)

Ans : (c) That place is called folder which the user can create to store the files.

144. In Windows 8, what is the short key to create a new folder on the desktop?

- (a) Ctrl + Shift + N
- (b) Ctrl + Shift + F
- (c) Ctrl + Shift + G
- (d) Ctrl + Alt + T

UPPCL Office Assistant III 24-10-2018 (Mor.)

Ans: (a) To create a new folder on the desktop in window 8 the shortcut key Ctrl + Shift + N is used.

145. Arrange the following steps in the correct sequence to change the screen saver in window 7.

- a) Select the 'Appearance and Personalization' category
 - b) Open the Control Panel from the Start menu
 - c) Choose 'Change Screen Saver' from the Personalization area.
 - d) Click 'OK'
 - e) Select a screen saver image
- (a) b, a, c, d, e
 - (b) b, a, c, e, d
 - (c) a, b, c, e, d
 - (d) b, c, a, e, d

UPPCL (Office Assistant III) 23-09-2018

Ans : (b) To change the screen saver in Window 7 following are the steps.

- b) Open the Control Panel from the Start menu
- a) Select the 'Appearance and Personalization' category
- c) Choose 'Change Screen Saver' from the Personalization area.
- e) Select a screen saver image
- d) Click 'OK'

146. Which of the following is the maximum cursor speed of the mouse in windows 10?

- (a) 20
- (b) 40
- (c) 10
- (d) 30

UPPCL Executive Assistant 28.11.2022, Shift-I

Ans. (a) : In windows 10 the mouse cursor speed is 10 by default and maximum cursor speed 20.

147. In which section of Microsoft Windows 8 can the settings of mouse, display, sound, network and keyboard be changed?

- (a) Browser
- (b) Control Panel
- (c) Office tools
- (d) Accessories

UPPCL TG-2, 17.11.2023, Shift-II

Forest Guard - 02-12-2018 (shift- II)

Ans. (b) : Control Panel is a features of the windows operating system, which allow the user to control and modify system settings. It contains a number of small application or control panels that can be used to view and change hardware or software settings. Example-keyboard, mouse, date and time settings.

148. There are different versions of Window 7 each of which is separate. But interoperable consists of a set of pervasive capabilities.

- (a) five (b) seven
(c) eight (d) six

UPPCL TG-II 19-03-2021 (Shift-I)

Ans. (d) : There are six different versions of windows 7 each of which is different. Lower versions feature set in each versions and additional feature are included.

- (i) Windows 7 starter operating system
(ii) Windows 7 home basic operating system
(iii) Windows 7 home premium operating system
(iv) Windows 7 professional operating system
(v) Windows 7 enterprise operating system
(vi) Windows 7 ultimate operating system

149. State whether the given statements are true or false.

- (i) The control panel can be used to uninstall the pre-installed programs on a Windows system.
(ii) The date and time of Windows system cannot be changed more than once in a day
(a) Both (i) and (ii) are true
(b) Both (i) and (ii) are false
(c) (i) is false, (ii) is true
(d) (i) is true, (ii) is false

UPPCL Assistant Accountant 24-02-2022 (Shift-II)

Ans. (d) : Programs that are already installed in windows systems can be uninstalled using the control panel. Hence statement (i) is true. The date and time of the window system can be changed by the user as many times as he wishes hence statement (b) is false.

150. Using the windows taskbar, which of the following features can be set/changed?

- (i) Date
(ii) Time
(a) Neither (i) nor (ii) (b) Only (i)
(c) Only (ii) (d) (i) and (ii) Both

UPPCL Executive Assistant 23.11.2022, Shift-I

Ans. (d) : The taskbar is at the bottom of the desktop, but you can also move it to either side or the top of the desktop.

Steps to change date and time in windows -

- (i) Right - Click on the time at the bottom right of the screen.
(ii) Select the adjusted date/time.
(iii) Select the date and time tab on the left side of the 'Setting' pop-up window.
(iv) Click on change under change Date/Time.
(v) Enter the time and Press change.

151. In Windows 7, When you right-click on the desktop, the 'Sort By' on the pop-up menu DOESN't include _____ option

- (a) Name (b) Size
(c) Item Type (d) Author Name

UPPCL (Office Assistant III) 23-09-2018

Ans : (d) When we right-click on any Windows desktop. The options like Name, Size and item type etc. are included under 'sort by' on the pop-up menu whereas it has nothing to do with author name.

152. Which of the following is a movable, hide able icon bar that is set at the very edge of a Graphical User Interface (GUI) desktop and serves as a launching pad for application?

- (a) Start menu (b) Task bar
(c) Icon (d) Application

UPPCL TG-2, 09.11.2023, Shift-I

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (b) : At the bottom edge of the desktop, there is a thin horizontal bar like box with a start button at one end and a lock at the other end, this is known as the taskbar. All those programs and files are displayed as icons in the taskbar list which are minimized at that time.

153. Which of the following is a special section of the windows taskbar that displays programs running in the background and information such as time and date, notifications, internet connection status and current volume level?

- (a) Menu icon (b) Start menu
(c) Quick launch bar (d) Notification area

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (d) : The notification center is located at the right end of the taskbar. It contains icons you might find yourself selecting often battery level, volume central, date & time, internet connection, notification area etc.

154. Which of the following statements is incorrect about the taskbar of the Windows 10 operating system?

- (a) The Start menu is on the left side of the taskbar.
(b) Internet connection status is displayed in the notification area of the taskbar.
(c) The taskbar is at the bottom of the screen.
(d) Icons of pinned applications are displayed in the notification area of the taskbar.

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (d) : The bar at the bottom of the Windows 10 desktop screen is called the taskbar and the Start menu is displayed on the left side of the taskbar and Internet connection status is displayed in the notification area on the right side of the taskbar. You can change or customize the taskbar as per your choice. The Start button, searchbar, task view button, quick launch, notification area element is located on the taskbar.

155. Which of the following options in the Windows 10 operating system places an app directly on the taskbar for quick access when it is on your desktop?

- (a) Save to taskbar (b) Pin to taskbar
(c) Assign to taskbar (d) Store to taskbar

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (b) : The Windows 10 operating system uses Pin to Taskbar for quick access when on the desktop and displays the Pin to Taskbar icon in the taskbar after the application is closed.

156. Which of the following statements is correct about the start menu of windows 10 Operating System?

- (a) It is located in the menu bar of the window
- (b) It is located in the middle of the menu bar of the window
- (c) It is located in the right corner of the taskbar
- (d) It is located in the left corner of the taskbar

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (d) : The start menu in windows 10 operating system is typically located in the bottom - left corner of the screen. It is represented by the windows logo icon. You can click on it to open the start menu, which provides access to your installed apps, settings and various system features.

157. Where is the taskbar placed in Microsoft Windows in the default settings?

- (a) At the top of the screen
- (b) At the bottom of the screen
- (c) At the center of the screen
- (d) At no place on the screen

**UPPCL Assistant Accountant III 25-02-2022 (Shift-I)
SSC MTS 10-10-2017 (Shift-I)**

Ans : (b) The taskbar in default setting of Microsoft Windows is at the bottom of the screen. It is always visible and highlighted so it can be easily seen.

158. Which of the following options in setting is used to set time and time zone in windows 10 OS?

- (a) Time & language
- (b) Accounts
- (c) Network and Internet
- (d) System

UPPCL Executive Assistant 29.11.2022, Shift-I

Ans. (a) : In windows 10, to set the time and zone, you can go to "Settings" and then select "Time language" section, you will find option to set the date and time as well as the time zone.

159. Which of the following options in setting in windows 10 OS is used to change the screen layout to Landscape, Landscape (flipped), etc?

- (a) Display Resolution
- (b) Scale and Layout
- (c) Display Orientation
- (d) Rotation Lock

UPPCL Executive Assistant 29.11.2022, Shift-I

Ans. (c) : To change the screen layout to options like landscape, landscape (flipped), portrait (flipped) in windows 10, you would go to "setting" within the "system" settings, select "display" here, you can adjust the orientation or screen layout setting to change the display orientation as desired.

160. A horizontal thick line visible at the bottom of the windows operating system is called a ____.

- (a) Scroll bar
- (b) Progress bar
- (c) Taskbar
- (d) Status bar

UPPCL Executive Assistant 30.11.2022, Shift-I

Ans. (c) : The taskbar is an example of a category of always visible graphical user interface elements that provide access to fundamental operating system functions and information.

161. Arrange the steps in correct order to change the date/time in Windows 10.

- a) Select 'Adjust Date/Time'
- b) Right-click on the time on the bottom-right of the screen.
- c) On the left side of the 'Setting' pop-up window select the Date & Time tab.
- d) Enter the time and press 'Change'.
- e) Under 'Change date and time' click 'Change'.

- (a) a, b, c, e, d
- (b) b, a, e, c, d
- (c) b, a, c, e, d
- (d) b, a, c, d, e

UPPCL (Office Assistant III) 23-09-2018

Ans : (c) Following are the correct sequence of steps to change date/time in windows-

(b) Right-click on the time on the bottom-right of the screen.

(a) Select 'Adjust Date/Time'

(c) On the left side of the 'Setting' pop-up window select the Date & Time tab.

(e) Under 'Change date and time' click 'Change'.

(d) Enter the time and press 'Change'.

162. The date and time on the desktop are at

- (a) Taskbar
- (b) My computer
- (c) Recycle bin
- (d) (a) and (b) only
- (e) None of these

(Ald. Bank (Clerk) 2011)

Ans : (a) The date and time on the desktop are in the right corner of the task bar. To set the time and date double Click on the time displayed in the taskbar. So that a calendar will be displayed in which the date and time are set.

163. The date and time on the desktop are available in ____

- (a) Keyboard
- (b) Recycle bin
- (c) My computer
- (d) Taskbar
- (e) None of these

(Syndicate Bank (Clerk) 2010)

Ans : (d) See the explanation of the above question.

164. Which of the following options is Not available in 'Taskbar and start Menu Properties' for customisation of the taskbar?

- (a) Lock the Taskbar
- (b) Auto-Hide the Taskbar
- (c) Disable Taskbar
- (d) Use Small Icons

UPPCL (Office Assistant III) 23-09-2018

Ans : (c) Taskbar and start Menu properties do not contain the disable task bar for customization.

165. Which of the following is NOT a power option?

- (a) Shutdown
- (b) Sleep
- (c) Hibernate
- (d) Logout

UPPCL Accountant 10-02-2018

Ans : (d) Logout means end access system. It is also called sign off in other words. It is not a power option.

166. There is a special area of your desktop that keeps track of all your running programs and their windows, constantly updating itself to show icons for your running programs/_____
- (a) Control Panel (b) Task Bar
(c) Windows Explorer (d) Title Bar

UPPCL Office Assistant III 17-10-2018 (Morning)

Ans : (b) At the bottom edge of the desktop there is a thin strip-like box with a start button at one end (left-hand side) and a clock at the other end (right-hand side) which is known as the task bar.

167. Which of the following statements is/are true for the recognition of Task bar?

- (i) Start button is located on its left-hand side.
(ii) Clock is located on its right-hand side.
(a) Only (ii) (b) Both (i) and (ii)
(c) Neither (i) nor (ii) (d) Only (i)

UPPCL Technician Electrical, 10.11.2023, Shift-II

Ans. (b) : See the above question explanation.

168. Identify the following window

- (a) Task Bar (b) Title Bar
(c) Status Bar (d) Start Menu

UPP Computer Operator 21-12-2018 (Batch-02)

Ans : (a) The taskbar is an element of the operating system located at the bottom of the screen. It allows you to locate and launch programs via the start button or view any currently open programs.

169. In Windows 7, how many check boxes are available under the 'Taskbar' tab in 'Taskbar and Start Menu Properties' dialogue box?

- (a) 4 (b) 2
(c) 5 (d) 3

UPPCL (Office Assistant III) 23-09-2018

Ans : (a) There are three dialog boxes under the taskbar in Window 7. It is a taskbar such as, Lock the taskbar, Auto hide the taskbar, use small icons.

170. In Windows 7, the taskbar lists all the programs and files which are_____.

- (a) deleted (b) open
(c) closed (d) moved

UPPCL (Office Assistant III) 23-09-2018

Ans : (b) The windows 7 taskbar lists all the programs and files that are currently open as icons.

171. In windows OS, a window can be maximized by double - clicking on its_____.

- (a) Ruler (b) Title bar
(c) Menu bar (d) Status bar

UPPCL Executive Assistant 29.11.2022, Shift-II

Ans. (b) : The title bar at the top of a window display an application defined icon and line of text. The text specifies the name of the application and indicates the purpose of the window. The title bar also makes it possible for the user to move the window using a mouse or other pointing device. In windows OS, a window can be maximized by double clicking on its title bar.

172. The maximize button, minimize button and close button are visible in any Windows.

- (a) Title bar (b) Menu bar
(c) Status bar (d) Ruler bar
(e) Tool bar

(Ald. Bank (Clerk)2011)

Ans : (a) The horizontal bar at the top of the Window is called title bar, which displays the name of the running program and the name of file, there are minimize, maximize and close buttons on the right side.

173. If a window screen is already maximised, then which of the following options is used to shrink the window to its previous size?

- (a)  (b) 
(c)  (d) 

Ans. (c) : Windows allows you to easily enlarge, hide, or shrink a window using the Minimize, Maximize, and Restore buttons.

All these three buttons are at the right end of the title bar. The Minimize button shrinks the window and places it on the taskbar while leaving the program running.

The Maximize button, which looks like a small window, is used to enlarge a window to cover the entire desktop.

After a window is maximized, the Maximize button changes to the Restore button. It looks like two windows near one another. If you click the Restore button, the maximized window shrinks to its previous size (the size it was before you maximized it).

174. _____ contains buttons and menus that provide quick access to commonly used commands

- (a) Menu bar (b) Tool bar
(c) Window (d) Find
(e) None of these

(Syndicate Bank (Clerk) 2010)

Ans : (b) A tool bar in a computer Graphical user interface (GUI) is a horizontal row or vertical column of selectable image buttons, which the user commonly used to provides quick access to commands.

175. Which of the following is NOT a process for Windows setup?

- (a) Offline configuration
- (b) Online configuration
- (c) Windows PE
- (d) Down-level

UPPCL (Office Assistant III) 23-09-2018

Ans : (a) Offline configuration contains Sample Offline XML file which is in directory install .

176. What is the command at the top of the screen like file, edit, font tools, to run the program and change things.

- (a) Menu bar
- (b) Tool bar
- (c) User friendly
- (d) Word processor
- (e) None of these

(Punjab & Sind (Bank) 2010)

Ans : (a) A menu bar is a thin horizontal bar that contains the labels of drop down menus in GUI. It allows the user to invoke commands to perform essential functions of any program such as opening and closing, editing text, and quitting the program.

177. Which statement is wrong regarding file name?

- (a) The files can have the same name or the same extension but both cannot be the same
- (b) Each file in the same folder has a unique name
- (c) File extension is another name of the type of file
- (d) File extension comes before the dot after the name of the file
- (e) None of these

(IAS (Pre) 2010)

Ans : (d) A files extension or file name extension is the suffix at the end of a computer file. It comes after the dot. And is usually two to four characters long. The file extension defines the type of file and tells your computer which application can run or open the file. What icon to use for the file like- .bat, .bin, .doc, .xlsx.

178. Microsoft Windows allows users to type file names up to characters including spaces provides facility.

- (a) 255
- (b) 55
- (c) 5
- (d) 155

UPPCL Office Assistant III 24-10-2018 (Evening)

Ans : (a) In Microsoft Windows user can write any file name up to 255 characters, including spaces such that minimum 1 and maximum 255.

179. Text and other data are stored in a temporary area and later transferred to some other place. It is pasted.

- (a) Clipboard
- (b) ROM
- (c) CD-ROM
- (d) Hard disk
- (e) None of these

(UBI (Bank) 2011), (Punjab & Sind (Bank) 2011)

Ans : (a) Clipboard is a temporarily storage area that stores our cut or copied text or images etc. When we copy any text or picture. It comes in the clipboard and

when we paste this copied object in any other file. It copied from the clipboard to that place. Data is stored in the clipboard until we delete it. We copy some other data or shut down the computer. We can paste it more than once. Because it remains in the clipboard.

180. Which of the following is used for data transfer between documents or applications. Via copy and paste operations?

- (a) Paragraph
- (b) Clipboard
- (c) Table
- (d) Smart Art

(AHC RO-2016)

Ans : (b) See the explanation of the above question.

181. An e-mail or icon on a web page that links to another web page is called?

- (a) URL
- (b) Hyperlink
- (c) Add-ons
- (d) plug-ins

UPPCL TG-II 19-03-2021 (Shift-I)

Ans. (b) : Hyperlinks are the primary method used to navigate between web pages and websites. Hyperlinks point to other web pages, graphics, file and other location on the same web page. When text is used as a hyperlink. It is usually underlined and appears as a different color.

182. If you open a menu and then decide that you do not want to select an option click the menu title again or press the ____ key to close the menu

- (a) Shift
- (b) Tab
- (c) Escape
- (d) F1
- (e) None of these

(UBI (Bank) 2011)

Ans : (c) If you open menu then decide that you do not want to select any option then the menu title is changed by clicking. It is pressing the escape key to close the menu. We come out of the menu.

183. When you install a new program in your computer in which menu does it get added.

- (a) All program menu
- (b) Start program menu
- (c) Select program menu
- (d) Desk program menu
- (e) None of these

(SBI(PO) 2010)

Ans : (a) When we install a new program in our computer. It gets added to the all programs menu.

184. Which of the following can be used to store a large number of files in a small amount of storage space.

- (a) File adjustment
- (b) File copying
- (c) File reading
- (d) File compatibility
- (e) File compression

(IBPS 2011)

Ans : (e) File compression is used when a file has to be sent from one computer to another through the network. Compression converts a file into a smaller form so that the file can be easily and quickly shared with other computers. When the file reaches the other computer. So the computer program decompresses the file. The file becomes in normal size.

185. _____ contains buttons and menus for quick access to commonly used commands

- (a) Toolbar (b) Menu bar
- (c) Window (d) Find
- (e) None of these

UPPCL TG-2, 07.11.2023, Shift-I
(Ald. Bank (Clerk)2011)

Ans : (a) Toolbar gives you fast access to frequently used commands and procedures such as click on 'New' button for new file or Ctrl + N. Click on 'Open' button for opening old file or Ctrl + O.

Increase the font size 

Click on the font size or Ctrl + Shift + P.

186. Open, Print and save are all located on the buttons.

- (a) Status bar
- (b) Formatting toolbar
- (c) Standard toolbar
- (d) Title bar
- (e) Status and title bar

(IBPS 2011)

Ans : (c) The standard toolbar helps you access frequently used commands and procedures. Buttons on a tool bar represent commands or processes. Click on the button needed to execute a command or procedure. In this Open, Print, Save, New, Cut, Copy, Paste, Spelling check, Format Painter, Undo, Redo etc. buttons are given.

187. To easily access commonly used commands and tools in a word processor use thebar.

- (a) Home (b) Title
- (c) Menu (d) Tool

(SSC J.E. 02.03.17, 2:45 pm)

Ans : (d) Toolbar used to access commonly used commands and tools in a word processor. Toolbar is also used in internet browsers to enhance your browsing experience.

188. Alignment buttons are available on the—

- (a) status bar
- (b) formatting toolbar
- (c) standard toolbar
- (d) none of these

(UPPCL TG2 Re-exam 16-10-2016)

Ans : (b) According to Window 2003, the alignment button comes under the formatting toolbar. There are four types of alignment— Left, Right, Center and Justify.

189. To close a window in Windows OS, you may use:

- (a) Ctrl+F5
- (b) Windows logo key+F4
- (c) Shift+F1
- (d) Alt+F4

UPPSC APS-2023, 07.01.2024

UPPCL Assistant Accountant 24-02-2022 (Shift-II)

Ans. (d) : The shortcut key to close any open Window in the windows operating system is Alt + F4. Ctrl + F5 shortcut key is used to refresh the current window. If you want to know about a particular part of the screen then press Shift + F1 and your point turns into an arrow with a question mark. then click on the thing you want to know about.

190. Shortcut used to hide all the tabs and go directly to the desktop -

- (a) Ctrl window (b) Windows +Up Arrow
- (c) Windows + D (d) Windows + K

UPPCL Accountant 10-02-2018

Ans : (c) Windows + D shortcut key used to hide all the tabs and go directly to the desktop.

191. To toggle from one window to another, within an application in Windows OS, you may use:

- (a) Alt+F6 (b) Alt+F9
- (c) Alt+F10 (d) Alt+F8

UPPCL Assistant Accountant 24-02-2022 (Shift-II)

Ans. (a) :

Alt + F6 → To toggle from one window to another.

Alt or F10 → To move between different tabs.

Alt + Shift + D → To enter current time

Alt + Shift + T → To use your keyboard to jump to the editor toolbar.

192. In MS-Word 2007, we can use undo/redo feature for up to.....action:

- (a) 200 (b) 300 (c) 150 (d) 100

(UPPCL TG2 11-11-2016)

Ans : (d) In MS Word 2007 the Undo/Redo feature can be used 100 times.

193. Redo is done by—

- (a) Ctrl + Z (b) Ctrl + Y
- (c) Y (d) Z

(UPPCL TG2 Re-exam 16-10-2016)

RRB NTPC, (Shift -1) Online, 19.03.2016

Ans : (b) Undo/Redo— Using the undo button located on the standard tool bar. We immediately undo the work done. Ctrl + Z is used for undo if we are not satisfied with any work we have done. We can come back to the previous state by doing redo (Ctrl + Y).

194. What is the symbol or question on the screen that prompts you to take action and tells the computer what to do next?

- (a) Scanner
- (b) Questionnaire
- (c) Prompt and dialog box
- (d) Information seeker
- (e) None of these

ARO Alld. HC, 15.12.2021,Shift-I
(Punjab & Sind (Bank) 2010)

Ans : (c) Many times we have to define a group of related controls. Dialog box is required to hold. Generally dialog boxes and prompts are used to get input from the user.

195. Which of the following options best describes the truth of the following statements?

- (i) The Windows taskbar is usually appears as a horizontal bar
 (ii) The windows 10 taskbar contains a search box that can be used to browse both the computer and the web.
- (a) (i) True (ii) False (b) (i) False (ii) False
 (c) (i) True (iii) True (d) (i) False (ii) True

UPPCL (TG-II) 24-01-2019 (Morning)

Ans : (c) In both statement (i) and (ii) above are true, window taskbar generally appears as a horizontal bar at the bottom of the screen while Windows 10 taskbar is useful tools. With this, both computer and web can be browsed.

196. As of December 2018, the most recent version of Microsoft Window is _____ and was released in _____

- (a) Windows 10, 2017 (b) Windows 8, 2016
 (c) Windows 10, 2015 (d) Windows 7, 2015

UPPCL (TG-II) 24-01-2019 (Morning)

Ans : (c) Windows 10 is the latest version of Microsoft. It is an upgraded version of Windows 8.1 in which the latest features have been provided. It was launched by Microsoft on July 29, 2015. It is current update and the latest version of windows. Window 11, was released on 05 October 2021. Windows 11, incorporates a redesigned user interface.

197. What starts by pressing Ctrl + Alt + Delete in Windows 7

- (a) Control Panel (b) Task Manager
 (c) My Computer (d) Windows Explorer

UPPCL Office Assistant III 17-10-2018 (Morning)

Ans : (b) There is a thin strip-like box on the bottom edge of the desktop. Which has a start button at one end and a clock at the other end. It is known as the taskbar. Task Manager is a windows utility program that displays the processes and programs currently running on your computer. In Windows 7, the shortcut key is opened by pressing 'Ctrl + Alt + Delete'.

198. Which of the following executable files are used to open Microsoft PowerPoint application through windows run/search box?

- (a) Powerpnt.exe (b) Ppoint.exe
 (c) MSPowerpoint.exe (d) Powerpoint.exe

UPPCL TG-II 25-01-2019 (Evening)

Ans : (a) To open PowerPoint through window Run/Search box, click on the start button, which will launch the search box, type powerpnt.exe. and press the enter button which will open the PowerPoint program.

199. Which of the following is not a part of 'Images' group under 'Insert' tab in MS-PowerPoint 2019?

- (a) Screenshot (b) Photo album
 (c) Shape (d) Pictures

Ans. (c) : Under the insert tab screenshots, photo albums, pictures etc. It comes under the image group. While with shape we insert a shape into our presentation. Like- Rectangle, Triangle, Arrow, Circle etc.

200. What does the following chat abbreviation mean?

- (a) Smiley (b) Frown
 (c) Come back later (d) Wink

UPPCL APS 27-09-2018 (Evening)

Ans : (a) Smiley  in chat abbreviation is an emoji which means smiley.

201. Which of the following is not an option in the screen saver settings dialog box?

- (a) Circles (b) 3D text
 (c) Ribbons (d) Mystify

UPPCL Office Assistant Account 28-8-2018

Ans : (a) Screen saver setting dialog box have following drop list available 3D text, Blank, Bubbles, Mystify, Photos, Ribbons but there is no circle available in screen saver.

202. Which process makes smaller files; which one faster to transfer over the internet?

- (a) Compression (b) Fragmentation
 (c) Encapsulation (d) None of the above

Uttarakhand RO/ARO, 2016

Ans : (a) Large files are converted into smaller files by the compression process, which makes the transfer over the internet faster.

203. Which of the following option is used to find load a file saved on the computer.

- (a) selecting the close command
 (b) selecting the new command
 (c) selecting the save command
 (d) selecting the open command

S.S.C. MTS 2014

Ans : (d) Open command has to be selected to find and load the file saved on the computer. It is entering the type of file (Pictures and Photos, Music, Video) in the search dialog box. The name of the file or a word located in the file and pressing the search tab. It is searching shows the desired file.

204. _____ is a unique name that you give to a file of information

- (a) folder (b) filename
 (c) filename extension (d) device letter
 (e) None of these

(PNB (Clerk) 2009)

Ans : (b) A filename is a specific name that we give to our file so that the file can be easily found. The file name can be given maximum of 255 characters and after that there is extension name which is separated by period(.) and indicates the name of the program.

205. You will use the command on file menu to _____
create a document.
- (a) New (b) Open
(c) Document (d) Type
(e) None of these

(PNB (Clerk) 2009)

Ans : (a) To create a new page use the new command on the file menu. Press the Ctrl + N button from the keyboard, which opens the new page (Window).

206. File extension is used for _____

- (a) To name the file
(b) To identify the type of file
(c) To identify the file
(d) None of these

(SBI/Clk-2009)

Ans : (b) File extension is used to identify the type of file.

207. Which file extension is used for binary files?

- (a) .BAK' (b) .BAT'
(c) .BKF' (d) .BIN'

(UPPCL TG2 11-11-2016)

Ans : (d) .BIN file extension is used for binary files. The file extension tells what type of file.

208. In Windows 10, a menu with 'Taskbar Settings' appears when you right-click on _____.

- (a) Taskbar (b) This PC icon
(c) Windows icon (d) Desktop

UPPCL (Office Assistant III) 23-09-2018

Ans : (a) Window 10 is system software in which right click for taskbar setting gives the option of taskbar.

209. Which of the following sequences opens the Date and Time window in Windows 10 that is used to change the system date and time?

- (a) Start > Settings > Date & Time
(b) Start > Settings > Date & Language > Date & Time
(c) Start > Settings > Date > Date & Time
(d) Start > Settings > Time & Language > Date & Time

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (d) : To change the date and time in Windows 10, click on Start and open the settings. Then after click on Time and Language, click on Date and Time and turn off Set time zone automatically and go to Time Zone drop-down menu and select India Standard Time.

210. Which of the following options is used to change the time from 24 - hour format to 12 - hour format in windows 10?

- (a) Start → Settings → Date → Date & time → Change data formats
(b) Start → Settings → Time & language → Region → Change data formats
(c) Start → settings → Time & language → Date & time → Change data formats
(d) Start → Settings → Date & language → Date & time → Change data formats

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (b) : In windows 10, for changing the time from 24 - hour format 12 - hour format used to following steps.

Start → Settings → Time & language → Region → Change data formats.

211. On which button is the help menu available?

- (a) End (b) Start
(c) Turn off (d) Restart
(e) None of these

(PNB (Clerk) 2009)

Ans : (b) The start button is located on the left side of the taskbar. The start button appears as soon as you click it. To get the type of information in the window open the start menu and click on it. Click on the help and support menu opens, where we can choose help topic.

212. Which of the following keyboard shortcuts are used to open the start menu of Windows.

- (a) Alt + Esc (b) Ctrl + Esc
(c) Esc (d) Ctrl + S

UPPCL TG-II 27-03-2021 (Shift-II)

Ans. (b) : If you are using a keyboard that does not have a Windows key, Ctrl + Esc shortcut will open the start Menu.

213. The keyboard can be controlled and customized using which options in Windows?

- (a) Start Menu (b) Taskbar
(c) Desktop (d) Control panel

UPPCL TG-II (20-03-2021) (Shift-II)

Ans. (d) : **Start Menu**– The start button is on the left corner of the task bar. The start menu has the following options.

1. Left pane 2. All program 3. Search
4. Right pane 5. Shut down

Taskbar– This is a thin bar at the bottom of the desktop. On whose left side is the start button and on the right side the task bar clock which are called quick launch.

Control panel– The keyboard or any hardware can be controlled and customized in the control panel.

214. In the Windows operating system, when you choose Settings → Personalization → Background → Choose a fit. Which of the following is NOT an option for Fit?

- (a) Full (b) Tile
(c) Stretch (d) Center

UPPCL Assistant Accountant 25.02.2022 (Shift-I)

Ans. (a): When we select personalization from settings in Microsoft windows the following options are available. Preview, background and if we select a fit if we do. We get Tile, stretch, counter, file, fit, span. But full is not given, hence option (a) is a wrong.

215. Which keyboard shortcut is used to switch between windows in the same order as they have been opened in Microsoft Windows?

- (a) Alt + End (b) Alt + Ctrl
(c) Alt + Spacebar (d) Alt + Esc

UPPCL TG-2, 10.11.2023, Shift-I

Ans. (d) : Alt + Esc keyboard shortcut is used to switch between windows in the same order as they have been opened in Microsoft Windows.
Alt+ Enter → Display properties for the selected item.
Alt+ spacebar → Open the shortcut menu for the active window.

- 216. If you have more than one window open at the same time. So you can quickly switch between them by clicking on the ____ icon for that windows?**
(a) Desktop (b) Menu bar
(c) Task bar (d) Program list

UPPCL Office Assistant Account 28-8-2018

Ans : (c) Taskbar is a part of the graphical user interface, which has many functions. You can switch windows by clicking on the taskbar icon.

- 217. Which of the following statements is incorrect about the Linux operating system?**
(a) It is an open source operating system.
(b) It was developed by Linus Torvalds.
(c) It is a multi-tasking operating system.
(d) It is a single user operating system.

UPPCL TG-2, 09.11.2023, Shift-II

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (d) : Linux is a free, open source, and popular multitasking operating system that was developed on September 17, 1991 by Linus Torvalds. Linux is a free and virus-free operating system. It is used in PCs, mobile device, super computer etc.

- 218. Which of the following statements is/are correct about Linux operating system?**
(a) It is a single tasking operating system
(b) It is a single user operating system
(c) It was developed by Linus Torvalds
(d) It is a product of Apple Incorporation

UPPCL Executive Assistant 28.11.2022, Shift-I

Ans. (c) : Linux is an open source operating system that acts as an interface between the computer and the user. It was invented and developed by Linus Torvalds in 1991. Anyone can use it for free and can also modify it.

- 219. Which of the following operating systems is not case sensitive?**
(a) Unix (b) Linux
(c) Linux and Unix (d) Windows

UPPCL Executive Assistant 30.11.2022, Shift-I

Ans. (d) : Linux is an open source operating system and Unix is a powerful and multitasking operating system. Linux and Unix are case sensitive operating system while windows is not.

- 220. Which of the following operating system is almost similar and supports many common commands?**
(i) Unix (ii) Linux (iii) MS - Windows
(a) (i) and (iii) (b) (i) and (ii)
(c) (i), (ii) and (iii) (d) (i) and (iii)

UPPCL Executive Assistant 30.11.2022, Shift-I

ARO Alld.HC, 19.12.2021, Shift-I

Ans. (b) : Linux is an open source operating system and Unix is a powerful and multitasking operating system. Linux and Unix is a case sensitive operating system and also supports many commands.

- 221. If the computer has a command key (⌘) on the keyboard, then the operating system on the computer is?**
(a) Chrome OS (b) Windows
(c) Linux (d) MacOS

UPPCL TG-2, 17.11.2023, Shift-I

Ans. (d) : If command key (⌘) is on computer keyboard, and will enter into computer, then that computer will be MacOS.

- 222. Which of the following is the subsystem of the Linux operating system that displays graphics on the monitor and is commonly referred to as a server or volume?**
(a) Init system (b) Daemons
(c) Graphical server (d) Kernel

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (c) : A graphical server is a subsystem of the Linux operating system that displays graphics on a monitor. It is software that controls how graphics are displayed on a computer. Users without a graphical server can interact with the Linux system only through a command-line interface. This is commonly referred to as an X server.

- 223. Which of the following statements is correct about Linux operating system?**
(a) It is a single user operating system
(b) It is a multi-tasking operating system
(c) It is a product of Oracle Incorporation
(d) It was developed by Dennis Ritchie

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (b) : Linux is an open - source operating system. Kernel initially developed by Linus Torvalds in 1991. It is a multi - tasking operating system. It's the core component of various Linux distributions like Ubuntu, Debian, Centos and more.

- 224. Which of the following is not a Linux distribution?**
(a) Solus (b) Honeycomb
(c) Fedora (d) Ubuntu

UPPCL Executive Assistant 28.11.2022, Shift-II

Ans. (b) : Solus, Fedora, Ubuntu are all Linux distribution operating systems while Honeycomb is the code name of the third version of the android operating system.

- 225. Which of the following options is INCORRECT with respect to the comparison between i) Windows OS and ii) Linux OS.**
(a) i) Licensed ii) Open sourced
(b) i) Less stable and less reliable ii) More stable and more reliable
(c) i) Takes less resources to execute ii) Takes more resources to execute
(d) i) Menu/Icon-based ii) Command line based

UPPCL Assistant Accountant 31.07.2023, Shift-I

Ans. (c) : Windows and Linux are two distinct operating system with several key differences-

1. Microsoft window is a commercial (Licensed operating system whereas Linux is an open source operating system.
2. Windows is less stable and less reliable whereas Linux more stable and more reliable.
3. Windows takes more resources to execute while Linux takes less resource to execute.
4. Windows has graphical user interface (Menu/Icon based) and is known for its user-friendliness while Linux is the command line interface (CLI) which offer more control and flexibility.

226. Which of the following is not correct about Linux?

- (a) It is an operating system
- (b) Linux is also used in embedded system
- (c) A unique feature of Linux is that it does not have a Kernel.
- (d) It can be installed on a computer without a software license.

UPPCL TG-II (20-03-2021) (Shift-II)

Ans. (c) : Linux is an open source operating system. Linux based on Kernel are used in embedded system. It can be installed on a computer without a software license.

227. What is Symbian?

- (a) MS-Dos operating system
- (b) Windows operating system
- (c) Mobile operating system
- (d) Linux-based mobile laptop operating

UPASI 05.12.2021 Shift-I

Ans. (c) : Symbian is a discontinued mobile operating system that was designed for smart phones such as Samsung, Motorola, Sony Ericsson and Nokia. The use of symbian gradually declined after the arrival of android.

228. Choose the odd word.

- (a) Access
- (b) Unix
- (c) MS-DOS
- (d) Windows 98

S.S.C. Multitasking 2013

Ans : (a) Unix, MS-DOS and Windows 98 are operating system while Access (Microsoft Access) is a database program.

229. What is the extended form of GUI?

- (a) General User Interface
- (b) Geographical User Interface
- (c) Graphical User Interface
- (d) Good User Interface

UPPCL TG-II (20-03-2021) (Shift-II)

Ans. (c) : Graphical User Interface is the extended form of GUI. It is the common user interface that includes graphical representation like icon, menus and button. In GUI communication can be performed by interacting with these icons rather than the usual text based or command based communication.

230. Linux is a/an.....operating system.

- (a) Mac
- (b) Windows
- (c) Microsoft
- (d) Open-source

UPASI 04.12.2021 (Shift-II)

Ans. (d) : Linux is a free open source operating system, released under the General Public License (GNU). Anyone can run, study, modify and redistribute the source code. Mac and Windows is the type of operating system.

231. Operating System based on Linux are

- (a) Debian
- (b) Fedora
- (c) Ubuntu
- (d) All of these

UPPCL Asst. Accountant Exam-09.02.2018

Ans. (d) : An operating system is software that manages the communication between your software and hardware. Debian, Fedora and Ubuntu OS are based on Linux.

232. Android is an operating system based on

- (a) Windows
- (b) Linux
- (c) IBM
- (d) MS-Word

MPPCS (J) 2013 Shift-II

Ans. (b) : Android is an operating system based on Linux. It is designed primarily for touch screen mobile devices such as Smartphone and Tablets. Latest version of android is android 14.

233. What is Ubuntu ?

- (a) Web Browser
- (b) External Hard Drive
- (c) Malware
- (d) Operating System

RRB NTPC 28.12.2020 (Shift-I) Stage Ist

Ans. (d) : Ubuntu Microsoft windows is an open source Linux based operation system. It is designed for computer, Smartphone and network server.

234. Which of the following is a feature of Linux system?

- (a) Real time and single user
- (b) Multiuser and multitasking
- (c) Multitasking and real time
- (d) Single user and multitasking

UPPCL TG-II 20-03-2021 (Shift-I)

Ans. (b) : Linux is an operating system that evolved from a Kernel created by Linux Torvalds.

Feature of Linux–

1. Linux is a multiuser, operating system
2. Multitasking operating system
3. Portable
4. Open source
6. Hierarchical File System
7. Shell

235. In Linux, which of the following files are device files, which provide buffered access to system hardware components and communicate with device drivers through the files system provide a method?

- (a) Binary (b) Image
(c) Block (d) Readable

UPPCL Executive Assistant 28.11.2022, Shift-II

Ans. (c) : Block files in Linux are device files that provide buffered access to components comprising the system hardware and provide a method of communication with device drivers through the file system.

236. In Linux, each file or directory is uniquely identified by an identifier, called a/an ____.

- (a) PID (b) Inode
(c) Tnode (d) Vnode

UPPCL TG-II 19-03-2021 (Shift-I)

Ans. (b) : In Linux, whenever a new file is created, it is given a file name and an Inode number. This number works as the unique identifier for that file. An Inode number is just like an index number of a book. The Inode table contains all the Inodes.

237. Which of the following is the main component of Linux which can interact with hardware?

- (a) GUI (b) Editor
(c) Kernel (d) Shell

UPPCL (TG-II) 24-01-2019 (Morning)

Ans : (c) Linux Kernel is the main component of the operating system which can interact with hardware.

238. Which of the following statements is/are FALSE?

- (i) Linux kernel is the core part of the operating system which establishes communication between devices and software.
(ii) Linux may be a perfect operating system if you want to get rid of viruses, malware, slowdowns, crashes.
(a) Both (i) and (ii) (b) Neither (i) nor (ii)
(c) Only (i) (d) Only (ii)

UPPCL Assistant Accountant 22-02-2022 (Shift-I)

Ans. (b) : The Linux Kernel is the main component of a Linux operating system and the main interface between a computer hardware and its processes. It communicates between the two management resources as efficiently as possible. Linux can be an ideal operating system if you want to get rid of viruses, malware, slowdowns, crashes, costly repairs etc.

239. Which of the following is an operating system?

- I. Ubuntu
II. Linux
III. Unix**

- (a) Only I
(b) Only II and III
(c) All I, II and III
(d) No option is correct

SSC JE Electrical (Exam date 24.01.2018) Shift-I

Ans. (c) : Ubuntu, Linux and Unix all are operating system.

240. In Linux, a case insensitive sorting can be done using the _____ option with the 'sort' command.

- (a) -k (b) -r
(c) -o (d) -f

UPPCL Assistant Accountant 24-02-2022 (Shift-II)

Ans. (d) : In Linux to sort mixed case text pass the -f option to sort. This will ignore case sensitivity when sorting and write the result to standard output.

• To sort by items done using -k option.

The -r is an option of sort command which sorts the input file in reverse order -0 option is use to write result to file instead of standard output.

241. Which of the following statement (s) is /are correct?

- (i) In Linux system, 'file.txt' and 'FILE.txt' different file names will be considered.
(ii) In a Windows system, 'file.txt' and 'FILE.txt' shall be treated as one file name.
(a) Neither (i) nor (ii)
(b) Only (ii)
(c) Both (i) and (ii)
(d) only (i)

UPPCL TG-II 25-01-2019 (Morning)

Ans : (c) Window file system treats file and directory name as case-insensitive.

Linux file system treats file and directory names as case-sensitive.

242. Which of the following operating systems is case - sensitive?

- (i) Unix (ii) Linux
(iii) MS - Windows
(a) (i), (ii) and (iii)
(b) Only (i) and (iii)
(c) Only (ii) and (iii)
(d) Only (i) and (ii)

UPPCL Executive Assistant 23.11.2022, Shift-I

Ans. (d) : Unix and Linux operating systems are case - sensitive.

MS - Windows is not case - sensitive.

243. What is an a.out (file) in a computer running Unix/Linux?

- (a) A file suitable to display
(b) A file suitable to print
(c) An executable file
(d) A utility to output characters to a serial device

UPPCL Assistant Accountant 24-02-2022 (Shift-II)

Ans. (c): a.out is a file format used in older version of unix-like computer operating system for executable file.

Basic Operations Performed in MS Word.

Creating a document

1. Open word
2. go to file tab → New → Blank document

OR

Press ctrl + N keys

Add and Format Text-

1. Place the cursor and type some text
2. To format, select the text and then

Add Pictures, Shapes, SmartArt and more

Step-1: Select the **Insert** tab.

Step-2: Select what you want to add:

- **Tables** - select **Table**, hover over the size you want, and select it.
- **Pictures** - select **Pictures**, browse for pictures from your computer, select a stock image, or even search Bing.

Note: Older versions of Word may have **Online Pictures** on the ribbon next to **Pictures**.

- **Shapes** - select **Shapes**, and choose a shape from the drop-down.
- **Icons** - select **Icons**, pick the one you want, and select **Insert**.
- **3D Models** - select **3D Models**, choose from a file or online source, go to the image you want, and select **Insert**.
- **SmartArt** - select **SmartArt**, choose a **SmartArt Graphic**, and select **OK**.
- **Chart** - select **Chart**, select the chart you want, and select **OK**.
- **Screenshot** - select **Screenshot** and select one from the drop-down

Open an existing word document:

Goto **File** tab → **Open** → **Browse** → select your document → **Click open**.

Step 1: Click on **file** tab

Step 2: Click on **open** and browse or navigate to where the document is store and double click it or select it.

Short Cut key- Press **Ctrl + O** keys.

Save The document:

Save→ To save the changes in the original document. It just update current file.

Save As→ To save a different copy of the document along with the changes made **Save As** mean don't update current file and create new file with different name.

Shortcut Keys→

Ctrl + S → Save

F12 → Save As

Note→ When you save for the first time "**save**" and "**Save As**" command are same.

Print a document

Before you print, you can preview your document and specify which pages you want to print.

Step-1: Click File > Print.

or

Press **Ctrl + P** shortcut keys from keyboard .

Step-2: To preview each page, select the forward and backward arrows at the bottom of the page.

If the text is too small to read, use the zoom slider at the bottom of the page to enlarge it.

Step-3: Choose the number of copies and any other option you want such as print all pages, print current page orientation and choose printer etc.

MS Word Shortcut Keys	
Press keys	To do this one
Ctrl + A	Select all contents of the page.
Ctrl + B	Bold selected text.
Ctrl + C	Copy selected text.
Ctrl + D	Open Font dialog box
Ctrl + X	Cut selected text.
Ctrl + P	Open the print window.
Ctrl + E	Aligns the line or selected text to the center of the screen
Ctrl + F	Open find box.
Ctrl + G	Go to
Ctrl + H	Replace
Ctrl + I	Italic selected text.

Ctrl + J	Justify the text
Ctrl + K	Open insert hyperlink window
Ctrl + U	Underline selected text
Ctrl + V	Paste
Ctrl + Y	Redo the last action performed
Ctrl + Z	Undo last action
Ctrl + L	Aligns the line or selected text to the left of the screen.
Ctrl + R	Align Selected text to the right of the screen.
Ctrl + M	Indents the paragraph
Ctrl + N	Create a new document.
Ctrl + Shift + F	Change the font.
Ctrl + Shift + >	Increase selected font with 1pts up to 12pt and then increase font +with 2pts.
Ctrl + O	Open a file
Ctrl + F12	launch the open dialog box
End key	Move the cursor to the end of line
Home key	Move the cursor to the start of line
Ctrl +]	Increase selected font with 1pts.
Ctrl + Shift + <	Decrease selected font with 1pts, if above 12pts then decreases font by 2pt.
Ctrl + [	Decrease selected font with 1pts.
Ctrl + Shift + *	View or hide non printing characters.
Ctrl + left arrow key	Moves cursor one word to the left.
Ctrl + right arrow key	Moves cursor one word to the right.
Ctrl + up arrow key	Moves cursor to the beginning of the paragraph.
Ctrl + down arrow	Moves cursor to the end of the paragraph.
Ctrl + Del	Deletes word to right of cursor
Ctrl + Backspace	Deletes word to left of cursor
Ctrl + End	Moves the cursor to the end of the document
Ctrl + Home	Moves the cursor to the home of the document
Ctrl + Spacebar	Reset selected text to the default font.
Ctrl + 1	Single space lines
Ctrl + 2	Double space lines
Ctrl + 5	1.5-line spacing
Ctrl + Alt + 1	Changes text to heading 1.
Ctrl + Alt + 2	Changes text to heading 2.
Ctrl + Alt + 3	Changes text to heading 3.
Ctrl + F1	Toggles the display of the Ribbon.
F1	Open help
Alt + Ctrl + F2	Open new document
Ctrl + F2	Display the print preview.
Alt + P, SP	To open page setup dialog box
Shift + F3	change case
Shift + insert	Paste the copying text
F4	Repeat the last action performed (Word 2000+)
F5	Go To
Ctrl + Shift + F6	Opens to another open Microsoft Word document.
F7	Spell and grammar

Shift + F7	Runs a Thesaurus check on the word highlighted.
F12	Save As.
Shift + F12	Save
Ctrl + Shift + F12	Prints the document
Alt + Shift + D	Insert the current date
Alt + Shift + T	Insert the current time
Mouse Action	To do this one
Click, hold and drag	Selects text from where you want.
Double-click	To select a word.
Triple-click	To Select the paragraph.
Ctrl + Mouse wheel	Zooms in and out

2. MS EXCEL

Accessing MS Excel-

→ We can start MS Excel by using the start menu-

Start → All program → Microsoft Office → Microsoft Excel.

→ We can start MS Excel by using Run Command.

(i) Select start→Run to display the run dialog box.

OR

Press 'windows' key + R

(ii) Type 'excel' in the open text box and click OK or press the Enter key.

Some Important Terminology for MS Excel

Term	Explanation
Work book	The workbook refers to an excel spreadsheet file. It is collection of one or more spreadsheet. Opening a workbook with three work sheets by default and we can add maximum 255 worksheet within workbook.
Worksheet	Within the workbook is where you'll find document called worksheet. Also known as spreadsheets, you can have multiple worksheets nestled in a workbook.
Cells	A cell is a rectangle or block housed in a worksheet. Any data that you want to enter into your worksheet must be placed in a cell. It is the intersection of a row and a column, each cell has its-own name or cell address. The maximum number of cells in excel 2019 is 17,179,869,184.
Column	Columns are a vertical block of cell that runs from top to bottom along the length of worksheet. In this, the alphabet is displayed from left to right A worksheet has a maximum 16384 columns. Column start with A, B, C and end with XFD.
Row	Rows are aligned horizontally. The maximum number of rows in excel 2019 is 1048576
Ribbon	Above the workbook is a section of command tabs called the Ribbon. A multitude of options are found behind each tab of the ribbon.
Cell Reference	A cell reference is a set of coordinates that identifies a specific cell. It is a combination of letters and numbers. For example, A5 would point to the cell located where column A and row 5 intersect.
Cell Range	A cell range is a collection of cells that have been identified as a group based on a variety of criteria. By using a colon (:) between cell references, excel can determine the range, also known as an array. e.g. A1:C1.
Merged cell	When two or more cells are combined, it is become what is known as a merged cell.
Operator	Operators are symbols or signs that indicate which calculation must be made in an expression.
Formula	A sequence inside a cell that is used to produce a value. It must begin with an equal (=) sign. This could be a mathematical equation, cell references, function or operator. A formula is also known as an expression.
Formula Bar	Nestled between the ribbon and workbook the formula bar will display the contents of an active cell. In the case of formulas. The formula bar will display all components of the formula.
Function	Functions are formulas that are pre-built into excel. They are designed to help simplify potentially complex formulas in a worksheet.
Filter	Filters are rules that you can employ to decide which rows in a worksheet to display. These filters can use data such as conditions or values.
Auto sum	This feature will add up the numbers you have entered in your sheet and display the total in a cell of your choosing.

Auto format	This is an automated format application to cells that match pre-determined criteria. This could be as simple as font alignment and size.
Pivot Table	This is a data summarization tool most commonly used to sort, average to sum up automatically. The information is pulled from one table while the results are displayed in another. Pivot tables makes it easy to retrieve specific information from a large source of data.
Pivot Chart	This type of chart provides aid for pivot tables. By providing graphical representations of the pivot table data, the user can provide a level of interactivity with the data.
Item	These are sub-categories of fields in your pivot table. If you have a field that is marked state, the items could be Alabama, Alaska and so on.

Some Important Functions Used in MS Excel

Functions	Description	Syntax	Diagram
SUM()	The sum function adds values you can add individual values, cell references or ranges or a mix all three.	sum (num1, [num2],) num1 – The first value to sum [required] num2 – [optional] the second value to sum For example– =sum (A2:A5)	
AVERAGE()	AVERAGE function calculate the average value in the range of cells	= AVERAGE (num1, [num2],) num1 – A number or cell reference that refers to numeric value [required] num2 – A number or cell reference that refers to numeric values. Example- AVERAGE (A1: A5)	
COUNT()	The count function, counts the numbers of cells in a range of cells. Empty cells and text values are ignored.	= COUNT (value1, [value2],) value1 – An item, cell reference, or range. value2 – An item, cell reference, or range [optional] Example– =COUNT(1, 2, 3, 4)//Returns 4 =COUNT(1, "a")//Returns 1	
COUNTA()	COUNTA function returns the count of cells that contain numbers, text, logical value, error values and empty text (" "). COUNTA does not count empty cells.	= COUNTA (value1, [value2],) Example– = COUNTA (1, 3, 8)//returns 3 = COUNTA (2, 5, "b", 1%)//returns 4	

ROUND()	The ROUND function rounds a number to a specific number of digits.	= ROUND (number, num_digits) number-(required) The number that you want to round. num-digits (Required) The number of digits to which you want to round the number argument. Example– = ROUND (B, B1, 1)// ROUND to 1 decimal place	
MAX()	The Excel MAX function returns the largest numeric value in the data provided.	= MAX (number1, [number2],) Example– = MAX (15, 16, 19)// returns 19	
MIN()	This function returns the smallest value out of a set of values.	= MIN (num1, [num2],) Example– MIN (18, 20, 13)//returns13	
TODAY()	In MS Excel TODAY() functions returns current date.	=TODAY() Example– TODAY()// Current date TODAY() + 90// 90 days from today	
NOW()	In MS Excel NOW() functions returns current date and time.	NOW()	
DAY()	The DAY() function returns the day value in a given date as a number between 1 to 31 from a given date.	= DAY(date)	
MONTH()	This function returns the month of date represented by a serial number. The month is given as an integer from 1(January) to 12 (December).	MONTH (Serial_Number) Example– MONTH ("01_OCT")//Returns11	

YEAR()	This function returns the year corresponding to the date, given as an argument.	YEAR (Serial_Number) Serial_Number is the date of the year you want to find it. Example– Year ("10/01/2014") = 2014	
CONCATENATED()	CONCATENATE() use to join two or more text string into one string.	CONCATENATE (text1, [text2],) Example- CONCATENATE("TOTAL" , " VALUE") = TOTAL VALUE	
CEILING()	CEILING() – The CEILING function rounds a number up to its nearest multiple of significance.	=CEILING (Number, significance)	
FLOOR()	In MS Excel the FLOOR rounds a number down to the nearest multiple of significance.	=FLOOR(number, significance)	
DATEDIF()	In MS Excel the DATEDIF function returns the difference between two date values in years, month or days.	=DATEDIF(start_dat, end_date,unit)	
POWER()	The POWER() returns the result of a number raised to a given number. This function is alternative of exponent operator.	=POWER(number, power)	

Microsoft Excel Shortcuts Keys	
Press Keys	To do this one
F2	Edit the selected cell.
F5	Go to a specific cell. For example A5.
F11	Create chart.
Ctrl + Shift + ;	Enter the current time.
Ctrl + :	Enter the current date.
Alt + Shift + F1	Insert New Worksheet.
Shift + F3	Open the Excel formula window.
Shift + F5	Bring up search box.
Ctrl + A	Select all contents of the worksheet.
Ctrl + B	Bold selected text.
Ctrl + I	Italic selected text.
Ctrl + K	Insert link.
Ctrl + U	Underline selected text.
Ctrl + 5	Strikethrough selected text.
Ctrl + P	Printing dialog box open.
Ctrl + Z	Undo last action.
Ctrl + F9	Minimize current window.
Ctrl + F10	Maximize currently selected window.
Ctrl + F6	Switch between open workbooks/ windows.
Ctrl + Page up	Move between Excel worksheets in the same Excel document.
Ctrl + Page down	Move between Excel worksheets in the same Excel document.
Ctrl + Tab	Move between two or more open Excel files.
Alt + =	Create a formula to sum all of the above cells.
Ctrl + '	Insert the value of the above cell into cell currently selected.
Ctrl + Shift + !	Format number in comma format.
Ctrl + Shift + \$	Format number in currency format.
Ctrl + Shift + #	Format number in date format
Ctrl + Shift + %	Format number in percentage format
Ctrl + shift + ^	Format number in scientific format.
Ctrl + Shift + @	Format number in time format.
Ctrl + Arrow Key	Move cursor to next section to text.
Ctrl + Space	Select entire column.
Shift + Space	Select entire row.

3. MS POWERPOINT SYSTEM

Accessing MS Power Point

→ We can start MS Power point by using the start menu-

Start → All program → Microsoft Office → Microsoft Power Point

→ we can start MS Power Point by using Run Command-

- (i) Select start → Run to display the Run dialog box.

OR

Press 'window' key +R.

- (ii) Type 'powerpnt' in the open text box and click OK or press the Enter key.

Basic Operations Performed on a Presentation

Tabs

- **Home Tab**–The home tab holds the cut and paste features, Font and Paragraph option and what you need to add or organize slides.

- **Insert Tab**– Click Insert tab to add something to a slide. This includes Pictures, Shapes, Charts, Links, Text boxes, Video and more.

- **Design Tab**–On the design tab, you can add a theme or color scheme or format the slide background.

- **Transitions Tab**– A slide transition is the visual effect that occurs when you move from one slide to the next during a presentation. You can control the speed, add sound, and customize the look of the transition effect.

→ **Animation Tab-** Use the animations tab to apply animation to a slides and the effect based on animation type.

→ **Slides Show**— On the slide show tab, set up the way that you want to show your presentation to others.

→ **Review-** The review tab lets you add comments, run spell check.

→ **View-** Views allow you to look at your presentation in different ways depending on where you are in the creation or delivery process.

Create a Presentation

1. Open the Microsoft PowerPoint.
2. In the left pane, select new.
3. To create a presentation from scratch, select blank presentation.
4. To use a prepared design, select one of the templates.

- Add a Slide-**
1. In the thumbnails on the left pane, select the slide you want new slide to follow.
 2. In the Home tab, in the slides section, select new slide.
 3. In the slides section, select layout and then select the layout you want from the menu.

→ **Place holder-** In PowerPoint, the dotted areas in an empty slides are called placeholder. A placeholder is a pre-formatted container on a slide for content (text, graphics or video). The pre-set formatting makes it easier to format slides consistently. To resize a placeholder, drag one of its corner borders.

MS PowerPoint Short Cut Keys	
Ctrl + N	Create new presentation
Ctrl + M	Add a new slide
Ctrl + B	Make selected text bold
Ctrl + X	Cut selected text, object or slide
Ctrl + C	Copy selected text, object or slide
Ctrl + V	Paste cut or copied text, object or slide
Ctrl + Z	Undo the last action
Ctrl + S	Save the presentation
Alt + H	Go to the Home tab
Alt + N	Go to the Insert tab
F5	Start the slide show
Esc	End the slide show
Ctrl + Shift + Tab	Switch between the thumbnail pane and the outline view pane.
Ctrl + A	Select all object on a slide
Ctrl + Shift + C	Copy Formatting only
Ctrl + K	Insert a hyperlink
Ctrl + Shift + V	Paste formatting
Ctrl + Spacebar	Remove formatting
Ctrl + O	Open a presentation
Ctrl + P	Print a presentation
Ctrl + Q	Exit PowerPoint
Ctrl + W	Close a presentation
Shift + F5	Resume slide show
Backspace	Delete one character to the left
Ctrl + Backspace	Delete one word to the left
Delete	Delete one character to the right.
Ctrl + Delete	Delete one word to the right.
Ctrl + F	Open find dialog box.
F10	Active the menu bar end.
Ctrl + H	Open the replace dialog box
Shift + F4	Repeat the last find action.
Shift + F3	Switch between sentence case.

4. MS Access System

Accessing MS Access-

→ We can start MS Access by using the start menu-
Start → all program → Microsoft Office → Microsoft Access.

→ we can start MS Access by using run command
(i) Select start → Run to display the run dialog box.

OR

Press 'window' key + R

(ii) Type 'msaccess' in the open text box and click ok or press the enter key.

Basic Operations performed in MS Access

Microsoft Access : Shortcuts Keys	
1. Shortcuts keys for database files.	
Ctrl + N	Open a new database.
Ctrl + O	Open an existing database.
Shift + F10	Display a shortcut menu for a selected item.
Alt + I	Open the look in list.
Ctrl + S	Save a database object.
F12	Open the save as dialog box.
Ctrl + P	Print the current or selected object.
Esc	Cancel print preview.
2. Shortcuts keys for the ribbon	
Alt + F	Open the file Menu.
Alt + H	Open the Home tab.
Alt + C	Open the create tab.
Alt + T	Open the table tab.
Alt + X	Open the external data tab.

Alt + Y	Open the database tools tab.
Alt + J	Open the fields tab.
F10	Select the active tab of the ribbon.
Shift + Tab	Move the focus to commands on the ribbon.
Ctrl + F1	Expand or collapse the ribbon.
F6	Move the focus to a different pane of the window.
F11	Show or hide the Navigation Pane.
Ctrl + F	Go to search box in the Navigation Pane.
Ctrl + F6	Switch to the next or previous database window.
Ctrl + W	Close the active database window.
Alt + F11	Switch between the visual basic editor and the previous active window.
Ctrl + F10	Maximize or restore a selected window
3. Shortcuts keys for menus, dialog boxers, wizards, property sheets, text boxes, combo boxes and list boxes.	
Home	Select the first or last command on the menu.
Spacebar	Open the selected menu.
Shift + F10	Open a shortcut menu.
Ctrl + Home	Move to the top or bottom of the selected gallery list.
Alt	Close the visible menu and submenu at the same time.
Esc	Close the visible menu.
Ctrl + Tab	Switch to the next or previous tab in a dialog box.
Shift + Tab	Move to the next or previous option or option group.
Alt + Down Arrow	Open the selected drop-down list box
Esc	Cancel the command and close the dialog box.
Alt + N	Move to the next page of the wizard.
Alt + B	Move to the previous page of the wizard.
Alt + F	Complete the wizard.
F4	Show or hide the property sheet.
Alt + Enter	Display a property sheet in design view.
Ctrl + Tab	Toggle forward between tabs when a property is selected.
Ctrl + Shift + Tab	Toggle backward between tabs when a property is selected.
Shift + Home	Select from the insertion point to the beginning of the text entry.
Ctrl + Shift + Left Arrow	Change the selection by one word to the left.
Ctrl + Shift + Right Arrow	Change the selection by one word to the right.
F4	Open a combo box.
F2	Rename a selected object.
Ctrl + G	Display the immediate window in the Visual Basic Editor.
4. Shortcuts keys for Design, Layout, Datasheet view.	
F2	Switch between edit mode and Navigation mode in a datasheet.
Esc	Exit Navigation mode.
F5	Switch to the form view from the form design view.
F6	Switch between the upper and lower portions of a window.
F7	Open the Visual Basic Editor from a selected property in the property sheet for a form.
Alt + F11	Switch from the visual basic editor back to the form or report design view.
Alt + F8	Show or hide the field list pane.
Ctrl + C	Copy the selected control to the Clipboard.
Ctrl + X	Cut the selected control to the clipboard.
Ctrl + V	Paste the contents of the clipboard in the upper-left corner of the selected section.
Ctrl + A	Select all records.
F9	Recalculated the fields in the window.
F1	Open the help window.
F7	Check spelling.

Important Questions Asked in Previous Years Examinations

1. What happens when you press the F5 key while editing in Notepad of Windows 10?

- (a) The current date and time is entered
- (b) Nothing happens
- (c) Notepad window gets refreshed
- (d) The name of the file is entered

UPPCL Office Assistant III 17-10-2018 (Morning)

Ans : (a) Notepad is a simple text editor program of Microsoft. The shortcut key 'F5' is used to enter the current date and time in Windows 10.

2. Which of the following applications belongs to MS Office?

- (a) Word
- (b) Photoshop
- (c) Gmail
- (d) Chrome

UPPCL JE 2019 (Batch-02)

Ans: (a) MS Office packages mainly includes Word, Excel, PowerPoint, MS access etc, which are used in office work, whereas Photoshop, Gmail and Chrome etc. are not include MS Office package.

3. Which of the following is application software?

- (a) Compiler
- (b) Operating system
- (c) MS Office
- (d) None of these

Uttarakhand Lower (Pre) 2016

RRB NTPC, (Shift -2) Online, 30.03.2016

Ans : (c) MS Office is an application software. It is a group of programs that are designed for a specific task. The purpose of application software is to assist the user in doing specific task. MS Word, Excel, PowerPoint, Access, Web browser example of application software.

4. Which one of the following is not an Office Package?

- (a) WPS
- (b) Microsoft Office 2010
- (c) Quantum
- (d) Libre

RRB NTPC 20.01.2021 (Shift-I) Stage Ist

Ans. (c) : Quantum is not includes office package WPS, MS Office 2010 and LibreOffice are includes in office package.

5. Which of these is NOT a part of the MS Office Suite?

- (a) PowerPoint
- (b) Projects
- (c) Word
- (d) Excel

RRB NTPC 27.02.2021 (Shift-I) Stage Ist

Ans. (b) : Project is not part of MS Office suite. But others come under MS Office suite.

6. Microsoft Office personal information manager is ____.

- (a) Outlook
- (b) Internet explorer
- (c) Organizer
- (d) Access

S.S.C. CGL (Tier-I) Exam, 2011

Ans : (a) Microsoft outlook is a personal information manager software system from Microsoft. Its includes in MS Office suits.

7. _____ is not an example of Presentation Graphics Software.

- (a) Macromedia
- (b) CorelDraw
- (c) FoxPro
- (d) PowerPoint

UPPCL APS Exam-18.02.2018

Ans. (c) Macromedia, CorelDraw, PowerPoint are example of presentation graphics software whereas FoxPro is a text based procedurally oriented programming language.

8. Which of the following are the products of MS Office suite?

I. Word

II. Oracle

III. Access

- (a) I and II only
- (b) I and III only
- (c) I, II and III
- (d) II and III only

UPPCL JE 2019 (Batch-01)

Ans: (b) Word and Access are the product of MS Office suite while Oracle is not.

9. Which of the following is not a version of MS Office.

- (a) MS-2000
- (b) MS-2003
- (c) MS-VISTA
- (d) MS-2007

(CCC April 2015)

Ans : (c) MS Office was first launched in 1989 by Microsoft corporation for Mac-OS, MS 2003, MS XP, MS 2000, MS 97 are the examples of MS Office. Whereas MS-VISTA is operating system developed by Microsoft.

10. _____ is an example of graphics, Multimedia and Presentation package.

- (a) Page Stream
- (b) Corel Ventura
- (c) CorelDraw
- (d) PagePlus

UPPCL APS Exam-18.02.2018

Ans. (c) : CorelDraw is an example of graphics, multimedia and presentation package. It is also known as Corel graphics suits, which includes the bitmap image editor, Corel paint as well as other graphics related programs.

11. Which of the following is NOT a valid MS Office extension?

- (a) .docx
- (b) .pot
- (c) .xlsm
- (d) .pptl

UPPCL Asst. Accountant Exam-09.02.2018

Ans. (d) : MS Office is an application software which was developed by Microsoft in 1989. MS Office has different types of package like MS Word, MS Excel, MS PowerPoint, MS Access etc.

MS Word → .docx

MS Excel → .xlsx

MS PowerPoint → .pptx

MS Access → .accdb

PowerPoint templates → . pot

12. A _____ is a pre-designed document with a coordinating font, layout and background
- (a) Guide (b) Modem
(c) Ruler (d) Template
(e) Design-plate

ARO Alld. HC, 19.12.2021, Shift-I
(RBI (Assi-2012))

Ans : (d) A template is a pre-designed document with a coordinating font, layout, theme and background.

13. _____ is not an example of a word processor.
- (a) Open Office Calc (b) Google Doc
(c) MS-Word (d) Notepad

UPPCL Executive Assistant 23.11.2022, Shift-I

Ans. (a) : Open office calc is part of the open office software package. It is a spreadsheet program similar to MS Excel.

14. Which of the following is not a word processor?

- (a) MS-Word (b) Notepad
(c) WordPad (d) Wordpress

(RRB JE (Shift-II), 29.8.2015)

Ans : (d) MS Word, Notepad, WordPad etc. come under the word processor but Wordpress does not come under it.

A word processor is a software package, with the help of it we can create, edit, print and save a document faster than creating by hard copy.

15. Which software is used in word processing

- (a) page maker (b) Word star
(c) MS Word (d) All of above

(Utt/PCS/Mains/2002)

Ans : (d) All the options in the above are examples of word processors.

16. The window that can be opened to see in advance what your document will look like when it is printed is called

- (a) Print Preview (b) Printer Window
(c) Print Demo (d) Print Viewer

UPPCL Office Assistant III 17-10-2018 (Morning)

Ans : (a) Print preview is a function that allows a user to see what a document will look like if printed.

17. A _____ can be defined as collection of related records that provide a complete set of information about a certain item or entity.

- (a) File (b) Type file
(c) File name (d) File extension

UPPCL Office Assistant Account 28-8-2018

Ans : (a) File stores related records that provide a complete set of information about a certain object or entity.

18. Which function Key displays the Print Preview window in Microsoft Office?

- (a) Shift + F2 (b) Alt + F2
(c) Alt + Ctrl + F2 (d) Ctrl + F2

SSC CHSL 13/10/2020 (Shift-II)

Ans. (d) :

Ctrl + F2 → Print preview.

Alt + Ctrl + F2 → Pop up the open windows so you can open a document.

Alt + F2 → Display the save dialog box.

Shift + F2 → Copy the selected content to a specific location.

19. When you are using _____, you're always running the most format updated apps Microsoft has offer. It regularly selects security updates, unlocks and most importantly, provides access to the latest features and tools as they become available.

- (a) Office 2019 (b) Office 365
(c) Open Office (d) Cloud Office 2019

[UPSSSC Computer Operator 10/01/2020]

Ans. (b) : Microsoft office 365 is a suit of cloud based productivity and calibration of applications (Word, Excel, PowerPoint, Outlook etc) into a cloud service. It is online version of Microsoft Office Software.

20. Features related to styles and clipboard appear under the _____ menu tab in MS Word 2016.

- (a) Design (b) View
(c) Layout (d) Home

UPPCL Executive Assistant 30.11.2022, Shift-I

Ans. (d) : The Home tab is the default tab in Microsoft Word. It have five group of related commands - Clipboard, Font, Paragraph, Styles and Editing. It helps you change document setting like font size, adding bullets, adjusting styles and many other common features.

21. In MS Word (Microsoft 365 version), you have positioned the cursor inside one of the cells of a Table. This causes which of the following two additional tabs in the Ribbon to appear?

- (a) Insert and Layout
(b) Table Design and Layout
(c) Table Design and View
(d) Insert and Table Design

UPPCL TG-2, 17.11.2023, Shift-I

Ans. (b) : In MS Word 365, when you place the cursor inside a cell of a table, the design and layout tabs appear in the ribbon.

22. What is the second name of Microsoft Word?

- (a) System software (b) Workbook
(c) Database system (d) Word processor

UPPCL TG-II 27-03-2021 (Shift-II)

Ans. (d) : The full name MS Word is Microsoft Word. It is a software of Microsoft Office package. MS Word is a word processor software. It is used for Open, Create, Edit, Formatting, Share & Print of the document.

23. What will be the output if sentence case is applied to the phrase 'attempting to run' in MS Word 365?

- (a) ATTEMPTING TO RUN
- (b) ATTEMPTING to RUN
- (c) Attempting To Run
- (d) Attempting to run

UPPCL Technician Electrical, 10.11.2023, Shift-II
UPPCL Executive Assistant 29.11.2022, Shift-II

Ans. (d) : Sentence case helps in changing the first letter of the first word of the sentence to capital. For example- Attempting to run
 Institute of Engineers (India)

24. Which of the following statements is FALSE with respect to the ribbon in MS-Word?

- (a) The ribbon is a user interface element that was introduced by Microsoft in MS Office2007.
- (b) The quick access toolbar is called ribbon.
- (c) The ribbon is a set of toolbars at the top of a window.
- (d) The ribbon is a command bar that organizes features of a program into a series of tabs at the top of a window.

UPPCL-TG-2, 07.11.2023, Shift-I

Ans. (b) : In MS Word, the ribbon is a graphical toolbar that gives you access to various functions and operations in one place, allowing you to easily perform formatting, layout, and other tasks, whereas the Quick Access Toolbar is a small toolbar that appears above the ribbon.

25. In MS-Word, if Microsoft Office Button exists, then it is located on the _____ corner of the window.

- (a) top-left
- (b) bottom-right
- (c) bottom-left
- (d) top-right

UPPCL AC 2020 (Exam Date 13.09.2021)

Ans. (a) : Office button is an essential element of Microsoft suite 2007, this button was introduced in office with new ribbon in 2007. When click on office button it displays some useful options which are very frequently used. In particular, the office button provides us with an option to open a document, save it and print.

26. Which of the following main menu items of MS-Word 2007 contains the 'Footnote and Endnote' command?

- (a) Page Layout
- (b) Insert
- (c) Home
- (d) References

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (d) : In MS - Word 2007, footnote appears at the bottom of the page and endnotes comes at the end of the document. A number or symbol or the footnote or endnote matches up with a reference mark in the document. For Inserting footnotes and endnotes, you can usually go to the "References" tab on the ribbon at the top.

27. Which of the following function keys are used to open the help viewer windows in MS Word 365 at any time?

- (a) F1
- (b) F5
- (c) F10
- (d) F4

UPPSC APS-2023, 07.01.2024

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (a) : In MS Word 365, F1 function key is used to open the help system for the active windows.

28. In which of the following tabs is page borders options available in MS- Word 365?

- (a) Preview
- (b) Developer
- (c) Home
- (d) Design

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (d) : Page Border is present in the design tab in MS word 365.

To use the page border option in MS word 365, follow the steps -

Design → Page Borders.

29. Which one of the following Icon is NOT present under the "Home" tab of the Ribbon of MS-Word (Microsoft 365 edition)?

- (a) 
- (b) 
- (c) 
- (d) 

UPPCL TG-2, 17.11.2023, Shift-I

Ans. (d) : In the Home tab of MS-Word 365, given icons are of the following types:

-  - Border
-  - Format Painter
-  - Bullet
-  - Numbering

whereas the icon given in option (d) is not located in Home tab.

30. Computer tools such as Word, Excel and PowerPoint are the products of which of the following companies?

- (a) Intel
- (b) Apple
- (c) Microsoft
- (d) Google

Lower Exam – 01-10-2019 (Shift-II)

Ans. (c) Computer tools such as Word, Excel and PowerPoint are products developed by Microsoft. It is the main function is to operate the text or document.

There are mainly four programs under MS Office-

- MS-Word
- MS-Excel
- MS-Power Point
- MS-Access

31. Which of the following options is the result of applying toggle case option on the word 'Online Test' in MS word 365?

- (a) Online test
- (b) ONLINE TEST
- (c) oNLINE tEST
- (d) Online tesT

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (c) : Toggle case lowercases the first letter of each word and uppercases the rest of the letter.

Example -
ONLINE TEST.

32. Which of the following icons is the font color icon in MS-Word 365?

- (a)  (b) 
(c)  (d) 

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (d) : In the Font group of the Home tab, choose a color from the list of font colors. You can also use the formatting options on the mini toolbar to format text.

33. Which of the following bars is not a part of the writer interface in a word processor.

- (a) Menu bar (b) Tool bar
(c) Formula bar (d) Title bar

UPPCL TG-2, 10.11.2023, Shift-I
(AHC RO/ARO-2014)

Ans : (c) Except for the formula bar all other options are part of the writer interface of the word processor. The formula bar is part of the interface of an excel sheet. It is used to display the content of an active cell in MS-Excel.

34. Which of the following sequence of steps is used to open the MS-Word 365 software?

- (a) To bring up the Run dialog, press windows key + 'R' -> without the quotes in the box, type 'Win.exe'.
(b) To bring up the Run dialog, press windows key + 'R' -> without the quotes in the box type 'WinWord.exe'.
(c) To bring up the Run dialog, press windows key + 'R' -> without the quotes in the box type 'Word.exe'.
(d) To bring up the Run dialog, press windows key + 'R' -> without the quotes in the box type 'MS-Word.exe'.

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (b) : To bring up the Run dialog in MS-Word, press Windows key + R and without the quotes in the box, type 'winword.exe' to open the MS Word 365 software.

35. Which of the following sequence of steps is used to open an existing (MS-Word) 365 document?

- (a) Home-> Open (b) File-> Open
(c) Home-> New (d) File-> New

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (b) : To open an existing document in MS-Word 365, after clicking on the File, click on the Open option and select and open the existing document.

36. Which of the following paste options will paste using original formatting of pasted text in MS-Word 365?

- (a)  (b) 
(c)  (d) 

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (d) : Word preserves the original formatting when you paste content into a document using Ctrl + V the paste button or right click + paste.

37. Which of the following sequence of steps is used to create a bulleted list for existing text in MS-Word 365?

- (a) Layout-> Bullets (b) Design -> Bullets
(c) Home -> Bullets (d) Insert -> Bullets

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (c) : Type * and a space before your text and word will make a bulleted list and the Home -> Bullets sequence is used to make text in MS - Word 365 bulleted.

38. If you always want first-line indentation, which of the following indentation options of the Paragraph tab is to be selected in MS-word 365?

- (a) Hanging (b) Alignment
(c) First line (d) Spacing

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (c) : To do first line indentation in MS Word 365, first line indentation is selected in the paragraph tab.

39. The _____ is a temporary holding area the computer uses for any item that has been copied or cut.

- (a) alignment (b) auto correct
(c) indentation (d) clipboard

UPPCL TG-2 03.11.2023, Shift-I
ARO Alld. HC, 15.12.2021, Shift-I

Ans. (d) : The clipboard is a temporary holding area that a computer uses for an item that is being copied or cut so that it can be pasted.

40. Which of the following icons is not available in the Clipboard group of the Home tab in MS-Word 365?

- (a)  (b) 
(c)  (d) 

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (c) : MS word clipboard group collected mainly four tools name cut, copy, paste and format painter, whereas highlighter is available in font group.

41. What is the purpose of the keyboard shortcut 'Ctrl + Left bracket (])' in MS-Word 365?

- (a) Center the text
(b) Cancel a command
(c) Decrease the font Size by 1 point
(d) Split the document window

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (c) : Keyboard shortcut keys -
Ctrl + Left bracket ([) - Decreases the font size by 1 point.
Ctrl + Right bracket (]) - Increases the font size by 1 point.

42. Which of the following is not a word processing file extension?

- (a) .bat (b) .doc
(c) .rtf (d) .docx

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (a) : A .bat file is a DOS batch file used to execute commands with the windows command prompt whereas .doc, .rtf and .docx are word processing file extensions.

43. Which of the following is NOT a valid section break option in Page Setup group of MS-Word 2010?

- (a) Even page (b) Next page
(c) Odd page (d) Alternate page

UPPCL TG-2, 09.11.2023, Shift-I
ARO Alld. HC, 18.12.2021, Shift-I

Ans. (d) : In Page Setup group of MS-Word 2010, Continuous, New Page, Even Page, Odd Page along with New Column are under Section break whereas Alternate page is not come under section break.

44. Which of the following Break options inserts a new section break and starts the new section on the same page in MS-Word 365?

- (a) Odd Page (b) Continuous
(c) Next Page (d) Even Page

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (b) : Continuous section break starts the new section on the same page. This type of section break is often used to change the number of columns without starting a new page.

45. For which of the following functions in MS-Word (Microsoft 365 Edition) the following icon is used for manipulation in "Table"?

- (a) Insert Above (b) Distribute Rows
(c) Split Table (d) Insert Below

UPPCL TG-2, 17.11.2023, Shift-I

Ans. (c) : "Split table" is used to manipulate tables in MS-Word 365. Split Table is a Microsoft Word function used to split a table. It means you can divide a large table into smaller parts, by which you can edit different segments in different ways.

46. Which of the following operations is not possible with respect to inserting rows and columns in MS Word 365 table?

- (a) Insert Left (b) Insert Across
(c) Insert Right (d) Insert Below

UPPCL TG-2, 17.11.2023, Shift-II

UPPCL Executive Assistant 25.11.2022, Shift-I

Ans. (b) : In MS Word 365, four options are displayed to insert rows and columns in the table which are as follows -

- Insert Columns to the Left
→ Insert Columns to the Right
→ Insert Rows Above
→ Insert Rows Below.

47. What will be the total number of cells of an MS Word 365 table if the number of rows is 13 and the number of columns is 17?

- (a) 210 (b) 221
(c) 211 (d) 212

UPPCL TG-2, 8.11.2023, Shift-I

Ans. (b) : If number of rows is 13 and number of column is 17, then total number of cells in a table

$$= \text{row} \times \text{column} \\ = 13 \times 17 \\ = 221$$

48. The drop cap feature of MS word 365 can be used to create very large size letters at _____ of a paragraph.

- (a) Start (b) End
(c) Second row (d) Last line

UPPCL TG-2, 07.11.2023, Shift-II

UPPCL Executive Assistant 25.11.2022, Shift-I

Ans. (a) : In MS - Word 365, the drop cap feature is a formatting option that allows you to create an ornamental or large capital letter at the beginning of a paragraph or section of text.

49. In MS-Word 2010, _____ is used to create a large capital letter at the beginning of a paragraph.

- (a) smart art (b) header
(c) chart (d) drop cap

UPPCL Technician Electrical, 03.11.2023, Shift-II

Ans. (d) : See the above question explanation.

50. Identify whether the given statements are true or false with reference to MS Word 365.

(I) The shading option is used to color the background behind the selected text or paragraph.

(II) Multi - level list is not supported in MS Word document.

- (a) I- False, II- True (b) I- False, II- False
(c) I- True, II- True (d) I- True, II- False

UPPCL Executive Assistant 25.11.2022, Shift-I

Ans. (d) : In MS - Word 365, shading refers to the application of a background color to a selected portion of a text or a specific element, such as a table cell or a text box. This shading can be used to highlight or emphasize text or elements within your document. A multi-level list is a type of numbered or bulleted list that has more than one level hierarchy. A multi-level list is supported in MS - Word document. So, statement (i) is true and statement (ii) is false.

51. What does the command 'Shift + End' do in MS-Word?
- Ending an editing session
 - Ending an Insert session
 - Selecting from the cursor position on the text to the end of the line
 - Closing a document

UPPCL Assistant Accountant 31.07.2023, Shift-I

Ans. (c) : In MS-Word, pressing the "Shift + End" keyboard shortcut is used to select text from the current cursor position to the end of the current line. It's a quick way to highlight or select text within a line without having to manually drag the cursor to the end of the line.

52. Which of the following is a tool in MS Word that is used to quickly apply the same formatting, such as colour, font style and size and border style, to multiple pieces of text graphics?
- Format Painter
 - Paragraph
 - Styles
 - Font

EMRS JSA, 17.12.2023, Shift-II

UPPCL Asst. Account. 22.06.2023, Shift-I

Ans. (a): Format Painter to quickly apply the same formatting such as color, font style and size, or border style, to multiple pieces of text or graphics.

53. What is the MS Word feature lets you to search your document for specific text, highlight text and/or replace it with different text or formatting called?
- Conditional formatting
 - Autocorrect
 - Sorting and filtering
 - Find and replace

UPPCL Asst. Account. 22.06.2023, Shift-I

Ans. (d): If we are working with a lot of text and need to search and replace a word or a phrase, use find and replace in MS Word.

54. To copy and paste the text in the same MS Word document, what is the correct order of keyboard shortcut commands?
- Ctrl + C and Ctrl + V
 - Ctrl + S and Ctrl + N
 - Ctrl + P and Ctrl + S
 - Ctrl + V and Ctrl + C

UPPSC APS-2023, 07.01.2024

EMRS H.W, 17.12.2023, Shift-I

UPPCL TG-2, 10.11.2023, Shift-I

UPPCL Asst. Account. 22.06.2023, Shift-I

Ans. (a) : To copy and paste keyboard shortcut- Ctrl + C for copy, Ctrl + V for paste and Ctrl + X for cut.

55. Which of the following options is used to copy a text from one area to another in a word document?
- Move and Paste
 - Clear and Paste
 - Cut and Paste
 - Copy and Paste

UPPCL Technician Electrical 30.11.2023, Shift-II

Ans. (d): See the above question explanation.

56. Which of the following sequences of steps must be carried out to create an MS-Word 2010 document?

- File → Create → Blank document
- File → Create → Document
- File → New → Blank document
- File → New → Document

UPPCL TG-2, 10.11.2023, Shift-I

Ans. (c) :	
MS Word	Steps to create documents
MS. word 2016	⇒ File → New → Search for online templates → create.
MS. word 2013	⇒ File → New → Blank document → create.
MS. word 2010	⇒ File → New → Blank document → create.
MS. word 2007	⇒ Office button → New → Blank document → create.
MS. word 2003	⇒ File → New →

57. What is the keyboard shortcut key to open a 'New Blank' document in Microsoft Word?

- CTRL + M
- CTRL + P
- CTRL + N
- CTRL + S

UPPCL TG-2, 8.11.2023, Shift-I

UPPCL Assistant Accountant 22.06.2023, Shift-II

ARO Alld. HC, 18.12.2021, Shift-I

Ans. (c) : In MS Word-
 Ctrl + M → Indent The paragraph.
 Ctrl + P → Print the document.
 Ctrl + N → Create a new document
 Ctrl + S → Save the document

58. A word file of 50 pages was created on the computer. To print the initial 12 pages of that file, which of the following printer command should be chosen?

- Print Preview
- Page set up
- Print from 1 to 12
- Print even page only

ARO Alld. HC, 20.12.2021, Shift-I

Ans. (c) : Print from 1 to 12

59. Which function key is used to open the 'Save As' window in MS Word 365?

- F4
- F12
- F5
- F7

UPPCL Technician Electrical 30.11.2023, Shift-II

UPPCL Executive Assistant 25.11.2022, Shift-I

Ans. (b) : In Microsoft Word 365, the F12 function key is typically used to open the "Save As" dialog box, allowing you to save the current document with a new name or in a different location.

60. Which of the following features in MS - Word 365 is used to automatically correct misspelled words and correct capitalization of words?

- (a) Auto Format (b) Auto Text
(c) Auto Fill (d) Autocorrect

UPPCL Executive Assistant 25.11.2022, Shift-I

Ans. (d) : Auto correct in MS - Word 365 is a feature that automatically corrects common spelling and typing errors as you type. It helps improve the accuracy and consistency of your documents by automatically replacing misspelled words or common abbreviations with their correct counterparts.

61. Which of the following is the keyboard shortcut to open the 'Print Preview' window in MS-Word 365?

- (a) Ctrl + F1 (b) Ctrl + F4
(c) Ctrl + F2 (d) Ctrl + F3

UPPCL TG-2, 17.11.2023, Shift-II

UPPCL Executive Assistant 25.11.2022, Shift-I

Ans. (c) : Keyboard shortcut for MS - Word 365 -
Ctrl + F1 → Displays or hides the ribbon.
Ctrl + F2 → Displays the print preview area on the print tab in the backstage view.
Ctrl + F3 → Cuts the selected content to the spike.
Ctrl + F4 → Closes the current document.

62. Which of the following keyboard shortcuts is used to change the casing of selected text in MS-Word 2007?

- (a) Shift + C (b) Ctrl + A
(c) Shift + F3 (d) Shift + F5

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (c) : In MS - Word 2007, using shortcut keys 'Shift + F3' typically toggles the text case of the selected text. It allows you to switch between Uppercase, Lowercase and Title case. Shortcut key Shift + F5 used for move to the last navigation.

63. Which of the following is the keyboard shortcut to open a document in MS-Word 2007?

- (a) Shift + O (b) Ctrl + O
(c) Ctrl + Alt + O (d) Alt + O

UPPCL TG-2, 17.11.2023, Shift-I

UPPCL TG-2, 10.11.2023, Shift-I

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (b) : The most frequently used shortcuts in Microsoft Word are:
Ctrl + O → Opens a document.
Alt + O → Opens the format menu.
Ctrl + Alt + O → Switches to the outline view.
Ctrl + N → Creates a new document.
Ctrl + W → Closes the document.

64. Which of the following statements is/are True regarding page setup in MS Word 2007?

- (i) In 'Normal' the value of margins is 2.0 cm in each direction.
(ii) The size of A3 paper is 21 cm × 20.7 cm

- (a) Both (i) and (ii) (b) Only (i)
(c) Only (ii) (d) Neither (i) nor (ii)

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (d) : In Microsoft Word, the default margin value are usually set to 2.54 cm (1 inch) in each direction. The A3 paper size is 29.7cm × 42 cm (11.7 × 16.5 inches). It is commonly used for posters, drawings and other larger documents. So both statements (i) and (ii) is incorrect.

65. Which of the following statements is INCORRECT about alignment of text of a paragraph in MS-Word 2007?

- (a) Alt + L shortcut keys may be used to align text to the left.
(b) Ctrl + R shortcut keys may be used to align text to the right.
(c) Ctrl + L shortcut keys may be used to align text to the left.
(d) Ctrl + E shortcut keys may be used to align text in the centre.

UPPCL TG-2, 10.11.2023, Shift-I

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (a) : Shortcut keys about alignment of text of a paragraph in MS - Word 2007 are-

Ctrl + L → Align text to the left
Ctrl + R → Align text to the right
Ctrl + E → Align text in the centre
Ctrl + J → Justification.

66. Which of the following is the extension of the file (in MS Word 2007) when saved in word 97-2003 document format?

- (a) docx (b) doc
(c) dox (d) doxc

UPPCL Executive Assistant 25.11.2022, Shift-II

ARO Alld. HC, 19.12.2021, Shift-I

Ans. (b): Microsoft Word uses the file extension ".docx" for its newer file. Older versions of word used ".doc" for their file extension.

When the file is saved in word 97 - 2003 document format, the file extension in MS Word 2007 is ".doc".

67. Which of the following commands is a part of the Page Setup menu in MS Word 2007?

- (a) Watermark (b) Orientations
(c) Page Color (d) Page Border

UPPCL TG-2, 17.11.2023, Shift-I

UPPCL TG-2, 07.11.2023, Shift-II

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (b) : The Page setup menu in MS Word is a set of options that allow you to customize the layout and formatting of your document's pages. It includes settings for adjusting page size, margins, orientation (Portrait or Landscape) paper source and more. It can be set by the following steps:
Layout -> Page Setup -> Orientation

68. Which of the following texts in MS-Word is an example of superscript?

- (a) $X = 25$ (b) $X = Y - 10$
(c) H_2O (d) $X^2 + Y^2 = 20$

UPPCL TG-2, 09.11.2023, Shift-II

UPPCL Executive Assistant 25.11.2022, Shift-II

Com. Asst. Alld. HC, 21.12.2021, Shift-I

Ans. (d) : In MS - Word, superscript is a formatting option that allows you to raise a character or number slightly above the regular text line. It's commonly used for things like mathematical exponents. For example - $x^2 + y^2 = 20$.

69. Which of the following menu items of MS-Word 2007 contains the 'Columns' command, which is used to split text into two or more columns.

- (a) Home (b) Page Layout
(c) Insert (d) References

UPPCL Executive Assistant 28.11.2022, Shift-I

Ans. (b) : MS - Word 2007, the Page Layout menu item contains the 'Columns' command, which is used to divide text into two or more columns. This Page Layout is present under setup group.

70. Which of the following menus includes Delete rows/columns Delete cells, Delete table options?

- (a) Insert (b) Page Layout
(c) Layout (d) Design

UPPCL (Office Assistant III) 23-09-2018

Ans : (c) Layout menu has the delete rows/columns delete cells, delete table options in MS Word. Steps of delete row, cell or table-

1. Click a row or cell in the table, and then click the layout tab/this is the tab next to the table design tab on the ribbon.
2. Click delete and click the option you need in the menu.

71. When we click File -> Print in MS-word 365, on the _____, we'll see a preview of our presentation and on the _____, we'll see the Print button and the configurable settings.

- (a) Right, Left (b) Left, Right
(c) Top, Bottom (d) Bottom, Top

UPPCL Executive Assistant 28.11.2022, Shift-II

Ans. (a) : You can see the matter by print preview how your print job will look before sending it to the printer.

72. Which of the following symbols should be typed to automatically convert a sentence into a bulleted list in MS - Word 365?

- (a) * (b) #
(c) \$ (d) %

UPPCL Executive Assistant 28.11.2022, Shift-II

Ans. (a) : Type * and a space before your text then word will be made a bulleted list. To complete your list, press enter until the bullets or numbering switch off. To start a numbered list type 1, a dot (.), a space and some text word will automatically start a numbered list for you.

73. Strike through option, which is used to cross something by drawing a line is available in which tab of MS Word 365?

- (a) Mailings (b) Home
(c) Developer (d) Review

UPPCL Executive Assistant 28.11.2022, Shift-II

Ans. (b) : Strike through option, which is used to cross something by drawing a line is available in Home tab of MS Word 365.

74. When multiple copies of pages are given for printing in MS Word 365, then which of the following print options is used to print the page sequentially?

- (a) Normal margins (b) Collated
(c) Print on both sides (d) No staples

UPPCL Executive Assistant 28.11.2022, Shift-II

Ans. (b) : Multiple copies of pages are given for printing in MS Word 365, then collated print option is used to print the pages sequentially.

75. Which of the following options is used to specify number of prints required in 'Print' option in MS-Word 2010?

- (a) Collated (b) Copies
(c) Orientation (d) Page Size

UPPCL Technician Electrical, 10.11.2023, Shift-II

Ans. (b) : Open the print dialog by pressing Ctrl + P. In the General tab, Choose the number of copies to specify number of prints required and select the Print button. If you want to choose Pages from the Range section, type the numbers of the pages you want to print in the text box, separated by commas. Use a dash to denote a range of pages in MS Word.

76. Which of the following icons refers to the LINE and Paragraph spacing options of the Home tab in MS Word 365?

- (a)  (b) 
(c)  (d) 

UPPCL Executive Assistant 28.11.2022, Shift-II

Ans. (a) :  icon refers to the line and paragraph spacing option of the Home tab in MS Word 365.

77. To delete a word on the left side in an MS - Word 365 document, which of the following keyboard shortcuts is used?

- (a) Ctrl + Backspace (b) Ctrl + Delete
(c) Ctrl + Enter (d) Ctrl + Insert

UPPCL Executive Assistant 29.11.2022, Shift-I

Ans. (a) : In MS Word 365, Ctrl + Backspace shortcut key is used to delete a word on the left side of a document.

78. Which of the following options in MS - Word 365 is used to apply formatting to specific borders of a table?

- (a) Table Style (b) Border Painter
(c) Border Style (d) Pen color

UPPCL Executive Assistant 29.11.2022, Shift-II

Ans. (b) : In MS - Word 365, the Border Painter is used to apply formatting to specific borders of a table.

79. Which of the following is added to the end of document to add explanatory information in MS - Word 365?

- (a) Footnote (b) Endnote
(c) Header (d) Footer

UPPCL Executive Assistant 29.11.2022, Shift-II

Ans. (b) : Footnotes appear at the bottom of the page and endnotes come at the end of the document. A number or symbol on the footnote or endnote matches up with a reference mark in the document.

80. Which of the following orientation option is used to display a document horizontally in MS - Word 365?

- (a) Vertical (b) Landscape
(c) Portrait (d) Layout

UPPCL TG-2, 17.11.2023, Shift-I

UPPCL Executive Assistant 29.11.2022, Shift-II

Ans. (b) : There are generally two types of page orientation in MS Word 365, Portrait and Landscape. Landscape is used to display a document horizontally and portrait is used to display it vertically.

81. In MS Word 365 a specific text box that points to a specific location on a document, with or without a small background, is called ____.

- (a) Format painter (b) Footnote
(c) Endnote (d) Callout

UPPCL Executive Assistant 29.11.2022, Shift-II

Ans. (d) : A callout is a type of text box that also includes a line for pointing to any location on the document. A callout is helpful when you need to identify and to explain parts of a picture.

82. Which of the following can be used to remove a portion of text from one place and insert it somewhere else in an MS Word 365 document?

- (a) Cut and Paste (b) Copy and Paste
(c) Copy and print (d) Cut and save

UPPCL Executive Assistant 29.11.2022, Shift-II

Ans. (a) : Cut and Paste is used to remove a part of text from one place and insert it somewhere else in an MS Word 365 document.

83. Find whether the given statements are true or false.

- (i) MS - Word table has not less than two rows.
(ii) MS - Word table has not less than two columns.

- (a) (i) false (ii) false (b) (i) true (ii) true
(c) (i) true (ii) false (d) (i) false (ii) true

UPPCL Executive Assistant 30.11.2022, Shift-I

Ans. (a) : In the MS-word a table must have at least one row and one column and maximum 32767 Rows and 36 column. In the MS Word application columns and rows make up a table structure. In a table, data is organized into rows and columns.

84. Which of the following options is INCORRECT with respect to the citation styles of the documents?

- (a) IEEE
(b) MP
(c) MLA
(d) HARVARD-ANGLIA

UPPCL Assistant Accountant 31.07.2023, Shift-I

Ans. (b) : Citation styles are standardized systems for referencing sources in academic and professional writing. There are many different citation styles, but they typically use one of three basic approaches-

- (i) Parenthetical citations - AAA, APA, APSA, ASA, Chicago, Harvard, MLA.

Ans. (a) : The Draw ribbon tab is primarily used to draw new one line diagrams or edit existing one lines by adding, moving, formatting or resizing existing one line objects. Under the Draw ribbon, we can add the Pen, Pencil, Highlighter options, while Paintbrush is the tools of Paint application.

86. A software application capable of creating, storing and printing documents is called:

- (a) Word processor (b) Browser
(c) Image editor (d) electronic mail

UPPCL Assistant Accountant 22.06.2023, Shift-II

Ans. (a) : A word processor is a computer program that allows users to create, edit format and print documents. It allows you to type and manipulate text insert images and perform various formatting tasks. Popular word processors are MS Word, Google Docs, LibreOffice writer.

87. Which of the following programmes/software is NOT used for creating a word document?

- (a) Notepad
(b) Adobe Acrobat Reader
(c) Microsoft Word
(d) Word Pad

SSC JE Civil - 23/09/2019 (Shift-I)

Ans. (b) : Notepad, Microsoft Word and Word Pad are used to create word document but adobe acrobat reader is used to read PDF.

88. The term 'wide ', 'Mirrored,' 'Narrow' describe which of the following options in MS word 365 in terms of the layout the document?

- (a) Breaks (b) Margins
(c) Size (d) Orientation

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (b) : The Margins options in the Page Setup group of MS Word, page layout includes wide, Mirrored, Narrow, Normal, Moderate, default and custom. Apply a predefined margin setting

- (1) Select Layout - Margins
- (2) Select the margin measurements you want.
- (3) You can also create custom margins.

89. In MS - Word 365 which of the following function keys, if possible repeats the last command or action?

- (a) F3 (b) F1
- (c) F4 (d) F2

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (c) : F4 → Repeat the last command or action, if possible.

F1 → Displays the word help Task Pane.

F2 → Move the selected text or graphic.

Shift + F3 → switch case.

F5 → Display the Go to dialog box.

90. Select the correct sequence of steps showing how to double underline text in MS Word.

- (a) a-select text.
b-click Insert tab; then on arrow of 'Font' group.
c-Select Underline Style as double line.
- (b) a- select text.
b- click page Layout tab; then click on arrow of 'Font' group.
c-Select Underline Style as double line.
- (c) a- Select text.
b- Click Home tab; then click on arrow of 'Font' group.
c- Select Underline style as double line.
- (d) a- Select text.
b- Click Layout tab; then click on arrow of 'Font' group.
c- Select Underline as double line.

Delhi Police Constable 10.12.2020 (Shift-I)

Ans. (c) : The correct sequence of steps which adds to double underline text in MS Word are

a – select text

b – Click Home tab; then click on arrow of 'Font' group.

c – Select underline style as double line.

91. In MS - Word 365 which the following refers to the use of a short, dashed line to break a word when it reaches the edge of a document or container?

- (a) Hyphenation (b) Strikethrough
- (c) Wrap text (d) Merge and Center

Ans. (a) : In MS word 365, hyphenation refers to the use of a short dashed line to break up a word when it reaches the edge of a document or container.

92. Which of the following options best describes the words regular, bold and Italic in MS Word 365?

- (a) Font Size (b) Color
- (c) Effects (d) Size

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (a) : Font size option best describes the words-regular, Bold and Italic in MS Word 365.

93. Which of the following options is NOT associated with the 'Delete Cells' dialog box in MS-Word 2010?

- (a) Delete entire column (b) Shift cells up
- (c) Delete entire row (d) Split cells

UPPCL TG-2, 09.11.2023, Shift-II

Ans. (d) : In the 'Delete Cells' dialog box of MS word 2010, Shift cell left, Shift cell up, Delete entire row and Delete entire column options are given, whereas Split cells are displayed on right clicking in the table. This is not associated to the 'Delete Cells' dialog box.

94. In MS - word 365, when we click on 'Delete' option in the Mini toolbar, which is displayed by right - clicking on the table cell, row or column which you want to delete. If you click, which of the following option is not available?

- (a) Delete Rows (b) Delete Columns
- (c) Delete Cells (d) Delete Pages

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (d) : In MS word 365 when we see the mini toolbar which is displayed when we right click in those table cell row or column. In this, on clicking 'Delete' option the following options are displayed -

→ Delete cell

→ Delete columns

→ Delete Rows

→ Delete Table.

95. Which of the following is the correct sequence of turning off bullets and numbering in MS Word 365?

1. Select auto correct options and then click the auto format as you type tab.
2. File > Options > proofing
3. Select ok.
4. Select or clear automatic bulleted lists or automatic numbered list.

(a) 1, 2, 3, 4 (b) 2, 4, 1, 3

(c) 2, 1, 3, 4 (d) 2, 1, 4, 3

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (d) : The correct sequence to turn off automatic bullets and numbering is as follows:
2,1, 4,3.

96. 'Screenshot' option is available in ----- tab of MS - Word 2010.

- (a) Home (b) Review
- (c) Insert (d) Design

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (c) : To take a screenshot in MS Word 2010 follow the step -

1. Click the insert tab at the top of the window.

2. Click the screenshot drop-down menu, then choose the open window from which you want to pull the screenshot.

97. What does the given button signify in MS-Word 2010?

- (a) Align Right (b) Align Left
(c) Center (d) Justify

UPPCL TG-2, 17.11.2023, Shift-II

UPPCL Technician Electrical, 10.11.2023, Shift-II

Ans. (c) : Text alignments are four types in MS Word:

Symbol	Alignment Name	Shortcut keys
	Left	Ctrl+L
	Center	Ctrl+E
	Right	Ctrl+R
	Justify	Ctrl+J

98. Which of the following keyboard shortcuts is used to centre align text in MS-Word 2019?

- (a) Ctrl + E (b) Ctrl + A
(c) Ctrl + W (d) Ctrl + C

UPPCL Technician Electrical, 03.11.2023, Shift-II

Ans. (a) : See the above question explanation.

99. Which of the following options in MS Word 365 is used to create your table by creating cell, row and column borders?

- (a) Create table (b) Quick table
(c) Draw table (d) Insert table

UPPCL TG-2, 07.11.2023, Shift-II

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (c) : Draw table option is used to create a table by creating cell, row and column manually, whereas create table, quick table and insert table create table by get command.

100. Which of the following tabs MS- Word 365 has options likes Save, Save as, Open a New Document etc?

- (a) Data (b) Review
(c) Home (d) File

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (d) : File tabs has New, Open, Save, Save as, Print etc. options which is used for create a new file, open existing file and print file etc.

101. Which of the following main menu items in MS-Word 2007 includes the 'Watermark' command?

- (a) Page layout (b) Insert
(c) Home (d) References

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (a) : In MS Word 2007, click Watermark on the Page Layout tab, and then click on Printed Watermark. Click Picture Watermark or Text Watermark in the Printed Watermark dialog box.

102. Which of the following is the keyboard shortcut to save the contents of the currently open Word document in MS Word 2007?

- (a) Alt + S (b) Shift + S
(c) Ctrl + Alt + S (d) Ctrl + S

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (d) : In MS Word 2007, the Ctrl + S keyboard shortcut is used to save the contents of the currently open Word document.

Shortcut key-

Ctrl + Alt + S = Splits the current document.

Alt + Shift + C = Deletes the Document Windows partition.

103. What is the correct sequence of steps performed for saving a document in MS Word?

- From the menu, select Save.
- Type the name of your document and click Save.
- Click File in the top left-hand corner of the screen.
- Start a new document in MS-Word and type your text.
- The dialog box appears. Select the folder location where you want to save the document.

- (a) v -> iv -> ii -> iii -> i
(b) iv -> v -> iii -> ii -> i
(c) i -> ii -> iii -> iv -> v
(d) iv -> iii -> i -> v -> ii

UPPCL TG-2, 07.11.2023, Shift-I

Ans. (d) : To save a document in MS-Word, the following steps are:

- Start an MS-Word document and type your text.
- Click on File located on top left side of screen.
- Select 'Save' option from menu.
- A dialog box is appear, select the location where you want to save your document.
- Type your document's name and click on Save.

104. Which of the following texts is an example of subscript in MS-Word?

- (a) $X = 12$ (b) $X = 10 + Y$
(c) H_2O (d) $X^2 + Y^2$

UPPCL TG-2, 09.11.2023, Shift-I

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (c) : A superscript or subscript in Word is a number, shape, symbol, or indicator that is smaller than the normal line of type and is set it slightly above (superscript) or below (subscript).

Ex- $X^2 + Y^2$, H_2O

105. Which of the following keyboard shortcuts is used to go to the File tab in MS-Word 2010?

- (a) Alt + N (b) Alt + F
(c) Alt + H (d) Alt + G

UPPCL Technician Electrical, 03.11.2023, Shift-II

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (b) : In MS Word 2010, the Alt+F shortcut key is used to go to the File tab. The File menu has options to manage Microsoft Word files. Alt + F shortcut key is used to open the file menu. 'Key tips' are displayed on the file menu page options.

106. Which of the following statement(s) is/are true about page setup in MS Word 2007?

- (i) The value of margin is normally 2.54 cm in each direction.
- (ii) The size of A4 paper is 21 cm × 29.7 cm.
- (a) Only (i) (b) Only (ii)
- (c) Neither (i) nor (ii) (d) Both (i) and (ii)

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (d) : The default A4 paper size in MS Word 2007 page setup is 21 × 29.7 cm or 8.27 × 11.69 inches, and the typical margin value is 2.54 cm. Page Setup can change the structure and layout of the pages in the document.

107. Which of the following statements is correct about the alignment of paragraph text in MS-Word 2007?

- (a) The keyboard shortcut 'Ctrl + L' can be used to align the text to the left.
- (b) The keyboard shortcut 'Ctrl + R' can be used to align the text to the right.
- (c) The keyboard shortcut 'Ctrl + C' can be used to center align the text.

- (a) Page Color (b) Margins
- (c) Paper Size (d) Orientations

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (a) : In MS Word 2007, Margin, Paper Size, Orientation options are available in the Page Setup menu in the Page Layout tab, whereas the Page Color option is not present in the Page Setup menu. Page Color Options is available in Page Background menu.

109. The keyboard shortcut to open a new blank document is which of the following?

- (a) Ctrl + N (b) Ctrl + Alt + N
- (c) Shift + N (d) Alt + N

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (a) : In MS word, the shortcut key to open a new blank document is Ctrl + N. The Microsoft Word is a word processor developed by Microsoft.

110. Which of the following menus enables you to switch between single page and two page views in MS-Word 2016?

- (a) View (b) Home
- (c) Review (d) Design

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (a) : View menu enables you to switch between single page and two page views in MS - Word 2016.

111. A reference to data that reader can directly follow by selecting or hovering is _____

- (a) hyper markup (b) hyper media
- (c) hyperlink (d) hypertext

ARO Alld.HC, 20.12.2021, Shift-II

Ans. (c) : A reference to data that reader can directly follow by selecting or hovering is hyperlink.

112. Mention the keyboard shortcut used to access 'Insert Hyperlink' window in MS - Word 2016.

- (a) Alt + L (b) Ctrl + H
- (c) Alt + K (d) Ctrl + K

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (d) :

Ctrl + K → Opens the hyperlink window.

Ctrl + H → Opens find and Replace window.

113. Which of the following is not a valid tab in the Table Properties window in MS - Word 2016?

- (a) Row (b) Column
- (c) Table (d) Sheet

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (d) : Valid tabs in table properties window in MS - Word 2016 are table, row, column cell in which table is default tab and sheet is not a valid tab.

114. Which of the following MS-Word features draws a line passing through the text?

- (a) Underline (b) Drop Cap
- (c) Strikethrough (d) Subscript

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (c) : The strike through feature of MS - Word draws a horizontal line through the middle of each word. Shortcut key for strikethrough is Alt+H-4.

Apply or remove single line strike through formatting.

(1) Select the text that you want to format.

(2) Go to Home > Strikethrough.

115. In MS - Word 2016, options like bold, underline and italic appear under the _____ menu/tab.

- (a) Design (b) Insert
- (c) Review (d) Home

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (d) : In MS - Word 2016, option like bold, underline and italic appear under the Home menu/tab.

116. Which of the following options is not available in the Page Setup group of the Layout tab in MS-Word 365?

- (a) Spacing (b) Line numbers
- (c) Hyphenation (d) Breaks

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (a) : In Microsoft Word 365, in Layout tab of Page Setup group, Line Number, Hyphenation, Breaks, Size, Orientation options are available while Spacing is available in Paragraph group.

117. Which of the following statements is incorrect with respect to the Help option in MS-Word 365?

- (a) The F5 function key can be used to open the Help Viewer window at any time.
- (b) You have to need to add a help shortcut to the Quick Access Toolbar to get it easily.
- (c) The Help option can be accessed from the File menu.
- (d) To get help you have to type your query "Tell me what you want to do" in the box.

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (a) : For the Help option in MS Word 365, Word Help can be opened at any point of time by using F1 function key and help option can be accessed from File menu.

118. In MS-Word, the keyboard shortcut 'Ctrl + E' is used for which of the following purposes?

- (a) Left-align text
- (b) Justify text
- (c) Right-align text
- (d) Center text

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (d) : In MS-Word, the keyboard shortcut 'Ctrl + E' is used to center align the text. Some keyboard shortcuts are following-
Ctrl + L - Left-align text
Ctrl + R - Right-align text
Ctrl + J - Justify text

119. Which of the following options is not available in the Editing group of the Home tab in MS-Word 365?

- (a) Find
- (b) Start Dictation
- (c) Replace
- (d) Select

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (b) : Find, Replace, Select options are available in Editing group of Home tab in MS Word 365 whereas Start Dictation option is not available in Home tab and Editing group.

120. Which one is the example of spreadsheet package ?

- (a) VisiCale
- (b) Unity
- (c) Ada
- (d) Snowball

ARO Alld. HC, 16.12.2021, Shift-II

Ans. (d) : Snowball is an example of spreadsheet package. This method is a way user can pay off his bills from smallest to largest such as current balance on all credit cards and loans.

121. In Microsoft Excel, what is the shortcut to hide a row?

- (a) Ctrl + 1
- (b) Ctrl + 5
- (c) Ctrl + 8
- (d) Ctrl + 9

APS Alld. HC, 23.12.2021, Shift-I

Ans. (d) :

Ctrl + 9 → To hide row in MS Excel
Ctrl + 8 → To show or hide the outline symbol
Ctrl + 5 → To apply or remove strikethrough
Ctrl + 1 → To open the Format cell dialog box.

122. In MS-Excel, which of the following is a graphical representation of data in a worksheet that shows comparison patterns and trends?

- (a) AutoSum
- (b) AutoFill
- (c) Charts
- (d) Pivot table

UPPCL Technician Electrical, 03.11.2023, Shift-II

Ans. (c) : In MS-Excel, charts are graphical representation of the data that is arranged in columns or rows on an Excel sheet can be plotted in a column chart. In column charts, categories are typically organized along the horizontal axis and values along the vertical axis. Column charts are useful to show how data changes over time or to show comparisons among items.

123. What is the result of '= 2+2/2*2' in MS-Excel 2010?

- (a) 8
- (b) 6
- (c) 4
- (d) 2

UPPCL TG-2, 09.11.2023, Shift-II

Ans. (c) : The order of calculation in MS - Excel is as follows-

'=2+2/2*2' Division and multiplication are done first
'=2+(2/2)*2'
Then addition and subtraction is done
'=2+2'
= 4

124. Which of the following options is used to display the content of an active cell in MS-Excel 2010?

- (a) Ruler
- (b) Formula bar
- (c) Scroll bar
- (d) Title bar

UPPCL Technician Electrical, 03.11.2023, Shift-II

Ans. (b): The formula bar is part of the interface of an excel sheet. It is used to display the content of an active cell in MS-Excel.

125. Which of the following keyboard shortcuts is used to minimize a workbook window in MS-Excel 2010?

- (a) Ctrl + F9
- (b) Ctrl + F5
- (c) Ctrl + F3
- (d) Ctrl + F7

UPPCL Technician Electrical, 03.11.2023, Shift-II

Ans. (a) : Ctrl+F2 displays the print preview area, Ctrl+F3 opens Excel name manager. Ctrl+F4 closes the selected workbook window. Ctrl+F5 restores the window size of the selected workbook window. Ctrl+F7 performs the Move command on the workbook window when it is not maximized. Ctrl+F8 performs the size command (on the Control menu for the workbook window) when a workbook is not maximized. Ctrl+F9 minimizes a workbook window to an icon.

126. Which of the following keyboard shortcuts is used for formatting a worksheet using 'Format as Table' style in MS-Excel 2010?

- (a) Ctrl + H + T (b) Alt + I + T
(c) Ctrl + I + T (d) Alt + H + T

UPPCL TG-2, 10.11.2023, Shift-I

Ans. (d) :	
Keyboard shortcut	Action
Alt + H + T	Format as Table
Ctrl + T	Create a Table
Alt + Shift + F1	Inserts a new worksheet
Ctrl + Shift + =	Inserts a new column
Shift + F3	Opens the Excel Formula window

127. Which of the following keyboard combinations is used to rename a sheet in MS-Excel 2010?

- (a) Alt + H + O + R (b) Alt + L + M + R
(c) Alt + I + O + R (d) Alt + H + L + R

UPPCL TG-2, 10.11.2023, Shift-I

Ans. (a) : To rename a sheet in Excel you can use the keyboard combinations Alt + H > O > R.

128. Which of the following keyboard combinations is used to add a sheet in MS-Excel 2010?

- (a) Alt + H + I + S (b) Alt + H + I + R
(c) Alt + I + M + R (d) Alt + I + O + R

UPPCL TG-2, 10.11.2023, Shift-I

Ans. (a) : Alt + H + I + S keyboard combinations is used to add sheet in MS - Excel 2010.

129. Which of the following is the scale of the row-height and the column-width in 'Normal' view of the MS Excel 2007?

- (a) Milimetre (mm) (b) Points (pt)
(c) Centimeter (cm) (d) Inches (in)

UPPCL TG-2 03.11.2023, Shift-I

Ans. (b) : In MS- Excel, the height of a row and the width of a column are increased or decreased depending on the point (Pt) scale by default, the height of a row is 15 paints and the width of a column is 8.43 points.

130. Which of the following file format is used to save a workbook as a comma - delimited text file in MS Excel 365 to be used an another windows operating system?

- (a) Text (MS-DOS)
(b) CSV (comma delimited)
(c) Unicode Text
(d) Formatted Text

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (b) : CSV (Comma delimited) file format is used to save a workbook as a comma delimited text file for use on another windows OS in MS Excel 365.

131. Which of the following is the correct to print worksheet in MS Excel 365?

- (a) File -> Print (b) View -> Print
(c) Pae Layout -> Print (d) Home -> Print

UPPCL TG-2, 07.11.2023, Shift-II

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (a) : To print a worksheet in Excel, the execute the following process -

File → Print.

132. What is the maximum size of row height in MS-Excel 365 based on a point scale?

- (a) 8.43 (b) 409
(c) 255 (d) 15

UPPCL TG-2, 17.11.2023, Shift-II

Ans. (b) : In MS - Excel 365, the maximum row height is 409 points. This allows for significant flexibility in adjusting the height of rows to accommodate various types of content. The row height can be set manually, and it is also affected by the display scaling (DPI), ranging from 15 points on a 100% DPI to 14.3% points on a 200 DPI. The default row height is 1500 points.

133. Which of the following options is used to change the size of rows in MS Excel 365?

- (a) Home -> Insert -> Row Width or Row Height
(b) Home -> Format -> Row Width or Row Height
(c) Home -> Cell Styles -> Row Width or Row Height
(d) Format as Table -> Format -> Row Width or Row Height

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (b) : To change the size of rows in MS Excel 365 follow the following procedure -

Step - 1 Select a row or range of rows.

Step - 2 On the home tab, select format → Row width (or row height)

Step - 3 Type the row width and select OK.

134. Which of the following MS-Excel function converts a binary number into a hexadecimal number?

- (a) HEX2BIN() (b) BIN2HEX()
(c) 2HEX() (d) 2BIN()

UPPCL Technician Electrical, 10.11.2023, Shift-II

Ans. (b) : BIN2HEX() function converts a binary number to hexadecimal. A binary number (BIN) is expressed in the base 2 numeral system, using only the digits 1 and 0; while a hexadecimal (HEX) is in the base 16 numeral system, using the numbers 0 to 9 and the letters A to F.

135. Which of the following keyboard shortcuts opens up the VBA interface in MS Excel 2010?

- (a) Alt + F10 (b) Alt + F11
(c) Alt + F13 (d) Alt + F12

UPPCL TG-2 03.11.2023, Shift-I

Ans. (b) : VBA interface in MS Excel is a programming environment used to create and modify macros in Excel. The shortcut key Alt+F11 is used to open the VBA interface in Excel.

136. In an MS Excel spreadsheet, how do we put multiple lines of text in one cell?
- Home tab -> Alignment group -> Wrap text
 - Home tab -> Cells group -> Autofit
 - Page Layout tab -> Cells group -> Wrap text
 - Page Layout tab -> Cells group -> Autofit

UPPCL TG-2, 07.11.2023, Shift-II

Ans. (a) : To place multiple lines of text in one cell in MS Excel spreadsheet is

Home tab → Alignment group → Wrap text

137. In MS - Excel 365 formula to refer to all cell in row 5 which of the following is used to?

- \$5\$5
- 5:5
- 5
- 5\$5\$

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (b) : From the given answer option (b) 5:5 is used to refer to all cells in row 5 in MS - Excel 365 formula, while \$5\$5 and 5\$5\$ are erroneous cell reference name.

138. Which of the following option is used to display the contents of the active cell in MS excel 2019?

- Formula bar
- Scroll bar
- Title bar
- Ruler

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (a) : The formula bar option is used to display the content of the active cell in MS excel 2019.

139. Which of the following charts is suitable for showing trends is data over equal intervals, such as month quarters or fiscal years in MS - Excel 365?

- Column
- Map
- Line
- Pie

UPPCL TG-2, 07.11.2023, Shift-I

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (c) : In MS Excel 365, Line charts are used to show trends in data over time. Column charts are used to compare values in categories. The pie chart displays the contribution of each value to the total.

140. In MS Excel spreadsheet, pie chart is used to compare data in _____.

- proportion
- numbers
- cubes
- quantity

UPPCL TG-2 03.11.2023, Shift-I

Ans. (a) : Pie chart in MS excel is special type of graphical representation that helps in displaying the share or percentage of data in an accessible manner. It is used to compare data across different subjects or to display the share of different statistics.

141. Which of the following keyboard shortcuts is used to apply a filter in MS-Excel 2010?

- Ctrl + Shift + K
- Ctrl + Shift + C
- Ctrl + Shift + L
- Ctrl + Shift + M

UPPCL TG-2, 09.11.2023, Shift-II

Ans. (c) : To apply filters in MS- Excel 2010, Ctrl + Shift +L shortcut key is used.

142. In the following screenshot of MS Excel (Microsoft version 365), which one refers to “Menu Bar”?

- D
- C
- B
- A

UPPCL TG-2, 17.11.2023, Shift-I

Ans. (a) : The Excel screenshot given in question is denoted by alphabet A, B, C, D, that are of the following:

- A → Title bar
B → Formula bar
C → Cell Address
D → Menu Bar

143. Which of the following option in MS - Excel 365 refers to display only rows that meet certain conditions?

- Merging
- Pivoting
- Sorting
- Filtering

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (d) : Filter option in MS excel 365 to select only certain conditions displays the completion lines.

Filtering a range of data -

- Select a cell within the range.
- Select data → filter.
- Select the column header arrow
- Select the Text filter or Number filters and then select a comparison, like between.
- Enter the filter criteria and select OK.

144. In MS - Excel 365 which of the following keyboard shortcuts is used to italicize text or remove italic formatting.

- Ctrl + 1
- Ctrl + 2
- Ctrl + 4
- Ctrl + 3

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (d) : In MS excel 365

Ctrl + 1 → Open the format cell dialog box.

Ctrl + 2 → Bold the text.

Ctrl + 3 → Italic text.

Ctrl + 4 → Underline the text.

Ctrl + 5 → Apply or remove strike through formatting.

Ctrl + 9 → Hide the selected row.

Ctrl + 0 → Hide the selected column.

145. Which of the following is the correct order of inserting columns in MS excel 365?

- (a) Design > Insert > Insert Sheet Columns
- (b) Draw > Insert > Insert Sheet Columns
- (c) Home > Insert > Insert Sheet Columns
- (d) Insert > Insert Sheet Columns

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (c) : In MS - Excel 365

Insert or delete a column-

Select any cell within the column, then go to Home > Insert > Insert sheet columns or delete sheet columns.

Insert or delete a row -

Home > Insert > Insert sheet rows or delete sheet rows.

146. Which of the following logical function returns true in MS Excel 365 if all its arguments?

- (a) FALSE
- (b) NOT
- (c) AND
- (d) OR

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (c) : AND logical function returns True in MS excel 365 all its arguments are true, and returns FALSE is one or more arguments evaluate to false.

Example -

=AND (1=1, 2=2, 3=3) All argument true

=AND (1=2, 2=3, 3=4) All argument false.

147. Which of the following is used as a text function in MS-Excel 2010?

- (a) Ceiling ()
- (b) Trim ()
- (c) Rate ()
- (d) Date ()

UPPCL TG-2, 09.11.2023, Shift-II

Ans. (b) : The trim function is premade in Excel and used to remove irregular text spacing and keep single space between words.

Syntax = TRIM (Text)

or

=TRIM (Cell Address)

148. Which of the following features of the data tab in MS - Excel 365 allows you to set rules that determine what can be entered in a cell?

- (a) Data validation
- (b) Data sorting
- (c) Data merging
- (d) Data filtering

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (a) : The data validation features of the data tab in Excel 365 allows the user to validate the values entered into the worksheet according to set rules while inputting data.

149. If the contents of A1 to A8 are 'DATA, 1, 2, 3, 4, 5, 6, COUNT' then what will be the output of the formula "=COUNTA(A1:A8)"

- (a) 6
- (b) 8
- (c) Error
- (d) 2

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (b) : The COUNTA function counts cells containing any type of information, including error values and empty text. There are 8 contents filled in cell A1 to A8.

= COUNTA (A1:A8)

= 8.

So, output will be 8.

150. In the spreadsheet below the font color of cell E1 is white. If the font color is changed to black, what will be displayed in cell E1

	A	B	C	D	E
1	7	8	9		
2					

- (a) 10
- (b) #error!
- (c) 24
- (d) 15

ARO Alld. HC, 16.12.2021, Shift-II

Ans. (d) : The value A, 7, 8, 9 are entered into given question's spreadsheet cell respectively.

On entering formula = SUM(A1 : C1) in cell E1,

= SUM (A1 : C1)

= SUM (7 : 8)

= 15

151. Which of the following options is used to easily identify trends in data by using bars, colors and icons to visually highlight important values in MS- Excel 365?

- (a) Cell Styles
- (b) Format as Table
- (c) Conditional Formatting
- (d) Pivot Table

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (c) : Conditional formatting is used in MS Excel 365 to visually highlight values, bars, colors and icons to make them easier to identify.

152. Referencing all cells in columns H to J in a formula in MS Excel 365 which of the following types of reference is used to do?

- (a) H-J
- (b) HJ
- (c) \$H\$J
- (d) H:J

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (d) : In MS Excel 365, the H:J reference is used to refer to all of columns H to J in a formula. In this application first column and then row is used, for example A is the column and 1 is the row.

153. Which of the following tabs in MS Excel 365 has the option to remove duplicate rows in a worksheet?

- (a) View
- (b) Formulas
- (c) Data
- (d) Review

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (c) : To remove duplicate rows from a worksheet in Microsoft Excel 365, click Data tab then click remove duplicate.

154. What will be the output of the function call '=N("Welcome")' in MS-Excel 2010?

- (a) 2
- (b) 0
- (c) Welcome
- (d) 4

UPPCL TG-2, 09.11.2023, Shift-II

Ans. (b) : N function is built - information in Excel which is classified as an information function. This function is used as a worksheet function the function returns the output as follows-

- ⇒ If the value is a number, the N function returns a number.
- ⇒ If the value is a date, the N function returns the date as a sequence number.
- ⇒ The N function will return 1 if the value is true, and the value 0 if the value is false.
- ⇒ The N function will return zero (0) for all other value.

155. Which of the following is the correct sequence of deleting rows in MS Excel 365?

- (a) Insert > Delete Sheet Rows
- (b) Home > Delete > Delete Sheet Rows
- (c) Draw > Delete > Delete Sheet Rows
- (d) Design > Delete > Delete Sheet Rows

UPPCL Technician Electrical 10.11.2023, Shift-II

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (b) : To delete rows in MS Excel 365 click on Home tab, click on delete menu and then select delete sheet row. Its shortcut key is Ctrl + - (minus).

156. Which of the following symbols in MS-Excel 2010, is prefixed before the number to treat number as text?

- (a) Apostrophe (')
- (b) Tilde (~)
- (c) Double quotation (")
- (d) Comma (,)

UPPCL TG-2, 09.11.2023, Shift-I

Ans. (a) : Sometimes Excel does not recognize certain file formats such as .CAV file or data imported from another program, so Excel automatically places an apostrophe (') at the beginning of each cell, that is why it is able to indicate that the value is text rather than a number or date. Hence option (a) is correct.

157. Which of the following MS Excel functions will give the result of factorization of a number?

- (a) FAC ()
- (b) FACTORIAL ()
- (c) FACTR ()
- (d) FACT ()

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (d) : In MS Excel, the FACT() function is used to calculate the factorial of a number. Microsoft Excel formula syntax. For example

= FACT (5)
= 5!
= 120.

158. Assume that cell A10 contains the formula "=IF(A10 > 85, "A", IF(A10 < 65, "B", IF(A10 > 75, "C", "D")))", where cell A10, contains "75". Which of the following should be the output in cell B10?

- (a) C
- (b) A
- (c) B
- (d) D

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (d) : In Excel, the IF function performs a logical comparison between two parts. The result of the IF function is either true or false. Example- in cell B10 The formula = IF(A10 < 85, "A", IF (A10 < 65, "B", IF(A10 > 75, "C", "D")))", where cell A10, contains "75". The output in cell B10 will be D

159. Which of the following statements is INCORRECT about printing in MS-Excel 2007?

- (a) The ranges of cells for printing may be selected manually.
- (b) By default, MS-Excel prints all data on all the worksheets of the current workbook.
- (c) It is possible to print non-contiguous ranges of cells.
- (d) By default, MS-Excel prints all data on the current worksheet.

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (b) : In MS Excel, we select a range of cells to print all the data in all worksheets in the current workbook and by default, Excel prints all the data in the current worksheet.

160. Which of the following statements is incorrect regarding cell references in MS Excel 2007?

- (a) C\$5 and \$C5 are examples of mixed cell reference.
- (b) C\$5 is an example of a relative cell reference.
- (c) \$C\$5 is an example of an absolute cell reference.
- (d) Cell reference identifies the position of a cell that can be used in a formula, function, or other Excel command.

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (b) : A cell reference identifies the position of a cell that is used in a formula, function or other Excel command. There are three types of cell references –

- 1- A relative cell reference is how far a cell or group of cells is from another cell in the same spreadsheet. Relative cell references do not contain a dollar sign Example A1.
- 2- Mixed Cell Reference - Mixed cell reference is either an absolute column and a relative row or an absolute row and a relative column. Mixed cell references use a dollar sign appended to a letter or number in a reference, but not both (ie, \$A1 or A\$1).
- 3- Absolute cell references - It can be locked by placing a dollar sign before cell and column references. Example: Formula = \$A\$2.

161. Identify the correct statement(s) about an MS Excel worksheet, workbook and spreadsheet.

- i. A workbook is just a single-page data file that is generally created as a specific datafile.
- ii. A worksheet is a bundle of workbooks wherein, generally, one or more than one workbook is available.

iii. A spreadsheet is an entire program wherein the user can create a worksheet or workbook.

- (a) Only (ii)
- (b) Only (i)
- (c) Only (iii)
- (d) All of (i), (ii) and (iii)

UPPCL TG-2, 07.11.2023, Shift-I

Ans. (c) : Spreadsheet (MS-Excel) is a whole program in which user can create a worksheet or workbook. A group of worksheets is in a workbook, it means more than one worksheets can be in a workbook. The data files of more than one page is in workbook and any data can be in it. Hence, statement (iii) is true of given statements.

162. Which of the following MS Excel formulas counts the number of cells of a string in the range A1 to A20 in a worksheet?

- (a) Count(A1:A20, *)
- (b) CountIF(A1:A20, *)
- (c) Count(A1:A20, "**")
- (d) CountIF(A1:A20, "**")

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (d) : In MS Excel, the formula CountIF(A1:A20, "**") is used to counts the number of cells of a string in the range A1 to A20 in worksheet.

163. Which of the following should be the address of the range of first five cells of the 2nd column in MS-Excel 2007?

- (a) B1 : E1
- (b) B1 : B5
- (c) 1B : 5B
- (d) B1 : 5

UPPSC APS-2023, 07.01.2024

EMRS JSA, 17.12.2023, Shift-II

Ans. (b) : Cell Range operator (:) produces one reference to all the cells between two references, including the two references, for example, B1:B5.

164. Suppose the date '14-09-2022' is stored in cell A1, which is 'Wednesday'. Which of the following formula of cell B1 will display 'Wed'?

- (a) =TEXT(A1, "dddd")
- (b) =Day(A1, "dddd")
- (c) =TEXT(A1, "ddd")
- (d) =DAY(A1, "ddd")

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (c): In Excel, the TEXT function is used to convert numbers to text within a spreadsheet. Essentially, the function will convert a numeric value into a text string. For example, cell A1 stored date '14-09-2022', which is Wednesday. The formula '=TEXT (A1, " ddd")' returns 'wed'.

165. Which of the following should be the address of the third cell of the fifth row in MS Excel 2007?

- (a) C5
- (b) 35
- (c) 53
- (d) 5C

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (a) : In MS Excel 2007, each cell has its own name or cell address depending on its column and row. The cell represents column C and row 5, hence the address of the cell is C5.

166. Which of the following correctly defines the default horizontal alignments in MS-Excel?

(i) Numeric values → Left

(ii) Text → Right

- (a) Only (i)
- (b) Neither (i) nor (ii)
- (c) Only (ii)
- (d) Both (i) and (ii)

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (b) : In MS - Excel by default text inside cells is left aligned horizontally and numeric values are right aligned.

167. What is the default alignment of numeric values that are entered into the cell of an MS-Excel worksheet?

- (a) Left
- (b) Justify
- (c) Right
- (d) Center

UPPCL Technician Electrical, 03.11.2023, Shift-II

Ans. (c) : See the above question explanation.

168. In MS Excel, concatenation of text can be done using -

- (a) Apostrophe (')
- (b) Exclamation (!)
- (c) Hash (#)
- (d) Ampersand (&)

UPPSC APS-2023, 07.01.2024

Ans. (d) : Concatenation of text can be done using ampersand (&) symbol in MS Excel. For example- =concatenate(B3, "&", C3).

169. Which of the following symbols/characters is used to enter formula in the cell of an MS Excel worksheet?

- (a) Dollar (\$)
- (b) Ampersand (&)
- (c) Equal (=)
- (d) Percent (%)

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (c) : Equal sign (=) is used to enter formula in the cell of an MS Excel worksheet. A formula in Excel always begins with an equal sign (=) Excel interprets the characters that follow equal sign as a formula.

170. While entering data in a cell of an MS Excel worksheet, which of the following keys can be pressed once to cancel the entire contents of the cell?

- (a) Backspace
- (b) Tab
- (c) Delete
- (d) Esc

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (d) : While entering data in a cell of an MS Excel worksheet, Escape (Esc) key can be pressed once to cancel the entire contents of the cell.

171. What is the address of the cell in an MS - Excel worksheet which is located at the intersection of the second row and third column?

- (a) C2
- (b) 2C
- (c) B3
- (d) 3B

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (a) : The address of the cell in an MS - Excel worksheet which is located at the intersection of the second row and third column is C2.

172. Which of the following operations can be performed on the worksheet tab in MS Excel 2016?

- (i) Delete (ii) Rename
(iii) Hide
(a) Only (i) and (iii) (b) (i), (ii) and (iii)
(c) Only (ii) and (iii) (d) Only (i) and (ii)

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (b) : The following operations can be performed on the worksheet tab in MS Excel 2016-

- (i) Insert
(ii) Delete
(iii) Rename
(iv) Protect Sheet
(v) Tab color
(vi) Move or copy
(vii) Hide, unhide
(viii) Select all sheet

173. Which of the following is correct to replace specific character in a cell in MS Excel 365?

- (a) Selecting specific characters and then typing new characters
(b) Clicking in a cell and then pressing backspace
(c) Clicking in a cell and then typing new characters
(d) Clicking in the cell and then pressing delete

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (a) : To replace specific characters in a cell in MS Excel 365, first select the specific characters and then type the new characters.

174. What will be the value in cell B2 for the Excel formula' = ROUND (C2,2)', if values in cell C2 is 7.66666666666667?

- (a) 7.7 (b) 7.68
(c) 7.67 (d) 2.00

UPPCL TG-2, 09.11.2023, Shift-I

Ans. (c) : Round function in Excel is categorized for Math and Trigonometry functions that round a number (here 7.66666666666667) to a specified number of digits (7.67), whereas the Round function, unlike the Up and Down functions, can round up or down.

175. What will be the output of the following MS - Excel functions?

= ROUNDUP(213.456, 0)

- (a) 214 (b) 213.546
(c) 220 (d) 210

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (a) : ROUNDUP function round a number up away from 0 (zero).

Syntax

ROUNDUP (number, num_digits)

Number : Any real number that rounded up.

Num_digits : The number of digits to which round number.

(i) = ROUNDUP (213.456,0)

Rounds 213.456 up to zero decimal places

Result 214.

(ii) = ROUNDUP (3.14159,3)

= 3.142

176. The feature that fills up forms etc automatically with pre-set values is called:-

- (a) AutoFill (b) Instant Fill
(c) Filler (d) FillUp

UPPCL Asst. Accountant Exam-09.02.2018

Ans. (a) : MS Excel has a feature that helps you automatically enter data. It is called auto fill.

177. In MS Excel 365, when you click on sort option under data tab, which of the following is not one of the fields under sort on?

- (a) Cell Width (b) Cell Color
(c) Font Color (d) Cell Values

UPPCL Executive Assistant 29.11.2022, Shift-II

Ans. (a) : On clicking sort option under data tab in MS Excel 365, sort on contains cell color, cell icon, font, color and cell value, whereas not cell width.

178. In MS-Excel 365, to enable overtyping mode, so that existing characters are replaced with new characters as you type, you must press the _____ key.

- (a) Insert (b) Backspace
(c) Enter (d) Shift

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (a) : To enable overtyping mode in MS Excel 365, the Insert key is used to replace existing characters with new characters while you are typing. The keyboard key used to switch between Insert and Overtyping modes or to insert an object at the current cursor position.

179. Which of the following is the scale of the row-height and the column-width in 'Normal' view of the MS Excel 2007?

- (a) Milimetre (mm) (b) Points (pt)
(c) Centimetre (cm) (d) Inches (in)

UPPCL Technician Electrical 30.11.2023, Shift-II

Ans. (b) : The scale of the row-height and the column-width in 'Normal' view of the MS excel 2007 is in Points (pt) which can be increased or decreased based on their scale. By default, the height of a row is 15 points and the width of a column is 8.43 points. The maximum column size in excel is 255 points.

180. Which of the following statement is true in MS-Excel 2007?

- (a) Maximum column size is 255
(b) Default row size is 8.43
(c) Default column size is 15
(d) Maximum row size is 255

UPPCL Technician Electrical 30.11.2023, Shift-II

Ans. (a) : See the above question explanation

181. Which of the following can be used to edit the content of a cell in MS-Excel 2016 worksheet?

(i) F2,

(ii) Double click

- (a) Both (i) and (ii) (b) Only (i)
(c) Only (ii) (d) Neither (i) nor (ii)

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (a) : To edit the contents of a cell in MS Excel 2016 worksheet, Press the F2 key or double - click in that cell.

182. In MS Excel (Microsoft 365 version), the Household expense data given in the table below has to be summarized visually as show in the figures below. which tool would use?

- (a) Table of Chart Conveter
(b) Pivot Table
(c) PivotChart
(d) Chart

UPPCL TG-2, 17.11.2023, Shift-I

Ans. (c) : A pivot chart is a graphical representation of data from a pivot table in a spread sheet program like excel.

It allows you to visualize and analyze data in various formats, such as bar charts, line graphs, pie chart etc. based on the summarised data in the pivot table.

183. The following image is from screenshot of MS Excel spreadsheet. The cursor is at Row 4, you right click the mouse, and then choose the option "Insert". Now what would be the cell address of the cell containing the number 46?

C4	D4	E4	F4	G4	H4
2					
3		51	52	53	54
4	45	46	47	48	49
5	34	35	36	37	38

- (a) E4 (b) E3
(c) D4 (d) E5

ARO Alld. HC, 16.12.2021, Shift-II

Ans. (d) : According to the question, in the screenshot of Excel, the number 46 is recorded in Cell E4, by right clicking on row 4 and clicking on Insert option, a row will be inserted in the sheet due to which the address of the value given in E4 will be changed, whose new address will be E5.

184. In MS-Excel 2010, the _____ feature helps us to combine the contents of a cluster of adjacent cells.

- (a) Pivot Table (b) AutoFill
(c) Charts (d) AutoSum

UPPCL Executive Assistant 24.11.2022, Shift-I
ARO Alld. HC, 18.12.2021, Shift-I

Ans. (d) : In MS-Excel 2010, the autosum feature helps us to combine the contents of a cluster of adjacent cells.

Pivot Table : Pivot table is a powerful tool to calculate, summarize and analyze data that helps you to see comparisons, patterns and trends in your data.

Autofill : Autofill, also known as AutoText in MS Word, has a feature that helps users to type faster by automatically completing words.

Charts : Charts are used to display a series of numerical data in a graphical format to make it easier to understand large amounts of data and the relationship between different series of data.

185. What will be the output of the following MS - Excel?

= CEILING (5*9, 12)

- (a) 50 (b) 48
(c) 46 (d) 45

UPPCL Executive Assistant 30.11.2022, Shift-I

Ans. (b) : The CEILING function in Excel is used to round a number up to the nearest specified multiple or significance.

Given function = CEILING (5*9, 12)

= CEILING (45, 12);

which would result in 48.

186. Which of the following sequence of steps is used to change the chart type of an existing chart in MS-Excel 365?

- (a) Page Layout -> Change Chart Type
(b) Chart Design tab -> Change Chart Type
(c) Draw -> Change Chart Type
(d) Format tab -> Change Chart Type

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (b) : To change the chart type of a chart in MS Excel 365, click on the Chart Design Tab and then select in the change chart type list.

187. What will be the output of the following formula of MS-Excel 365?

=20/10*7+4-1

- (a) 20 (b) 17
(c) 27 (d) 30

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (b) : In MS- Excel 365, the output of

= 20/10 × 7 + 4 – 1

= 2 × 7 + 4 – 1

= 14 + 4 – 1

= 18 – 1

= 17

188. In MS-Excel 365, cells on other worksheets, in the same workbook, can be referred to by prepending a _____ symbol after the name of the worksheet to begin the cell reference.

- (a) Exclamation point (!)
(b) Colon (:)

- (c) Percentage (%)
(d) Asterisk (*)

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (a) : In MS Excel 365, the exclamation point (!) symbol is used after the name of the worksheet to introduce cell references to cells on other worksheets in the same workbook.

189. In MS-Excel 365, to enter the same data in multiple cells at the same time, cells must be selected in which you want to enter the data (cells need not be contiguous). In the active cell, the data should be typed and then press _____.

- (a) Shift + Enter (b) Ctrl + Enter
(c) Tab + Enter (d) Alt + Enter

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (b) : In MS-Excel 365, to enter the same data in multiple cells at the same time, cells must be selected in which you want to enter the data (cells need not be contiguous). In the active cell, the data should be typed and then press shortcut keys 'Ctrl + Enter'.

190. Based on a point scale, what is the maximum size of a row height in MS-Excel 365?

- (a) 255 (b) 15
(c) 409 (d) 43

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (c) : The maximum line height in MS Excel 365 is 409 points, with 1 point being approximately 1/72 of an inch or 0.035 cm.

191. Which of the following function is used to return the number of days between two dates in MS-Excel 365?

- (a) DAY (b) FIND
(c) DAYS (d) DATE

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (c) : MS Excel 365 DAYS function is a formula that calculates the number of days between two dates. Syntax- = DAYS (end_date, start_date).

192. Which of the following functions in MS-Excel 365 is used search for an item in a range of cells, and then return the relative position of that item in the range?

- (a) MATCH (b) Lookup
(c) VLOOKUP (d) CHOOSE

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (a) : The MATCH function searches for a specified item in a range of cells and then returns the relative position of that item in the range. For example, if the range A1 : A3 contains the values 5, 25 and 38 then the formula.

= MATCH (25, A1 : A3, 0) returns the number 2, because 25 is the second item in the range.

193. Which of the following cell references is used for the cell in column Z and row 20 in MS-Excel 365?

- (a) Z:Z (b) 20:20
(c) 20Z (d) Z20

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (d) : Z20 cell reference is used for cells in column Z and row 20 in MS Excel 365 because cell is intersection of row and column, column is denoted to alphabet and row is denoted to numbers.

194. The Wrap Text option is available in which group of the Home tab in MS- Excel 365?

- (a) Font (b) Cells
(c) Alignment (d) Styles

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (c) : Wrap Text is available in the alignment group of the Home tab in MS Excel 365.

195. Which of the following options of the Home tab is used to set a column to a specific width in MS-Excel 365?

- (a) Format as Table (b) Cell Alignment
(c) Format (d) Cell Styles

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (c) : The format option of the Home tab in MS Excel 365 is used to set a column to a specific width.

196. In one or several formulas of an MS-Excel 365 worksheet, you cannot use a cell reference to refer_____.

- (a) data on table of other word document
(b) data on other worksheets in the same workbook
(c) data from one or more contiguous cells on the worksheet
(d) data contained in different areas of a worksheet

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (a) : In one or several formulas of an MS - Excel 365 worksheet, you cannot use a cell reference to refer data on table of other word document.

197. Which of the following keyboard shortcuts is used to create a chart immediately after selecting the data in MS-Excel 365?

- (a) Alt + F1 (b) Alt + F2
(c) Alt + F4 (d) Alt + F3

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (a) : Once you have selected data, you can create a chart by pressing the shortcut key F11. This will create a default chart in a new worksheet. If you want to create a chart on the same worksheet as your data, select the cells you want to use and press Alt + F1.

198. When MS-Excel 365 is in Edit mode, the word 'Edit' appears in the _____ corner of the Excel program window.

- (a) lower-left (b) lower-right
(c) top-left (d) top-right

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (a) : When MS - Excel 365 in Edit mode the word 'Edit' appears in the lower-left corner of the excel program window.

199. What will be the output of the following MS-Excel 365 formula?

=50 + 20/5 - 3

- (a) 51 (b) 60
(c) 11 (d) 61

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (a) : = 50 + 20/5 - 3

= 50 + 4 - 3

= 54 - 3

= 51

200. Identify whether the given statements are true or false with reference to MS Excel 365.

I. A workbook can't contain less than three worksheets.

II. The name of the first worksheet of an MS - Excel workbook can't be changed.

- (a) I - False, II - True (b) I - True, II - False
(c) I - False, II - False (d) I - True, II - True

UPPCL Executive Assistant 25.11.2022, Shift-I

Ans. (c) : In the context of MS Excel 365, a workbook, must have at least one visible worksheet and the first worksheet of the MS Excel workbook must be named by the user can be changed as per requirement. Hence, in this question, both statements (I) and (II) are false.

201. Which of the following feature of MS Excel 365 scans cell the entries in the column in which matching data is entered and selects the entry with the unique match present in the column ends?

- (a) AutoComplete (b) AutoFormat
(c) AutoCorrect (d) AutoFill

UPPCL Executive Assistant 25.11.2022, Shift-I

Ans. (a) : Using the AutoComplete feature in MS Excel 365 allows you to enter matching data end the entry with unique data.

202. Which of the following statements is false regarding charts in MS Excel 365?

- (a) Data arranged in columns or rows on a worksheet can be plotted in a column chart
(b) Pie charts show the size of items with multiple data series
(c) Line charts can show continuous data over time
(d) Bar charts show comparisons between different items

UPPCL TG-2, 07.11.2023, Shift-II

UPPCL Executive Assistant 25.11.2022, Shift-I

Ans. (b) : Microsoft Excel 365 offers a variety of chart types that you can use to visualize your data.

⇒ Column Chart - Displays data in vertical bars, suitable for comparing values in different categories.

⇒ Pie Chart - Represents data as a circle divided into segments, useful for showing proportions or percentages.

⇒ Line Chart - Shows data points connected by lines, ideal for displaying trends over time.

⇒ Bar Chart - Similar to a column chart but with horizontal bars, useful for comparing values across categories.

Therefore, statement of option (b) is false.

203. In MS - Excel 365, which function key is used to instantly change a cell reference in a formula to absolute?

- (a) F4 (b) F12
(c) F2 (d) F10

UPPCL Executive Assistant 25.11.2022, Shift-I

Ans. (a) : In MS - Excel 365, the F4 function key is used to quickly change a cell reference in a formula to absolute. Absolute cell references are used in formulas to lock a specific cell or range so that when you copy the formula to another cell, the referenced cell or range remains constant, instead of adjusting relative to the new cell.

204. In MS - Excel 365, which of the following options of the Alignment group is used to move the cell content away from the left border of the cell?

- (a) Orientation (b) Increase Indent
(c) Text Control (d) Decrease Indent

UPPCL Executive Assistant 25.11.2022, Shift-I

Ans. (b) : In MS Excel 365, the 'Increase Indent' function is a formatting option that allows you to adjust the alignment and positioning of text within a cell. This can be used to move the cell content away from the left border of the cell.

205. If cells A1 to A6 in MS - Excel 365 worksheet are filled with 'A, 12, B, 20, C, 15' then what will be the output of '=MAX (A1 : A6)'?

- (a) A (b) !ERROR
(c) 20 (d) #NUMBER

UPPCL Executive Assistant 25.11.2022, Shift-I

Ans. (c) : In MS - Excel 365, the =MAX () function is used to find the maximum value in a range of cells. It takes one or more arguments, which can be numbers or cell references and returns the largest value among them.

Given range of numbers in cell A1 to A6 are filled with 'A, 12, B, 20, C, 15' then output of =MAX (A1 : A6) is 20.

206. Which of the following operators in MS- Excel 365 formula operator raises a number to a power?

- (a) % (percent sign) (b) ^ (caret)
(c) / (Forward slash) (d) * (asterisk)

UPPCL Executive Assistant 25.11.2022, Shift-I

Ans. (b) : In MS - Excel 365, the caret (^) operator is used to represent exponentiation or raising a number to a power. For example, if you want to calculate 2 raised to the power of 3 you can enter the formula " $=2^3$ " in a cell.

207. In MS - Excel 365, what is the cell reference 'C4' known as?

- (a) Absolute column and relative row
- (b) Relative column and row
- (c) Absolute column and row
- (d) Relative column and absolute row

UPPCL Executive Assistant 25.11.2022, Shift-I

Ans. (a) : In MS - Excel 365, the cell reference 'C4' is known as an 'absolute column and relative row'. The dollar sign (\$) before the column letter 'C' indicates that the column reference is absolute. However, the row reference '4' is relative, so it will adjust when you copy the formula vertically to other cells.

208. In MS - Excel worksheet, cells A1 to A20 store the names of 20 persons, which of the following MS - Excel formula counts the number of persons whose names start with the letter "A" and end with "f"?

- (a) $=\text{COUNTIF}(A1:A20, "A*f")$
- (b) $=\text{COUNTIF}(A1:A20, "Af*")$
- (c) $=\text{COUNTIF}(A1:A20, "A*f")$
- (d) $=\text{COUNTIF}(A1:A20, "A?f")$

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (c) : The COUNTIF formula in MS Excel is used to count the number of cells within a range that meet a specified condition or criteria.

Syntax -

$=\text{COUNTIF}(\text{range}, \text{criteria})$.

For example, a list of name in cells A1 to A20 and counts the number of persons whose names start with the letter "A" and end with "f". You can use the COUNTIF formula like this -

$=\text{COUNTIF}(A1 : A20, "A*f")$

209. Which of the following options of the 'Format Cells → Alignment' menu is used to show content of a cell from the lower-left to upper-right direction in MS-Excel 2007?

- (a) Horizontal Direction (b) Orientation
- (c) Vertical Direction (d) Direction

UPPCL Technician Electrical 30.11.2023, Shift-II

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (b) : In MS - Excel 2007, Home → Orientation → Format Cell → Alignment menu is used to show content of a cell from the lower-left to upper - right direction. Under Orientation on the right side, in the degrees box, use the up or down arrow to set the exact number of degrees that you want to rotate the selected cell text.

210. Which of the following MS-Excel functions returns the binary number equivalent to a decimal number?

- (a) DEC2BIN()
- (b) TOBIN()
- (c) DECTOBIN()
- (d) DECIML2BINARY()

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (a) : In MS - Excel, the DEC2BIN() function is used to convert a decimal (base 10) number into its binary (base2) representation. You can use this function to perform binary conversions easily.

Syntax - $=\text{DEC2BIN}()$.

211. Which of the following is an example of absolute cell reference in MS-Excel 2007?

- (a) A\$5 (b) \$A5
- (c) \$A\$5 (d) A5

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (c) : In MS Excel an absolute cell reference is a way to lock specific cell or range of cells in a formula so that they do not change when you copy the formula to other cells. It is denoted by adding a "\$" symbol before both the column letter and row number in the cell reference. For example, if you have formula " $=A5$ ", you can use absolute cell references like this " $=\$A\5 ".

212. Cell B1 has the formula " $=\text{IF}(A1 >= 80, "AB", \text{IF}(A1 <= 60, "BC", \text{IF}(A1 >= 70, "CD", "DE")))$ " where in cell A1 stores 55. Which of the following should be the output in cell B1?

- (a) CD (b) DE
- (c) BC (d) AB

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (c) : Given formula in cell B1 -

$=\text{IF}(A1 >= 80, "AB", \text{IF}(A1 <= 60, "BC", \text{IF}(A1 >= 70, "CD", "DE")))$.

IF cell A1 stores 55, then output of cell B1

$=\text{IF}(55 >= 80, "AB", \text{IF}(55 <= 60, "BC", \text{IF}(55 >= 70, "CD", "DE")))$

$=\text{IF}(\text{FALSE}, "AB", \text{IF}(\text{TRUE}, "BC", \text{IF}(\text{FALSE}, "CD", "DE")))$.

= BC

213. Which of the following should be the address of the range of the first five cells of the first column in MS - Excel 2007?

- (a) 1A : 5A
- (b) A1 : E1
- (c) A1 : A5
- (d) A1 : 5

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (c) : In MS- Excel, a cell range refers to a group or selection of adjacent cells within a spreadsheet. It's identified by specifying the first cell in the range, followed by a colon and then the last cell in the range. For example, "A1 : A5" represents a cell range that includes the first five cells of the first column.

214. A _____ is a computer program that can capture, display and manipulate data arranged in rows and columns.

- (a) textbook (b) workbook
(c) numbers (d) spreadsheet

UPPCL TG-2 03.11.2023, Shift-I
ARO Alld. HC, 20.12.2022, Shift-I

Ans. (d) : A spreadsheet is a computer program that can capture, display and manipulate data arranged in rows and columns. It is used for data entry calculations and analysis, which is in tabular form.

215. Which of the following statements is correct about printing in MS-Excel 2007?

- (a) The ranges of cells for printing cannot be selected manually.
(b) It is not possible to print non-contiguous ranges of cells.
(c) By default, Excel prints all data of the all worksheets of the current workbook.
(d) By default, Excel prints all data of the current worksheet.

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (d) : Printing in MS - Excel allows you to create physical copies of your spreadsheets. By default, Excel prints all data of the current worksheet. To print in Excel, follow these general steps -

1. Open your Excel workbook.
2. Go to the "File" tab or the office button
3. Select "Print" or "Print Preview".

216. A1 cell stores the date "21-09-2022" which is Wednesday. Which of the following formulas in cell B1 display "21-Sep-2022"?

- (a) =TEXT(A1, "dd-mmm-yyyy")
(b) =TEXT(A1, "ddd-mmm-yyyy")
(c) =TEXT(A1, "dd"- "mmm"- "yyyy")
(d) =TEXT(A1, "dd-mmmm-yyyy")

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (a) : The formula = TEXT (A1, "dd - mmm-yyyy") in MS - Excel is used to convert a date in cell A1 in to a text string with specific date format. Cell A1 contains a date like "21-09-2022", using = TEXT (A1, "dd - mmm - yyyy") Formula will display it as "21 - Sept-2022" in the cell B1.

217. Two non-contiguous range of cells in a worksheet. How to select these two non-contiguous ranges of cells to print?

- (a) Select the first range of cells→ Press shift → Select the second range of cells.
(b) Select the first range of cells→ Press ctrl → Select another range of cells
(c) Select the first range of cells→ Press Alt → Select the second range of cells
(d) Select first range of cells→ Press Ctrl + Alt → Select second range of cells

UPPCL Executive Assistant 28.11.2022, Shift-I

Ans. (b) : To print two non - contiguous range of cells in a worksheet, first click on the cells→ Select the first range of cells, press Ctrl then select the second range of cells.

218. Which of the following values are in cell A1 of an Excel worksheet, if it contains the formula "=DEC2HEX(180)"?

- (a) B4 (b) 180
(c) 114 (d) 4B

UPPCL Executive Assistant 28.11.2022, Shift-I

Ans. (a) : In MS Excel worksheet, the formula "=DEC2HEX (180)" in cell A1 will result in the value of B4. Conversion decimal to Hexadecimal $(180)_{10} = (?)_{16}$

$$\begin{array}{r|l} 16 & 180 \\ \hline & 11 \end{array} \begin{array}{l} 4 \text{ remainder} \\ \uparrow \end{array}$$

In Hexadecimal 11 → B

Output $(B4)_{16}$

219. Which of the following is the value in cell B1 of an Excel worksheet, If it has the formula = DEC2HEX (63)?

- (a) 36 (b) B3
(c) F3 (d) 3F

UPPCL Technician Electrical 30.11.2023, Shift-II

Ans. (d) : In MS Excel worksheet, the formula "=DEC2HEX (63)" in cell B1 will result by converting Decimal to Hexadecimal $(63)_{10} = (?)_{16}$

$$\begin{array}{r|l} 16 & 63 \\ \hline & 3 \end{array} \begin{array}{l} 15 \text{ remainder} \\ \uparrow \end{array}$$

In Hexadecimal 15 → F

Output $(3F)_{16}$

220. Which of the following values is in cell B1 of an Excel worksheet, if it contains the formula "=IF(A1>= 80, A1 + 10, IF (A1 <= 60, A1- 5, IF (A1 >= 70, A1*2, A1/2)))" and of cell A1 the value is 50?

- (a) 100 (b) 25
(c) 60 (d) 45

UPPCL Executive Assistant 28.11.2022, Shift-I

Ans. (d) : In cell B1 of the Excel worksheet by applying the formula = IF (A1>=80, A1+10, IF (A1<=60, A1-5, IF (A1>= 70, A1*2, A1/2))) the value of cell A1 is given as 50 hence,

= IF (50>=80, 50+10, IF (50<= 60, 50-5, IF (50>=70, 50*2, 50/2)))

= IF (False, 60, IF (True, 45, IF (False, 100, 25)))

= IF (True, 45)

= 45.

221. To delete multiple slides in MS - PowerPoint 365, we should ____ hold down, select the slides we want to delete and then right click and select delete slide.

- (a) Tab (b) Alt
(c) Home (d) Ctrl

UPPCL Executive Assistant 29.11.2022, Shift-II

Ans. (d) : To delete multiple slides in MS - PowerPoint 365, we should hold Ctrl, Select the slides we want to delete and then right click and select delete slide.

222. Which of the following is a MS-PowerPoint 365 keyboard shortcut used for closing the presentation?

- (a) Ctrl + F4 (b) Ctrl + F2
(c) Ctrl + F3 (d) Ctrl + F1

UPPCL Technician Electrical 30.11.2023, Shift-II

Ans. (a) : Keyboard shortcuts for MS-PowerPoint 365 - Ctrl + F1 → Displays or hides the ribbon.

Ctrl + F2 → Displays the print preview area on the print tab in the backstage view.

Ctrl + F3 → Cuts the selected content to the spike.

Ctrl + F4 → Closes the current presentation.

223. Which file format can be added to a PowerPoint show?

- (a) .jpg (b) .gav
(c) .wav (d) All of these

ARO Alld. HC, 16.12.2021, Shift-II

Ans. (d) : .jpg, .gav and .wav file types are supported in MS PowerPoint. PowerPoint is a presentation program used to quickly create, edit, view, present or share presentations.

224. Which of the following is not a presentation software?

- (a) Microsoft Access
(b) Slide shark
(c) Microsoft PowerPoint
(d) Open office Impress

UPPCL TG-II 25-01-2019 (Morning)

Ans : (a) MS Access is a database software while the other are presentation software.

225. Which of the following effects is used to change the direction of clip word art image in MS PowerPoint 365 slide?

- (a) Corrections (b) Rotate
(c) Flip and Group (d) Group

UPPCL Executive Assistant 29.11.2022, Shift-I

Ans. (b) : In Microsoft PowerPoint, the "Rotate" function allows you to change the orientation or angle of selected objects within your presentation.

226. Which of the following is the correct option to save a file in MS - PowerPoint 365?

- (a) Design -> Save (b) File -> Save
(c) Draw -> Save (d) Insert -> Save

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (b) : To save a file in MS PowerPoint 365, choose File -> Save or click browse for a folder, type a name for your presentation in the file name box and click save.

227. Which of the following is the correct way to create a presentation using a template in MS - PowerPoint 365?

- (a) File-> Open-> Search for online templates and themes
(b) File-> Recent-> Search for online templates and themes
(c) File-> Home-> Search for online templates and themes
(d) File-> New-> Search for online templates and themes

UPPCL TG-2, 10.11.2023, Shift-I

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (d) : Use of the following procedure to create a present option using a template in MS PowerPoint 365 - File → New → Search for online templates.

228. Which of the following menus is used to insert clip art pictures into a presentation in MS - PowerPoint 365?

- (a) Insert (b) Transitions
(c) Animation (d) Design

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (a) : The insert tab is used to insert clip art into a presentation in MS PowerPoint 365.

229. Which of the following shortcut keys is used to change the font size of selected text in MS PowerPoint 365?

- (a) Alt + G, H (b) Alt+N, S, H
(c) Alt+H, F, S (d) Alt+W, Q

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (c) : Alt + H shortcut key opens the home tab and the shortcut 'key' is made in it. After this, on pressing F, FF (Font Face), FS (Font size)

230. To delete multiple slides in MS-PowerPoint 365, hold ____ and select the slides you want then right-click and select Delete Slide?

- (a) Alt (b) Tab
(c) Ctrl (d) Enter

UPPCL TG-2, 17.11.2023, Shift-II

Ans. (c) : To delete a slide in PowerPoint 365, hold down the Ctrl key and select the slides you want to delete, then right click and select Delete Slide.

231. Which of the following options is used to set the transition speed of a slide in MS PowerPoint 365?

- (a) Animations-> Duration
(b) Slide Show-> Duration
(c) Transition-> Duration
(d) Design-> Duration

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (c) : In MS Office 365, Select the slide has the transition that you want to change and follow the following procedure.

Transition → Duration

232. Which of the following formatting options Add and text to the top, middle or bottom of the bounding box in MS - PowerPoint 365?

- (a) Add or Remove Columns
- (b) Text Direction
- (c) Numbering or Bullets
- (d) Align Text

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (d) : Align text connects text to the top, middle or bottom of the bounding box in MS PowerPoint 365.

233. In Microsoft PowerPoint 2016, all the items like formatting, positioning place holder box is consisted and showing in ___ slide.

- (a) Outline View
- (b) Slide Format
- (c) Slide Layout
- (d) Slide Master

[UPSSSC Computer Operator 10/01/2020]

Ans. (d) : In MS PowerPoint 2016, in slide master all the items which shows on its such as formatting, positioning and placeholder box are consisted.

234. Which of the following layouts is NOT available in MS PowerPoint?

- (a) Picture only
- (b) Blank
- (c) Title only
- (d) Picture with Caption

UPPCL TG-2, 07.11.2023, Shift-I

Ans. (a) : There are different types of layouts in MS PowerPoint like blank, title only, picture with caption etc, whereas picture only layout is not available.

235. Which of the following views of MS - Power Point 365 presentation is used to edit the appearance of presentation handouts including layout, header, footer and background?

- (a) Slide Master
- (b) Notes Master
- (c) Slide Sorter
- (d) Handout Master

UPPCL TG-2, 07.11.2023, Shift-I

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (d) : Handout Master View Layout of MS - PowerPoint 365 presentation is used to edit the appearance of presentation handouts including header and footer and background.

Notes are used for editing in the master view layout presentation. Any change in the slide master changes all slides related to it.

Slide sorter view to view all slides on a single screen.

236. MS-PowerPoint 2000 has which of the following six views?

- (a) Normal views, slide sorter view, Online view, Slide view, Notes page view, Slide Show view

- (b) Normal view, Slide sorter view, Vertical view, Slide view, Notes page view, Slide show view

- (c) Normal view, Slide sorter view, Vertical view, Slide view, Notes page view, Slide Show view

- (d) Normal view, Slide sorter view, Outline view, Slide view, Notes page view, Slide Show view

Ans. (d) : There are six views of an MS PowerPoint 2000 presentation: 1. Normal view, 2. Slide sorter view, 3. Outline view, 4. Slide view, 5. Notes page view, 6. Slide Show view.

237. Which view is used to write and design a presentation in MS-PowerPoint 2010?

- (a) Notes
- (b) Slide Show
- (c) Slide Sorter
- (d) Normal

UPPCL Technician Electrical, 03.11.2023, Shift-II

Ans. (d) : In Normal View, the Slide Pane shows the current slide as it will look during your slide show. This view is also used to write and design a presentation. Slide Sorter View: View of all your slides in thumbnail size. When you have completed your presentation, the Slide Sorter View makes it easy for you to add, delete, or reorder your slides.

238. Which of the following options is used to prevent the footer from appearing on the title slide in MS PowerPoint 365?

- (a) Don't show on title slide
- (b) Show option
- (c) Don't show on first slide
- (d) Show slides

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (a) : The don't show on slide option is used to prevent the footer from appearing on the title slide in MS - PowerPoint 365.

(i) Insert → Header & Footer.

(ii) Slide → Don't show on title slide.

239. Which of the following slide Layout in MS PowerPoint 365 has the layout of "Title slide"

- (a) (ii)
- (b) (iv)
- (c) (iii)
- (d) (i)

UPPCL TG-2, 17.11.2023, Shift-I

Ans. (d) : In the given slide, the first slide is the title slide. Title slide is the first slide of presentation in which presentation's name, author's name and other important information are included. The main purpose of this slide is to introduce the audience to presentation subject and main signal.

240. In MS - PowerPoint 365 which of the following options of set up slide show is used to select the required slides for the presentation?

- (a) Show slides (b) Advance slides
(c) Show type (d) Show option

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (a) : To select required slides for presentation in MS PowerPoint 365, use show slides option of setup slides show, under this option.

- All
- From  to 
- Custom show

Slide play option.

241. Which of the following is not a PowerPoint shape?

- (a) Circle (b) Triangle
(c) Diamond (d) Oval

UPPSC APS-2023, 07.01.2024

Ans. (c) : Diamond is not a PowerPoint shape.

242. In MS PowerPoint you want to make sure that the logo symbol of your company is showed at the upper right corner in any given presentation. To do so, which among the following views would have to use?

- (a) Slide sorter (b) Slide master
(c) Notes Master (d) Outline view

UPPCL TG-2, 17.11.2023, Shift-II

[UPSSSC Computer Operator 10/01/2020]

Ans. (b) : Master slides control the look of your entire presentation including Colors, Fonts, Backgrounds, Effects and just about everything else you can insert a shape or a logo on a slide master. For example it will show up on all your slides automatically.

243. Which of the following options can be used from the print layout settings to print four slides in one page in MS PowerPoint 365?

- (a) Handouts (b) Notes Pages
(c) Outline (d) Full Page Slides

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (a) : To print four slides in one page in MS - PowerPoint 365 the handouts option from the print layout settings can be used. In the page setup group, you can specify the layout and number of slides to print on each page, change the orientation of Handouts and set the slide size.

244. Which of the following views allow consistent formatting of each slide, all in one place, with one simple step on MS PowerPoint?

- (a) Outline (b) Slide Sorter
(c) Notes Page (d) Slide Master

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (d) : The same font and image in all slides such as logo are applied to all slides when changes are made to the slide master. To open slide master view, on the view tab, select slide master.

245.are the visual effects which appear in PowerPoint when one slide moves to next.

- (a) Slide Effects (b) Slide Frames
(c) Slide Movements (d) Slide Transitions

EMRS JSA, 17.12.2023, Shift-II

Ans. (d) : A slide transition is the visual effect that occurs when you move from one slide to the next during a presentation. User can control the speed, add sound, and customize the look of transition effects.

246. Select the option that arranges the following steps in the correct sequence to add slide transitions to MS PowerPoint 365 presentations.

- (i) Select the slide you want to add transition to.
- (ii) Select the Transitions tab and choose a transition. Select a transition to see a preview.
- (iii) Select Preview to see what the transition looks like.
- (iv) Select Effect Options to choose the direction and nature of the transition.
- (v) Select Apply To All to add the transition to the entire presentation.

- (a) ii, i, iii, iv, v (b) i, iv, ii, iii, v
(c) i, ii, iv, iii, v (d) iii, ii, iv, i, v

UPPCL TG-2, 8.11.2023, Shift-II

Ans. (c) : The following steps have to be done to add slide transition in MS PowerPoint 365 presentation.

1. Select the slide you want to add a transition to.
2. Select the transitions tab and select a transition. Select a transition to see preview.
3. Select the effect option to choose the direction and nature of the transition.
4. Select the preview to see how the transition looks.
5. Select 'Apply to All' to add the transition to the entire presentation.

247. Which of the following options on the transitions tab is used to change how transition occur, for example, the direction in which the slide enters MS-PowerPoint 365?

- (a) Effect Options (b) Animation
(c) Duration (d) Advance Slide

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (a) : Effect options on the transitions tab is used to change how transitions occur.

A slide transition is the visual effect that occurs when you move from one slide to the next slide during a presentation.

Add slide transitions

- (i) Select the slide
- (ii) Select the transition tab and choose a transition

- (iii) Select effect options to choose the direction and nature of the transition.
 (iv) Select preview to see what the transition looks like.

248. Which keyboard shortcuts is used to open the font dialog box in MS PowerPoint 365?

- (a) Ctrl + F (b) Ctrl + N
 (c) Ctrl + T (d) Ctrl + M

UPPCL TG-2, 09.11.2023, Shift-I

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (c) : Ctrl + N → Create new presentation.

Ctrl + B → Apply bold formatting to the selected text.

Ctrl + T → Open the font dialog box.

F5 → Start the slide show.

Esc → End the slide show.

Ctrl + M → Insert new slide.

249. Which of the following software is used to create and design presentations?

- (a) MS-Access (b) MS-PowerPoint
 (c) MS-Word (d) MS-Excel

UPPCL Executive Assistant 22.11.2022, Shift-I

ARO Alld. HC, 14.12.2021, Shift-I

Ans. (b) : Microsoft PowerPoint is a presentation software designed to allow users to create slide - based presentations including video and images, as well as slide transitions and animations.

250. Which of the following is NOT a valid colour setting option File → Print in MS-PowerPoint 2010?

- (a) Pure black and white (b) Color
 (c) Grayscale (d) Multiplex color

UPPCL TG-2, 09.11.2023, Shift-II

Ans. (d) : In MS PowerPoint 2010, the valid color settings in the print command under the file menu are pure black and white, colour, grayscale, whose steps are follows.

File → Print → color/Grayscale

251. Which of the following keyboard shortcuts is used to start the first slide show in MS - PowerPoint 365?

- (a) F2 (b) F5
 (c) F4 (d) F9

UPPCL Technician Electrical 10.11.2023, Shift-II

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (b) : In Microsoft PowerPoint 365, F5 keyboard shortcut is used to start the slide show from the first slide and Shift + F5 is used to start the slide show from the current slide.

252. The 'Wipe' effect in MS-PowerPoint 2010 can be applied to a slide from the ____ tab.

- (a) Transitions (b) Design
 (c) Review (d) Animations

UPPCL TG-2, 09.11.2023, Shift-II

Ans. (d) : Wipe effect can be applied to a slide from the Animation tab in MS- PowerPoint 2010. For this-

1. Select the slide on which you want to apply the wipe effect.

2. Go to the Animation tab.

3. Select the 'Exit' animation option in the animation chart group and select 'Wipe' from there.

253. Which of the following options in MS PowerPoint 365 sets the transition timing by specifying how long a slide will remain in view before the transition to the next slide begins?

- (a) Advance Slide
 (b) Advanced Animation
 (c) Effect Options
 (d) Duration

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (a) : Advanced slide transition timing in MS PowerPoint 365 sets how long a slide will remain in view before the transition to the next slide begins. If no time is selected then, when you click the slide with the mouse, the slide advances. Select the slide for which you want to set the time.

254. In MS PowerPoint 365, the shortcut key for ending a slide show in Windows environment is?

- (a) Ctrl + E (b) Ctrl + T
 (c) Tab (d) Esc

UPPCL TG-2, 17.11.2023, Shift-I

Ans. (d) : In MS PowerPoint 365, the shortcut key for ending a slide show in Windows environment is "Esc".

255. Which of the following options of the insert tab of MS PowerPoint 365 is the 'equation' object?

- (a) Text (b) Illustrations
 (c) Add-ins (d) Symbols

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (d) : The symbols option of the insert tab of MS PowerPoint contains the 'equation' object.

256. Which of the following options can be used to insert MS-Excel worksheet into MS - PowerPoint 365?

- (a) Insert -> Forms (b) Insert -> Table
 (c) Insert -> Object (d) Insert -> Chart

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (c) : In PowerPoint on the Insert tab, click on tab object. In the insert object dialog box, select create from file click or tap browse and in the browse box, find the Excel workbook with the data you want to insert and link to before you close the Insert object box, select link and click ok.

257. Which of the following statements is/are true about viewing a presentation in MS-PowerPoint 2007?

- (i) By default, slides are opened in 'Normal' view.

(ii) The slide show command may be executed by pressing the 'F7' key.

- (a) Both (i) and (ii) (b) Neither (i) nor (ii)
(c) Only (ii) (d) Only (i)

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (d) : By default, slides open in normal view to view a presentation in MS PowerPoint 2007. MS PowerPoint 2007 is a presentation software program that allows you to create slides, handouts, notes, and outlines. It is widely used and is an effective tool.

258. Which of the following statements is/are true regarding Header and Footer in MS PowerPoint 2007?

- (i) By default, the slide number is displayed at the top right corner of the slide.
(ii) 'Date and Time' inserted using header and footer cannot be changed automatically.
(a) only (ii) (b) both (i) (ii)
(c) neither (i) nor (ii) (d) only (i)

UPPCL TG-2, 10.11.2023, Shift-I

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (c) : By default, the slide number in the header and footer in PowerPoint 2007, the date and time in the upper left corner of the slide, and the date and time in the Insert tab can be changed automatically.

259. Which of the following keyboard shortcuts is used to start a slide show from the current slide?

- (a) Ctrl + F5 (b) Shift + F5
(c) F5 (d) Alt + F5

UPPCL TG-2, 8.11.2023, Shift-I

UPPCL Executive Assistant 22.11.2022, Shift-II

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (b) : To start a slide show from the current slide in MS PowerPoint, the keyboard shortcut Shift + F5 is used.

Shortcut key -

F7 = To open the spell check.

F5 = To start slide show from the first slide.

Ctrl + F5 = To restore our presentation window size.

Alt+F5 = Single Display.

260. Which of the following keyboard shortcuts is used to create a blank presentation in MS-PowerPoint 2007?

- (a) Ctrl + M (b) Alt + M
(c) Ctrl + N (d) Ctrl + Alt + N

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (c) : The Ctrl+N shortcut key in Microsoft PowerPoint 2007 opens a new blank presentation in a new PowerPoint window.

261. Which of the following keyboard shortcuts is used to insert a blank slide in MS-PowerPoint 2007?

- (a) Alt + M (b) Ctrl + Alt + M
(c) Ctrl + N (d) Ctrl + M

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (d) : In Microsoft PowerPoint, the Ctrl + M shortcut key is used to insert a new blank slide. This blank slide layout contains no elements and can be designed as per user's requirement. Ctrl + N is used to create a new presentation.

262. Which of the following slide layouts in MS-PowerPoint 2010 contains no elements and can be designed as per your requirement?

- (a) Blank Slide
(b) Two Content Slide
(c) Title Only Slide
(d) Title and Content Slide

UPPCL TG-2, 17.11.2023, Shift-I

UPPCL Technician Electrical, 03.11.2023, Shift-II

Ans. (a) : See the above question explanation.

263. To open a PowerPoint presentation in MS-PowerPoint 2007, which of the following keyboard shortcuts is used to display 'Open Window'?

- (a) Ctrl + Alt + O (b) Ctrl + O
(c) Shift + O (d) Alt + O

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (b) : In MS PowerPoint 2007, the keyboard shortcut Ctrl + O is used to open a PowerPoint presentation.

Ctrl + N - Create a new presentation document.

Ctrl + Q - Save and close a presentation.

Ctrl + F2 - View print preview.

264. By default, which of the following commands is not present in the Quick Access Toolbar of MS PowerPoint 2007?

- (a) Redo (b) Copy Slide
(c) Save (d) Undo

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (b) : Quick Access Toolbar features are collection of shortcuts to options, commands or option groups. In which options like Redo, Save, Undo, Spelling, Quick Print, Open, New etc. are available.

265. Which of the following is NOT a component of an MS-PowerPoint 2010 window?

- (a) Title bar
(b) Quick Access toolbar
(c) Notes Pane
(d) Audio tab

UPPCL Technician Electrical, 03.11.2023, Shift-II

Ans. (d) : Title bar, Quick Access toolbar and Notes Pane are components of an MS-PowerPoint 2010 window whereas Tab audio is any sound that occurs from within your browser tab and plays on your computer's speakers.

266. By default, the _____ tab is selected when you open MS-PowerPoint 2010.

- (a) Insert (b) Design
(c) Animations (d) Home

UPPCL TG-2, 09.11.2023, Shift-II

Ans. (d) : On opening MS-PowerPoint 2010, the Home tab is selected by default.

267.The _____ in MS-PowerPoint 2010 is used to edit and design slides.

- (a) Notes Pane (b) Status bar
(c) Title bar (d) Slides Pane

UPPCL Technician Electrical, 03.11.2023, Shift-II

Ans. (d) : The Slide Pane is a feature found in presentation software, such as Microsoft PowerPoint or Google Slides, that displays the content of a slide in the editing view. In the Slide Pane, users can view and edit the content of the slide, including text, images, shapes, and other visual elements.

268. Which of the following main menus can be used to insert sound/movie into a slide in MS PowerPoint 2007?

- (a) Animation (b) Insert
(c) View (d) Design

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (b) : To insert sound/movie into a slide in MS PowerPoint 2007, sound and movie tool given in media clip group under Insert is used.

269. Identify whether the following claims are true or false.

Claim I: We can add different sound files to different slides in MS PowerPoint.

Claim II: We can create a video out of an MS PowerPoint presentation that includes recorded audio as well.

- (a) Claim I: True, Claim II: True
(b) Claim I: False, Claim II: False
(c) Claim I: True, Claim II: False
(d) Claim I: False, Claim II: True

UPPCL TG-2, 07.11.2023, Shift-II

Ans. (a): The given statements are true because - We can add different sound files to different slides and create videos from presentations including recorded audio.

270. Proofing content language selection adding comments and comparing presentations comes under which of the following menu in MS PowerPoint 2016?

- (a) Design (b) Home
(c) Review (d) View

UPPCL TG-2, 09.11.2023, Shift-I

UPPCL Executive Assistant 23.11.2022, Shift-I

Ans. (c) : Proofing content language selection adding comments and comparing presentations comes under review menu in MS PowerPoint 2016.

271. Which of the following is the correct way to change the slide layout of a new slide in an MS PowerPoint 2016 presentation?

- (a) Triple - click on the slide in the Navigation Pane
(b) Double - click the slide in the Navigation Pane

(c) Right - click on the newly inserted slide and select choose out option to choose from the existing layout style

(d) Right click on the newly inserted a slide and select new slide option

UPPCL Executive Assistant 23.11.2022, Shift-I

Ans. (c) : The correct way to change the slide layout of a new slide-

Right click on the newly inserted slide and select existing layout style to choose from select layout option.

272. Which of the following statements are true?

(i) MS - PowerPoint has many view options that change the way your presentation is displayed.

(ii) In MS - PowerPoint, the number next to the slider displays the current zoom percentage, also called the zoom level.

- (a) Only (i) (b) Only (ii)
(c) Neither (i) nor (ii) (d) (i) and (ii) Both

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (d) : Both the above statements are true in the context of MS Power Point.

273. Which software is more useful for presentation in a classroom ?

- (a) Microsoft Access
(b) Microsoft Excel
(c) Microsoft PowerPoint
(d) Microsoft Word

RRB NTPC 14.03.2021 (Shift-I) Stage Ist

Ans. (c) : MS PowerPoint is more useful software for presentation. With the help of PowerPoint presentation, we can create a slide show for represent important information.

274. If you press the ___ key in MS-PowerPoint 2016, then the presentation will appear in full-screen mode from the beginning.

- (a) Shift + F5 (b) F5
(c) F4 (d) F7

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (b) : To start the slide show from the beginning press the F5 key and to start the presentation from the current slide press Shift + F5.

275. In MS - PowerPoint 2016, the _____ group on the _____ menu contains commands for formatting the text in your document.

- (a) Home; Paragraph (b) Review; Paragraph
(c) View; Font (d) Home; Font

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (d) : In MS PowerPoint 2016, the font group on the Home menu contains commands for formatting the text in your document.

276.Paragraphs, drawing and editing related commands appear under the menu in MS-PowerPoint 2016.

- (a) View (b) Home
(c) Insert (d) Transitions

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (b) : Paragraphs, drawing and editing related commands appear under the Home menu in MS PowerPoint 2016.

277. What is the default file type (extension) for presentations created in MS PowerPoint 2007 or newer versions?

- (a) .pptx (b) .pptm
(c) .ppt (d) .xppt

EMRS JSA, 17.12.2023, Shift-II

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (a) : .pptx is the default file type (extension) for presentations created in MS PowerPoint 2007 or newer versions.

278.In MS PowerPoint 2016, the _____ is located just above the Ribbon and it gives you access to common commands no matter which tab/menu is selected.

- (a) Status bar
(b) Quick Access Toolbar
(c) Title bar
(d) Scroll bar

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (b) : The quick access toolbar in MS PowerPoint 2016 is located just above the ribbon and gives you access to common commands no matter which tab menu is selected.

279.MS PowerPoint 2016 includes several tools to help you manage and organize the content on your slides which of the following are such tools?

(i) Ruler

(ii) Gridlines

- (a) Both (i) and (ii) (b) Only (i)
(c) Only (ii) (d) Neither (i) nor (ii)

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (a) : MS PowerPoint 2016 includes several tools to help you manage and organize the content on your slides. You can align the slide content by using the rulers and gridlines on the view tab.

280.Which of the following keyboard shortcuts and its/their functions is/are correct in MS-PowerPoint 365?

(i) Ctrl + D - Duplicating an object.

(ii) Ctrl + X - Cut selected object or text

- (a) Both (i) and (ii) (b) Neither (i) nor (ii)
(c) Only (ii) (d) Only (i)

UPPCL TG-2, 17.11.2023, Shift-II

UPPCL TG-2, 07.11.2023, Shift-II

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (a) : In MS PowerPoint 365, following are the keyboard shortcut keys:

Ctrl + D – To duplicate an object/slide.
Ctrl + X – To cut selected object or text.
Ctrl + Q – Save and Close Presentation.
Ctrl + Z – To undo a task.

281.Which of the following tabs is used to change the line style in MS-PowerPoint 365 slide?

- (a) Design (b) Picture Format
(c) Draw (d) Shape Format

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (d) : To change the line style in MS PowerPoint 365 slides, the Shape Format option in the Illustrations group of the Insert tab is used.

282.Which of the following sequence of steps is used to manually set a picture object to a specific aspect ratio in MS-PowerPoint 365?

1. On the shortcut menu, clicking on Format Picture.
 2. Right-clicking on a picture
 3. Under the Scale, entering a percentage of the original height or width.
 4. In the dialog box, clicking on the Size tab
- (a) 4,3,2,1 (b) 2,1,4,3
(c) 1,2,3,4 (d) 2,4,3,1

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (b) : To set a Picture object manually, right-click on the picture and click on the Format Picture option and click on the Size tab in the dialog box to enter its original height or width in percentage.

283.Which of the following MS-PowerPoint 365 view is used to rearrange slides easily?

- (a) Handout Master (b) Slide Master
(c) Slide Sorter (d) Notes Page

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (c): Slide Shorter view is used in MS-PowerPoint 365 to easily rearrange slides when you create your presentation and also when you prepare your presentation to print. This view makes it easy for you to order and organize the sequence of your slides.

284.Which of the following keyboard shortcuts is used to open the zoom dialog box in MS-PowerPoint 365?

- (a) Alt+W,Q (b) Alt+H, F
(c) Ctrl+M (d) Ctrl+B

ARO Alld. HC, 16.12.2021, Shift-II

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (a) : In MS-PowerPoint 365, the shortcut key 'Alt + W' is used to open the zoom dialog box and by 'Alt + Q' you can set the zoom size in percentage. In this, you can zoom at least 10% and up to 400%.

285.Which option in Picture Format tab is used to improve the brightness, contrast or sharpness of a picture in MS-PowerPoint 365?

- (a) Artistic Effects (b) Corrections
(c) Transparency (d) Color

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (b) : In MS PowerPoint 365 the brightness, contrast or sharpness of a picture can be improved using the Adjust group or the Corrections option in the Picture Format tab by clicking on the icon.

286.The 'Presentation Views' group in MS-PowerPoint 365 is available in which of the following tabs?

- (a) View (b) Transition
(c) Review (d) Home

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (a) : Slide Sorter, Notes Page, Slide Show options are available in the Presentation View of View tab of MS PowerPoint 365.

287.Which tab has options like appear, fade, fly-in etc in MS-PowerPoint 365?

- (a) Slide Show (b) Animations
(c) Design (d) Transitions

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (b) : Appear, Fade, Fly in, Float in options are available in Animations tab of MS PowerPoint 365. Select the Animations tab and then select the Add Animation drop-down menu like Appear.

288.To indent the first line of a paragraph in MS-Word 365, place your cursor at the beginning of the paragraph and press the _____ key.

- (a) Shift (b) Tab
(c) Alt (d) Ctrl

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (b) : To indent the first line of a paragraph in MS Word 365, place your cursor at the beginning of the paragraph and use the Tab key and can indent using the space bar.

289.Which of the following options in the shape format tab is used to make a line dotted or dashed in MS - PowerPoint 365?

- (a) Shape Outline (b) Shape Options
(c) Shape Fill (d) Shape Effects

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (a) : On the format tab, click the arrow next to shape outline. If you don't see the format tab, make sure you've selected the line. Point to Dashes, and then click the style you want to create a custom style click more lines and then choose the options that you want.

290.Which of the following options is NOT available in Text Format options that appear when the cursor hovers over selected text in MS-Power Point 365?

- (a) Numbering of Bullets (b) Font Color
(c) Align Text (d) Insert Picture

UPPCL TG-2, 10.11.2023, Shift-I

UPPCL TG-2, 07.11.2023, Shift-I

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (d) : On selected text in MS - PowerPoint 365 numbering or bullets for color and align text options are available in the text format that appears when the cursor is hovered over whereas insert picture options are not available.

291.Push, Fade, Wipe, etc. are options of which tab in MS-PowerPoint 365?

- (a) Design (b) Slide Show
(c) Transitions (d) Animations

UPPSC APS-2023, 07.01.2024

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (c) : In MS - PowerPoint 365, there are options are in transition tab like Push, Fade, Wipe etc. Under the design tab, commands like page setup, themes and background are included.

292.To delete multiple slides which are not in sequence in MS-PowerPoint 365, you must hold _____ and select the slides you want and then right-click and select Delete slide.

- (a) Tab (b) Ctrl
(c) Alt (d) Shift

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (b) : To delete multiple slides which are not in sequence in MS - PowerPoint 365, you must hold Ctrl and select the slides you want and then right click and select delete slide.

293.Shapes like circles, squares and arrows are available in which group of the Insert tab in MS-PowerPoint 365?

- (a) Images (b) Tables
(c) Slides (d) Illustrations

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (d) : Shapes like circle, square, arrow, picture, clip art, chart etc. are available in the Illustrations of the Insert tab in MS PowerPoint 365.

294.In MS-PowerPoint, Normal view displays slide thumbnails on the _____ side of the screen.

- (a) left (b) bottom
(c) top (d) right

UPPCL TG-2, 17.11.2023, Shift-II

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (a) : In MS - PowerPoint, normal view displays slide thumbnails on the left side of the screen.

295.Which option of format <object type> in the shortcut menu is used to manually set the object to a specific proportion in MS-Power Point 365?

- (a) Effects (b) Line
(c) Fill (d) Scale

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (d) : The format object type scale in the shortcut menu in MS - PowerPoint 365 is used to manually set the object to a specific ratio.

296. You have selected a picture in a slide of MS-PowerPoint 365. Which of the following options is not available in the Format Picture shortcut menu?

- (a) Layout (b) Size & Properties
(c) Fill & Line (d) Effects

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (a) : After selecting a picture in a slide of MS PowerPoint 365, options like size and properties, fill and line, effects etc. are available in the format picture shortcut menu while layout is not.

297. Which of the following MS PowerPoint views shows the thumbnail form of a slide?

- (a) Outline view (b) Master view
(c) Notes page view (d) Slide sorter view

25.11.2022, Shift-I

Ans. (d) : Slide shorter view in MS PowerPoint indexes all the slides of your presentations horizontally sequenced displays as thumbnails.

Various types of views appear in the presentation views group of the view tab of MS PowerPoint. You can find different types of views at the bottom right of the slide window are visible which can be used easily.

298. Which of the following statements is false with reference to MS PowerPoint 365.

- (a) We cannot assign slide timing manually
(b) After creating a slide, we can easily modify its layout
(c) To end an MS - PowerPoint presentation we should use the 'Esc' key
(d) A custom slide show can be created using a subset of slides

25.11.2022, Shift-I

Ans. (a) : All statements except statement (a) are true regarding MS PowerPoint 365. In MS PowerPoint users can align slide typing as per their requirement.

299. Which of the following option is used to record the time of presentation in MS - PowerPoint 365 and which helps in checking whether the presentation fits within a certain time frame or not?

- (a) Rehearsal (b) Custom animation
(c) Slide transition (d) Slide orientation

UPPSC APS-2023, 07.01.2024

25.11.2022, Shift-I

Ans. (a) : The Rehearsal feature in MS PowerPoint 365 is used to record the presentation time and it helps to check whether the presentation fits within a given time frame or not. The Rehearsal option is present in the setup group of the slide show tab in MS Power Point.

300. Which of the following options is not a view of MS- PowerPoint 365?

- (a) Slide Show (b) Outline
(c) Slide (d) Inline

25.11.2022, Shift-I

Ans. (d) : In MS - PowerPoint 365 a 'view' refers to the different ways you can look at and work on your presentation. There are several view options available, including -

- Normal view
→ Slide sorter view
→ Outline view
→ Reading view
→ Slide show view
→ Presenter view.

301. In MS PowerPoint 365, pressing the 'Home' Key during a slide show will take you to the _____ slide of the presentation.

- (a) Middle (b) Last
(c) Second (d) First

25.11.2022, Shift-I

Ans. (d) : In MS PowerPoint 365, pressing the 'Home' key during a slide show will take you to the first slide of the presentation.

302. Which of the following actions will cause a shortcut menu to appear during a slide show in MS PowerPoint 365?

- (a) Right clicking on the current slide
(b) Clicking the shortcut button in the formatting toolbar
(c) Clicking an icon on the current slide
(d) Press the shortcut key 'Shift + Enter'

25.11.2022, Shift-I

Ans. (a) : Right clicking on the current slide during a slide show in MS PowerPoint 365 will show a shortcut menu.

303. Which of the following options in MS-PowerPoint 2019 is used to minimize ribbon so that only the tab names are shown?

- (a) Quick Access toolbar (b) Collapse
(c) Work Area (d) Thumbnail

UPPCL TG-2, 09.11.2023, Shift-I

Ans. (b) : In MS- PowerPoint, collapse is used to minimize the ribbon by which double click can be done only on tab and if document is to be collapsed (short), Ctrl +F1 shortcut can be used.

304. In MS - PowerPoint 2019, which of the following is used to display a group of related commands within a tab?

- (a) Collapse (b) View Options
(c) Work Area (d) Ribbon

25.11.2022, Shift-I

Ans. (d) : In MS - PowerPoint 2019, the Ribbon tab has its own specific groups of related commands. These groups have several additional commands that can be viewed by clicking the arrow at the right bottom corner of any group. Ribbon is on the top of worksheet, below the title bar. It contains eight tabs: Home, Insert, Design, Transition, Animation, Slide show, Review and View.

305. Which of the following is the visual effect given when slides start and stop on the screen during slide show in MS - PowerPoint 365 Presentation?

- (a) Slide Transition
- (b) Slide Layout
- (c) ClipArt
- (d) Slide Sorting

25.11.2022, Shift-I

Ans. (a) : In MS- PowerPoint 365, a slide transition is a visual effect that occurs when you move from one slide to another during a presentation. It adds a dynamic element to your slide shows. The slide transition feature allows you to specify how one slide transitions to the next, such as sliding in from the slide, fading in or out, or other animation effects.

306. Which of the following statements is correct about the Quick Access Toolbar of MS - PowerPoint 2007?

- (a) By default it is located in the lower left corner of the window
- (b) The number of commands is fixed and it cannot be changed
- (c) By default, it contains open, save, New and slide - show commands
- (d) By default it contains only 3 commands

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (d) : The Quick Access Toolbar in MS PowerPoint is a customizable toolbar located above the Ribbon. By default it contains only 3 commands (Save, Undo, Redo) and you want to choose 'more commands' customize further.

307. Which of the following main menus to insert a picture (image) in a slide in MS-PowerPoint 2007?

- (a) Animation
- (b) Design
- (c) View
- (d) Insert

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (d) : The Insert tab in PowerPoint is used to insert objects and elements on the slide in presentation. Under the insert menu you can add text, pictures, shapes, video etc.

308. Which of the following statements is/are correct about Headers and Footers in MS PowerPoint 2007?

- (i) By default, the slide number is displayed at the bottom right
- (ii) 'Date and time' cannot be inserted using headers and footers.
- (a) Only (i)
- (b) Both (i) and (ii)
- (c) Only (ii)
- (d) Neither (i) nor (ii)

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (c) : In MS PowerPoint 2007, Headers and Footers are elements that can be added to slides to display consistent information such as slide numbers, date, time and other details. So, statement (i) is correct and statement (ii) is incorrect.

309. Which of the following methods is used to create a presentation using templates in MS PowerPoint 2007?

- (a) Office Button → New → Create Button
- (b) Office Button → New → Installed Templates → Select a Template → Create Button
- (c) Office Button → Installed Templates → Select a Template → Create Button
- (d) Office Button → New → Blank → Select a Template → Create Button

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (b) : In MS PowerPoint 2007, you can create a presentation using templates the following steps - Office Button → New → Installed Templates → Select a Template → Create Button

310. Which of the following keyboard shortcuts is used to insert a duplicate slide of the selected slide in MS PowerPoint 2007?

- (a) Alt + D
- (b) Ctrl + Alt + M
- (c) Ctrl + D
- (d) Ctrl + M

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (c) : In MS PowerPoint, Ctrl + D inserts a duplicate of the selected slide, in the thumbnail pane on the left side of the PowerPoint Program window, then press 'Ctrl + D'.

311. When MS-PowerPoint 2007 software is opened, it displays the title slide. Which of the following statements is correct about this slide?

- (a) It is not possible to change the font size and font face of its place holders.
- (b) It is necessary to type something in each place holder.
- (c) by default, it contains 3 place holders.
- (d) By default, it contains only the title and subtitle place holders.

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (d) : In MS - PowerPoint software, the title slide is the first slide of a presentation. It usually contains a title and subtitle place holders.

312. Which of the following is NOT a type of background style that you can apply to a slide in MS-PowerPoint 2010?

- (a) Picture or texture fill
- (b) Background fill
- (c) Solid fill
- (d) Gradient fill

UPPCL TG-2, 09.11.2023, Shift-II

Ans. (b) : "Background Styles" in MS PowerPoint are used to modify the background of a slide. These can include different colors, images and designs which helps in making your slides attractive. You can select these from the "Background Styles" option under the "Design" tab.

313. Which of the following statements is/are True about viewing presentations in MS - PowerPoint 2007?

(i) By default, the status bar contains the 'Normal', 'Print Layout', and 'Web Layout' views commands.

(ii) The slide show command can be executed by pressing the 'F2' key.

- (a) Only (ii) (b) Both (i) and (ii)
(c) Neither (i) nor (ii) (d) Only (i)

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (c) : While viewing a presentation in MS PowerPoint 2007, by default the status bar contains the commands 'Normal view slide show, slide shorter. The Slide show command is executed by pressing 'F5' key.

314. Which of the following keyboard shortcuts is used to start a slide show from the first slide?

- (a) Alt + F5 (b) F5
(c) Ctrl + F5 (d) Shift + F5

UPPCL Executive Assistant 25.11.2022, Shift-II

Ans. (b) : Some shortcut keys for MS PowerPoint -

F5 → Switch to slide show

Alt + F5 → Switch to presenter view

Ctrl + F1 → Switch to full screen

Alt + F9 → Show or hide guides

Shift + F9 → Show or hide the grid.

315. When MS- PowerPoint 2007 software is opened. It displays the title slide which of the following statements is incorrect regarding this slide?

- (a) It is not mandatory to type anything in its place holder
(b) By default, it contains only title and subtitle place holders
(c) It is possible to change the font size and font face of its place holders
(d) By default, it contains three place holders

UPPCL Executive Assistant 28.11.2022, Shift-I

Ans. (d) : On opening MS PowerPoint 2007 software title slide is displayed and by default it contains two place holders title and subtitle. The font size and font face of its place holder can be changed and it is not mandatory to type anything in it.

316. Which of the following is not the value of transition speed of a slide in MS PowerPoint 2007.

- (a) Medium (b) Fast
(c) Very Fast (d) Slow

UPPCL Executive Assistant 28.11.2022, Shift-I

Ans. (c) : In MS - PowerPoint 2007, Very Fast is not the value of slide transition speed. You can control the transition speed, add sounds and customize the properties of transition effects. Slow, medium, fast is a value of slide transition speed.

317. Which of the following tasks are done by pressing 'Ctrl + M' shortcut key in MS - Power Point 2007?

- (a) It copies the selected slide to the clipboard
(b) It deletes the selected slide
(c) It inserts a duplicate slide of the selected slide
(d) It inserts a blank slide

UPPCL Executive Assistant 28.11.2022, Shift-I

Ans. (d) :

Shortcut Function

Ctrl + M - This insert a blank slide.

Ctrl + Q - To save and close the presentation.

Ctrl + W - To close the open presentation.

Ctrl + D - To duplicate the selected object or slide.

318. By default, how many commands can be there in the quick access toolbar of MS - PowerPoint 2007?

- (a) 3 (b) 2
(c) 4 (d) 1

UPPCL Executive Assistant 28.11.2022, Shift-I

Ans. (a) : The quick access toolbar is a customizable toolbar containing a set of commands that are independent of the tab that is currently displayed. It can be located in one of two places - upper left corner above the ribbon (default location) upper left corner below the ribbon. The Save, Undo and Redo commands appear by default on the quick access toolbar.

319. Which of the following statements is/are correct regarding header and footer?

- (i) Slide numbers cannot be inserted using header and footer.
(ii) By default, the inserted 'Date and Time' place holder' is displayed in the lower left corner of the slide and is automatically changed with the system date.
(a) Both (i) and (ii) (b) Only (i)
(c) Only (ii) (d) Neither (i) nor (ii)

UPPCL Executive Assistant 28.11.2022, Shift-I

Ans. (c) : In MS Power Point 2007, the Header and Footer command comes under the Insert Tab. The header appears at the top of the slide and the footer appears at the bottom of the slide. By default, the inserted 'Date and Time' place holder' is displayed in the lower left corner of the slide and is automatically changed with the system date. Slide numbers also be inserted using header and footer.

320. New slide in which group of Home tab in MS PowerPoint 365 option available?

- (a) Voice (b) Undo
(c) Designer (d) Slides

UPPCL Executive Assistant 28.11.2022, Shift-II

Ans. (d) : A new slides option is available in the slides group of the Home tab in MS - PowerPoint 365.

7. Data Representation & Number System

Representation of Data

Data representation refers to the form in which data is stored, processed and transmitted. Information, such as text, numbers, photo or music into digital data that can be manipulated by electronic devices.

Digital Signal– A digital signal represents the original time varying quantity as a sampled sequence of quantized values. This imposes some bandwidth and dynamic range constraints on the representation but, unlike the analog signal, can avoid further electronic noise and distortion.

Analog Signal– An analog signal is any continuous signal for which the time varying feature of the signal represents some other time varying quantity i.e. analogous to another time varying signal. For example in an analog audio signal the instantaneous voltage of the signal varies continuously with the pressure of the sound waves.

Different between Analog and Digital Signal		
	Analog Signal	Digital Signal
1.	Analog signals are continuous signals.	Digital signals are not continuous they are discrete signals.
2.	We can represent analog signals in the form of sign waves.	We can represent digital signals in the form of waves.
3.	The values of voltage will be in a continuous range.	The values of voltage will be discontinuous.
4.	These signals are used in analog devices.	Digital electronic devices like computers, Smartphone, smart watches etc. use these signals.
5.	Any natural sound, human voice, data read by analog devices.	Electronic signals, computer signals, data read by digital devices.

Number system

Introduction– Every number system has a set of unique characters or literals. The count of these literals is called the radix or base of the number system. Number systems are also called positional number system because the value of each symbol (digit and alphabet) in a number depends upon its position within the number. Number may also have a fractional part similar to decimal numbers used by us.

A computer is a digital system that stores and processes different types of data in the form of 0s and 1s. The different types of data handled by a computer system include numbers, alphabets and some special characters. Therefore, there is a need to change the data entered by the users into a form that the computer system can understand and process. different types of codes have been developed and used to represent the data entered by the users in the binary format. The binary system represents each type of data in terms of binary digits, 0s and 1s. Since these code convert the data into the binary form, the computer codes are also referred as binary codes.

The different number systems, which come under. The category of positional number system are as follows.

1. Decimal system
2. Binary system
3. Octal system
4. Hexadecimal system.

1. **Decimal System**– The decimal system is the most common number system used by human beings. It is a positional number system that uses 10 as a base to represent different values. Therefore, this number system is also known as base 10 number system. In this system, 10 symbols are available for representing the value. These symbols include the digits from 0 to 9. The common operations performed in the decimal system are addition (+), subtraction (-), multiplication (x), and division (/)

The decimal system can be used to represent both the integer as well as floating point values. The floating point values are generally represented in this system by using a period called decimal point. The decimal point is used to separate the integer part and the fraction part of the given floating point number. In the following example, the value 237 which comes before the decimal point, is called integer value and the value 25, which comes after the decimal point, is called fraction value.

2. **Binary System**– Among all the positional number system, the binary system is the most dominant number system that is employed by almost all the modern digital computer system. The binary system

uses base-2 to represent different value. Therefore, the binary system is also known as base-2 system. As this system used base-2, only two symbols are available for representing the different values in this system. These symbols are 0 and 1, which are also known as bits in computer terminology. Using binary system, the computer systems can store and process each type of data in terms of 0s and 1s only. In binary system, the point use to separate the integer and the fraction part of a number is known as binary point. In the following example, the binary number 11001.101 represents the decimal value 25.625.

$$\begin{array}{ccccccc}
 \text{Integer Part} & & & & \text{Binary Point} & & \text{Fraction Part} \\
 1 & 1 & 0 & 0 & 1 & & 1 & 0 & 1 \\
 1 \times 2^4 & + & 1 \times 2^3 & + & 0 \times 2^2 & + & 0 \times 2^1 & + & 1 \times 2^0 & + & 1 \times 2^{-1} & + & 0 \times 2^{-2} & + & 1 \times 2^{-3} \\
 16 & + & 8 & + & 0 & + & 0 & + & 1 & + & 0.5 & + & 0 & + & 0.125 = 25.625
 \end{array}$$

⇒ The following are some of the technical terms used in binary system.

Technical terms	Used in Binary System.
Bit	It is the smallest unit of information used in a computer system. It can either have the value 0 or 1. Derived from the words 'Binary digit'.
Nibble	It is a combination of 4 bits.
Byte	It is combination of 8 bits. Derived from words 'by eight'.
Word	It is a combination of 16 bits.
Double word.	It is a combination of 32 bits.
Kilobyte (KB)	It is used to represent the 1024 bytes of information.
Megabyte (MB)	1024 KB
Gigabyte (GB)	1024 MB
Terrabyte (TB)	1024 GB
Petabyte (PB)	1024 TB
Exabyte (EB)	1024 PB
Zettabyte (ZB)	1024 EB
Yottabyte (YB)	1024 ZB

3. Octal system– The octal system is the positional number system that used base-8 to represent different values. Therefore, this number system is also known as base-8 system. As this system uses base-8, eight symbols are a available for representing the value in this system. These symbols are the digits 0 to 7. In octal system, the point used

to separate the integer and the fraction part of a number is known as octal point. In the following example, The octal number 215.43 represents the decimal value 141.5469.

$$\begin{array}{ccccccc}
 \text{Integer Part} & & & & \text{Octal point} & & \text{Fraction Part} \\
 2 & 1 & 5 & & & & 4 & 3 \\
 2 \times 8^2 & + & 1 \times 8^1 & + & 5 \times 8^0 & & 4 \times 8^{-1} & + & 3 \times 8^{-2} \\
 128 & + & 8 & + & 5 & + & 0.5 & + & 0.0469 = 141.5469
 \end{array}$$

The following lists the octal representation of decimal numbers 0 through 15.

Decimal number	Octal representation
0	0
1	1
2	2
3	3
4	4
5	5
6	6
7	7
8	10
9	11
10	12
11	13
12	14
13	15
14	16
15	17

4. Hexadecimal system– The hexadecimal system is a positional number system that uses base-16 to represent different values. Therefore, this number system is known as base-16 system. As this system uses base-16, 16 symbols are available for representing the value in this system. These symbols are the digits 0-9 and the letters A, B, C, D, E and F. The digits 0-9 are used to represent the decimal value 0 through 9 and The letters A, B, C, D, E and F are used to represent the decimal value 10 through 15. In hexadecimal system, the point used to separate the integer and the fraction part of a number is known as hexadecimal point. In the following example, the hexadecimal number 4A9.2B represents the decimal value 1193.1679.

$$\begin{array}{ccccccc}
 \text{Integer Part} & & & & \text{Hexadecimal Point} & & \text{Fraction Part} \\
 4 & A & 9 & & & & 2 & B \\
 4 \times 16^2 & + & 10 \times 16^1 & + & 9 \times 16^0 & & 2 \times 16^{-1} & + & 11 \times 16^{-2} \\
 1024 & + & 160 & + & 9 & + & 0.125 & + & 0.0429 = 1193.1679
 \end{array}$$

The following Lists shows decimal and binary equivalent of 16 alphanumeric symbols used in hexadecimal number system.

Decimal Number	Hexadecimal Symbol	4-bit Binary Number
0	0	0000
1	1	0001
2	2	0010
3	3	0011
4	4	0100
5	5	0101
6	6	0110
7	7	0111
8	8	1000
9	9	1001
10	A	1010
11	B	1011
12	C	1100
13	D	1101
14	E	1110
15	F	1111

Conversion of Numbers

The computer systems accept the data in decimal form, whereas they store and process the data in binary form. Therefore, it becomes necessary to convert the number represented in one system into the numbers represented in another system. The different types of number system conversions can be divided into the following major categories.

1. Decimal to Non-decimal
2. Non-decimal to Decimal
3. Binary to Octal
4. Binary to Hexadecimal
5. Octal to Hexadecimal

1. **Decimal to Non-decimal**– The decimal to non-decimal (binary, octal or hexadecimal), conversions use the step given below.

Step 1: Divide the given number by the base value of the number system in which it is to be converted.

Step 2: Note the remainder.

Step 3: Keep on dividing the quotient by the base value and note the remainder till the quotient is Zero.

Step 4: Write the noted remainders in the reverse order (from bottom to top).

- (i) **Decimal to Binary conversion**– The decimal to binary conversion is performed by repeatedly dividing the decimal number by 2 till the decimal number becomes zero and then reading the remainders from last to first to obtain the binary equivalent of the given decimal number.

Let us now convert a decimal value to its binary representation and verify that the binary equivalent of $(65)_{10}$ is $(1000001)_2$.

- (ii) **Decimal to Octal Conversion**– The decimal to octal conversion is performed by repeatedly dividing the decimal number by 8 till the decimal number becomes zero and reading the remainders from last to first to obtain the octal equivalent of the given decimal number. The following example illustrates the method of converting decimal number 98 into its equivalent octal number.

- (iii) **Decimal to Hexadecimal Conversion**– The decimal to hexadecimal conversion is performed by repeatedly dividing the decimal number by 16 till the decimal number becomes zero and reading the remainders from last to first to obtain the hexadecimal equivalent of the given decimal number. The following example illustrates the method of converting decimal number to its hexadecimal equivalent.

2. **Non-decimal to Decimal**– The non-decimal to decimal conversions can be implemented by taking the concept of place values. Not considering we can use the following steps to convert the given number with base value to its decimal equivalent, where base value can be 2, 8 and 16 for binary, octal and hexadecimal number system, respectively.

- Step 1 : Write the position number for each alphanumeric symbol in the given number.
- Step 2 : Get positional value for each symbol by raising its position number to the base value symbol in the given number.
- Step 3 : Multiply each digit with the respective positional value to get a decimal value.
- Step 4 : Add all these decimal values to get the equivalent decimal number.

(i) **Binary Number to Decimal Number Conversion**– A binary number can be converted to equivalent decimal number by calculating the sum of the products of each bit multiplied by its corresponding place value. The following example illustrate the method of converting binary number $(1101)_2$ to decimal number.

Digit→	1	1	0	1
Positional value→	2^3	2^2	2^1	2^0
Decimal Number→	1×2^3	$+ 1 \times 2^2$	$+ 0 \times 2^1$	$+ 1 \times 2^0$
	8	+ 4	+ 0	+ 1 = $(13)_{10}$

Therefore, $(1101)_2 = (13)_{10}$

(ii) **Octal Number to Decimal Number Conversion**– An octal number can be converted into its equivalent number in decimal system by calculating the sum of the products of each digit multiplied by its corresponding place value. The following example shows how to compute the decimal equivalent of an octal number $(257)_8$.

Digit→	2	5	7
Positional value→	8^2	8^1	8^0
Decimal Number→	2×8^2	$+ 5 \times 8^1$	$+ 7 \times 8^0$
	128	+ 40	+ 7 = $(175)_{10}$

Therefore, $(257)_8 = (175)_{10}$

(iii) **Hexadecimal Number to Decimal Number Conversion**– A hexadecimal number can be converted into its equivalent number in decimal system by calculating the sum of the products of each symbol multiplied by its corresponding place value. The following example shows how to compute the decimal equivalent of an Hexadecimal $(3A5)_{16}$.

Digit→	3	A	5
Positional value→	16^2	16^1	16^0
Decimal Number→	3×16^2	$+ 10 \times 16^1$	$+ 5 \times 16^0$
	768	+ 160	+ 5 = $(933)_{10}$

Therefore, $(3A5)_{16} = (933)_{10}$

3. Conversion from Binary Number to Octal Number and Vice-versa–

(i) **Binary Number to Octal Number**- Given a binary number, an equivalent octal number representation by 3 bits is computed by grouping 3 bits from right to left and replacing each 3-bit group by the corresponding octal digit. In case number of bits in a binary number is not multiple of 3, then add required, number of 0s on most significant position of the binary number

Example – Convert $(10101100)_2$ to octal number.

Make group of 3-bits of the given binary number (Right to Left) 010 101 100
Write octal number for each 3-bit group. 2 5 4
Therefore, $(10101100)_2 = (254)_8$

(ii) **Octal Number to Binary Number**– Each octal digit is an encoding for a 3-digit binary number. Octal number is converted to binary by replacing each octal digit by a group of three binary digits.

Example– Convert $(705)_8$ to binary number.

Octal digit → 7 0 5
Write 3-bits binary value for each digit → 111 000 101
Therefore, $(705)_8 = (111000101)_2$

4 Conversion from Binary Number to Hexadecimal Number and Vice-versa–

(i) **Binary Number to Hexadecimal Number**– Given a binary number, its equivalent hexadecimal number is computed by making a group of 4 binary digits from right to left and substituting each 4-bit group by its corresponding computed by making a group of 4 binary digits from right to left and substituting each 4-bit group by its corresponding hexadecimal alphanumeric symbol. If required, add 0 bit on to have number of bit in a binary number as multiple of 4.

Example– Convert $(0110101100)_2$ to hexadecimal number.

Make group of 4-bits of the given binary number (Right to left)
→ 0001 1010 1100
Write hexadecimal symbol for each group
→ 1 A C

Therefore, $(0110101100)_2 = (1AC)_{16}$

(ii) **Hexadecimal Number to Binary Number**– Each hexadecimal symbol is an encoding for a 4-digit binary number. Hence, the binary equivalent of a hexadecimal number is obtained by substituting 4-bit binary equivalent of each hexadecimal digit and combining them together.

Example. Convert $(23D)_{16}$ to binary number.

Hexadecimal digits→ 2 3 D
Write 4-bit binary for each digit→ 0010 0011 1101
Therefore, $(23D)_{16} = (001000111101)_2$

5. **Conversion from Octal Number to Hexadecimal Number**– The given octal number can be converted into its equivalent hexadecimal number in two different steps. Firstly, We need to convert the given octal number into its binary equivalent. After obtaining the binary equivalent, we need to making a group of 4 binary digits from right to left and substituting each 4-bit group by its corresponding hexadecimal alphanumeric symbol. In this type of conversion, we need to represent each digit in the octal number to its equivalent 3-bit binary number.

Example– Convert the octal number $(365)_8$ into its hexadecimal number.

Octal digits→ 3 6 5
 Write 3-bits binary value
 for each digit→ 011 110 101
 Regrouping into 4-bits of
 the binary number (Right to Left) →
 0000 1111 0101
 Write hexadecimal symbol
 for each group→ 0 F 5
 Therefore, $(365)_8 = (F5)_{16}$

Conversion of a Number with Fractional Part.

Decimal Number with Fractional Part to Another– Number system– To convert the fractional part of a decimal number to another number system with base value, repeatedly multiply the fractional part by the base value till the fractional part becomes 0. Use integer part from top to bottom to get equivalent number in that number system. The fractional part does not become 0 in successive multiplication, then stop after, 10 multiplications. In some cases, fractional part may start repeating then stop further calculation.

(i) Fractional Part of Decimal Number to Binary Number.

Example. Convert decimal number $(0.25)_{10}$ to binary.

	Integer part
$0.25 \times 2 = 0.50$	0
$0.50 \times 2 = 1.00$	1

Since the fractional part is 0, the multiplication is stopped. Write the integer part from top to bottom to get binary number for the fractional part.

Therefore, $(0.25)_{10} = (0.01)_2$

Example– Convert $(0.675)_{10}$ to binary.

$0.675 \times 2 = 1.350$	1
$0.350 \times 2 = 0.700$	0
$0.700 \times 2 = 1.400$	1
$0.400 \times 2 = 0.800$	0
$0.800 \times 2 = 1.600$	1
$0.600 \times 2 = 1.200$	1
$0.200 \times 2 = 0.400$	0

Since the fractional part (400) is the repeating value in the calculation, the multiplication is stepped, write the integer part from top to bottom to get binary number for the fractional part.

Therefore, $(0.675)_{10} = (0.1010110)_2$

(ii) Fractional Part of Decimal Number to Octal Number.

	Integer part
$0.625 \times 8 = 5.000$	5
$0.000 \times 8 = 0.000$	0

Since the fractional part is 0, the multiplication is stopped, write the integer part from top to bottom to get octal number for the fractional part.

Therefore, $(0.625)_{10} = (0.50)_8$

(iii) Fractional Part of Decimal Number to Hexadecimal Number.

Example– Convert $(0.675)_{10}$ to hexadecimal form.

	Integer Part
$0.675 \times 16 = 10.800$	A (Hexadecimal Symbol for 10)
$0.800 \times 16 = 12.800$	C (Hexadecimal Symbol for 12)

Since the fractional part (.800) is repeating, the multiplication is stopped, Write the integer part from top to bottom to get hexadecimal equivalent for the fractional part.

Therefore, $(0.675)_{10} = (0.AC)_{16}$

Non-decimal Number with Fractional Part to Decimal Number System– Computer positional value of each digit in the given number using its base value, Add the product for positional value and the digit to get the equivalent decimal number with fractional part.

(i) Fractional Part of Binary Number to Decimal Number.

Convert $(0.111)_2$ into decimal number.

Digit→	0	1	1	1
Fractional value→	0	2^{-1}	2^{-2}	2^{-3}
Decimal value→	$1 \times 2^{-1} + 1 \times 2^{-2} + 1 \times 2^{-3}$			
	$0.5 + 0.25 + 0.125 = 0.875$			

Therefore, $(0.111)_2 = (0.875)_{10}$

(ii) Fractional Part of Octal Number to Decimal Number.

Convert $(0.12)_8$ into decimal number.

Digit→	0.	1	2
Fractional value→	0.	8^{-1}	8^{-2}
Decimal value→	$1 \times 8^{-1} + 2 \times 8^{-2}$		
	$0.125 + 0.03125 = 0.15625$		

Therefore, $(0.12)_8 = (0.15625)_{10}$

(iii) Fractional Part of Hexadecimal Number to Decimal Number

Convert $(0.58)_{16}$ into decimal number.

Digit→	0.	5	8
Fractional value→		16^{-1}	16^{-2}
Decimal value→	$5 \times 16^{-1} + 8 \times 16^{-2}$		
	$0.3125 + 0.03125 = 0.34375$		

Therefore, $(0.58)_{16} = (0.34375)_{10}$

Fractional Binary Number to Octal or Hexadecimal Number- To convert the fractional binary number into octal or hexadecimal value, substitute groups of 3-bit or 4-bit for integer part by the corresponding digit, similarly, make groups of 3-bit or 4-bit for fractional part starting from left to right, and substitute each group by its equivalent digit or symbol in octal or hexadecimal number system, Add 0s at the end of the fractional part to make a perfect group of 3 or 4 bits.

Example– Convert $(10101100.01011)_2$ to octal number.
Make perfect group of 3-bits→

$\begin{array}{ccccccc} 010 & 101 & 100 & . & 010 & 110 \end{array}$

Write octal symbol for each group →

$\begin{array}{ccccccc} 2 & 5 & 4 & . & 2 & 6 \end{array}$

Therefore, $(10101100.01011)_2 = (254.26)_8$

Note– Make 3-bit groups from right to left for the integer part and left to right for the fractional part.

Example– Convert $(10101100.01011)_2$ to hexadecimal number.

make perfect group of 4-bits→

$\begin{array}{ccccccc} 1010 & 1100 & . & 0101 & 1100 \end{array}$

Write hexadecimal symbol for each group→

$\begin{array}{ccccccc} A & C & . & 5 & C \end{array}$

Therefore, $(10101100.01011)_2 = (AC.5C)_{16}$

Binary Coded Decimal (BCD) Systems

Weighted 4-bit BCD code-

Example– Represent the decimal number 5327 in weighted BCD code.

⇒ The given decimal number is 5327

The corresponding 4-bit 8421 BCD representation of decimal digit.

$\begin{array}{cccc} & 8 & 4 & 2 & 1 \\ 5 & \rightarrow & 0 & 1 & 0 & 1 \\ 3 & \rightarrow & 0 & 0 & 1 & 1 \\ 2 & \rightarrow & 0 & 0 & 1 & 0 \\ 7 & \rightarrow & 0 & 1 & 1 & 1 \end{array}$

Therefore, The 8421 BCD representation of decimal number $(5327)_{10}$ is $(0101001100100111)_2$

Example– Convert the decimal number $(87.34)_{10}$ to weighted BCD code.

⇒ The given decimal number is 87.34

The corresponding 4-bit 8421 BCD representation of decimal digit

$\begin{array}{cccc} & 8 & 4 & 2 & 1 \\ 8 & \rightarrow & 1 & 0 & 0 & 0 \\ 7 & \rightarrow & 0 & 1 & 1 & 1 \\ 3 & \rightarrow & 0 & 0 & 1 & 1 \\ 4 & \rightarrow & 0 & 1 & 0 & 0 \end{array}$

Therefore, The 8421 BCD representation of decimal number $(87.34)_{10}$ is $(1000\ 0111.0011\ 0100)_2$

Excess-3 BCD Code–

Example– Convert the decimal number 85 to XS-3 BCD code.

⇒ The given decimal number is 85. now, add 3 to each digit of the given decimal number as–

$$8 + 3 = 11$$

$$5 + 3 = 8$$

The corresponding 4-bit 8421 BCD representation of the decimal digit–

$\begin{array}{cccc} & 8 & 4 & 2 & 1 \\ 11 & \rightarrow & 1 & 0 & 1 & 1 \\ 8 & \rightarrow & 1 & 0 & 0 & 0 \end{array}$

Therefore, the XS-3 BCD representation of the decimal number 85 is 1011 1000.

ASCII Code

Characters	Decimal representation	Hexadecimal representation
NUL	0	0
SOH	1	1
STX	2	2
ETX	3	3
EOT	4	4
ENQ	5	5
ACK	6	6
BEL	7	7
BS	8	8
HT	9	9
CAN	24	18
SUB	26	1A
ESC	27	1B
RS	30	1E
US	31	1F
!	33	21
#	35	23
\$	36	24
%	37	25
&	38	26
*	42	2A
+	43	2B
/	47	2F
0 - 9	48 - 57	30 - 39
<	60	3C
=	61	3D
>	62	3E
?	63	3F
A - I	65 - 73	41 - 49
J - O	74 - 79	4A - 4F
P - Z	80 - 90	50 - 5A
a - i	97 - 105	61 - 69
j - o	106 - 111	6A - 6F
p - z	112 - 122	70 - 7A

Gray Code

The Gray code or reflected binary code is an ordering of the binary number system such that two successive values differ in only one bit. Gray codes are very useful in the normal sequence of binary number generated by the hardware that may cause an error or ambiguity during the transition from one number to the next. The Gray code is not weighted that means it does not depend on positional value of digit. This cyclic variable code that means every transition from one value to the next value involves only one bit change.

Binary to Gray code conversion– We can convert a number represented in the binary form to the Gray code we need to remember the following two rules:-

- Example-** Convert the Binary number 1011 to its equivalent Gray coded number.

- (i) The most significant bit (MSB) of the binary code is always equal to the MSB of the given gray code.
- (ii) Other bits of the output binary code can be obtained by checking gray code bit at that index. If current gray code bit is 0, then copy previous binary code bit, else copy invert of previous binary code bit.

Gray code digit		Binary digit
1	→	1
1	invert of previous binary code bit →	0
0	copy previous binary code bit →	0
1	invert of previous binary code bit →	1
0	copy previous binary code bit →	1
0	copy previous binary code bit →	1
1	invert of previous binary code bit →	0
1	invert of previous binary code bit →	1

$$\begin{array}{r} 0011 \\ +1 \\ \hline 0100 \end{array}$$

YCT

Important Questions Asked in Previous Years Examinations

1. _____ tells raw facts while in _____ the data becomes meaningful.
- Information, reporting
 - Information, bits
 - Records, bytes
 - Data, information

KPSC Instructor Electronics Mech.20.07.2018

Ans : (d) The data are defined as numbers that represent measurements from the real world. Datum is a single measurement.

Information is organized or classified data, which has some meaningful values for the receiver. Information is the processed data on which decisions and action are based.

2. Which of the following is a variable - length coding system that uses 7 bits for normal ASCII characters but uses 16 - bit Unicode as needed to represent data?
- Extended ASCII
 - UTF-8
 - EBCDIC
 - BCD

RRB Kolkata LP-2009

KPSC Jr. Instructor 22.11.2018

KPSC Instructor Electronics Mech.20.07.2018

Ans. (b) : UTF-8 is variable - length encoding system. Which uses 7 bits for normal ASCII characters, but it uses 16-bit Unicode as needed to represent data.

3. Which of the following registers is used for storage of data, either coming to the CPU or data being transferred by the CPU?
- Program counter
 - Memory Buffer register
 - Memory Address register
 - Accumulator

MP Electrician Instructor 07.11.2016, Morning

Ans. (b) : A memory buffer register or memory data register is the register in a computers CPU that stores the data being transferred to and from the immediate access storage. It contains a copy of the value in the memory location specified by the memory address register.

4. What does the term 2 Gigafllops indicate?
- CPU is running at 2 GHz
 - CPU memory data transfer speed is 2Gb/s
 - Secondary memory space is equal to 2×2^{30} bytes
 - The system can perform 2×2^{30} floating point operations per second.

WBPSK Instructor-18.09.2021

Ans : (d) Gigafllops is a unit of measurement used to measure the performance of a computers floating point unit. Commonly referred to as the FPU. One gigafllops is one billion (1000,000,000) FLOPS or floating point operations per second.

5. The Extended ASCII code uses _____ bits to represent each character.

- 7
- 4
- 16
- 8

HSSC wireman Instructor -17.12.2019, Shift-I

KPSC Instructor Electronic-25.06.2014

Ans. (d) : Extended ASCII (American Standard Code for Information Interchange) is a version that supports the representation of 256 different characters. This is because Extended ASCII uses eight bits to represent a character as opposed to seven in Standard ASCII where 8 bits are used for error checking.

6. If the ASCII code of E is 01000101, then what will be the ASCII code of F?

- 01010110
- 01000110
- 01000111
- 11000110

UPPCL (TG-II) 24-01-2019 (EVENING)

Ans : (b) The ASCII code of E is 69 in decimal. When we convert decimal to binary then it will be 01000101. Whereas the ASCII code of F is 70. It is 01000110 when we convert decimal to binary.

7. The ASCII code of 7 is 00110111. What will be the ASCII code of 8?

- 00111000
- 00111001
- 11001000
- 00110010

UPPCL TG-II 19-03-2021 (Shift-I)

Ans. (a) : ASCII stands for American Standard Code for Information Interchange. ASCII code was created by "American standards Association" committee. This code was already used by the Bell Company in telegraphy at that time. Previously only uppercase letters and numbers were included, but in 1967 lowercase letters were added. It has a character set from 0 to 127, than later ASCII characters from 128 to 255 were added to it. So, ASCII code of 7 is 55 in decimal and binary representation is 00110111. ASCII code of 8 is 56 in decimal and binary representation is 00111000.

8. ASCII-8 is an 8-bit code and can uniquely represent a maximum of _____ characters

- 256
- 127
- 255
- 128

UPPCL (TG-II) 24-01-2019 (EVENING)

Ans : (a) The basic ASCII codes use 7-bits for each character. This gives a total of 128 possible unique symbols. The extended ASCII character set uses 8-bits, which gives an additional 128 characters (i.e. 256 in total).

9. How many bits are required for each character to represent data in ASCII format in a computer system?

- 7
- 5
- 9
- 10

RRB Kolkata LP-2009

MP Electrician Instructor 07.11.2016, Morning

Punjab Wireman instructor-07.07.2013

Ans. (a) : American standard code for Information Interchange (ASCII) is a standard for encoding characters in computer system. Standard ASCII code values range from 0 to 127. ASCII uses 7 bits to represent a character. Extended ASCII represents 256 characters. 8 bits are required to represent it.

- 10. ASCII-7 is a 7 bit code and it can typically represents a maximum of _____ characters.**
 (a) 64 (b) 127
 (c) 256 (d) 128

HSSC wireman Instructor -17.12.2019, Shift-II

Ans. (d) : The American Standard Code for Information Interchange (ASCII) is a 7-bit character set consisting of 128 characters. It includes numbers 0-9 upper and lower case English letters from A to Z and some special characters. Whereas the extended ASCII code is 8 bits long and its range is from 128 to 256.

- 11. ASCII-7 is a 7-bit code and can uniquely represent a maximum of _____ classes.**
 (a) 128 (b) 256
 (c) 127 (d) 64

UPPCL (TG-II) 24-01-2019 (Morning)

Ans : (a) The 7 bit ASCII code definitely denotes 128 characters. In this each number is expressed as a 7 digit binary number. Like 0000000, 1111111 will be binary i.e. $(2)^7 = 128$.

- 12. Considering binary, octal, decimal and hexadecimal, which of the following is a valid number in all system?**
 (a) 8090 (b) A100
 (c) 3030 (d) 1010

**KPSC Jr. Instructor 22.11.2018
 Punjab Wireman instructor-07.07.2013**

Ans. (d) : In the above option 1010 will be correct because binary is in the form of 0, 1 octal range from 0 to 7 decimal is from 0 to 9 and hexadecimal is from 0 to 9 and A to F. Hence option (d) is valid in all.

- 13. The computer code for interchange of information between terminals is:**
 (a) ASCII (b) BCD
 (c) BCDIC (d) Hollerith

KPSC Instructor Electronic-25.06.2014

Ans : (a) The computer code for the interchange of information between terminals is ASCII. ASCII stands for American Standard Code for Information Interchange. Computers can only understand numbers, so an ASCII code is the numerical representation of a character such as 'a' or '@' or an action of some sort.

- 14. Which of the following is a non-weighted code.**
 (a) BCD (b) Binary
 (c) Excess-3 (d) Decimal

GSSSB Electronic Instructor-21.01.2014

Ans : (c) The excess-3 code is a non-weighted coded used to express code used to express decimal numbers. It is a self complementary Binary Coded Decimal (BCD) code and numerical system which has biased representation. Gray code is also non weighted code.

- 15. Which of the following techniques of data presentation typically presents the least number of character?**

- (a) EBCDIC (b) ASCII-8
 (c) BCD (d) ASCII - 7

UPPCL TG-II 25-01-2019 (Morning)

Ans : (c) BCD Stands for Binary Coded Decimal. In this each decimal number is expressed as a 4-digit binary code.

- 16. The range of integer values that can be represented using 16-bit 2's complement form is**

- (a) -32768 to +32767 (b) -32767 to +32767
 (c) -32767 to +32768 (d) -32768 to +32768

UKSSSC Tech. Electrical Instructor-21.11.2017

Ans : (a) A 16 bit integer can store 2^{16} (or 65536) distinct values. In an unsigned representation, these values are the integers between 0 and 65535 using 2's complement possible values range from -32768 to 32767.

- 17. Convert decimal -65 (negative 65) to 2's complement representation using 8-bit.**

- (a) 10101010 (b) 10101011
 (c) 10111111 (d) 10001111

GSSSB Supervisor Electronic Instructor 18.01.2014

Ans : (c)

$$\begin{array}{r}
 64 \ 32 \ 16 \ 8 \ 4 \ 2 \ 1 \\
 1 \ 0 \ 0 \ 0 \ 0 \ 1 \\
 \hline
 + 1 \\
 \hline
 1's \text{ Complement } 0 \ 1 \ 1 \ 1 \ 1 \ 0 \\
 \hline
 + 1 \\
 \hline
 2's \text{ Complement } 1 \ 0 \ 1 \ 1 \ 1 \ 1
 \end{array}$$

To extract 8 bit 2's complement, first the given number is converted into binary. If you change 0 to 1 in binary, then it turns into its complement. Adding 1 to 1's complement. If the number is negative then 2's is increased by 1 before complement. But if it is positive 2's complement is further increased to 0.

- 18. Which of the following is the correct gray code for the binary number (1111)₂?**

- (a) 1111 (b) 1000
 (c) 1100 (d) 1110

**MP Electrician Instructor 07.11.2016, Morning
 WBPSC Instructor-18.09.2021**

Ans : (b) The gray code is also called the cyclic code, the reflected binary code. To obtain the gray code, the binary code is arranged in such a way that there is only one digit difference between two consecutive values.

Example—

So, gray code (1000).

19. The integer 89 is encoded in BCD format and stored in a single byte (8-bit) in packed form. Which of the following option best represents it?
- (a) 10101010 (b) 01011010
(c) 10001001 (d) 10011000

HSSC Electrician Instructor -17.12.2019
KPSC Jr. Instructor- 09.07.2014

Ans : (c) When we convert 89 to BCD, we always make a pair of four digits.

20. What is the hexadecimal equivalent of the binary bit string '111010001011110101'?
- (a) E8BB1 (b) 3102155
(c) 3A2F5 (d) 753831

RRB Kolkata LP-2009

Ans : (c) Hexadecimal number is one of the number systems which has value is 16 and it has only 16 symbols 0, 1, 2, 3, 4, 5, 6, 7, 8, 9 and A, B, C, D, E, F. Where A, B, C, D, E, F are single bit representation of decimal value 10, 11, 12, 13, 14, 15 respectively.

Decimal Digit	Hexadecimal Digit
0	0
1	1
2	2
3	3
4	4
5	5
6	6
7	7
8	8
9	9
10	A
11	B
12	C
13	D
14	E
15	F

$\frac{3}{0011} \frac{A}{1010} \frac{2}{0001} \frac{F}{0111} \frac{5}{10101} \Rightarrow (3A2F5)_{16}$

21. There are three fields in a standard 32 bit floating point format. Sign (S), Exponent (E) and significant (M) which option represents the correct bit width of these three fields.
- (a) S = 1, E = 8, M = 23
(b) S = 3, E = 5, M = 24
(c) S = 1, E = 5, M = 26
(d) S = 1, E = 10, M = 21

KPSC Instructor Electronics Mech.20.07.2018

Ans : (a) Given the standard is 32 bit sign in 32 bit floating point format S = 1 exponent E = 8, M = 23.

22. Select the odd option.
- (a) Decimal (b) Binary
(c) Octal (d) Hexadecimal

GSSSB Electronic Instructor-22.01.2017
KPSC Jr. Instructor- 09.07.2014

Ans. (a) : Binary, Octal and Hexadecimal are all number systems that are not commonly used for day-to-day human calculations, whereas Decimal is the number system we used in our daily lives.

23. How many different addresses can be created using an 8-bit address line?
- (a) 128 (b) 256
(c) 64 (d) 512

UPPCL TG-II 19-03-2021 (Shift-II)

Ans. (b) : There are 256 different unsigned 8-bit numbers. The smallest unsigned 8-bit number is 0 and the largest is 255. For example 000010102 is 8+2 or 10.

24. _____ is used to display binary data in a computer.
- (a) 0 and 1 (b) positive and negative
(c) 0 and 2 (d) 1 and 2

RRB Kolkata LP-2009

Ans : (a) In computer systems, a binary digit or bit is the smallest unit of data. Each bit has a single value of either 1 or 0, which means it can't take another value. Computers can represent numbers using binary code in the form of digital 1's and 0's inside the central processing unit and RAM.

25. For any number (e.g. 15), which of the following number system will use the largest number of numbers (symbols) for representation?
- (a) Octal (b) Hexadecimal
(c) Decimal (d) Binary

UPPCL TG-II 25-01-2019 (Evening)

Ans : (d) The binary number system uses the largest number of digits for its representation in which the number 1 and 0 are used.

26. The number of unique symbols used in the binary number system is
- (a) Sixteen (b) Ten
(c) Eight (d) Two

DSSSB Craft Instructor (ESM) 06.10.2019
HSSC wireman Instructor -17.12.2019, Shift-I

Ans. (d) : The binary number system is one such number system. In which 0 and 1 are used to represent numbers. The processor in the computer can easily understand only binary numbers. The number formed using 0 and 1 is a binary number whose base is 2.

27. What is the size of the following binary sequence in nibbles?
- 1100101011010011

- (a) 4 (b) 16
(c) 8 (d) 2

UPPCL TG-II 25-01-2019 (Evening)

Ans : (a) These are total 16 digits in 1100101011010011, the size of each digits is 1 bit, so there will be a total binary number of 16 bits. There are 4 bits in 1 nibble. So the size of the binary sequence will be 4 nibbles when divided into $\frac{16}{4} = 4$ parts.

28. In the Gray code, successive numeric values differ only by _____ bit.

- (a) 1 (b) 3
(c) 2 (d) 4

KPSC Jr. Instructor 22.11.2018

Punjab Wireman instructor-07.07.2013

Ans : (a) A gray code is a coded binary representation of a decimal digit with a 1 bit position change for consecutive digits.

Decimal digit	Binary	Gray code
0	000	000
1	001	001
2	010	011

29. Which number system can computers understand?

- (a) Binary (b) Hexadecimal
(c) Octal (d) Decimal

UPPCL Technical Grade-II (Shift- II) 27.03.2021

RRB Gorakhpur L.P.-2008

Punjab Wireman instructor-07.07.2013

Ans : (a) A computer can understand only the 'on' and 'off' state of a switch. These two states are represented by 1 and 0. The combination of 1 and 0 form binary numbers.

30. How many different numbers can be represented by one byte in the binary number system?

- (a) 255 (b) 264
(c) 263 (d) 256

UPPCL TG-II (20-03-2021) (Shift-II)

Ans. (d) : 1 byte = 8 bit

So $2^8 = 256$ numbers can be represented.

31. How many unique binary codes can be generated using 8 bits. 8 bits can represent a positive number from 0 to 255.

- (a) 255 (b) 128
(c) 256 (d) 512

UPPCL TG-II 28-3-2021 (Shift-I)

Ans. (c) : A maximum of $2^8 = 256$ unique binary codes can be generated using 8 bits. 8 bits can represent a positive number from 0 to 255.

32. Decimal Number System has a base of _____.

- (a) 2 (b) 10
(c) 8 (d) 16

GSSSB Supervisor Electronic Instructor 18.01.2014

Ans. (b) : Decimal Number System is the number system in which a total of 10 numbers (0, 1, 2, 3, 4, 5, 6, 7, 8, 9) are used to count calculate. So its base is 10.

33. If the decimal number 60 is shown as 2020 in the base B number system, then what will be B?

- (a) 2 (b) 5
(c) 3 (d) 4

KPSC Instructor Electronics Mech.20.07.2018

Ans. (c) : Conversion of base B number 2020 to Decimal Number 60

$$(2020)_B = (60)_{10}$$

$$2 \times B^3 + 0 \times B^2 + 2 \times B^1 + 0 \times B^0$$

$$2B^3 + 2B$$

if $B = 3$

$$2 \times 3^3 + 2 \times 3 = 54 + 6 = (60)_{10}$$

So base $B = 3$

34. To represent a 31-digit binary number, we need a maximum of _____ digits in the decimal number system.

- (a) 7 (b) 10
(c) 11 (d) 15

UKSSSC Tech. Electrical Instructor-21.11.2017

MP Electrician Instructor 07.11.2016, Morning

WBPSB Instructor-18.09.2021

Ans. (b) : To represent a 31-digit binary number, we need a maximum of 10 digits in the decimal number system.

Given, $n = 31$

$$(1 \dots n)_2 = (2^n - 1)_{10}$$

$$(111 \dots 1_{(31)}) = (2^{31} - 1)_{10}$$

$$= (2147483648 - 1)_{10}$$

$$= (2147483647)_{10}$$

= 10 digits

35. Convert 89 into binary notation.

- (a) 1100110 (b) 101110
(c) 1011011 (d) 1011001

HSSC Electrician Instructor -17.12.2019

KPSC Jr. Instructor 22.11.2018

Ans. (d) : $(89)_{10} = (?)_2$

2	89	
2	44	1
2	22	0
2	11	0
2	5	1
2	2	1
1	1	0

$$(89)_{10} = (1011001)_2$$

36. Convert 13 to binary:

- (a) 1102 (b) 1011
(c) 1101 (d) 1111

Punjab Wireman instructor-07.07.2013

RRB Kolkata LP-2009

Ans : (c) $(13)_{10} = (?)_2$

2	13	
2	6	1
2	3	0
	1	1

$$(13)_{10} = (1101)_2$$

37. Select the option which gives the correct decimal equivalent result of 1001, 10011, 101 and 110.

- (a) 9, 19, 4, 3 (b) 10, 19, 5, 6
(c) 9, 18, 5, 6 (d) 9, 19, 5, 6

UPPCL Technical Grade-II-09.08.2015

RRB Gorakhpur L.P.-2008

Ans : (d) Binary to decimal conversion

$$(1001)_2 = (?)_{10}$$

$$(1001)_2 = 1 \times 2^3 + 0 \times 2^2 + 0 \times 2^1 + 1 \times 2^0$$

$$= 8 + 0 + 0 + 1 = 9$$

$$(10011)_2 = (?)_{10}$$

$$(10011)_2 = 1 \times 2^4 + 0 \times 2^3 + 0 \times 2^2 + 1 \times 2^1 + 1 \times 2^0$$

$$= 16 + 0 + 0 + 2 + 1 = 19$$

$$(101)_2 = (?)_{10}$$

$$(101)_2 = 1 \times 2^2 + 0 \times 2^1 + 1 \times 2^0$$

$$= 4 + 0 + 1 = 5$$

$$(110)_2 = (?)_{10}$$

$$(110)_2 = 1 \times 2^2 + 1 \times 2^1 + 0 \times 2^0$$

$$= 4 + 2 + 0 = 6$$

So, option (d) is correct.

38. Convert 101110 into decimal notation

- (a) 44 (b) 56
(c) 72 (d) 46

DSSSB Craft Instructor (ESM) 06.10.2019

UPPCL Technical Grade-II (Shift-I) 20.03.2021

Ans. (d) : $(101110)_2 = (?)_{10}$

$$= 1 \times 2^5 + 0 \times 2^4 + 1 \times 2^3 + 1 \times 2^2 + 1 \times 2^1 + 0 \times 2^0$$

$$= 32 + 0 + 8 + 4 + 2 + 0 = 46$$

$$(101110)_2 = (46)_{10}$$

39. Convert 11010 to Octal

- (a) 32 (b) 36
(c) 26 (d) 46

UKSSSC Tech. Electrical Instructor-21.11.2017

KPSC Jr. Instructor 22.11.2018

Ans. (a) : First convert binary into decimal then the resulting decimal into octal.

$$(11010)_2 = (?)_{10}$$

$$= 1 \times 2^4 + 1 \times 2^3 + 0 \times 2^2 + 1 \times 2^1 + 0 \times 2^0$$

$$= 16 + 8 + 2 = 26$$

$$(26)_{10} = (?)_8$$

8	26	
	3	2

$$(11010)_2 = (32)_8$$

40. Integers in computers are generally represented using _____ representation.

- (a) floating point (b) 9's complement
(c) 2's complement (d) 1's complement

DSSSB Craft Instructor (ESM) 06.10.2019

Ans : (c) Integers in any computer are generally represented using 2's complement representation. Because 2's complement representation always represents a positive number, write 1 if the number is negative and 0 if the number is positive.

41. What is the base of the Octal Number System?

- (a) 8 (b) 16
(c) 32 (d) 64

MP Electrician Instructor 07.11.2016, Morning

Ans : (a) The octal number system has only eight digit from 0 to 7. Every number represents with 0, 1, 2, 3, 4, 5, 6 and 7 in this number system. The base of the octal number system is 8 because it has only 8 digits. So there maximum value of digit is 7 and it cannot be more than 7.

42. Convert 110001 into octal notation

- (a) 49 (b) 59
(c) 51 (d) 61

MP Electrician Instructor 07.11.2016, Morning

HSSC wireman Instructor -17.12.2019, Shift-II

Ans : (d) First convert $(110001)_2$ into decimal.

$$1100001 = 1 \times 2^5 + 1 \times 2^4 + 0 \times 2^3 + 0 \times 2^2 + 0 \times 2^1 + 1 \times 2^0 =$$

$$32 + 16 + 0 + 0 + 0 + 1$$

$$(49)_{10}$$

8	49	
	6	1

(61)₈

$$(110001)_2 = (49)_{10} = (61)_8$$

43. The ASCII code for CR (Carriage Return) in octal is

- (a) 10 (b) 12
(c) 11 (d) 15

HSSC Electrician Instructor -17.12.2019

KPSC Jr. Instructor 22.11.2018

Ans. (d) : 15 in octal is the ASCII code of CR and the binary number of CR is $(00001101)_2$. The decimal number of CR $(13)_{10}$, the hexadecimal number of CR $(0D)_{16}$ etc.

44. What would be the 8's complement of an octal number 42500?

- (a) 35200 (b) 35301
(c) 35300 (d) 35100

Punjab Wireman instructor-07.07.2013

Ans. (c) : Firstly find the 7's complement.

We obtain the 7's complement of an octal number by subtracting each digit from 7.

$$77777$$

$$- 42500$$

$$35277 \rightarrow 7's \text{ Complement}$$

We add 1 in 7's complement obtain the 8's complement

$$\begin{array}{r} 35277 \\ + \quad 1 \\ \hline (35300)_8 \rightarrow 8\text{'s Complement} \end{array}$$

 So, 8's complement of $(42500)_8$ is $(35300)_8$.

45. The octal representation of the binary bit string '01100101010101' _____ .
 (a) 052671 (b) 165252
 (c) 62525 (d) 356789

KPSC Instructor Electronic-25.06.2014

Ans : (c) Binary is the simplest kind of number system that uses only two digits of 0 and 1 (i.e. value of base 2).

The octal number system is a base-8 number system where the range of number is 0,1,2,3,4,5,6,7.

Octal digit	Binary code
0	000
1	001
2	010
3	011
4	100
5	101
6	110
7	111

So if you make each group of 3 bit of binary input number

$$\begin{array}{ccccccc} \overline{110} & \overline{010} & \overline{101} & \overline{010} & \overline{101} \\ 6 & 2 & 5 & 2 & 5 \\ (01100101010101)_2 = (62525)_{10} \end{array}$$

46. Convert 1585 from decimal to hexadecimal notation
 (a) 631 (b) 580
 (c) 67D (d) 63A

UKSSSC Tech. Electrical Instructor-21.11.2017

Ans. (a) : $(1585)_{10}$ to $(?)_{16}$

16	1585	
16	99	1
	6	3

$$(1585)_{10} = (631)_{16}$$

47. If A and B are the inputs of a half adder, the carry is given by _____.
 (a) A XOR B (b) A OR B
 (c) A AND B (d) A PXOR B

HSSC wireman Instructor -17.12.2019, Shift-II

Ans. (c) : If A and B are the inputs of a half adder, the carry is given by A AND B. While the sum is given by A XOR B.

48. There are three main logic operations.
 (a) AND, OR, NOT
 (b) XOR, AND, NOT

- (c) NAND, NOR, XOR
 (d) OR, NOR, XNOR

HSSC Electrician Instructor -17.12.2019

Punjab Wireman instructor-07.07.2013

Ans : (a) A logical operator is a symbol or word used to connect two or more expressions such that the value of the compound expression produced depends only on that of the original expressions and on the meaning of the operator. The main logical operators include AND, OR and NOT.

49. The ASCII code for the LF (Line Feed) in hexadecimal is

- (a) 0D (b) 0A
 (c) 0C (d) 0B

UPPCL Technical Grade-II (Shift-I) 27.03.2021

KPSC Jr. Instructor 22.11.2018

Ans. (b) : Line feed has ASCII code (\n or 0A) in hexadecimal. \n is hexadecimal in string and 10 in decimal. CR (Carriage Return) has hexadecimal (\n or 0D) and is 13 in decimal.

50. If the ASCII code of U is 01010101, then what will be the ASCII code of V?

- (a) 01010100 (b) 01010110
 (c) 01000110 (d) 01010111

UPPCL TG-II 25-01-2019 (Evening)

Ans : (b) The ASCII code of U is 85 in decimal system and the binary code of 85 is 01010101. While the ASCII Code of V is 86 in decimal and the binary code of 86 is 01010110, so the ASCII of V is 01010110.

51. If the ASCII code of W is 01010111, then what will be the ASCII code at X?

- (a) 01011001 (b) 01101000
 (c) 01011000 (d) 01011100

UPPCL TG-II 20-03-2021 (Shift-I)

Ans. (c) : The ASCII code of W is 01010111 then the ASCII code of X is.

$$\begin{array}{r} \boxed{1111} \leftarrow \text{Carry} \\ 01010111 \\ +1 \\ \hline 01011000 \end{array}$$

In binary addition $1 + 0 = 1$ and the value of $1 + 1$ would have been 0 but a carry is left in them which is added to the next digit.

52. Select the odd option from the following.

- (a) Parity (b) 1's complement
 (c) Checksum (d) CRC

GSSSB Electronic Instructor-21.01.2014

Ans : (b) In the options, parity, checksum, CRC (Cyclic Redundancy Check) are all three bit related to error detective. While 1's complement indicates that a given bit is obtained an inverting.

8.

Internet & Email

History of Internet

The ARPANET (Later renamed the internet) established a successful link between the university of California, Los Angeles and the Stanford Research Institute on October 29, 1969.

In year 1991 a user friendly internet interface was developed. Delphi was the first national commercial online service to offer internet connectivity in July 1992.

Wi-Fi was first introduced in 1997. The year is 1998 and windows 98 is released. Smartphone use is widespread in 2007. The 4G network is launched in 2009 now day internet is used by 3 billion people. By 2030 there are expected to be 7.5 billion internet users and 500 billion devices linked to the internet.

Advantages of the Internet :

- It is the best source of a wide range of information. There is no better place to conduct research than the internet.

- Online gaming, talking, browsing, music and TV are quickly becoming the most popular way to pass the time.
- Virtual shops where you may buy anything you want and need without leaving your house,
- Hundreds and thousands of newsgroups and service that keeps you updated with every tick of the clock, the internet is a source of the most recent news.

Disadvantages of the internet :

- Spending too much time on the internet is hazardous for the young generations health and leads to obesity.
- Children who use the internet develop an addiction, which is quite dangerous.
- It is now quite easy to decipher some one's chat or email messages thanks to the hacking community.

The Internet and World Wide Web

Internet Architecture Model

Internet Protocol (IP) Address

IPv4 and IPv6

IPv4	IPv6
1. IPv4 has a 32-bit address length.	1. IPv6 has a 128-bit address length.
2. It supports manual and DHCP address configuration.	2. It supports Auto and renumbering address configuration.
3. It can generate 4.29×10^9 address space.	3. Address space of IPv6 is quite large it can produce 3.4×10^{38} address space.
4. Address representation of IPv4 is in decimal.	4. Address representation of IPv6 is in hexadecimal
5. In IPv4 checksum field is available.	5. In IPv6 checksum field is not available.
6. It has broadcast message transmission scheme.	6. In IPv6 multicast and any cast message transmission scheme is available.
7. IPv4 has a header of 20-60 bytes.	7. IPv6 has header of 40 bytes fixed.
8. Example -192.0.2.1.	8. Example – 2001 : 0db8 : 85a3 : 0000 : 0000 : 8a2e : 0370 : 7334

Class of IP addresses

Address Class	Address Range	Default subnet Mask	Bit Assignment
Class A	1.0.0.0 to 126.255.255.255.	255.0.0.0	7 Bit 0 24 Bit Network Host
Class B	128.0.0.0 to 191.255.255.255	255.255.0.0	14 Bit 1 0 16 Bit Network Host
Class C	192.0.0.0 to 223.255.255.255	255.255.255.0	21 Bit 1 1 0 8 Bit Network Host
Class D (Multicast)	224.0.0.0 to 239.255.255.255	Reserved for Multicasting	28 Bit 1 1 1 0 Host
Class E (Reserved)	240.0.0.0 to 254.255.255.255	Experimental	28 Bit 1 1 1 1 Host

Internet and World Wide Web

Internet	World Wide Web (WWW)
1. Internet is a means of connecting a computer to any other computer anywhere in the world.	1. World Wide Web (WWW) which is a collection of information which is accessed via the internet.
2. It is originated sometimes in late 1960s.	2. Tim Berners-Lee invented the World Wide Web (WWW) in 1989.
3. The first version of the internet was known as ARPANET.	3. In the beginning WWW was known as 'NSFNET'.
4. Internet uses IP Address.	4. WWW uses HTTP.
5. Internet is primarily hardware based.	5. WWW is more software oriented as compared to the internet.

E-mail (Electronic Mail)

E-mail is a popular feature of the Internet. It is a cheap, fast and reliable medium of exchanging Messages, Videos, Images, Graphics etc. It is a client/server application that provides a routed, stored message service between two e-mail accounts. With modern computers connected to the Internet, users can send e-mail from any location.

Structure of E-mail:

E-mail messages are composed of binary data, most often in ASCII (American Standard Code for Information Exchange).

In 'To', you type the e-mail address of the recipient of the email message and in 'From' your e-mail address appears. In 'Subject' you can type the subject or summary of your e-mail. At the bottom of the message, there is a 'Signature' area where you can put any personal information about yourself. There are five parts of an e-mail message—

- e-mail address
- Header
- Body
- Signature (optional)
- Attachments (optional)

E-mail Addressing—

To send or receive any e-mail user's e-mail address is very necessary. It is made up of two different parts—

1. User Name
2. Domain Name

1. **User Name**– This is the personal identity on the mail server given by the user, which can be used only once on a server. This is called the @ (at the rate) symbol which is automatically added to the e-mail.
2. **Domain Name**– This is the name of the server on which you want to create your e-mail account.

Header–

It contains the date and time of sending message, the subject of message, carbon copy (CC) and information related to the attached files and the e-mail address of the sender. Following are the header fields related to message transport which are required for the users of e-mail facility–

Name	Function
To	Email address of primary recipient
CC	The email address of the secondary recipient to whom copied email is send.
From	E-mail Address of sender
BCC	The email address of the secondary recipient to whom a copy of the email is being forwarded, but the primary recipient is not aware that the email has been received by someone else.
Sender	E-mail Address of Original Sender
Received	Transfer Agent's Identity, Message Received date and time etc.
Return Path	It is used to identify the return path to the sender

Following are some other header fields, which are not necessary but are used if required–

- **Date**– Date and time of sending message.
- **Reply To**– The e-mail address to reply to.
- **In Reply-to**– Identification number of these replied messages.
- **Message ID**– A unique number to identify the message.
- **Reference**– Identification number of the other message.
- **Keywords**– User selected keywords.
- **Subject**– A one-line display of the message is being sent.
- **Body**– It contains the text of the e-mail message and the icon of the attachment. This is the primary location of the entire e-mail.
- **Attachments**– Attachments can be sent by adding text, table, graphics, animation, audio or video to any file with an e-mail. It Contains personal information of the sender which is optional.

- **Bounce mail**– When an e-mail is sent, if it does not reach the intended destination, then that e-mail comes back to the sender, it is called bounce mail.

Signature–

Signature is personal information in email message that appears automatically at the bottom of the outgoing message.

Carbon Copy–

To send the message through CC to more than one recipient, their e-mail address is written in Carbon Copy (CC). Under this, the person receiving the message from the mentioned e-mail address also gets to know that apart from him, who else has received this message.

Blind Carbon Copy–

BCC (BCC), it is exactly like CC, the only difference is that in BCC, the recipient does not know which other people have received this message.

The header displays the following information–

- Date and time of the message.
- Message subject
- Where carbon copies have been sent.
- Files attached to messages
- Sender's e-mail address

Configuring E-mail Client–

E-mail address can be changed only by configuring the e-mail client. Agents are registered with the software to access e-mail.

Outlook 2010, included with Internet Explorer 8.0, is the e-mail program through which we can communicate all over the world.

Using E-Mail:

Through e-mail, users can send or receive data anywhere in the world. Any user can access e-mail in two ways. First through e-mail client and second through web based e-mail pattern.

Opening an E-mail Account:

To send e-mail, you must have an e-mail account. There are many free websites and web portals available on the Internet to open an e-mail account, using which you can open an account. Some of these are as follows–

- www.hotmail.com
- www.yahoo.com
- www.gmail.com
- www.msn.com
- www.rediffmail.com

Mailbox:Inbox and Outbox:

A mailbox is the storage area of an e-mail account that holds received e-mail, sent e-mail, and some additional e-mail folders. As soon as an e-mail arrives at the mailbox, the e-mail software automatically stores it in the user's mailbox and stores it until the user reads it.

In this, recently received messages are at the top and old messages are at the bottom. You can sort the message list by clicking on any field header (From, Subject, Receive etc.).

The Outbox is the part of the e-mail account that stores e-mails that have not been fully delivered. Once done, it is moved out of the Outbox and stored in the Sent Item.

You can view the contents of the outbox and edit them before sending.

■ Editing messages in Outbox

- Click on Outbox in the Folder pane to select it.
- Double-click the message header in the message list pane.
- An edit window is displayed and you can edit the message in it.
- After clicking on Send, it goes back to Outbox.
- It prompts to connect, click on Cancel.
- Sending a message from outbox.

- Click on the Send/Receive tab and select the message you want to edit.
- When offline it prompts the user to go online, click on yes and then click on Connect.
- After clicking on the Connect button, the message is sent to the recipient address.

Logging In of an E-mail account–

After creating e-mail account, the user can sign in, that is, by opening the e-mail account, user can see their e-mail.

For this, go to the homepage of the web site where you have your e-mail account. There will be a dialog box display for Sign in, after entering your e-mail ID and Password, your Gmail box will open. After successful login, you can view the e-mails in your inbox.

Important Questions Asked in Previous Years Examinations

1. Which of the following terms is a world-wide network of computers also known as network of networks?

- (a) VLAN (b) MAN
(c) Internet (d) World Wide Web

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (c) : The internet is a World Wide Network of computers which is also called a network of networks.

2. Which icon is used to add an attachment to an email?

- (a) Stationary icon (b) Paper clip icon
(c) Emoji icon (d) None of these

UPPSC APS-2023, 07.01.2024

Ans. (b) : Paper clip icon is used to add an attachment to an email.

3. If you are replying to an email, which of the following fields are filled in automatically?

- (a) "To" and "From" field both
(b) Only "From" field
(c) Neither "To" field nor "From" field
(d) Only "To" field

UPPCL TG-II 27-03-2021 (Shift-II)

Ans. (a) : If an email user wants to reply an email then he would filled "To" and "From" field both automatically.

To → Email address of receiver

From → Email address of sender

4. Which of the following refers to learning with the aid of technology that enables to learn anytime or anywhere?

- (a) E-banking (b) E-learning
(c) E-commerce (d) Email

UPPCL TG-2, 09.11.2023, Shift-II

Ans. (b) : The system of learning based on formal education but with the help of electronic resources is called e-learning, in this the teaching work can be done anywhere, anytime using computer and internet.

In e- learning, education is delivered to a large number of recipients at the same or different times.

5. Which of the following is called mail program, mail application or mail client and allows you to manage, read and compose email?

- (a) Mailer
(b) Mailbox
(c) Mail engine
(d) Mail server

UPPCL TG-2, 09.11.2023, Shift-I

Ans. (a) : Mailer is a program or service that sends an e-mail to one or more receivers. It allows users to manage, read, write e-mail. Mailer's other name can be called mail client or mail application.

6. In Gmail, email messages can be categorized by using ____.

- (a) spaces (b) notes
(c) labels (d) folders

UPPCL TG-2, 07.11.2023, Shift-I

Ans. (c) : Labels are types of tag in Gmail that helps, organizes emails into different categories. This allows you to associate your email with specific topics, projects or people and makes it easier to search.

7. What does HTTPS stand for?

- (a) Hyper Text Transport Protocol Secure
(b) Hyper Text Transfer Protocol Secure
(c) Hyper Transfer Tariff Protocol System
(d) Hyper Transport Tariff Protocol System

EMRS JSA, 17.12.2023, Shift-II

ARO Alld. HC, 06.01.2022, Shift-I

SSC JE Electrical (Exam date 10.12.2020) Shift-II

Ans. (b) : HTTPS is short form of Hyper Text Transfer Protocol Secure. It is the secure version of HTTP. It is used to secure communication internet.

8. Match the points under the column 'LIST-I to those under the column 'LIST-II'.

List-I	List-II
a) Email server	i) A free email (Webmail) tool provided by Microsoft
b) LinkedIn	ii) Postfix
c) Orkut	iii) A social networking portal for business professionals
d) Hotmail	iv) The service was designed to help users meet new and old friends.

- (a) a-ii, b-iii, c-i, d-iv (b) a-iii, b-ii, c-iv, d-i
(c) a-ii, b-iii, c-iv, d-i (d) a-ii, b-iv, c-iii, d-i

UPPCL Assistant Accountant 31.07.2023, Shift-II

Ans. (c) : Postfix is a hugely-popular Mail Transfer Agent (MTA) designed to determine routes and send emails. LinkedIn is a social networking site or portal designed specifically for the business community/professionals. Orkut was a social networking service owned and operated by Google. This service was designed to help users meet new and old friends and maintain existing relationships. Accounts such as hotmail, outlook, MSN etc. are provided by Microsoft.

9. Verification of a login name and password on a computer is known as.....

- (a) Authentication (b) Synchronization
(c) Identification (d) Accessibility

UPPSC APS-2023, 07.01.2024

UPASI 04.12.2021 (Shift-II)

Ans. (a): The process of verifying the login name and password is known as authentication.

10. Which of the following website addresses takes you the login page of Gmail?

- (a) google/com
(b) path://1145:www/pictures.au
(c) https://mail.google.com
(d) 8002a://www.html

UPPCL TG-2, 10.11.2023, Shift-I

Ans. (c) : https://mail.google.com website address leads to the Gmail log in page.

- The myaccount.google.com address takes you to the Gmail sign in page.

11. Which of the following is a computer based application for exchanging message between users?

- (a) e-kyc (b) e-mail
(c) e-aadhar (d) e-sharm

Bihar PGT TRE 2.0, 15.12.2023

UPPCL TG-2, 17.11.2023, Shift-II

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (b) : Email is a computer based application. It allows an internet user to send a message in formatted manner (mail) to the other internet user in any part of world. In email, any high-speed communication equipment typically would not be needed.

12. If you use a font that is not supported by the browser, the original text

- (a) Will be the one displayed using only the 'Arial' font
(b) Will be displayed with a distinctive background
(c) Will display in default font
(d) Will not be displayed

S.S.C. CPO Exam, 2012

Ans : (c) If we use a font which is not supported by the browser, then the original text will be displayed in the default font.

13. Which among the following is used to navigate through hypermedia structures?

- (a) Nodes (b) Keys
(c) None of these (d) Buttons

UPPCL ARO-18.02.2018

Ans. (a) : Nodes are used to navigate or transfer data from one place to another, through hypermedia structures.

14. Which among the following notation is usually used to represent an IP address in under stable format?

- (a) Binary notation
(b) Hexadecimal notation
(c) Dotted-decimal notation
(d) Octal notation

Delhi Police Constable 07.12.2020 (Shift-I)

Ans. (c) : Dotted-decimal notation is usually used to represent an IP address in an under stable format. IP address is written most of the times in dotted-decimal notation.

15. In email, to search for messages after 02/22/2021, which of the following options should be entered?

- (a) newer than : 02/22/2021
(b) newer : 02/22/2021
(c) after than : 02/22/2021
(d) after : 02/22/2021

UPPCL ARO 25.02.2022 (Shift-II)

Ans. (d) : To find emails after a specific date use YYYY/MM/DD . For ex. if you are trying to find emails before or after September 1, 2021 type before: 2021-09-01 or after: 2021-09-01 in the search bar and press enter. You can combine the two keywords to find emails between two dates.

16. Which of the following options is the correct sequence to print an entire web page in Google Chrome browser?

- (a) Open the web page -> Press Ctrl + A -> Right click on the page and left click on 'Print'
- (b) Open the web page -> click on page Setup -> Click on the 'Print' icon
- (c) Open the web page -> Press Ctrl + S -> Right click on the page and left click on 'Print'
- (d) Open the web page -> Click on Print Preview -> Click on the 'Print' icon

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (a) : To print the entire webpage in Google Chrome browser use the following procedure:

- Open the web page
- Use/press Ctrl + A shortcut key
- Right click on the page and left click on print.

17. In the context of searching content on the Internet which of the following facts is NOT true?

- (a) Use quotation marks
- (b) Use complex search terms
- (c) Use specific keywords
- (d) Vary your search engine

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (b) : We can use quotation marks, choose specific keywords and change our search engine to search for content on the Internet but we can not use complex term in browser.

18. Which of the following is true with respect to Local Area Network?

- (a) LAN can be operated only on client/ server technology
- (b) It connects devices that are in a single limited area
- (c) It is a combination of devices connected in different countries
- (d) WAN cannot connect multiple LANs simultaneously

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (b) : LAN is the short form of Local Area Network. It connects devices which are available in a single or limited area with the help of LAN.

LAN can share data at speeds ranging from 10 Mbps to 1000 Mbps. Data transmission speed is higher in LAN network because the range of LAN network is limited to a fixed area.

19. Which of the following layer is not available in five - layered internet architecture?

- (a) Transport
- (b) Data Link
- (c) Session
- (d) Application

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (c) : TCP/IP has five different layers those are followings -

- Application Layer
- Transport Layer
- Internet Layer
- Data Link Layer
- Physical Layer

Therefore, session layer does not come under five layer internet architecture.

20. What is the full form of IAB in the context of the internet?

- (a) Internet Architecture Board
- (b) Internet Actual Blacklist
- (c) Internal Architecture Board
- (d) Internet Architecture Bureau

UPPCL Technician Electrical, 03.11.2023, Shift-II

Ans. (a) : The full form of IAB is Internet Architecture Board. It is "a committee of the Internet Engineering Task Force (IETF) and an advisory body of the Internet Society (ISOC).

21. In the context of Internet, what is the full form of ARPANET?

- (a) Advanced Research Planning Agency Network
- (b) Automatic Research Projects Agency Network
- (c) Advanced Remedial Projects Agency Network
- (d) Advanced Research Projects Agency Network

EMRS PGT CS, 16.12.2023, Shift-II

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (d) : In the context of internet full form of ARPANET is Advanced Research Projects Agency Network.

22. Almost every search engine user programs or automated scripts called _____ to systematically browse the World Wide Web and index them in a local repository.

- (a) Crawler
- (b) Adware
- (c) Spooler
- (d) Spyware

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (a) : A web crawler or web spider is a computer program that is used to search and automatically index website content and other information over the internet.

23. Which of the following statements regarding the Internet is incorrect?

- (a) It is a global network that connects billions of computers around the world.
- (b) It uses TCP/IP protocol.
- (c) It is different from the World Wide Web.
- (d) It is a collection of web pages which are accessed through a browser.

UPPCL TG-2, 10.11.2023, Shift-I

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (d) : Internet is an international network of computers which is called a network of networks. The Internet is a global system of interconnected computer networks that uses the Internet Protocol Suite (TCP/IP) to communicate between networks and devices. It is a wide area network and is a collection of World Wide Web pages.

24. Find out whether the given statements are true or false.

(i) WWW is a worldwide network of devices like computers, laptops, tablets etc.

(ii) The Internet is a collection of websites or web pages stored on web servers and connected to local computers.

(a) (i)- false, (i)- true (b) (i)- true, (ii)- false

(c) (i)- false, (ii)- false (d) (i)- true, (ii)- true

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (c) : The World Wide Web is an interconnected system of public web pages accessible via the Internet. The World Wide Web follows the client-server model. The World Wide Web provides features such as hypertext information system, cross-platform, distributed, open standards, open-source, etc. British scientist Tim Berners-Lee invented the World Wide Web in 1989.

The Internet is a global system of interconnected computer networks that uses the Internet Protocol Suite TCP/IP to communicate between devices and networks. Internet is a global network of computers. Hence, both the given statements are false.

25. DNS (Domain Name System) comes under which of the following services of the Internet?

(a) Communication (b) Directory

(c) WWW (d) Information retrieval

UPPCL TG-2, 17.11.2023, Shift-II

UPPCL TG-2, 07.11.2023, Shift-II

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (b) : DNS (Domain Name System) comes under the service of Internet Directory. The Domain Name System (DNS) is a naming database in which Internet domain names are located and translated into Internet Protocol (IP) addresses. The Domain Name System has been an essential component of the functionality of the Internet since 1985.

26. Which of the following types of computing is used in the defense industry?

(a) Farmacy Management Software

(b) Library manager

(c) GPS tracking

(d) e-banking

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (c) : GPS tracking monitors location through the use of the Global Positioning System (GPS) to remotely track the location of an entity or object. GPS technology is used for a wide variety of military missions, including precision-guided, munitions strikes, force tracking, search and rescue, and remote piloting of unmanned aerial vehicles.

27. Which of the following is not proper internet etiquette?

(a) You can forward unwanted messages

(b) You should include your name at the bottom of the mail

(c) You should use abbreviations wisely

(d) Attachments should be small

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (a) : Internet etiquette, often referred to as "netiquette", It refers to a set of guidelines and social norms for polite and respectful behavior when using the internet, especially in online communications. Here are some proper internet etiquette -

→ You should include your name at the bottom of the mail.

→ You should use abbreviations wisely.

→ Attachments should be small.

→ Think before you post.

28. Which of the following is NOT a netiquette?

(a) Respect others' privacy.

(b) Don't spam.

(c) Mention your name and address everywhere.

(d) Review what you wrote and try to interpret it objectively.

UPPCL-TG-2, 07.11.2023, Shift-I

Ans. (c) : Netiquette refers to the rules of personal and social conduct on the Internet. It summarizes how to behave harmoniously and appropriately for everyone in situations where people meet online. Sharing your name, address and ID everywhere does not come under netiquette.

29. Which of the following entities is not an Internet Service Provider (ISP) in India?

(a) HSBC

(b) BSNL

(c) TATA Communications

(d) MTNL

UPPCL Executive Assistant 28.11.2022, Shift-II

Ans. (a) : HSBC institution is a foreign banking institution in India.

30. Find out which of the following in the content of internet are the statements true or false?

(i) Two recent adaptations of internet technology are the intranet and the extranet.

(ii) The internet currently utilizes a portion of the total resources of the existing public telecommunication networks.

(a) (i) True (ii) False (b) (i) True (ii) True

(c) (i) False (ii) True (d) (i) False (ii) False

UPPCL Executive Assistant 29.11.2022, Shift-II

Ans. (b) : Internet is a world wide network of computers. It consists of many local, national and international networks and all these networks are interconnected. It currently uses a portion of the total resources of the existing public telecommunications network. Two recent adaptations of internet technology are the intranet and the extranet.

31. Which of the following is NOT a governing body of the internet?

- (a) Internet Research Task Force (IRTF)
- (b) Internet Engineering Task Force (IETF)
- (c) Internet Assigned Task Authority (IATA)
- (d) World Wide Web Consortium (W3C)

UPPCL TG-2, 09.11.2023, Shift-II

Ans. (c) : Internet governance involves a system of laws, rules and policies that determine how regulatory bodies manage and oversee the affairs of the internet such as IRTF, IETF, W3C, while Internet Assigned Task Authorities are not concerned with internet governance.

32. Which of the following includes core web interest groups, such as web browser developers, government agencies, researchers and universities?

- (a) Internet Research Task Force
- (b) Internet Engineering Task Force
- (c) World Wide Web Consortium
- (d) Internet Architecture Board

UPPCL Executive Assistant 29.11.2022, Shift-II

Ans. (c) : World Wide Web Consortium is an international organization. It was founded in 1994 by Tim Berners-Lee. This mainly includes core web interest groups such as web browser developers, government institutions, researchers and universities etc.

33. Which of the following keyboard shortcuts can be used in Google Chrome to open a link in a new window?

- (a) Alt + click a link
- (b) Double click a link
- (c) Shift + click a link
- (d) Ctrl + click a link

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (c) : Shift + click a link keyboard shortcuts can be used in Google Chrome to open a link in a new window.

34. Which of the following symbols is used to leave a placeholder that may be automatically filled by the search engine later while searching?

- (a) Asterisk (*)
- (b) Hyphen (-)
- (c) Colon (:))
- (d) Plus (+)

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (a) : The asterisk wildcard will leave a placeholder that will be filled automatically by the search engine. This wildcard is an easy way to find a parameter if we don't know all the words.

35. Which of the following statements is incorrect regarding the internet?

- (a) Internet and World Wide Web are the same
- (b) Every computer connected to the internet is identified by an IP address
- (c) A computer connected to the internet is called a client
- (d) Internet works with the help of clients and servers

UPPCL Executive Assistant 28.11.2022, Shift-I

Ans. (a) : The full form of the internet is an interconnected network. It was developed by Bob Kahn and Vint Cerf in 1969. The network of networks are called internet and its information and data exchanged through this medium. The World Wide Web is a service of the internet. Through this web pages are received in which text, images, audio, video and other multimedia are also available. Statement (a) is false regarding internet.

36. Which of the following statements is correct about the Internet?

- (a) Internet and World Wide Web are the same.
- (b) It is collection of web pages that is accessed through browsers.
- (c) It uses the TCP/IP protocol.
- (d) It is a private network that connects computers of an organisation.

UPPCL Executive Assistant 25.11.2022, Shift-II
APS All. HC, 22.12.2021, Shift-I

Ans. (c) : The Internet is a global network of interconnected computers and servers that allows people all over the world to communicate, share information, access resources and engage in various online activities. It facilitates the transfer of data through a system of protocols, including TCP/IP, enabling services like web browsing, email, social media and much more.

37. What is the full form of PDN?

- (a) Pocket Data Network
- (b) Packet Data Network
- (c) Packet Discharged Network
- (d) Pocket Discharged Network

UPRVUNL Asst. Acct. 15.05.2022 (Shift-II)

Ans. (b) : PDN stands for Public Data Network or Packet Data Network. This is a generic term for a network providing data services as Internet and Intranet.

38. Internet, initially started as—

- (a) TCP/IP experiment
- (b) Network for the defense force of America
- (c) Group of research scientists of Bell Lab
- (d) Contribution was done by all the above institutions

(RRB JE-2014)

Ans : (b) The first workable prototype of the internet came in the late 1960s with the creation of ARPANET or the Advanced Research Projects Agency Network. Originally funded by the U.S. Department of defense, ARPANET used packet switching to allow multiple computers to communicate on a single network. It was started by Videsh Sanchar Nigam Limited (VSNL) on August 15 1995.

39. The evolution of IOT started with the first connected network called _____.

- (a) ARPANET
- (b) TCP
- (c) IoT
- (d) SMTP

UPPCL TG-2, 09.11.2023, Shift-II

Ans. (a) : Internet and IoT originated in 1962, J.C.R. Lickliter, head of the Defense Advanced Research Projects Agency (DARPA), envisioned a galactic network of interconnected sets of computers, later evolving into the Advanced Research Projects Agency Network (ARPANET) in 1969.

40. With reference to Host to Host layer, which among the following is/are NOT its protocols?

A. Transmission Control Protocol

B. User Datagram Protocol

- (a) Both A and B (b) Only A
(c) Only B (d) Neither A nor B

UPRVUNL Asst. Acct. 15.05.2022 (Shift-II)

Ans. (d) : Host to Host layer is the layer just above the internetwork, which is responsible for end to end data integrity. The two most important protocols operating at this layer are Transmission Control Protocol (TCP) and User Datagram Protocol (UDP).

41. Which of the following statements is INCORRECT with reference to TCP/IP model?

- (a) TCP/IP follows a horizontal approach.
(b) TCP/IP has seven layers
(c) TCP/IP is more reliable when compared to OSI model
(d) TCP refers to Transmission Control Protocol

UPRVUNL Asst. Acct. 15.05.2022 (Shift-II)

Ans. (b) : The TCP/IP (Transmission Control Protocol/Internet Protocol) model follows a horizontal approach and has 5 layers.

- Physical Layer • Link Layer or Network Access Layer
- Network Layer • Transport Layer
- Application Layer

42. Which of the following WAN technology is a method of data transmission in which a message is divided into several Parts called packets and is sent independently, in triplicate, over the same route as each packet that is optimized for and reassembled at the destination?

- (a) Packet over SONET (b) Overlay network
(c) Circuit switching (d) Packet switching

UPPCL Executive Assistant 28.11.2022, Shift-II

Ans. (d) : Packet switching is a method of transferring data by dividing it into multiple parts called packets.

43. Which of the following switching technology is used by the internet?

- (a) Telephone Switching (b) Packet Switching
(c) Circuit Switching (d) Telex Switching

UPPCL TG-II 19-03-2021 (Shift-II)

Ans. (b) : Packet switching technology is used by the Internet. Packet switching is a method of transferring data in the form of packets across different networks. In order to transfer files over the network in a fast and efficient manner and reduce transmission latency, data is divided into smaller pieces of variable length, called packets.

44. A small text file created by a website that is stored in the user's computer temporarily for that session is called _____

- (a) bug (b) cache
(c) cookie (d) malware

UPPSC APS-2023, 07.01.2024

UPPCL TG-2, 07.11.2023, Shift-II

RRB NTPC 08.01.2021 (Shift-I) Stage Ist

Ans. (c) : A cookie is information that a website puts on a user's computer. Cookies store limited information from a web browser session on a given website that can be retrieved in the future. They are also sometimes referred to as browser cookies, web cookies or internet cookies.

45. IP serves as a focal point for the internet protocol architecture, it defines a common method for exchanging _____ between a wide collection of networks.

- (a) message (b) Packet
(c) package (d) Information

ARO Alld. HC, 06.01.2022, Shift-I

UPPCL TG-II 27-03-2021 (Shift-I)

Ans. (b) : IP serves as the focal point for the architecture, it defines a common method for exchanging packets among a wide collection of networks. Above IP there can be arbitrarily many transport protocols, each offering a different channel abstraction to application programs.

46. Hangouts is a communications platform that combines video calling, voice calling and text-based messaging into a single service. It is developed by:

- (a) Oracle (b) Google
(c) IBM (d) Apple

UPSSSC JE 2018 (Exam date 16.04.2022)

Ans. (b) : Hangout is a free video chatting and messaging app developed by Google. It is available on Android and iOS platforms. But it is currently replaced by Google chat.

47. Which of the following statements is INCORRECT about plug-ins?

- (a) Adobe Flash is an example of an application that is available as a plug-in Adobe Flash
(b) They are applications intended for use in a web browser
(c) Plug-ins are similar to Active X controls
(d) Plug-ins can be executed outside of a web browser

UPPCL Assistant Accountant 25-02-2022 (Shift-I)

Ans. (d) : Out of the above options, (d) is incorrect because Adobe Flash Plug-ins available as application can't be executed outside the web browser. Adobe Flash Player (formerly known as Macromedia Flash Player and Shock web Flash in Internet Explorer, Firefox and Google Chrome) Flash player can run from a web browser as a browser plug-in or an supported mobile devices.

48. Which among the following is/are NOT types of website hosting?

- A. Shared hosting
- B. Dedicated server
- C. Grill hosting
- (a) None of the given options
- (b) Only B
- (c) Only A
- (d) Only C

UPRVUNL Asst. Acct. 15.05.2022 (Shift-II)

Ans. (d) : Web Hosting is a service that allows an individual or organization to post their website or webpage on the internet.

Types of web hosting–

1. Shared Web Hosting
2. Dedicated Hosting
3. Virtual Private Server (VPS)
4. Cloud Web Hosting
5. Grid Hosting

49. Which of the following is NOT a web browser?

- (a) Mozilla Firefox
- (b) Google Chrome
- (c) iTunes
- (d) Microsoft Edge

UPPCL TG-2, 10.11.2023, Shift-I

Ans. (c): Mozilla Firefox, Google Chrome and Microsoft Edge are all three web browsers while iTunes is an e-financial card provided by Apple Inc. company. With the help of this card, users can make purchases from the iTunes Store on various topics like audio, video, apps and games

50. What do the following icons represent?

- (a) Web browsers
- (b) Websites
- (c) Web documents
- (d) Web windows

UPPCL TG-2, 10.11.2023, Shift-I

UPPCL TG-2, 09.11.2023, Shift-I

Ans. (a) : Web browsers are application software for exploring the World Wide Web. It provides an interface between the server and the client and it requests web documents and services from the server. The symbols given above represent Google Chrome, Opera, Mozilla Firefox, and Safari respectively, which are examples of web browsers.

51. Which of the following is web browser software?

- (a) Ubuntu
- (b) Linux
- (c) Vivaldi
- (d) ChromeOS

UPPCL TG-2, 8.11.2023, Shift-I

UPPCL Assistant Accountant 31.07.2023, Shift-II

Ans. (c) : The name of a freeware, cross-platform web browser with a built-in e-mail client is Vivaldi, while Ubuntu, Linux and ChromeOS are operating systems.

52. Which of the following is NOT an internet browser?

- (a) Panda
- (b) Safari
- (c) Firefox
- (d) Chrome

RRB NTPC 27.02.2021 (Shift-II) Stage Ist

Ans. (a) : Panda is not an internet web browser. Several types of web browsers are:

1. Chrome
2. Opera
3. Safari
4. Mozilla Firefox
5. Internet Explorer

53. Which of the following statements is incorrect regarding the internet?

- (a) The standard Internet Protocol is used in internet is called Hyper Text Markup Language (HTML).
- (b) There is no centralized administration for the internet for accessing and using whether for technical implementation or policies.
- (c) Internet has millions of small domestic, education, commercial and government networks.
- (d) Internet is a collection of computers that shares information.

Ans. (a) : The internet is a global system for interconnected computer networks that use the internet protocol suite (TCP/IP) for communications between networks and devices. It includes private, public, educational, business, networks while HTML is a language used to create web pages.

54. In order to transfer files between two computers located at distant places, whom should be they connected?

- (a) Internet
- (b) Hub
- (c) Repeater
- (d) Modem

UPPCL (TG-II) 24-01-2019 (EVENING)

Ans : (a) The Internet is the global system of interconnected computer network that uses the internet protocol suite (TCP/IP) to communicate between network and devices. It is a network of networks that consists of private, public, academic, business and government networks of local to global scope.

55.is a global system of interconnected governmental, academic, corporate, public, and private computer networks.

- (a) Intranet
- (b) Internet
- (c) Extranet
- (d) Darknet

(SSC 10+2 CHSL 31.01.17, 1.15 pm)

Ans : (b) See the above question 12 explanation.

56. Which of the following is defined as a network connecting multiple networks that connect users from every country in the world?

- (a) Intranet
- (b) WWW
- (c) Internet
- (d) Home page

UPPCL TG-II 20-03-2021 (Shift-I)

Ans. (c) : See the above question explanation.

57. _____ is the actual telephone call between people on the internet.
 (a) E-Telephony (b) Internet Telephony
 (c) Chatting (d) E-Calling

RRB NTPC, (Shift -I) Online, 07.04.2016

Ans : (b) Internet telephony software essentially provides free telephone calls anywhere in the world. The full name of Internet is International Network. Internet telephony is also called IP telephony or broadband telephony.

58. _____ formally launched the first publicly available internet service for India in August 1995.

- (a) VSNL (b) Aircel
 (c) Airtel (d) BSNL

SSC JE Mechanical – 22/03/2021 (Shift-II)

Ans : (a) It was on August 15, 1995 Videsh Sanchar Nigam Limited formally launched the Internet for the Indian Public.

59. Google Search allows you to search by:

1. Text 2. Voice 3. Image

- (a) Only 1 is true
 (b) Only 1 and 2 are true
 (c) Only 2 and 3 are true
 (d) All 1, 2 and 3 are true

ARO Aild. HC, 06.01.2022, Shift-I

Ans. (d) : By Google search engine you can search something by adopting a method among text, voice or image. Hence, Google allows you to search by these three methods.

60. Which of the following is an example of search engine?

- (a) Internet explorer (b) Google
 (c) Mozilla Firefox (d) Opera Mini

UPASI 04.12.2021 (Shift-I)

Ans. (b) : Google is an example of a search engine. It is owned by Google LLC. Google Android operating System is currently providing Services like Android TV, Cloud computing. It was established on September 4, 1998 in California, while internet Explorer, Mozilla Firefox and Opera mini are examples of web browsers.

61. Ashish has to prepare a PowerPoint presentation on 'Greenhouse Effect'. He wants to find information on the topic from the Internet. Which of the following will help him to find the relevant data?

- (a) Operating system (b) MS-Word
 (c) MS-Excel (d) Search engine

UPPCL TG-2, 09.11.2023, Shift-I

Ans. (d) : If Ashish has to prepare a PowerPoint presentation on 'Greenhouse Effect' and he wants to get information on this topic from the internet, then he should use a search engine because a search engine is a software system which finds pages similar to web search that contain the information specified in the query organised on the world wide web.

62. It is believed that the Internet was developed by DARPA explain the full form of DARPA?

- (a) Defense Active Research Projects Agent
 (b) Different Advanced Research Projects Agency
 (c) Defense Advanced Research Projects Agency
 (d) Defense Advanced Review Projects Agent

UPPCL Executive Assistant 28.11.2022, Shift-I

Ans. (c) : The full form of DARPA is Defense Advanced Research Projects Agency. It is a USA government agency. It prepares and executes research and development projects to expand the boundaries of technology and science. It is believed that the Internet was developed by DARPA.

63. What is the full form ARPANET

- (a) American Research Planning Agency Network
 (b) American Research Project Agency Network
 (c) Advanced Research Project Agency Network
 (d) Advanced Research project Activity Network

Delhi Police Constable 10.12.2020 (Shift-I)

Ans. (c) : The full name of ARPANET is Advanced Research Projects Agency (ARPA) a branch of the U S Department of Defense funded the development of the Advanced Research Project Agency Network (ARPANET) in the late 1960s. Its Initial purpose was to connect research institutions eventually became the internet was first called ARPANET, funded by the Pentagon by telephone lines.

64. The network that eventually became the internet was first called :

UPPCL Technician Electrical, 10.11.2023, Shift-II

- (a) WAN (b) MAN
 (c) LAN (d) ARPANET

Ans. (d) : See the above question explanation.

65. Consider the following events and arrange these in correct chronological order starting from the earliest to last activity –

- (i) ARPA (ii) WWW
 (iii) Hypertext (iv) TCP/IP

Select the correct option from the code given below –

- (a) iv, iii, ii, i (b) iii, i, iv, ii
 (c) i, iv, iii, ii (d) ii, i, iv, iii

UPPSC APS-2023, 07.01.2024

Ans. (b) :

- (i) ARPA - 1969
 (ii) WWW - 1989
 (iii) Hypertext - 1965
 (iv) TCP/IP – 1983

Correct chronical order from starting is (iii), (i), (iv), (ii).

66. Servers are computers that provide resources which are connected to a.....

- (a) client (b) network
 (c) supercomputer (d) Mainframe

SSC JE Electrical (Exam date 29.01.2018) Shift-I

Ans. (b) : A server is a computer program or device that provides a service to another computer connected to a network. A client is a system that uses remote services from a server. A computer network is a set of computers sharing resources located on or provided by network nodes.

67. The application used for viewing web pages is known as.....
- (a) MS Word (b) Browser
(c) Email (d) PowerPoint

UPPCL TG-2, 07.11.2023, Shift-II
UPASI 04.12.2021 (Shift-II)

Ans. (b) : Browser is a computer program that enables the internet users to access, navigate and search world's web sites. Browsers interpret hyper text links and allow documents formatted in HTML to be viewed on the computer screen and provide many other services. There are many types of browser like Google Chrome, Microsoft Edge, Mozilla Firefox, Safari etc.

68. The first network that planted the seeds of internet was-
- (a) ARPANET (b) NSFNET
(c) VNET (d) INET

ARO Alld. HC, 16.12.2021, Shift-II
(UPPCL TG-2 26.06.2016)

Ans : (a) A group of interconnected computers is called internet. The US department of defense ARPANET (Advanced Research Project Agency Network) was a network that formed the basis of the internet. In 1970, the size of the network was increased with the help of TCP/IP protocol.

69. _____ was the network that became the basis of the internet.
- (a) Arpanet (b) Cluster
(c) HTTP (d) SSID

SSC CHSL (Tier-I) –08/07/2019 (Shift-I)

Ans. (a) : ARPANET was the network that became the basis of the internet. The full name of ARPANET is Advanced Research Project Agency Network. It was the World's first packet switching network in which the TCP/IP model was used. Due to this, the foundation of the internet was laid later.

70. Which of the following is considered to be the world's first computer network?
- (a) NSFNET (b) ASAPNET
(c) CNET (d) ARPANET

UPPCL Technician Electrical 10.11.2023(Shift-II)
UPPCL TG-II 19-03-2021 (Shift-I)

Ans. (d) : ARPANET (Advanced Research Project Agency Network) was packet switching network and first network to implement the TCP/IP protocol suite. This is launched by USA in 1969 by the department of defense. It is based on packet switching technology network.

71. What was the name of the first internet.
- (a) UNIVNET (b) USNET
(c) ARPANET (d) EURONET

UPPCL (Ste.) 28-08-2018 (Morning)

Ans : (c) ARPANET is the World's first internet which was interlinked with NSFNET.

72. Advanced Research Project Agency (ARPA) is responsible for the development of the following-
- (a) Website (b) Online
(c) E-mail (d) Internet

MPPSC (Pre) G.S. 2009

Ans : (d) ARPA (Advanced Research Project Agency) is responsible for the development of the internet. The internet was started in 1969 by the USA department of defense. It becomes accessible to the general public after the ban on internet access was lifted in 1989.

73. A shared network within an organization that enables all its employees to communicate with one another is called:
- (a) extranet (b) intranet
(c) telnet (d) internet

RRB NTPC 26.07.2021 (Shift-I) Stage Ist

Ans. (b) : Intranet is a type of private network that uses the internet protocol to exchange the data between a company, firm, organization etc.

74. Which country has the largest internet users?
- (a) USA (b) China
(c) India (d) Russia

(SSC CGL (TIER-I) 03-09-2016, 4.15 pm)

Ans : (b) China is the largest internet users country. Top three internet users as per data for the year 2021.

1. China	-	854 Million
2. India	-	560 Million
3. America	-	313 Million

75. State whether the following statements are true or false.

- (i) Internet is the best popular local area network (LAN).
(ii) Each computer connected to the internet (should have IP address).
- (a) (i)–correct, (ii) –correct
(b) (i)–wrong, (ii) –wrong
(c) (i)–correct, (ii) –wrong
(d) (i)–wrong, (ii) –correct

UPPCL TG-2, 10.11.2023, Shift-I
UPPCL TG-II 27-03-2021 (Shift-II)

Ans. (d) : (i) The best network to make better use of the internet is WAN (Wide Area Network) which covers a very large area. The LAN is limited to an office or building.

(ii) It is every computer connected through IP address to internet. IP address is numeric level of internet protocol.

76. Which of the following statements regarding the internet is incorrect.

- (a) Every computer in the internet is identified by a unique IP address.
- (b) The internet is owned by the United Nations
- (c) The internet is a World Wide Global system of interconnected computer network.
- (d) The internet uses the standard internet protocol (TCP/IP)

UPPCL TG-II (20-03-2021) (Shift-II)

Ans. (b) : Internet is global system of interconnected government educational, corporate, public and private computer network. Internet uses the standard internet protocol (IP) and transmission control protocol (TCP). The united nations does not own the internet.

77. A shared network within an organization to provide connectivity to its staff is:

- (a) Extranet
- (b) Telnet
- (c) Internet
- (d) Intranet

RRB NTPC 13.03.2021 (Shift-I) Stage Ist

Ans. (d) : An intranet is a private network used to enterprise and company information and computing resources among employees. Intranet encourages communication within an organization.

78. Classify the following into web browsers and Search engines.

- (1) Firefox
- (2) Chrome
- (3) Duck-Duck-Go
- (4) Edge
- (5) Bing
- (6) Internet Explorer
- (7) Safari
- (8) Google
- (9) Yahoo
- (10) Opera

- (a) Web browser - 1,2,4,6,7,10
Search engine -3,5,8,9
- (b) Web browser - 1,2,4,7,10
Search engine -3,5,6,8,9
- (c) Web browser - 1,2,4,6,10
Search engine -3,5,7,8,9
- (d) Web browser - 1,2,4,6,7,9
Search engine -3,5,8,10

UPPCL TG-2, 07.11.2023, Shift-I

UPPCL Assistant Accountant 25.02.2022 (Shift-I)

Ans. (a) : Web browsers– Firefox, Chrome, Edge, Internet explorer, Safari, Opera.

Search Engine– Duck-Duck-Go, Bing, Google, Yahoo.

79. Which of the following is not a web browser.

- (a) Google
- (b) Mozilla Firefox
- (c) Microsoft Edge
- (d) Netscape Navigator

Village Development Officer- 22-12-2018 (shift- II)

Ans : (a) Web browser is a software program. Browsers are mainly used to display and access websites on internet. It is other content such that hyper text markup language (HTML) and extensible markup language (XML). Mozilla Firefox, Microsoft Edge, Netscape Navigator etc. are Web Browsers while Google is a search engine.

80. Which of the following is used in small offices and internet cafes to allow small group computers to be connected to each other.

- (a) Personal Area Network (PAN)
- (b) Local Area Network (LAN)
- (c) Metropolitan Area Network (MAN)
- (d) Wide Area Network (WAN)

ARO Alld. HC, 16.12.2021, Shift-II

UPPCL TG-II 27-03-2021 (Shift-II)

Ans. (b) : LAN stands for Local Area Network is a computer network, which is used to connect two or more computers. It is a local area network operating at a local level. For example home, office, school, airport etc.

81. A cookie is

- (a) an advertisement displayed on a web page
- (b) a program that records web site visits
- (c) an information stored by web server on client
- (d) a technology to store password on client system

UPPCL Assist. Acct. 2016 (Exam date 20.11.2016)

Ans. (c) : Cookies are feature in web browsers with the help of which a website stores some information on the user's computer.

82. A private network used by an organization for exclusive use by its employees is

- (a) Internet
- (b) Intranet
- (c) LAN
- (d) Network Interface Card (NIC)

RRB NTPC, (Shift -3) Online, 29.04.2016

Ans : (b) An Intranet is a private network used by an organization for the exclusive use.

83. What is intranet?

- (a) Internal internet used for transfer of information.
- (b) Internal network used for transfer of information to external company.
- (c) Internal network used for transfer of information within an organization
- (d) Used to transfer information between two entities internal network
- (e) None of these

(SBI (PO) 2010)

Ans : (c) See the explanation of the above question.

84. Set of rules and guidelines used for Internet is technically called as:

- (a) Netetiquette
- (b) Netiquette
- (c) Shockware
- (d) Spyware

(UPPCL TG2 11-11-2016)

Ans : (b) A set of rules and guidelines used for the internet is technically known as a netiquette.

85. Which of the following is the delivery of various services through the internet. These resources contain tools and application such as data storage, servers, databases, networking and software.

- (a) Local Area Networking
- (b) Personal Area Networking
- (c) Metropolitan Area Networking
- (d) Cloud Computing

UPPCL TG-II 27-03-2021 (Shift-I)

Ans. (d) : Cloud computing is a delivery of computing services such that including software, analytics and intelligence over the internet. It is a tool application such that server, storage, database networking resources etc.

86. Which of the following function keys/keyboard shortcuts can be used to reload the current page in Google Chrome?

(i) F5

(ii) Ctrl + r

- (a) Only (ii)
- (b) Neither (i) nor (ii)
- (c) Only (i)
- (d) (i) and (ii) both

ARO All. HC, 18.12.2021, Shift-II

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (d) : To reload the current page in Google chrome, use the F5 or Ctrl + r Function keys/keyboard shortcut. Ctrl + W or Ctrl + F4 shortcut is used to close the current page.

87. Button is pressed to reload a webpage.

- (a) Redu
- (b) Reload
- (c) Restore
- (d) Refresh

(CCC March 2016)

Ans (d) : Refresh button is used to reload a webpage.

88. Which of the following statements is not true about saving web pages for later viewing.

- (a) A webpage can be bookmarked only and cannot be saved
- (b) A web page can usually be saved through the option "File" → edge.
- (c) Some tools allow downloading the entire data of a website and accessing it offline.
- (d) Most web browsers convert web pages to PDF files provides the facility to saves as.

UPPCL TG-II (20-03-2021) (Shift-II)

Ans. (a) : A webpage is a hypertext document provided by the website. It is displayed with the help of a web browser. Users can save the web page and save the web address as per their requirement.

89. Recognize the positive impact of internet in life.

- (a) Cyber crimes are increasing.
- (b) The user is suffering from internet addiction disorder.
- (c) Best source of knowledge through one click.
- (d) Causes less physical activity and poor eyesight.

RRB NTPC, (Shift -2) Online, 11.04.2016

Ans : (c) It is best knowledge through one click. Internet is best source of knowledge.

90. Uses the internet

- (a) Feed forward switching
- (b) Forward switching
- (c) Circuit switching
- (d) Variable length packet switching

UPPCL (Ste.) 28-08-2018 (Morning)

Ans : (d) Internet carries a very large range of information and it uses variable length packet switching.

91. Which of the following statements is/are incorrect?

- (i) Internet is a worldwide network of many smaller networks.
- (ii) Internet between computers located at distend places provides the facility of transfer of files.
- (a) Only (ii)
- (b) Only (i)
- (c) Neither (i) nor (ii)
- (d) Both (i) and (ii)

UPPCL (TG-II) 24-01-2019 (Morning)

Ans : (c) The internet is a global network connecting millions of computers. It is network of networks that consists of millions of private, public, academic, business and government networks of local to global scope, and Internet between computers located at distend places provides the facility of transfer of files.

92. Which of the following is the correct option in Gmail to turn on the spell checking feature any time you compose an e-mail message?

- (a) Settings > See all settings > General > Spelling
- (b) Settings > See all settings > Labels > Spelling
- (c) Settings > See all settings > Labels > Language
- (d) Settings > See all settings > General > Language

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (a) : In Gmail, the following procedure needs to be followed to turn on the spell check feature while composing an email.

Setting → See all setting → General → Spelling.

93. Which of the following is the sequence of steps to activate spelling and grammar in Gmail?

- (a) Gmail -> Settings -> General -> Spelling or Grammar
- (b) Gmail -> Options -> General -> Spelling or Grammar
- (c) Gmail -> preferences -> General -> Spelling or Grammar
- (d) Gmail -> Design -> General -> Spelling or Grammar

UPPCL Executive Assistant 29.11.2022, Shift-II

Ans. (a) : Here are the steps to activate spelling and grammar in Gmail.

Gmail → Settings → General → Spelling or Grammar

94. Which of the following fields will briefly identify what we are writing about in the e-mail?

- (a) CC (b) Subject
- (c) From (d) To

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (b) : Subject field will briefly identify what we are writing about in the e-mail.

95. Which of the following is an area of the mailbox in e-mail where messages that are in the process of being sent or that have failed to be sent are stored?

- (a) Spam (b) Inbox
- (c) Sent Mail (d) Outbox

UPPCL TG-2, 17.11.2023, Shift-II

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (d) : Outbox is the area of the mailbox in e-mail where messages that are in the process of being sent or that have failed to be sent are normally stored.

96. Which of the following statements is true with respect to e-mail address?

- (a) A domain name is not specific to an organization
- (b) Popular e-mail providers for business or personal use include email, yahoo
- (c) The # symbol is a connector between the domain and the person to whom the e-mail address belongs
- (d) Domain names cannot be commercial or personal

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (b) : Popular e-mail providers for business or personal use include G-mail, Yahoo. A domain name is specific to an organization.

The @ symbol is a connector between the domain and the person to whom the e-mail address belongs. Domain names can be commercial or personal.

97. Which of the following is not a method by which we can access and use mail boxes?

- (a) Pager (b) Email clients
- (c) Mobile phone (d) Webmail

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (a) : We can access and use mail boxes through e-mail client, mobile phones, web mail etc, but pagers are not used to send emails. Pager is an online messaging tool for sending text messages to someone.

98. Which of the following operators can be used when we want to search a specific word and any synonym for that word in Google search engine?

- (a) Minus (b) Period
- (c) Tilde (d) Quotations

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (c) : When we want to search a specific word and any synonym for that word in Google search engine then we use tilde operator.

99. Which of the following is a communication service provided by Internet?

- (a) File Transfer Protocol
- (b) Gopher
- (c) Archie
- (d) E-mail

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (d) : E-mail is a communication service provided by internet, it is used for messaging through internet & computer, whereas file transfer protocol is used as protocol. Gopher is used for listing internet content and Archie is a tool for indexing FTP archive, allowing users to more easily identify specific file.

100. E-mail client is the feature of:

- (a) MS-Word (b) MS-Excel
- (c) MS-PowerPoint (d) MS-Outlook

ARO Alld. HC, 14.12.2021, Shift-I

Ans. (d) : An email client is a software application that allows users to send, receive and organize emails. Email clients download messages from the server for local use and upload them to the server for delivery.

Email client software:

Mozilla Thunderbird, Mailbird, eM Client, Microsoft Outlook.

101. Which of the following is the correct way to configure the outlook e-mail client on a PC?

- (a) Actions -> account Settings
- (b) Tools -> Account Settings
- (c) View -> Account Settings
- (d) Edit -> Account Settings

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (b) : To configure outlook e-mail client on PC, go to tools or file and select email accounts or account settings. Click on your email address and select edit change or add new.

102. Which of the following statements is correct regarding replying to emails?

- (a) The 'Reply BCC' option is used to reply to all recipients on BCC lines. It is not used to reply to the original sender.
- (b) The 'Reply' option is used to reply only to the original sender.
- (c) 'Forward' option is used only to reply to the original 'sender'.
- (d) 'Reply All' option is used to reply to all recipients on the CC lines. It is not used to reply to the original sender.

UPPSC APS-2023, 07.01.2024

UPPCL TG-2, 10.11.2023, Shift-I

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (b) : Regarding replying to emails, the Reply option is used only to reply to the original sender. BCC→ Hiding the recipient of an email by using Blind Carbon Copy so that no other person knows to whom the e-mail has been sent.

CC → Carbon Copy is used to send information through a mail to more than one person. The person receiving the e-mail at the address mentioned on the CC box can know whether the same e-mail has been sent to other addresses other than his.

Forward→ Use the Forward option to send a message to someone who is not on the To or CC line.

103. Which of the following statements regarding sending a new email is incorrect?

- (a) The subject of the message is entered in the field.
- (b) Full form of CC is Carbon Copy, which is used to send the same message to more than one person and they all see the list of recipients of this message.
- (c) The email address of the sender is automatically stored in the 'To' field.
- (d) The full form of BCC is Blind Carbon Copy used to send the same message to more than one person and none of them can see the list of recipients of this message.

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (c) : In the context of sending a new email, the email address of the sender is not automatically stored in the To field whereas the email address has to be filled in the To field. Hence, all the three statements given are true.

104. Which of the following statements related to email is correct?

- (a) Quoting is useful as it reminds the receiver of the message that is being replied to.
- (b) The CC field includes email addresses of all those recipients whose addresses will not be visible to any other recipient.
- (a) Only (a) (b) Both (a) and (b)
- (c) Only (b) (d) Neither (a) nor (b)

UPPCL Technician Electrical, 03.11.2023, Shift-II

Ans. (a) : Quoting in email is useful as it reminds the receiver of the message that is being replied to, so statement (a) is correct whereas (b) is incorrect because The CC field includes email addresses of all those recipients whose addresses will be visible to any other recipient.

105. Which of the following statement(s) is/are true about instant messaging using smileys?

- (i) Instant messaging smileys can be sent with text messages.
- (ii) Smiley is a pictorial representation of emotion.
- (a) Neither (i) nor (ii) (b) Both (i) and (ii)
- (c) Only (ii) (d) Only (i)

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (b) : Instant messaging is an online chat facility that enables the transfer of messages in real time between two or more people over the Internet. In instant messaging, smileys can be sent along with text messages. A smiley is a pictorial representation of an emotion.

106. Which of the following statement(s) is/are true about email?

- (i) It is used to send electronic messages through the Internet.
- (ii) The format of email address is 'domainname@username'.
- (a) Only (ii) (b) Only (i)
- (c) (i) and (ii) both (c) Neither (i) and nor (ii)

UPPCL TG-2, 07.11.2023, Shift-I

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (b) : E-mail (Electronic Mail) is a means of sending or receiving messages through electronic devices through the Internet. It is a type of digital message. It is one of the most commonly used features on communication networks. The format of e-mail address is User Name Symbol Domain Name Example is- radha@gmail.com

107. Which of the following statements is/are false?

- (i) You may include as many addresses as you wish in the 'To' field of an email or as many address as are permitted by emailing system.
- (ii) The same email address cannot be entered in both the 'To' and 'Cc' fields.
- (a) Only (ii) (b) Neither (i) or nor (ii)
- (c) Only (i) (d) Both (i) and (ii)

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (a) : (i) You may include as many addresses as you wish in the 'To' field of an email or as many address as are permitted by emailing system the above statements is true.

(ii) The same email address can be entered in both the 'To' and 'Cc' fields. Hence statement (ii) is false.

108. Which of the following symbols should be used in email addresses to separate username and domain name?

- (a) @ (b) #
- (c) \$ (d) %

UPPCL TG-2, 10.11.2023, Shift-I

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (a) : The @ symbol is used in email addresses to separate the username and domain name.

109. The first part of the email address is.....

- (a) username (b) mail server
- (c) domain name (d) system name

UPPCL TG-2, 10.11.2023, Shift-I

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (a) : The full form of email is electronic mail, the first part of which is the user name. Email is made up of the user name a symbol (@), and the domain name. As - Yct2005@gmail.com.

110. Which of the following options of the Gmail App Launcher is used to add, access, create groups, view and edit contacts in Gmail?

- (a) Tasks (b) Contacts
- (c) Calendar (d) Mail

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (b) : The Contacts option in Gmail App Launcher is used to add and access, create groups, view and edit contacts in Gmail.

111. In desktop versions of Outlook, you can manually check the spelling in your email messages at any time by going to _____.

- (a) File -> Spelling & Grammar
- (b) Review -> Spelling & Grammar
- (c) Insert -> Spelling & Grammar
- (d) Options -> Spelling & Grammar

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (b) : In desktop versions of Outlook, you can check the spelling in your email message at any time by clicking Review, Spelling and Grammar.

112. Which of the following is used in the Google search engine to search for articles or content on a certain website?

- (a) Asterisk (*)
- (b) Hyphen (-)
- (c) Colon (:))
- (d) Tab

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (c) : A colon (:) is used to search for articles or content on a certain website in the Google search engine. The colon is an invalid character unless it is used for its intended purpose. For example (http://), while the special characters asterisk (*), hyphen (-) are not included.

113. You can choose to create a _____ that will appear at the end of every email you send.

- (a) formatting options
- (b) attachments
- (c) subject
- (d) signature

UPPCL TG-2, 10.11.2023, Shift-I

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (d) : The full name of e-mail is electronic mail. It is a type of digital message and can contain text files or images.

An email signature is a block of text that is automatically inserted to the end of an email message you send. A signature is used to provide the recipient with your name, e-mail address, business contact information, website URL or even memorable anecdotes.

114. Which of the following tabs of Settings can be used to turn on or off the Spelling, Grammar and Autocorrect tools in Gmail?

- (a) Add-ons
- (b) General
- (c) Labels
- (d) Accounts and Import

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (b) : The general tab in settings can be used to turn on or off the spelling, grammar and autocorrect tools in G - mail.

115. Which of the following statements is false regarding email forwarding?

- (a) When forwarding an email, it is possible to delete existing attachments.
- (b) When forwarding an email, it is possible to forward it to multiple recipients.
- (c) When forwarding an email, it is possible to compose a message and/or modify an existing message.
- (d) When forwarding an email, it is not possible to delete existing attachments.

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (d) : When forwarding an email, you can delete existing attachments and forward it to multiple recipients and also compose a message or modify an existing message. So, statements of option (d) is false.

116. Which of the following options is NOT valid when forwarding email messages in Gmail?

- (a) Forward to all
- (b) Reply
- (c) Replay to all
- (d) Forward

UPPCL TG-2, 09.11.2023, Shift-II

Ans. (a) : When forwarding emails in Gmail, you can not forward them all at once whereas in email, forward related replies can be replied to all and forwarded.

117. Which of the following features of Outlook 365 can be used to restrict intrusive spam?

- (a) Block senders
- (b) Block recipients
- (c) Safe senders
- (d) Safe recipients

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (a) : In outlook 365, the 'Block sender' feature allows you to prevent emails from a specific sender or email address from reaching your inbox. When you block a sender, their emails are typically sent to your junk email folder automatically. This feature can help you manage and reduce unwanted or spam emails.

118. Junk email are also known as:

- (a) Spoof
- (b) Inbox
- (c) Spam
- (d) Crumbs

UPPSC APS-2023, 07.01.2024

APS All. HC, 22.12.2021, Shift-I

RRB NTPC 02.03.2021 (Shift-II) Stage Ist

Ans. (c) : Junk email is also known as spam. This is unsolicited email. A TV program or the funny copy of the film is called spoof.

119. All sent mails are stored in _____ folder by default.

- (a) Sent
- (b) Inbox
- (c) Draft
- (d) Trash

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (a) : All sent mails are stored in sent folder by default. Sent folder serves as a record of the messages you have sent to others. This folder is helpful for keeping track of your outgoing emails and can be useful for reference or confirmation that an email was sent successfully.

120. Which of the following statements is correct

about sending a new e-mail?

- (a) The subject of the message is entered in the heading field
- (b) The sender's e-mail address is automatically stored in 'To' field
- (c) BCC means 'Blind Carbon Copy', which is used to send the same message more than one person and all of them can see the list of recipients of this message
- (d) The recipient's e-mail address is entered in the 'To' field

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (d) : Some correct statements about sending a new e-mail are-

- (i) The subject of the message is entered in the 'Subject' field.
- (ii) The sender's email address is automatically stored in 'From' field.
- (iii) BCC means Blind Carbon Copy', which is used to send the same message to more than one person and all of them cannot see the list of recipients of this message.
- (iv) The recipient's e-mail address is entered in the 'To' field.

So the option (d) is correct.

121. Which of the following statements is/are true about instant messages using smiles?

- (i) Only text message can be sent in instant messaging.
 - (ii) Smiley is a graphical representation of emotion.
- (a) Neither (i) nor (ii)
 - (b) Only (ii)
 - (c) Both (i) and (ii)
 - (d) Only (i)

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (b) : Instant messaging using smileys involves communicating with other through text - based messages accompanied by emotions or smiley faces to convey emotions, tone or reactions.

Smileys are often used to express happiness, human or positivity in a conversation.

122. Deleted emails are stored in -

- (a) Inbox
- (b) Outbox
- (c) Trash
- (d) Draft

UPPSC APS-2023, 07.01.2024

Ans. (c) : The trash folder in an email is where emails are temporarily stored after deleted from the inbox.

123. When a mail (message) is digitized in G-mail once done, it remains in the folder for 30 days.

- (a) Trash
- (b) Spam
- (c) Draft
- (d) Deleted

UPPCL Executive Assistant 28.11.2022, Shift-I

Ans. (a) : In Gmail, when a mail (message) is deleted, it remains in the Trash folder for 30 days. If it is permanently deleted from the folder cannot be retrieved.

124. Which of the following is used to add a mail

address to the address book in Gmail?

- (a) Add to Address book
- (b) Add to mail
- (c) Add to Contacts
- (d) Add to list

UPPCL Executive Assistant 28.11.2022, Shift-II

Ans. (c) : Add to contacts is used to add a mail address to the address book in Gmail.

125. Which of the following options is used to create a new e-mail message in G-mail?

- (a) Create
- (b) Add
- (c) Amend
- (d) Compose

UPPCL Executive Assistant 28.11.2022, Shift-II

Ans. (d) : To create a new e-mail in G-mail, you should look for the "Compose" option.

126. In Gmail, which of the following options in Mailbox can be used to create a new email message?

- (a) Settings
- (b) Drafts
- (c) Compose
- (d) Create

UPPCL TG-2, 09.11.2023, Shift-II

Ans. (c) : The option 'compose' is used to create a new email message in gmail whereas in Draft, we can save any necessary mail. To save mail in draft, we tap the draft option by tapping on three dots given in compose dialog box.

New account can be created by using create in gmail.

127. Which option has to be clicked to reply to a single email or the last email in a thread in Gmail?

- (a) Reply 
- (b) Reply all 
- (c) Forward all.
- (d) Forward

UPPCL TG-2, 09.11.2023, Shift-I

UPPCL Executive Assistant 28.11.2022, Shift-II

Ans. (a) : Reply  option has to be clicked to reply to a single email or the last email in a thread in Gmail.

To reply to an email within a thread, click reply all to forward a single email or the lost email in a thread, click forward.

128. Which of the following keyboard shortcuts is used to activate the emoji pane in Gmail while composing an email?

- (a) Alt + Shift + 2
- (b) Ctrl + Shift + 2
- (c) Ctrl + Shift + 3
- (d) Tab + Shift + 2

UPPCL Executive Assistant 28.11.2022, Shift-II

Ans. (b) : Ctrl + Shift + 2 → Activate the emoji pane in Gmail.

Ctrl + Shift + 5 → Previous Font.

Ctrl + Shift + 6 → Next Font.

129. If an email message was undeliverable, most emailing systems will inform. Which of the following characteristic of an email system does it reflect?

- (a) Speed
- (b) Reliability
- (c) Forgery
- (d) Generality

UPPCL Executive Assistant 29.11.2022, Shift-I

Ans. (b) : If the message does not reach its destination

the first time, the email server notifies the sender or returns the message. This feature is called reliability of the e-mail system.

130. E-mail addresses often include the name of the country the address is from and it is the last two characters of the address. Which of the following domains indicates the country Brazil?

- (a) .br (b) .bo
(c) .bs (d) .bt

UPPCL Executive Assistant 29.11.2022, Shift-II

Ans. (a) : .br – Brazil
.in – India
.au – Australia
.cn – China

131. In the standard inbox of the outlook application, messages are usually set to _____ as the default option.

- (a) By Size (b) By Date
(c) By Subject (d) By Type

UPPCL Executive Assistant 29.11.2022, Shift-II

Ans. (b) : In the standard inbox of the outlook application, messages are usually set to by date as the default option.

132. Which of the following statements is INCORRECT about email protocols?

- (a) MIME is part of email protocols
(b) SMTP and IMAP are email protocols
(c) MIME and FTP are email protocols
(d) SMTP and POP3 are email protocols

UPPCL Assistant Accountant 31.07.2023, Shift-I

Ans. (c) : Email protocols are a set of rules and standards that govern the sending, receiving and management of email message. They ensure that different email systems can communicate and work together effectively. Some common email protocols include-

- (i) SMTP (Simple Mail Transfer Protocol)
(ii) IMAP (Internet Message Access Protocol)
(iii) POP3 (Post Office Protocol Version 3)
(iv) MIME (Multipurpose Internet Mail Extensions)
While FTP (File Transfer Protocol) is a standard network protocol used to transfer file from one host to another over a TCP-based network, such as the internet.

133. An email account CANNOT be created using which of the following?

- (a) Rediffmail (b) Yahoo! Mail
(c) Gmail (d) Fmail

UPPCL Asst. Account. 22.06.2023, Shift-I

Ans. (d) : You can create email account on Rediffmail, Yahoo! mail and Gmail while fmail is nothing.

134. Which of the following is not a benefit of e-

governance?

- (a) Expanded reach of government
(b) Low transparency
(c) Direct participation of constituents
(d) Increased convenience

UPPCL Asst. Account. 22.06.2023, Shift-I

Ans. (b) : Benefit of e-governance-

1. Expanded reach of government
2. Direct participation of constituents
3. Increased convenience

135. The webmail is hosted on:

- (a) desktop disk (b) client
(c) laptop disk (d) cloud server

UPPCL ARO 25.02.2022 (Shift-II)

Ans. (d) : Webmail (or web-based email) is an email service that can be accessed using a standard web browser. Webmail can be hosted on cloud servers, cloud email provides you with robust email tools and gives you access to them over the Internet.

136. Inbox is default location for all

- (a) incoming mail (b) forwarded mail
(c) sent mail (d) deleted mail

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (a) : Inbox is the default location for all incoming mails. An inbox is a repository in an email application that accepts incoming messages.

137. Which of the following symbols is used to insert smiley emoji in email in outlook 2016?

- (a) :-O (b) ;-)
(c) :-) (d) :-(

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (c) : In outlook 2016, the :-) symbol is used to insert a smiley emoji in an e-mail.

138. Which of the following types of files are not allowed to be sent as attachments by most e-mail service providers?

- (a) .doc (b) .jpg
(c) .pdf (d) .exe

UPPCL TG-2, 17.11.2023, Shift-II

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (d) : .exe or bin files are generally not allowed to be sent as email attachments by most e-mail service providers because executable files can introduce virus in to system.

139. Which of the following statements is correct regarding e-mail forwarding?

- (a) New messages cannot be included in forwarded e-mail messages
(b) E-mail can be forwarded to only one person
(c) E-mail only manually can be forwarded
(d) Apart from the original attached files, some new files can also be attached with the forwarded email

UPPCL Executive Assistant 28.11.2022, Shift-I

Ans. (d) : The full form of e-mail is 'Electronic Mail'. It is made up of username and domain name. This can also include forwarding email to more than one person and creating a new messages while forwarding in addition to the original attached files, some new files can be attached with the forwarded e-mail.

140. Which of the following statements is correct regarding sending a new e-mail?

- (a) The subject of the message is entered in the "Subject field" and its mandatory
- (b) In the field, only one recipient's e-mail address should be entered
- (c) The signature of the sender is optional
- (d) If the same message is to be send to more than one person, only one e-mail address is entered in the field and the remaining e-mail addresses are and/or fields

UPPCL Executive Assistant 28.11.2022, Shift-I

Ans. (c) : The full form of e-mail is 'Electronic mail'. To send an e-mail address is required which is made up of user name and domain name. The sender's signature is optional. The subject of the message is entered in the 'subject' field and it is not mandatory.

141. Which of the following statements regarding emailing is incorrect?

- (a) Primary contacts are placed in the 'To' field.
- (b) Tertiary contacts are placed in the 'BCC' field.
- (c) Email addresses placed in the BCC field can be viewed by all recipients of the email.
- (d) Secondary contacts are placed in the 'CC' field.

UPPCL TG-2, 09.11.2023, Shift-II

UPPCL Executive Assistant 30.11.2022, Shift-I

Ans. (c) : The full form of e-mail is electronic mail. It provides the facility to the user to send or receive message in electronic mode over the Internet.

- (i) To is a field in which the e-mail address of the primary recipient is written.
- (ii) Full form of CC is Carbon Copy and it is a secondary field.
- (iii) BCC is the short form of Blind Carbon Copy and it is a tertiary field email addresses placed in this field can't be seen by all recipients of the email.

142. Amitabh has sent an email to different recipients in To, Cc and Bcc fields. Which of the following statements is true?

- (a) All the recipients can see the email addresses in To, Cc and Bcc fields.
- (b) The recipients in the Bcc field can see the email addresses in To and Cc fields.

- (c) The recipients in the To field can see the email addresses in Cc and Bcc fields
- (d) The recipients in the Cc field can see the email addresses in To and Bcc fields.

UPPCL TG-2, 8.11.2023, Shift-I

UPPCL TG-2, 07.11.2023, Shift-I

UPPCL TG-2, 07.11.2023, Shift-II

UPPCL Assistant Accountant 31.07.2023, Shift-II

Ans. (d) : The recipients in the CC field can see the email addresses in To and BCC fields, because the recipients listed in the "To" field are the direct addresses of your email message. In email, CC stands for Carbon Copy and BCC stands for Blind Carbon Copy. The BCC recipients will be able to see the email address you have entered into the CC field, but the recipients entered the To and CC fields won't be able to see the addresses of any contacts entered into the BCC field.

143. Which of the following statements about Bcc in e-mail is false?

- (a) The address entered in the Bcc field can be forwarded.
- (b) When you enter e-mail addresses in the Bcc field of a message, those addresses are not visible to e-mail recipients.
- (c) For security and privacy reasons, it is best to use the Bcc feature when sending e-mail messages to a large number of people.
- (d) Recipients will receive the message, but will not be able to see the address listed in the Bcc field.

UPPCL ARO 25.02.2022 (Shift-II)

Ans. (a) : Blind Carbon Copy allows the sender of a message to hide the person entered in the BCC field from other recipients. When you enter an email address in the BCC field, it means that a copy of the email you are sending will be forwarded to that address as well, but anyone receiving the email will not be able to see the address in the BCC field. When an email is forwarded to, everyone's addresses in the To and CC fields are also forwarded along with the message, Addresses placed in the BCC field are not forwarded.

144. Which one of the following is not an App/Website for both train ticket and flight booking in India?

- (a) Goibibo
- (b) redBus
- (c) Paytm
- (d) Ticket new

UPPSC APS-2023, 07.01.2024

Ans. (d) : Ticket New is a paytm subsidiary is an online platform for booking movie tickets and entertainment events.

145. Which of the following is NOT an application of Information Technology in railways?

- (a) E-ticketing
- (b) SMS Gateway
- (c) Bullet Trains
- (d) National Train Enquiry System

UPPCL ARO-18.02.2018

Ans. (c) : E-ticketing, SMS Gateway and National Train Tracking or enquiry System etc. are all applications of Information Technology in Railways whereas Bullet Train is one of the fastest mode of transport.

146. Which of the following is a time sensitive service on the Internet?

- (a) E-mail
- (b) File transfer
- (c) Internet telephony
- (d) File download

UPPCL TG-II 19-03-2021 (Shift-I)

Ans. (c) : Internet telephony is the type of communication service, with the help of which you can make calls using the internet even without a SIM card. This technology is called Voice over Internet Protocol (VoIP) technology.

147. Which among the following describes an Applet?

- (a) A tag in HTML
- (b) A security protocol
- (c) Picture displayed on a web page
- (d) Program that can be embedded in another application

UPPCL ARO-18.02.2018

Ans. (d) : Applets are small programs used in Internet computing. These programs can be transported from one computer to another over the Internet. The applet can be run by browser or any java enabled web browser.

148. -----is reference to Applet Computing.

- (a) Java Application
- (b) Computer Virus
- (c) A Firewall
- (d) A Coofin

RRB NTPC 17.01.2017 (Shift-III) Stage Ist

Ans : (a) Applet is a small Java program that runs in a browser. It is a program included in the HTML, which can work in the text without affecting the operating system and hardware.

149.is a video collaboration tool for real-time communications.

- (a) Zoom
- (b) Anydesk
- (c) Docker
- (d) Vmware

UPASI 04.12.2021 (Shift-II)

Ans. (a) : Zoom is a video collaboration tool for real time communication. Zoom integrates cloud video conferencing, online meetings, group messaging, and a software defined conference call into one easy to use platform.

150. Which of the following is a free encyclopedia, written collaboratively by the people who use it?

- (a) Google
- (b) Wikipedia
- (c) Encyclopedia
- (d) Yahoo

(SSC 10+2 CHSL 20.01.17, 1.15 pm)

Ans : (b) Wikipedia was started in 2001 by Jimmy Wales and Larry Sanger. It is an open web-based and collaborative multilingual encyclopedia. People all over the world use it. About 13 million articles have been written in it. Anyone can edit its articles.

151. To whom are Jimmy Wales and Larry Sanger related?

- (a) Wikipedia
- (b) Google
- (c) WhatsApp
- (d) Facebook

RRB NTPC, (Shift -I) Online, 29.03.2016

Ans : (a) See the above question explanation.

152. Which of the following options is a service that allows the user to send a message in electronic mode over the internet?

- (a) Email
- (b) SMS
- (c) Speed Post
- (d) Register Post

UPSSSC JE 2018 (Exam date 16.04.2022)

Ans. (a) : E-mail facilitates the user to send or receive messages in electronic mode over the Internet.

153. Which of the following is not a valid e-mail address?

- (a) email@domain.com
- (b) 1234567890@domain.com
- (c) email.@domain.com
- (d) ——@domain.com

EMRS JSA, 17.12.2023, Shift-II

Delhi Police Constable 27.11.2020 (Shift-I)

Ans. (d) : E-mail address has two major parts-

(1) User name (2) Domain name

For example rajesh72@domain.com

↑ ↑
 user name domain name

154. Which of the following is not a way to control spam in the context of e-mails?

- (a) Not responding to spam message
- (b) Downloading spam filtering tools and anti-virus software
- (c) Declare post your e-mail address publicly
- (d) Think before clicking hyperlink

UPPCL Executive Assistant 21.11.2022, Shift-I

Ans. (c) : Following are the ways to control spam in the context of email -

1. Not responding to spam messages.
2. Avoid clicking on any unnecessary/expired hyper links.
3. Using spam filtering tools and antivirus.
4. Use public spam lists to block messages from known spammers.
5. Identify fake emails designed to appear legitimate.

9. Websites & Web Browsers

Introduction of Website

Website is a collection of web pages belonging to a particular person or organization found under the same domain name. Different pages of the website are linked with each other through hyperlinks.

A website can contain few or many web pages. Steps to connect to any website are as follows–

- Type URL for any website in web browser such as www.youthcompetitiontimes.com
- The browser tries to connect to the web server.
- The web server accepts the request.
- The homepage of the website is downloaded from the web server on your personal computer.
- The web page is displayed by the web browser and the connection between server and your browser is closed.

Web Page–

It is an electronic page created using HTML (Hyper Text Markup Language). This Provides links to information. A web page can contain text, images, graphs, audio, video or hyperlinks.

Each web page has a unique address called a URL that identifies its location on the network. There are two types of web pages static and dynamic. Static web page has the same content every time then it is accessed and the content of dynamic web page keeps changing at every time accessed.

Website Address–

The web address is also called URL. It identifies the location of a specific web page. URLs display the Internet addresses of files on client computers connected to the Internet.

Enter the web page address you want to visit in the address bar.

- To type a web page address,
 - Click on the address bar.
 - Type in the web page address.

Example- <https://www.featurepics.com>

- The web page is displayed as shown below.

Internet Addressing Scheme–

Many computers are connected together on the Internet. But each connected computer is assigned a unique address for communication, which is called the IP Addressing System. IP address is an address that is used to uniquely identify a device on an IP network. The directory system available in IP addressing is called Domain Name System which converts a name into a numeric (DNS) address.

Domain Names–

A set of network resources that are assigned to users. Through this, computers connected on the Internet are identified and located. The domain name is always unique and separated by a dot (.)

Example- google.com, yahoo.com etc.

The Domain Name System is used to identify servers and translates domain names into IP addresses. It is a two-letter abbreviation indicating the name of a single country and a three-letter abbreviation indicating the name of the organization.

Some of the key identifiers are as follows–

.com	–	Commercial business
.edu	–	Educational Institutions
.org	–	Organizations
.gov	–	Government entities
.net	–	Internet service provider
.info	–	Information services

URL (Uniform Resource Locator)–

Uniform Resource Locator (URL) is used to specify an address on the World Wide Web. It provides network identification for any resource connected to the web.

Any document or page available on the World Wide Web can be easily accessed using a URL.

The format of the URL is as follows–

Protocol://host name/other_information

For example, <http://featurepics.com>

The protocol in a URL describes that how information is being transferred through the link. The protocol used for web resources is Hypertext Transfer Protocol (Http). Apart from this, HTTPS, FTP, Telnet and Gopher protocol are also used in most web browsers and newsgraps.

The protocol is followed by a colon (:), two slashes (//) and then the domain name. The domain name refers the location of the resource. Domain after the name there are links to files or subdirectories.

Absolute URL–

An absolute URL contains all the information needed to locate a resource on the Internet. This is a complete path including the domain filename.

Example- <http://www.sparkpay.com/images/img.jpg>

It locates the image file named img.jpg which is available in the Images directory and has the domain www.sparkpay.com.

Relative URL–

A relative URL usually contains only the path to a particular file, which is relative to the absolute URL itself.

Example- <http://www.domain.com/default.html>

An example of a relative is URL.

Through this you can easily create hypertext documents. They can be connected by hyperlinks through file names, so that the user can go to another file by clicking on the file name available in a document while reading it.

Website

Static and Dynamic web Pages

Static Web page	Dynamic Web page
1. In Static Web Pages, Pages will remain same until someone change it manually.	1. In dynamic web pages, content of pages are different for different visitors.
2. In static web pages, information are change rarely.	2. In dynamic web page, information are change frequently.
3. In static web pages, data base is not used.	3. In dynamic web pages, database is used.
4. Static web pages are written in languages such as : HTML, Java Script, CSS, etc.	4. Dynamic web pages are written in languages such as: CGI, AJAX, ASP, ASP.NET etc.
5. Static web pages does not contain any application program.	5. Dynamic web pages contains application program for different services.

Most Commonly used tags in HTML

HTML tags	Description	Syntax
HTML	It is the root of the html document which is used to specify that the document is html.	<html> statements </html>
Head	Head tag is used to contain all the head element in the html file.	<head> statements </head>
Body	It is used to define the body of html document. It contains image, tables, lists etc.	<body> statements </body>
Title	It is used to define the title of html document.	< title > statements </title>
Heading	It is used to define the heading of html document.	< h1 > Statements < /h1 > < h2 > Statements < /h2 > < h3 > Statements < /h3 >
Paragraph	It is used to define paragraph content in html document.	< P > Statements < /P >
Emphasis	It is used to renders as emphasized text.	< em > Statements < /em >
Bold	It is used to specify bold content in html document.	< b > Statements < /b >
Italic	It is used to write the content in italic format.	< i > Statements < /i >
Small	It is used to set the small font size of the content.	<Small > Statements < /Small >

Underline	It is used to set the content underline.	< u > Statements </u >
Strike	It is used to represent as deleted text. It cross the text content.	<Strike > Statements < /Strike >
Anchor	It is used to line one page to another page.	 Statements
List	It is used to list the content.	< li > Statements
Ordered List	It is used to list the content in a particular order.	< ol > Statements
Unordered List	It is used to list the content without order.	< ul > Statements
Comment	It is used to set the comment in html document in html document. It is not visible on the browser.	< ! - - Statements >
Marquee	It is used to scroll the text or image content.	<marquee> Statements </marquee >
Center	It is used to set the content into the center.	<center> Statements </center >
Font	It is used to specify the font size, font color and font – family in html document.	 Statements
Line break	It is used to break the line.	< br >
Image	It is used to add image element in html document.	< img >
Link	It is used to link the content from external source.	< link >
Tables	Table tag is used to create a table in html document.	<table> Statements < /table >
Tr	It is used to define row of html table.	< tr > Statements </tr >
Th	It defines the header cell in a table. By default it set the content with bold and center property.	< th > Statements </th >
Td	It defines the standard cell in html document.	< td > Statements </td >
Form	It is used to create html form for user.	<form> Statements < /form >
Input	It is used to take the input from the user.	< input >
Dropdown option	It is used to select an option from a drop down list.	<option > statements </option >

Important Questions Asked in Previous Years Examinations

1. Which of the following is not a web browser?

- (a) Netscape (b) Safari
(c) Yandex (d) Opera

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (c) : Yandex is a search engine.

Search engines - Google, Bing, Yahoo, DuckDuckGo, Baidu, Ask.com, Never.

Web browser - Chrome, Firefox, Opera, Microsoft Edge, Safari, Vivaldi, Brave, Netscape Navigator, Mosaic, Internet Explorer, etc.

2. Which of the following is not web mail provider?

- (a) upGrad (b) Yahoo
(c) Outlook (d) Google

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (a) : Google, Outlook and Yahoo are web mail provider, these are usually free e-mail accounts that operate from a website, whereas upGrad is not related to Webmail.

3. Which of the following keyboard shortcuts is used to activate the first tab when multiple tabs are opened in Google Chrome?

- (a) Ctrl + 1 (b) Alt + 9
(c) Alt + 1 (d) Ctrl + 9

UPPCL Executive Assistant 22.11.2022, Shift-I

Ans. (a) : Table for chrome tab action

Action	Shortcut
Active the first tab	Ctrl + 1
Active the right most tab	Ctrl + 9
Move tabs right or left	Ctrl + Shift +Pg Dn Ctrl + Shift + Pg Up

4. Which of the following is a graphical web browser developed by Apple?

- (a) Edge (b) Chrome
(c) Safari (d) Firefox

UPPCL Executive Assistant 22.11.2022, Shift-I

UPPCL Executive Assistant 22.11.2022, Shift-II

ARO Alld. HC, 14.12.2021, Shift-I

Ans. (c) : Safari is a web browser developed by Apple. It is built into Apple's operating systems, including Mac OS, iOS, and iPad OS are used Apple's open source browser engine website.

5. Which of the following is an incorrect statement about search engines?

- (a) Bing was launched by Microsoft in 2009.
(b) Google search engine was originally known as Backrub
(c) AltaVista was launched by Apple.
(d) Ask was launched in 1996.

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (c) : About search engine Bing, Google search engine, Ask are correct based on the given statements, while AltaVista is incorrect because it was not launched by Apple, AltaVista was launched by Digital Equipment Corporation on December 15, 1995.

6. Which of the following statement(s) is/are true about web browsers?

- (i) They are application software that is used to search, retrieve and display information available on the World Wide Web.
(ii) They send requests to web servers across the Internet using HTTP.
(a) Both (i) and (ii) (b) Neither (i) nor (ii)
(c) Only (ii) (d) only (i)

UPPCL Executive Assistant 22.11.2022, Shift-II

Ans. (a) : A web browser is application software that is used to search, retrieve and display information available on the World Wide Web and to send requests to web servers across the Internet using HTTP. Microsoft Edge, Internet Explorer, Mozilla Firefox, Opera, Safari etc. are examples of web browser

7. Which of the following statements is/are true?

- (i) Yahoo is a web portal, which is one of the main features of web search portal.
(ii) Google and Bing both are search engines.
(a) Neither (i) nor (ii)
(b) Only (i)
(c) Only (ii)
(d) Both (i) and (ii)

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (d) : Yahoo is a web service provider. It provides a web portal. Google and Bing both are search engines.

8. World Wide Web was the first web browser, named _____ to avoid any confusion with the World Wide Web.

- (a) Nexus (b) Firefox
(c) Safari (d) Internet Explorer

UPPCL Executive Assistant 23.11.2022, Shift-II

APS Alld. HC, 23.12.2021, Shift-I

Ans. (a) : The World Wide Web was the first web browser, which was later named Nexus to avoid any confusion with World Wide Web. It was invented by 'Tim Berners-Lee' in 1990.

9. The _____ browser was a text based browser, invented in _____.

- (a) Lynx; 1985 (b) Safari; 1985
(c) Lynx; 1992 (d) Safari; 1992

UPPCL Executive Assistant 23.11.2022, Shift-II

Ans. (c) : The Lynx browser was a text based browser invented in 1992. A text - based web browser is a web browser that renders only the text of web page and ignores most graphic content.

10. Which of the following browsers was released in 2008 for Microsoft Windows?

- (a) Microsoft Edge (b) Opera
(c) Google Chrome (d) Mozilla Firefox

UPPCL TG-2, 10.11.2023, Shift-I

Ans. (c) : Among the options provided Google Chrome was released in 2008 for Microsoft windows.

	Browser	Release Time
1.	Opera	April 10, 1995
2.	Mozilla Firefox	November 09, 2004
3.	Google Chrome	02 September, 2008
4.	Microsoft Edge	29 July, 2015

11. Match the columns.

Web Browsers	Manufacturer
(i) Chrome	(a) Microsoft
(ii) Edge	(b) Apple
(iii) Safari	(c) Google

- (a) (i)-(a), (ii)-(b), (iii)-(c)
(b) (i)-(c), (ii)-(b), (iii)-(a)
(c) (i)-(c), (ii)-(a), (iii)-(b)
(d) (i)-(b), (ii)-(a), (iii)-(c)

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (c) : Google Chrome is a web browser developed by Google on December 11, 2008 through open source code. Microsoft Edge is a web browser developed by Microsoft that was released in July 2015. Microsoft Edge replaced Internet Explorer 11 as the default browser in Windows 10, and Edge was also released for Android and iOS in 2017 and for Mac OS in 2019.

Safari is a graphical web browser developed by Apple. It is primarily open source software and primarily based on WebKit. It supports macOS, iOS and iPadOS and Safari has become the third most popular desktop browser.

12. Match the columns.

List-I	List-2
(i) Web browser	(A) .org
(ii) Domain name	(B) URL
(iii) Webpage	(C) Mosaic
(iv) Webpage address	(D) A single hypertext document

- (a) I-C, II-A, III-D, IV-B
(b) I-D, II-A, III-B, IV-C
(c) I-C, II-B, III-D, IV-A
(d) I-D, II-B, III-A, IV-C

UPPCL TG-2, 09.11.2023, Shift-II

Ans. (a) : Right match:

List-I	List-2
(i) Web browser	(C) Mosaic
(ii) Domain name	(A) .org

(iii) Web page	(D) A single hypertext document
(iv) Webpage address	(B) URL

13. Which of the following provides a software interface that allows you to click on WWW hyperlinked resources?

- (a) Browser (b) IP Address
(c) URL (d) URI

UPPCL Executive Assistant 24.11.2022, Shift-I

Ans. (a) : A browser is a software program used to locate, retrieve, and display information available on the World Wide Web and provides an interface that allows clicking on hyperlinked resources on the World Wide Web.

14. Which of the following is a type of browser window that opens without any user request while browsing the internet?

- (a) Pop-up (b) Pull-up
(c) Plugins (d) Add-ons

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (a) : Pop - up is a type of browser window, which opens without any user request while browsing the Internet. It is also used to show advertisements on the Internet we can turn on or off pop-up windows in our browser as per our choice.

15. Which of the following is not the main part of a search engine?

- (a) Search algorithm (b) Search index
(c) Crawler (d) Kernel

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (d) : Search engine is a web based application that helps the user to find information on the World Wide Web. Its main parts are search algorithm, search index and crawler while kernel is a part of operating system.

16. Which of the following options is generally used to store the contact information of the people you contact frequently by web mail?

- (a) Public profile
(b) Private profile
(c) Online calendar
(d) Online address book

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (d) : Address book feature of a mail program allows the users to store information about the people when they communicate regularly by sending e-mails.

17. Which of the following is a software program that serves the web pages requested by web users using a browser?

- (a) Website (b) Web server
(c) URL (d) Web client

UPPCL Executive Assistant 24.11.2022, Shift-II

Ans. (b) : A web browser is a program that your computer runs to communicate with web servers on the Internet which enables you to download and display the web pages that you request. A web server is software and hardware that uses HTTP and other protocols to respond.

Web Crawler, a search engine uses multiple web crawlers to crawl through the World Wide Web and collect information. It is basically a software also known as a bot or spider.

141. Which of the following is used to open a new tab on a browser?

- (a) Ctrl + T (b) Ctrl + A
- (c) Ctrl + W (d) Ctrl + Y

SSC JE Civil 11.12.2020 (Shift-II)

Ans. (a) : Ctrl + T is used to open a new tab on a browser.

- Ctrl+T – to open a new tab on the browser.
- Ctrl+A – Select all the text at once.
- Ctrl+C – Copy the selected text.
- Ctrl+Y – To redo the undo text.
- Ctrl+O – Open an already created.
- Ctrl+S – To save the file.

142. If you use a font that is not supported by a browser then the original text.

- (a) Supported by browser, text will be displayed using 'Arial' font only.
- (b) It will be displayed with a distinctive background
- (c) It will be displayed in the default font
- (d) It will not be displayed

S.S.C. CPO Exam, 2012

Ans : (c) If you use a font which is not supported by the browser, then the original page will be displayed in the default font self.

143. The software that allows you to read web pages and surf the internet is called a—

- (a) Web Crawler
- (b) Search Engine
- (c) Web spider
- (d) Web Browser

MPPCS (J) 2018 Shift-II

Ans. (d) : Web browser is an application software with the help of which is able to access the necessary information on the world wide web.

144. Which of the following search engines is launched by Microsoft?

- (a) Yandex
- (b) Bing
- (c) Baidu
- (d) Google

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (b) : Bing search engine is launched by Microsoft in June 1, 2009.

145. Which among the following is a web browser developed by Microsoft?

- (a) Firefox
- (b) Internet Explorer
- (c) Windows Explorer
- (d) Netscape

UPASI 05.12.2021 Shift-I

Ans. (b) : Internet explorer is a web browser developed by Microsoft whose first version was released in 1995. Mozilla released the first versions was Firefox in 2002. The Netscape web browser was first released in 1994 by Netscape communications.

146. Which of the following is not a Web browser?

- (a) XHTML
- (b) FireFox
- (c) MacWeb
- (d) Net Scape

(RRB SSE (Shift-III), 03.09.2015)

Ans : (a) XHTML stands for Extensible Hyper Text Markup Language. This is a language used on the world wide web (WWW). It is a software language. It is a feature of HTML and XML language are included, where are all other browsers.

147. During a period of time, you visit the number of websites and pages are presented by-

- (a) Title bar
- (b) History list
- (c) Menu bar
- (d) Status bar

(R.R.B Kolkata (L.P.)-2009)

Ans : (b) The number of websites you visit during a period of time, it displays the history list to all those who have viewed the page. History list stores the information of all those pages in the browser.

148. Alta Vista is a

- (a) Program
- (b) Software
- (c) Browser
- (d) Search Engine

S.S.C. Combined Higher Secondary (10 ± 2) Level Exam , 2011

Ans : (d) Alta Vista is a search engine developed in December 1995. A browser is an application program that allows HTML files to be opened on the internet.

149. Which of the following statements is correct about search engines?

- (a) Google search engine was originally known as Back Rub
- (b) Alta Vista was launched by Microsoft
- (c) Bing was developed by Apple
- (d) Ask was launched in 2005

UPPCL Executive Assistant 21.11.2022, Shift-II

Ans. (a) : Google was officially launched in 1998 by Larry Page and Sergey Brin to market Google search. Larry Page, Sergey Brin, students at Stanford University in California developed a search algorithm at first known as 'BackRub' in 1996, with the help of Scott Hassan and Alan Steremberg. 150. Google is a

- (a) Search Engine
- (b) RDBMS software
- (c) Multimedia software
- (d) None of these

Uttarakhand Lower (Pre) G.S. 2016

Ans : (a) The world wide web (WWW) is a store house of information where millions of web pages are located which can be accessed by help of internet. The search engine helps us to find the desire information from the repository. The search engine maintains a list of all the web pages located on the web, Google, Yahoo, apk.com etc.

151. Which of the following is NOT a characteristic of WWW?

- (a) The web provides an easy-to-use and interactive user interface by making use of hyperlinks, textboxes, checkboxes, etc.
- (b) The web can contain any kind of information such as text, images, audio and video.

- (c) It is a consistent way of accessing information either by clicking a hyperlink or by entering a specific address.
- (d) It is a formal set of rules and conventions that govern how computers exchange information over a network medium.

UPPCL Technician Electrical, 03.11.2023, Shift-II

Ans. (d) : All the options (a), (b) and (c) are characteristics of www whereas option (d) is characteristic of protocol because it is a formal set of rules and conventions that govern how computers exchange information over a network medium.

152. The process of complete software that allows the user to search the internet is called.

- (a) Search Engine
- (b) Internet Service Provider (ISP)
- (c) Multimedia Application
- (d) Browser

RRB JE (Bhopal) 2014

Ans : (a) The process of complete software that allows the user to search the internet is called search engine.

153. Which of the following is not a search engine?

- (a) Dow Jones
- (b) Yahoo
- (c) Lycos
- (d) Meta growler

MPPSC (Pre) G.S. 2009

Ans : (a) Dow Jones is the stock index of United States of America. So Dow Jones is not correct while Yahoo, Lycos, Meta Growler are search engines.

154. _____ focuses on the local Chinese market. While _____ is global and continues to expand.

- (a) Baidu, Google
- (b) Google, Yahoo!
- (c) Yahoo!, Baidu
- (d) Google, Baidu

UPPCL Executive Assistant 30.11.2022, Shift-I

Ans. (a) : Baidu is a Chinese search engine website that provides a web search service similar to Google. It was started by Robin Li in January 2000. It is the largest search engine in China, while Google continues to expand all over the world.

155. Which of the following is a search engine?

- (a) Baidu
- (b) Packets
- (c) Cookies
- (d) None of above

MPPSC (Pre) G.S. 1st Paper, 2016

Ans : (a) Baidu is a search engine which was developed by a Chinese company in the year 2000.

156. Which of the following are large systems specially designed to solve complex scientific and industrial problems?

- (a) Mini computers
- (b) Micro computers
- (c) Mainframes
- (d) Super computers

UPPCL Executive Assistant 30.11.2022, Shift-I

Ans. (d) : A super computer is a computer with a high level of performance as compared to a general - purpose computer. The performance of a super computer is commonly measured in floating point operations per second instead of million instruction per second.

157. Which was the first web browsers developed by the National Center for Supercomputing applications?

- (a) Mosaic
- (b) Netscape
- (c) Opera
- (d) Mozilla Firefox

ARO Alld. HC, 18.12.2021, Shift-II

RRB NTPC 06.04.2021 (Shift-II) Stage Ist

Ans. (a) : The Mosaic web browser was developed in 1993 by the national center for super computer applications. It was the world's first popular web browser. It was facility to add images and an innovative graphical interface.

158. _____ is a tool or program helps in searching specific information/files on the Internet?

- (a) Mosaic
- (b) QBASIC
- (c) Webzine
- (d) Archie

(UPPCL TG2 11-11-2016)

Ans : (d) The program Archie is helpful in finding specific information, files in the internet. This is a search engine, which was developed in 10 September 1990.

159. SEO stands for

- (a) Search engine optimization
- (b) Search engine operation
- (c) Simple engine operation
- (d) Spider engine operation

UPPCL TG-II 27-03-2021 (Shift-I)

Ans. (a) : SEO stands for search engine optimization. It is a process of increasing the number of visitors of the website by applying some SEO tools to increase site higher in the search engine result.

160. To clear browsing data in Google Chrome, which of the following steps are followed?

- (a) Menu → Cast → More Tools → Clear Browsing History
- (b) Menu → Print → More Tools → Clear Browsing History
- (c) Menu → More Tools → Clear Browsing History
- (d) Menu → Find → More Tools → Clear Browsing History

UPPCL ARO 25.02.2022 (Shift-II)

Ans. (c) : Open Chrome on your computer. After opening Chrome click on more tools in the right then click on clear browsing history. When you click on clear browsing history then you will select time frame such that a last hour all time. After the selecting time frame, select the type of information. You want to remove and then click on clear data.

161. Which of the following statements about the option 'clear recent history' in web browser is false?

- (a) It allows you to start browsing with a clean state.
- (b) It allows you to clear the history record.
- (c) Clear recent history the action can be undone
- (d) All your website visits will be erased from your browser's memory

UPPCL ARO 25.02.2022 (Shift-II)

Ans. (c) : On doing 'clear recent history' in the web browser, It deletes all the records you have searched from your browsers' memory. It allows you to browse from a new page.

162. Which of the following is a process used by web developers to turn website code into interactive pages that users see when they visit a website?

- (a) Rendering
- (b) Hosting
- (c) Crawling
- (d) Deploying

UPPCL Executive Assistant 29.11.2022, Shift-I

Ans. (a) : Rendering is a process used in web development that turns website code into the interactive pages users see when they visit a website. The term generally refers to the use of HTML, CSS and JavaScript codes. The process is completed by a rendering engine, the software used by a web browser to render a web page.

163. Which among the following are prerequisites for website publishing?

A. Web development software

B. Internet connection

C. Web server

- (a) Both A and B
- (b) Both C and A
- (c) Both B and C
- (d) All A, B, C

UPRVUNL Asst. Acct. 15.05.2022 (Shift-II)

Ans. (d) : Website publishing is the process of publishing original content on the internet. Web development software, Internet connection and web server are required for website publishing.

164. Which among the following is NOT a web browser?

- (a) Edge
- (b) Ubuntu
- (c) Chrome
- (d) Firefox

SSC JE Electrical (Exam date 28.10.2020) Shift-I

Ans : (b) Web browser is an application. It allows to be used to link various pages on the internet for information. Mozilla Firefox, Google Chrome, Opera, Internet Explorer are web browsers while Ubuntu is not web browser but an operating system.

165. Which among the following is a software program that enables internet users to access, navigate, and search World Wide Web sites?

- (a) Cookie
- (b) Firewall
- (c) Browser
- (d) Database

UPSSSC JE 2018 (Exam date 16.04.2022)

Ans. (c) : See the explanation of the above question.

166. Which of the following is not a search engine?

- (a) Opera
- (b) DuckDuckGo
- (c) Chrome
- (d) Bing

UPPCL Stenographer Exam-18.02.2018

Ans. (a/c) : Opera and Chrome are web browsers. These are the best browsers to read websites for mobile while DuckDuckGo and Bing are search engines.

Note- The answer of this question is option (a) provided by the commission.

167. The name of the first web browser of the world was—— and it was developed by——.

- (a) Gopher, Bill Gates
- (b) World Wide Web, Tim Berners-Lee
- (c) Gopher, Tim Berners-Lee
- (d) World Wide Web, Bill Gates

UPPCL TG-II 25-01-2019 (Morning)

Ans : (b) 'World Wide Web' was the first web browser that was invented by Tim Berners-Lee in 1990, Later it was renamed 'Nexus'.

168. Which shortcut key is used to invoke the File menu in the Internet Explorer 11?

- (a) Alt + F4
- (b) Shift + F
- (c) Alt + F
- (d) Ctrl + F

UPPCL-JE 31-01-2019 (Batch -01)

Ans: (c) Alt+F Shortcut key is used to open file menu in Internet Explorer 11.

169. Which is not a web browser from the following?

- (a) Opera
- (b) Mozilla Firefox
- (c) Safari
- (d) Google

RRB NTPC 06.04.2021 (Shift-I) Stage Ist

Ans. (d) : Google is search engine. 'Google Inc.' has Google's patent. The Google search engine was developed in 1997 by Lary Page and Sergey Brin. It is the most widely used search engine. The CEO of Google is Sundar Pichai.

Opera- Opera is a web browser developed by Opera Software Company. This browser is free. Opera is founded in 1995.

Mozilla Firefox- Mozilla Firefox, developed by the Mozilla Foundation, and its subsidiary, Mozilla corporation, with a mobile version for windows OS, Linux and Android. It is free and open web browser. It was established in 2004.

Safari – Safari is a web browser from Apple. It was established in 2003.

170. What is the shortcut to add a website to 'Favorites'?

- (a) Ctrl + F (b) Ctrl + D
(c) Ctrl + E (d) Ctrl + B

UPPCL Assistant Accountant 25.02.2022 (Shift-I)
UPPCL APS Exam 18.02.2018

Ans. (b) : If we want to add any website to our interested page during reading, we do bookmark them, for this Ctrl+D shortcut key is used.

Ctrl + F → To open Find dialog box.

Ctrl + E → To focus and select the browser's search bar.

Ctrl + B → To bold the selected text.

171. Identify whether the given statements are true or false.

- (i) The tab index attribute specifies the tab order of an element in HTML.
(ii) The access key HTML attribute allows web developers to assign certain keyboard shortcuts to web elements.
(iii) The 'class' attribute of the HTML tag is a global attribute.
(a) i-False, ii-True, iii-False
(b) i-False, ii-True, iii-True
(c) i-True, ii-False, iii-True
(d) i-True, ii-True, iii-True

UPPCL TG-2, 8.11.2023, Shift-I

Ans. (d) : (i) The tab index attribute specifies the tab order of an element in HTML.

The tab index attribute can be used on any HTML element.

(ii) The access key HTML attribute allows web developers to assign certain keyboard shortcuts to focus web elements.

(iii) The class attribute specifies one or more class names for an element.

The class attribute is a global attribute of an HTML tag. Hence, all the statements given in the question are true.

172. _____ is a language that is used to design standardised web pages so that the web pages contents can be read and understood from any computer across the globe.

- (a) Hyper Traffic Markup Language
(b) Hyper Transmission Markup Language
(c) Hyper Text Markup Language
(d) Hyper Text Machine Language

UPRVUNL Asst. Acct. 15.05.2022 (Shift-II)

Ans. (c) : Hyper Text Markup Language (HTML) is a language designed for web pages so that we can read or understand it on any computer around the world because it runs on a browser, anyone can read or see it.

173. Which of the following statements is/are INCORRECT with respect to viewing the contents of an HTML file?

A. The output of an HTML file is viewed using Internet Explorer, Mozilla, Opera, Mosaic or any internet browsing tool.

B. HTML headings are defined with the <h1> to <h6> tags. While <h1> defines the most important heading, <h6> defines the least important heading.

- (a) Neither A nor B (b) Only B
(c) Only A (d) Both A and B

UPRVUNL Asst. Acct. 15.05.2022 (Shift-II)

Ans. (a) : The output of an HTML file is viewed using any web browser.

HTML headings are defined with the <h1> to <h6> tags. While <h1> defines the most important heading, <h6> defines the least important heading.

Thus, neither A nor B is incorrect in the given option. Hence option (a) will be correct.

174. Which among the following is/are NOT true with reference to Id selector?

A. The id of an element should be unique within a page, so the id selector is used to select one unique element.

B. The id selector uses the id attribute of an HTML element to select a specific element.

- (a) Only A (b) Neither A nor B
(c) Only B (d) Both A and B

UPRVUNL Asst. Acct. 15.05.2022 (Shift-II)

Ans. (b) : The id selector uses the id attribute of an HTML element to select a specific element. The id of an element is unique within a page, so the id selector is used to select one unique element.

To select an element with a specific id, write a hash (#) character, followed by the id of the element. An id name cannot start with a number.

175. Which among the following is not true with respect to syntax of HTML tags?

A. Title begins with <Title> tag and ends with </Title> tag.

B. Head begins with <Head> tag and ends with </Head> tag.

- (a) Only B (b) Both A and B
(c) Neither A nor B (d) Only A

UPRVUNL Asst. Acct. 15.05.2022 (Shift-II)

Ans. (c) : The <title> tag defines the title of the document. The title must be text only; syntax—

<title> title name </title>

The <head> tag in HTML is a container for metadata and is placed between the <html> tag and the <body> tag.

Syntax :-

```
<head>
<title> YCT </title>
</head>
```

176. Which HTML tag is used to define information about a document?

- (a) <html> (b) <meta>
(c) <head> (d) <details>

NVS PGT 19.09.2019 (Shift-I)

Ans. (c) : The <head> tag is used to define the body of a document that contains metadata related to the document.

177. An html file consists of:

A. Head

B. Body

- (a) Only A (b) Both A and B
(c) Neither A nor B (d) Only B

UPRVUNL Asst. Acct. 15.05.2022 (Shift-II)

Ans. (b) : An html file is a file written in the HTML language for a webpage, which is used to structure the web page and its content. An HTML file is made up of various tags, heading, link, element etc.

Ex-

```
<!DOCTYPE html>
<html>
<head>
<title> Page title Name </title>
</head>
<body>
<h1>my first heading</h1>
</body>
</html>
```

178. Which among the following are front end languages?

A. HTML

B. CSS

C. JavaScript

- (a) All A, B and C (b) Only A and C
(c) Only A and B (d) Only B and C

UPRVUNL Asst. Acct. 15.05.2022 (Shift-II)

Ans. (a) : Front end language is the web browser understandable language, which is used to design the webpage or website. There are two types of languages used in web development.

1. Frontend language– HTML, CSS, JavaScript.

2. Backend Language– Java, PHP, Python.

179. Which among the following is/are NOT a feature of W3.CSS?

A. In-built responsive designing

B. Standard CSS

- (a) Both A and B (b) Only A
(c) Only B (d) Neither A nor B

UPRVUNL Asst. Acct. 15.05.2022 (Shift-II)

Ans. (d) : Both given statements (A) & (B) are the feature of W3.CSS.

Hence the option (d) is true. W3.CSS is a modern CSS framework with built-in responsiveness. When you use CSS and HTML to resize, hide, shrink, enlarge or move the content to make it look good on any screen is called responsive web design.

180. _____ is a simply designed language intended to simplify the process of making web pages presentable.

- (a) CSS (b) CAS
(c) C (d) JavaScript

UPRVUNL Asst. Acct. 15.05.2022 (Shift-II)

Ans. (a) : CSS stands for Cascading Style Sheets.

CSS describes how HTML elements should be displayed.

181. When the mouse pointer becomes a pointer finger while pointing at some text or pictures on a webpage, such text or picture is called.

- (a) Hyperspace (b) Hypersheet
(c) Hypertext (d) Hyperlink

UPPCL (Ste.) 28-08-2018 (Morning)

Ans. (d) : A hyperlink is a text or an icon that you can click on to open the other website. The link is usually blue and is underlined, serves as a reference point that connects a particular page to other page over the web.

182. Who invented HTML in 1990?

- (a) Tim Berners - Lee (b) David Noble
(c) Kane Kramer (d) Niklaus Wirth

RRB NTPC 22.01.2021 (Shift-I) Stage Ist

Ans. (a) : Tim Berners-Lee invented HTML in 1990.

HTML stands for Hyper Text Markup Language.

HTML is the standard markup language for creating webpage.

183. <HTML>

<HEAD>

<TITLE>HTML Sample </TITLE>

</HEAD>

</HTML>

In the above given HTML code segment you need to add an image file in the next paragraph. Which code segment will you use for this ?

- (a) <P>
 <IMAGE height ="100%" width="100%"
 src ="Sample gif">
 </P>
(b) <A>
 <IMG
 height="100%"width="100%"src="Sample.g
 if">

- (c) <P>
<IMG
height="100%"width="100%"src="Sample.gif">
</P>
(d) <P>
<IMAGE="Sample.gif">
</P>

UPP Computer Operator 21-12-2018 (Batch-01)

Ans : (c) In HTML, tag is used to add image inside webpage. Images are not technically inserted into a web page. Images are linked to webpage. The tag has two required attributes.

src → Specifies the path to the image.

alt → Specifies an alternate text for the image.

Width → It is an optional attribute which is used to specify the width to display the image.

Height → Height attributes set the height of image.

To add image in next paragraph.

```
<P>
<img height = "100%"width = "100%"
src = "Sample.gif">
```

- 184. The IMAGE tag uses which of the following attributes to specify the URL of the image to be displayed?**

- (a) SCR (b) SRC
(c) Source (d) Alt

(UPPCL RO/ARO-2014)

Ans : (b) See the above explanation.

- 185. What will be displayed in the browser page when the following code is included ?**

```
<html>
<body>
<script type="text/javascript">
document.write("Hellow World!")
</script>
</body>
</html>
```

- (a) Hellow World!
(b) document.write("Hellow World!")
(c) "Hellow World!"
(d) Nothing will be displayed

UPP Computer Operator 21-12-2018 (Batch-01)

Ans : (a) Run the following HTML code on browser Hellow World! will be displayed.

- 186. HTML is a**

- (a) programming language
(b) scripting language
(c) mark up language
(d) network protocol

UPPCL Assist. Acct. 2016 (Exam date 20.11.2016)

Ans. (c) HTML is a markup language.

- 187. Which of the following is required to create an HTML document–**

- (a) Search Engine (b) Internet
(c) Text Editor (d) Browser

RRB JE CBT-II 28–08–2019 (morning)

Ans. (c) : Text Editor is required to create an HTML document. By the use of text editor, webpage can be created and modified.

Example of Text Editor–

Notepad, Text Edit, Notepad ++, Subline Text 3.

- 188. In an HTML page, the tag is used to embed an image, and its _____ attribute specifies the path of the image to be displayed.**

- (a) src (b) path
(c) source (d) root

UPPCL AC 2020 (Exam Date 13.09.2021)

Ans. (a) : The tag is used to embed an image in an HTML page. The src attribute specifies the location (URL) of the external source.

- 189. Which of the following is used with the tag as an attribute to specify an alternate text for an image, if the image for some reason cannot be displayed?**

- (a) auxiliary (b) duplicate
(c) alt (d) alternate

UPPCL AC 2020 (Exam Date 13.09.2021)

Ans. (c) : Alt attribute specifies an alternate text for an image, if the image cannot be displayed. The alt attribute provides alternatives information for an image if a user for some reason cannot view it.

- 190. Web pages are created by using which of the following?**

- (a) HTTP (b) SMTP
(c) HTML (d) SGML

ARO Alld. HC, 06.01.2022, Shift-I

RRB NTPC, (Shift -1) Online, 31.03.2016

(SSC 10+2 CHSL 08.01.17, 10 am)

Ans : (c) HTML stands for Hyper Text Markup Language. HTML is the standard markup language for creating web pages. HTML elements tell the browser how to display the content.

- 191. Which of the following is a markup language?**

- (a) HTML (b) Python
(c) Java (d) PHP

SSC JE Electrical (Exam date 26.09.2019) Shift-I

Ans. (a) : See the above question explanation.

- 192. What is the full form of HTML–**

- (a) High Transfer Markup Language
(b) Hyper Text Markup Language

- (c) High Text Machine Language
- (d) Hiper Text Machine Language

SSCJE Electrical 27.01.2018 (Shift-II)

RRB JE (Shift-I) 02.09.2015

UPSSC JE 2015

(SSC-2013)

UPPCL Asst. Account. 22.06.2023, Shift-I

Ans : (b) The full form of HTML is Hyper Text Markup Language.

193.element contains meta information about the HTML page.

- (a) Metadata (b) Html
- (c) Head (d) Body

UPASI 05.12.2021 Shift-I

Ans. (c) : The < head > element contains meta information about the HTML page and is placed between the <html> tag and the <body> tag.

194. Identify whether the following statements are true or false.

- i) The tabindex attribute specifies the tab order of an element in HTML.
 - ii) The accesskey HTML attribute allows web developers to assign certain keyboard shortcuts to web element
 - iii) The 'class' attribute of HTML tags is a global attribute.
- (a) i-True, ii-False, iii-True
 - (b) i-False, ii-True, iii-True
 - (c) i-False, ii-True, iii-False
 - (d) i-True, ii True, iii-True

UPPCL Assistant Accountant 31.07.2023, Shift-II

Ans. (d) : The tabindex attribute specifies the tab order of an element in HTML (when the "tab" button is used for navigating). The accesskey HTML attribute provides a hint for generating keyboard shortcuts for the current web elements to be assigning certain keyboard shortcuts for web developers. The 'class' attribute is part of the global attribute which can be used on any HTML element. Hence, all statements are true.

195. Style definitions are normally saved in external_____.

- (a) .txt files (b) .js files
- (c) .css files (d) .script files

UPPCL Asst. Account. 22.06.2023, Shift-I

Ans. (c): The style definitions are normally saved in external .css files with an external style sheet file, you can change the look of an entire website by changing just one file.

196. Which of the following is NOT a valid CSS type used to set the style in web pages that contain HTML elements?

- (a) Inward CSS
- (b) External CSS
- (c) Inline CSS
- (d) Internal or embedded CSS

UPPCL Asst. Account. 22.06.2023, Shift-I

Ans. (a) : You can add CSS file three types Inline- by using the style attribute inside HTML elements.

Internal- by using a <style> element in the <head> section.

External- by using a <link> element to link to an external CSS file.

197. In web designing and publishing, what does WYSIWYG stand for?

- (a) What You Sell Is What You Give
- (b) What You Save Is What You Gain
- (c) What You Send What You Go
- (d) What You See Is What You Get

UPPCL Asst. Account. 22.06.2023, Shift-I

Ans. (d) : WYSIWYG is an acronym for "What You See Is What You Get." WYSIWYG editors enable users to manipulate the content or layout without having to type any commands.

198. Which of the following is the correct syntax to include a comment in an HTML document?

- (a) /*Comment*/ (b) <!--Comment-->
- (c) // (d) //Comment//

UPPCL Asst. Account. 22.06.2023, Shift-I

Ans. (b) : <!--.....--> The comment tag is used to insert comments in the source code. Comments are not displayed in the browsers you can use comments to explain your code, which can help you when you edit the source code at a later date. This is especially useful if you have a lot of code.

199. To make character appearance bold, which HTML tag is used?

- (a) <i> character </i>
- (b) character
- (c) <bold>character</bold>
- (d)
 character</br>

UPPCL Assistant Accountant 22.06.2023, Shift-II

Ans. (b) : In HTML the tag is used to apply bold formatting to text.

200. The front end of a website is built with all of the following languages, EXCEPT:

- (a) HTML (b) CSS
- (c) JavaScript (d) SQL

UPPCL Assistant Accountant 22.06.2023, Shift-II

Ans. (d) : The front end of a website is the part that users see and interact with. It is created using HTML, CSS and JavaScript. Structured Query Language (SQL) is a programming language that is used to communicate with and manipulate data in Relational Database Management System (RDBMS). SQL is used to Power the back ends of many web applications.

201. How many correct statements regarding web page are given below?

1. A webpage is identified as a distinct URL.
2. Web pages can be both static and dynamic.
3. The core element of a web page is generally an HTML page.

- (a) 0 (b) 2
(c) 1 (d) 3

UPPCL Assistant Accountant 31.07.2023, Shift-I

Ans. (d) : A web page is a single document or page of content that is part of a website on the world wide web. It is identified as a distinct URL. It can be both static and dynamic. The core element of a web page is generally an HTML page, so given all statements are correct.

202. Which of the following symbols is used to comment in CSS?

- (a) /*comment*/
(b) <#comment#>
(c) #comment
 <comment>
(d) comment
 <comment>

UPPCL Assistant Accountant 31.07.2023, Shift-I

Ans. (a) : A CSS comment is placed inside the <style> element, and starts with /* and ends with */. For example :

```
/* This is a single-line comment */
```

203. Which tag is used inside an HTML page to define an internal CSS?

- (a) <style> (b) <show>
(c) <view> (d) <css>

UPPCL Assistant Accountant 31.07.2023, Shift-I

Ans. (a) : In HTML, the <style> tag is used to define inline CSS (Cascading Style Sheets) for a specific element or a set of elements within the web page. It allows you to apply styling rules directly to the content without the need for an external CSS file.

204. Which tag is used to create an ordered list in HTML?

- (a) (b) <lt>
(c) <list> (d) <olist>

UPPCL Assistant Accountant 31.07.2023, Shift-I

Ans. (a) : The tag in HTML is used to create ordered lists. Ordered lists are used to represent a list of items where the order of the items is significant, typically displayed with numbers or letters to indicate the sequence. Each item within the element is defined with the tag.

205. Which of the following statement is INCORRECT?

- (a) Angular JS supports the model-view-controller (MVC) design pattern but it does not support the model-view-viewmodel (MVVM) design pattern.
(b) Window object is the main entry point of a client-side JavaScript
(c) A client side JavaScript code can be embedded within an HTML document.
(d) An array can be used in JavaScript

UPPSC APS-2023, 07.01.2024

UPPCL Assistant Accountant 31.07.2023, Shift-I

Ans. (a) : JavaScript is a versatile programming language commonly used in web development. It allows you to add interactivity and dynamic behaviour to websites. An array can be used in JavaScript. Window object is the main entry point of a client-side JavaScript. A client-side JavaScript code can be embedded within an HTML document. Angular JS supports the Model-View-Controller (MVC) design pattern and it also support the model-view-view model (MVVM) design pattern.

206. In an HTML page, the <a> tag defines a hyperlink, and its _____ attribute specifies the URL of the page the link goes to.

- (a) link (b) href
(c) img (d) path

UPPCL AC 2020 (Exam Date 13.09.2021)

Ans. (b) : The href attribute specifies the URL of the page the link goes to. If the href attribute is not present, the <a> tag will not be a hyperlink.

207. What is URL ?

- (a) A web browser
(b) A computer software
(c) Address of the web page displayed on the internet
(d) Searching engine

RRB NTPC 04.01.2021 (Shift-I) Stage Ist

RRB NTPC 07.01.2021 (Shift-II) Stage Ist

Ans. (c) : URL stands for Uniform Resource Locator. URL is the address of the web page displayed on the internet.

208. HTML comments placed between _____ tags.

- (a) <t-- ... --/t> (b) <!-- -->
(c) <c-- --/c> (d) <p-- ... --/p>

UPPCL ARO-15.09.2018

Ans : (b) HTML comments are not displayed in the browser, but they can help document your html source code. HTML comments are visible to anyone the views the page source code. You can add comments to your HTML source code by using the following syntax.

<!-- -->
There is an exclamation point (!) in the start tag but not in the end tag. Comment can be used to hide content.

209. What should be the first tag in any HTML document?

- (a) <html> (b) <1>
(c) <start> (d) <begin>

**UPPCL ARO 18.02.2018
(SSC J.E. 03.03.17, 10:00 am)**

Ans : (a) First tag in any HTML document is <html> </html> tag.

The <html> element is the root element of an HTML page.

```
<!DOCTYPE html>
<html>
<head>
<title> Page Title </title>
</head>
<body>
The Content document.....
</body>
</html>
```

210.attribute of the Form tag specifies how the form-data should be encoded when submitting it to the server.

- (a) Bodytype (b) Datatype
(c) Enctype (d) Formtype

UPASI 04.12.2021 (Shift-I)

Ans. (c) : The <form> tag is used to create an HTML form for user input.

Syntax-

```
<form> input </form>
```

Enctype- Enctype attribute of the form tag specifies how the form data should be encoded when submitting it to the server.

211. The tags along with its associated tags and attributes is used in two ways; to separate different blocks of content and to present content in the form of tables :

- (a) <table> </table>
(b) <body> </body>
(c) <text> </text>
(d) <name> </name>

(SSC J.E. 04.03.17, 10:00 am)

Ans : (a) The <table> tag defines an HTML table. An HTML table consists of one <table> element and one or more <tr>, <th> and <td> element defines a table cell.

Ex:- <table>
<tr>
<th> Month </th>

```
<th> Savings </th>
</tr>
<tr>
<td> January </td>
<td> $100 </td>
</tr>
</table>
```

212. Element between <td> and </td> tag of HTML table are _____ by default.

- (a) justify
(b) Left Alignment
(c) Centre Alignment
(d) Right Alignment

UPPCL AC 2019 (Exam Date 29.01.2019)

Ans. (b) : The <td> tag defines a standard data cell in an HTML table. An HTML table has two kinds of cells: **Header Cell-** Contains header information created with the <th> element.

Data Cell- Contains data created with the <td> element. The text in <td> elements are regular and left aligned by default.

The text in <th> elements are bold and centered by default.

213. What does HR stand for in <hr> tag?

- (a) Heading Regulations
(b) Heavy Romulans
(c) Horizontal Rule
(d) Horizontal Rulers

S.S.C. CGL (Tier-I) 2013

Ans : (c) The <hr> tag in HTML stands for horizontal rule and is used to insert a horizontal rule or a thematic break in an HTML page to divide or separate document section.

The <hr> tag is an empty tag and it does not require an end tag.

214. Which tag is used to insert a horizontal line on the web page?

- (a) <ho.li> (b) <h.l>
(c) <-l> (d) <hr>

(SSC JE 04.03.17, 10:00 am)

Ans : (d) See the above explanation.

215. To insert a line break this HTML tag is used :

- (a)
 (b) <break>
(c) <Break> (d) </>

(SSC J.E. 01.03.17, 10:00 am)

Ans : (a) To insert a single line break used
 tag. The
 tag is an empty tag.

216. Identify the attribute value in the following HTML statement.

```
<p align = "left">final examination </p>
```

- (a) left (b) <p> and </p>
(c) align (d) final examination

UPPCL AC 2019 (Exam Date 29.01.2019)

Ans. (c) : `<p align = "left" > final examination </p>`
In the above HTML statement `<p>` align attribute is used to specify the alignment of the paragraph text content.

Attribute value–

Left– It sets the text left align.

Right– It sets the text right-align.

Centre– It sets the text center align.

Justify– It stretch the text of paragraph to sets the width of all lines equal.

The P align attribute is not supported by HTML 5.

217. The _____ element is the root element of an HTML page.

- (a) `<head>` (b) `<body>`
(c) `<html>` (d) `<title>`

UPPCL AC 2020 (Exam Date 13.09.2021)

Ans. (c) : The `<html>` element is the root element and it defines the whole HTML document. It has a start tag `<html>` . The `<body>` element defines the documents body.

218. Which character informs browser to stop tagging the text (in HTML) ?

- (a) / (b) .
(c) ! (d) :

(SSC J.E. 02.03.17, 10:00 am)

Ans : (a) Slash (/) character informs browser to stop tagging the text.

219. What does X stand for in document formatting language "XML"?

- (a) Expandable (b) Executive
(c) Extensible (d) None of these

AHC RO 2019 (Exam date 10.01.2020)

Ans. (c) : XML stands for Extensible Markup Language. XML is a markup language similar to HTML. XML was designed to store and transport data.

220. The world wide web may be considered a universe of information available through:

- (a) HTTP (b) TELNET
(c) SMTP (d) FTP

UPPCL ARO 13-09-2018

Ans : (a) HTTP stands for Hyper Text Transfer Protocol. It is an application layer protocol used to access the data on the world wide web.

221. Which protocol is used to receive E-mail.

- (a) SMTP (b) HTTP
(c) FTP (d) POP3

AGTA - 15-02-2019

Ans : (d) POP3 (Post Office Protocol 3) is the E-mail retrieval protocol used to receive E-mails from the server. Internet Message Access Protocol (IMAP) is also an E-mail retrieval protocol to retrieve E-mail message from the server.

222. Which one of the following determines how different programs exchange data over the internet?

- (a) Hyper text transfer protocol
(b) Bluetooth
(c) URL
(d) E-mail

RRB NTPC 17.01.2021 (Shift-I) Stage Ist

Ans. (a) : Hypertext Transfer Protocol (HTTP) is the set of rules for transferring files over the web. Through the HTTP protocol, determines how different programs exchange data over the internet.

223. Which HTML tag is used to make a text bold?

- (a) `<body>` (b) `<b>`
(c) `<br>` (d) None of these

(SSC J.E. 02.03.17, 2:45 pm)

Ans : (b) `<b>` tag → used to make a text bold.

`<body>` tag → It defines the document body.

`<hr>` tag → `<hr>` tag stands for horizontal rule and it is used to insert a horizontal rule in an HTML Page.

`<h1>` to `<h6>` → Defines HTML headings.

`<p>` → Defines a paragraph.

`<br>` → Inserts a single line break.

`<img>` → Defines an image.

`<a>` → Defines a hyperlink.

224. Which of the following values are valid with respect to align attribute of 'div' tag in HTML?

- (i) Left
(ii) Center
(iii) Right

- (a) (i), (ii) and (iii)
(b) Only (i) and (iii)
(c) Only (i) and (ii)
(d) Only (ii) and (iii)

UPP Computer Operator 21-12-2018 (Batch-02)

Ans : (a) Left, Right and Center values are valid with respect to align attribute of 'div' tag in HTML.

225. Which of the following HTML codes is used to create a list using lowercase letters?

- (a) `<ol type = "a">` (b) `<ol case="a">`
(c) `<ol letter="a">` (d) `<ol "a">`

UPP Computer Operator 21-12-2018 (Batch-02)

Ans : (a) The `<ol>` tag defines an ordered list. An order list can be numerical or alphabetical type attribute sets the numbering type.

"a" for Lowercase letters

"A" for Uppercase letters

"i" for Roman

"1" for number

`<ol type = "a">` HTML code is used to create a list using lowercase letters.

226. In HTML, what kind of list will tags create?

- (a) Grocery List
- (b) Symbol List
- (c) Ordered List
- (d) Bulleted List

UPP Computer Operator 21-12-2018 (Batch-02)

Ans : (c) See the above explanation.

227. Which of the following is the correct structure of HTML tags?

- (a) <HTML></HTML><HEAD></HEAD><BODY></BODY></HTML>
- (b) <HTML><HEAD></HEAD><BODY></BODY></HTML>
- (c) <HTML><HEAD><BODY></BODY></HEAD></HTML>
- (d) <HTML><HEAD><BODY></HTML></HEAD></BODY>

(UPPCL RO/ARO-2014)

Ans : (b) HTML Page Structure :

```
<html>
  <head>
    <title> page title </title>
  </head>
  <body>
    <h1> YCT </h1>
    <p> computer </p>
  </body>
</html>
```

228. In an HTML page, if the background image is smaller than the screen, what will happen ?

- (a) It will be repeated
- (b) It will be stretched
- (c) It will get clipped
- (d) It will leave a blank space at the bottom of your page

UPP Computer Operator 21-12-2018 (Batch-01)

Ans : (a) In an HTML page, if the background image is smaller than the screen, then the image will be repeated until it takes up the entire screen.

229. Which of the following attributes in the video tag is used to specify an image to be displayed while the video is downloading?

- (a) Poster
- (b) Splash
- (c) Icon
- (d) Altimage

UPASI 04.12.2021 (Shift-II)

Ans. (a) : The <video> tag is used to embed video content in a document. Poster attribute specifies an image to be shown while the video is downloading. Src attribute specifies the URL of the video file.

230. Which of the following HTML codes is not valid?

- (a) <frameset cols="100,150">
- (b) <frameset width="16%,84%">
- (c) <frameset rows="16%,84%">
- (d) <frameset columns="16%,84%">

UPP Computer Operator 21-12-2018 (Batch-02)

Ans : (d) The <frameset> tag in HTML is used to define the frameset.

Attributes :-

Cols attribute specifies the number and size of horizontal spaces in a frameset. Rows attribute is used to define the number of rows and their size. option (d) <frameset columns = "16%, 84%"> HTML code is not valid.

231. How can you write into HTML output using JavaScript?

- (a) Using innerHTML
- (b) Using console.log()
- (c) Using document.write()
- (d) Using window.alert()

NVS PGT 19.09.2019 (Shift-I)

Ans. (c) : The HTML <script> tag is used to define a client-side script.

Javascript used in HTML

```
<html>
<body>
<script>
  document.write("Hello Rahul")
</script>
</body>
</html>
```

Output:

Hello Rahul

232. A non-linear cross referencing tool which connects the links to other text using hyperlinks are called.....

- (a) Hypertext
- (b) Rich text
- (c) VoIP
- (d) Bookmark

UPASI 04.12.2021 (Shift-I)

Ans. (a) : Hypertext is a cross referencing tool that links to other text using hyperlinks. Hyper text is non-linear and multi sequential and it is different from our normal text.

233.specifies the HTML Element that you want to style.

- (a) Attribute
- (b) Selector
- (c) Property
- (d) Key name

UPASI 05.12.2021 (Shift-II)

Ans. (b) : CSS selectors are used to select the HTML elements that you want to style. CSS selectors select HTML element according to their id, class, type, attribute etc.

Network Security

The security provided to the computer and network to protect against unauthorized access and risk is called network or computer security. Network or computer can be kept secure by using some process or software–

- (i) Antivirus
- (ii) Firewall
- (iii) Authentication and Authorization
- (iv) Cryptography

Protecting computer systems from viruses and malicious Attacks–

A malicious attack is an attempt to forcefully access someone's computer using computer viruses, phishing or other techniques like spamming, social media etc.

Computer virus is a type of malicious computer program of software that can damage and destroy computer files.

Following some security practices can help you reduce the risks and protect computer systems from viruses and malicious attacks–

(i) Antivirus

Antivirus is a software tool that is used to detect and remove or prevent malicious software (malware). Antivirus software protects your computer from malware and cyber criminals (hackers). It is used to remove and repair malicious web pages, files, software applications etc.

We can protect our computer system by installing and using antivirus from malicious software like malware viruses and hackers etc. Antivirus software prevents, detects & removes malicious software (like worms, virus) from a side variety of threats, cyber criminals.

Some of the main antivirus software are–

- (i) Norton
- (ii) McAfee
- (iii) AVG
- (iv) Quick Heal
- (v) PANDA
- (vi) Microsoft Security Essentials
- (vii) Avast
- (viii) Avira

(ii) Authentication and Authorization:

- (i) **Authentication–** Authentication is a process of verifying or identifying user or information with its help the identity of the data or user is verified.

There are several methods of authentication:

- (i) Username and Password
- (ii) Biometrics
- (iii) OTP (One time password)
- (ii) **Authorization–** Authorization is to verify the rights of the user. This process is done after authentication. In authorization the rights of the user are checked.

(iii) Cryptography:

Cryptography is a technique through which information and communication are kept secure. In this, it is coded in such a way that only the recipient can understand the data or message.

The word cryptography is derived from the Greek word Kryptos and Graphene. Krypto means hidden and Graphene means- writing.

In cryptography, the data or message is converted into an unreadable secret code called cipher text and this data can be read only by those who have the secret key to decrypt it. Decrypted data is called plain text. Cryptography is completed in two process:

- (i) Encryption
- (ii) Decryption

- (i) **Encryption–** The process of converting data plain text into cipher text is called encryption. This is a technique whose code cannot be easily understood by an unauthorized person because a key is needed to decrypt it.
- (ii) **Decryption–** Converting cipher text back to plain text is called decryption.

Types of Cryptography– There are two types of cryptography:

- (a) **Symmetric Cryptography–** In this type of cryptography, the same key is used to encryption and decryption of data.
- (b) **Asymmetric Cryptography–** In this cryptography, public key is used for encryption and private key is used for decryption.

(iv) Keep Software Updated:

Install software patches on your computer so attackers do not take advantages of known vulnerabilities. Consider enabling automatic updates, when available.

(v) Avoid Using Public Wi-Fi :

Unsecured Public Wi-Fi may allow an attacker to intercept your device's network traffic and gain access to your personal information.

(vi) Backup and Restoring Data :

Any data that you want to protect against loss or damage can be unsaved as backup data. The meaning of backup is to make a copy of lost data. Backup means "You keep a copy of your data or information in a location other than the original" so that if the data is deleted or corrupted from the original source the data can be retrieved (recovered) again from the data kept at that other location.

Restoring data is the process of copying backup data from secondary storage and restoring it to its original location or new location.

(vii) Firewall :

A firewall is a network security device that prevents unauthorized access to personal data on your computer from outsiders by filtering network traffic. Along with blocking unwanted traffic it also protects your computer from getting infected by blocking malicious software.

Firewall also prevents the virus from a system to another system. It acts as a wall between the computer and the network/internet or in other word we can say a firewall typically establishes a barrier between a trusted network and untrusted network, such as the internet.

Utility of Firewalls

(i) **Monitoring Network Traffic**– Monitoring of network traffic involves the following security measures–

- Source or destination based blocking of incoming network traffic firewalls block the incoming traffic by looking into the source of the traffic.
- Outgoing network traffic can be blocked based on the source or destination that means firewalls can also filter data between your internal network and internet.
- Block network traffic based on content.

(ii) **Preventing Hacks**– Firewalls keep hackers out of your data, emails, computer system and other sensitive information.

(iii) **Promotes Privacy**– Having a firewall keeps the data safe and builds an environment of privacy that is trustworthy and a system without a firewall is accepting every connection into the network from anyone.

Type of Firewall:

A firewall is usually classified in two types–

(i) Packet Filter Firewall

(ii) Proxy Based Firewall

(i) **Packet Filter Firewall**– It is used as a packet filter. It can forward or block packets based on the information in the network layer and transport layer.

A packet filtering firewall can block particular host from accessing the Network.

These type of firewall monitors network traffic and filters incoming packets based on configured security rules.

They also monitor outgoing and incoming packets. This firewall is also known as a static firewall. These types of firewalls do not prevent web based attacks.

(ii) **Proxy Firewall**– A proxy firewall sometimes called an application gateway, which stands between the two computer. Customer computer and the corporation computer. A proxy firewall filters or operate at the application layer.

There are some other firewalls

- Stateful inspection Firewalls
- Next-Generation Firewalls
- Circuit Level Gateways
- Cloud Firewall

Advantages of Network Firewall

- (1) Halt Hacking
- (2) Stop Viruses
- (3) Better Security
- (4) Increasing Privacy

Network attack

Hacker and its Type :

Hacker are those person, who have good knowledge in the world of computer science. Who are well versed in computer programming and network. Hacker can control anyone's computer system through internet even by sitting remotely, such as access data, stealing data, deleting data etc.

Types of Hackers–

- (1) White Hat Hacker/Ethical Hacker
- (2) Black Hat Hackers
- (3) Gray Hat Hackers
- (4) Red Hat Hackers

1. **White Hat Hacker**– White Hat Hackers are known as Ethical Hackers. Ethical Hackers do hacking only after getting permission by the owner of the system with good motives. They do completely legal work only. This type of Hackers are employed by businesses and government agencies as data security analysts, security specialists etc.
2. **Black Hat Hacker**– These type of hacker use their ability to perform illegal tasks. Such as stealing or tampering with personal information and data of a company or person's website or their computer.
These type of hackers are criminals of cyber crime and they have a malicious motive and goal to make money by stealing funds from online bank accounts, stealing secret and data etc.
3. **Grey Hat Hacker**– Grey hat hackers are a blend of both black hat and white hat activities.
Often, grey hat hackers will look for vulnerabilities in a system without the owner's permission or knowledge. If issues are found they will repeat them to the owner. However this type of hacking is still considered illegal because the hacker did not receive permission from the owner prior to attempting to attack the system.
4. **Red Hat Hacker**– These types of hackers work to prevent government agencies, top secret centers and cybercrime. These hackers are a combination of both black and white hat.

Malicious Software : Malware & Virus

Malware– Malware is a malicious software or program designed to damage computer servers or networks without the knowledge of a computer user.

There are some different type of malware–

- (1) Computer Virus
- (2) WORM
- (3) Trojan Horse
- (4) Back Door
- (5) Spyware
- (6) Adware

1. **Computer Virus**– A computer virus is a type of malicious computer program that can damage and destroy computer files or data.

It is a special type of code or program created by programmers. Through a computer virus the data of any computer can be stolen, destroyed and the computer can be taken under its control. It can reduce the capacity of the system disc by entering the boot sector. Virus is transmitted to the computer through internet, pen drive, storage disc etc.

Computer virus is divided into different type:

- (a) **Boot Sector Virus**– It is a type of virus that infects the boot sector or the master boot record (MBR) of the hard disc.

It infects the file that starts the operating system. It spreads through removable media.

- (b) **File Infector Virus**– This virus is also known as parasitic virus, it is associated with program files, such as .com or .exe file. The main source of this virus are the game, word processor.

- (c) **Multipartite Virus**– This type of virus can infect both the boot sector and executable file. If this type of virus attacks your system then your system is at increased risk of cyber threat, that is data may be lost or breach and misuse.

- (d) **Macro Virus**– It is associated with an application such as MS word or excel. This virus starts running automatically as soon as the application is opened.

2. **WORM**– Worm is a type of malware, which spreads from one computer to another by making a copy of itself and occupies the memory.

3. **Trojan Horse**– A Trojan horse is a malware program that looks like other software or programs such as games etc. but its effects are terrible when run it. It can be used by a hacker to break the password or access the data of hard disc.

Trojan horse spreads through downloading software from website or legitimate looking emails and files attached to emails.

4. **Back Door**– Back door is a type of malware like a Trojan. It is used by the attacker to gain unauthorized remote access to the PC.

5. **Spyware**– Spyware is a type of malware program that steals data by sending it to the user's system without his knowledge.

It monitors your computer when it is connected to the internet and your (user) system is completely under the control of the hacker.

It monitors user's activity on internet and transmits that information in the background to someone else.

6. **Adware**– This is a type of advertising malware software or program, which will suddenly appear in the form of pop-up window (in the form of a text message) or banner and ask you to click, but after clicking this malware starts downloading.

Spam :

Spam is unsolicited e-mail or message sent through the internet. It is difficult to identify the sender of spam because it is anonymous. It is mostly used for advertising.

Hacking :

Hacking is the process of gaining unauthorized access to computer network security systems for some legal or illegal purpose. This process is done by a hacker.

Hackers do some hacking by making or using software programs like malware, virus, worm and by transmitting it to the user's.

Ethical Hacking :

Ethical hacking involves hackers who do hack into a system with prior permission to find out vulnerabilities so that they can be fixed before a person with malicious intent find them. This procedure is called ethical hacking. Ethical hacking is completely legal.

Phases of Ethical Hacking–

To find such vulnerabilities, ethical hackers undertake several phases of the ethical hacking methodology.

These phases are–

- (1) Reconnaissance
- (2) Scanning
- (3) Gaining Access
- (4) Maintaining Access
- (5) Clearing Track

1. **Reconnaissance**– This is the first step of Hacking, also known as the footprint or information gathering phase. This is the preparatory phase where we collect as much information as possible about the target. Before launching an attack, the attacker collects all the necessary information about the target footprint collects data from TCP, UDP, IP and Host Network Area.

There are two types of foot printing:

- (i) Active
- (ii) Passive
- (i) **Active**– Directly interacting with the target to gather information about target directly using Nmap tool to scan.
- (ii) **Passive**– Trying to collect information without directly accessing the target in anyway.

2. **Scanning**– This is the second phase of hacking. In this phase hackers try to find different ways to get information of system such as information of user's account, IP address etc.

In this phase, three types of scanning are involved:

- (i) Port scanning
- (ii) Vulnerability scanning

(iii) Network mapping

3. **Gaining Access**– In this phase, Hackers gains access to the system, applications network and escalates their user privileges to control the system connected to it. In this phase, hacker will connect to the network. This will allow hacker to launch more powerful attacks and get more accurate information.
4. **Maintain Access**– Once a hacker has gained access, they want to keep that access for future exploitation and attacks. Here, the hacker secure access to the organizations Rootkits and Trojans and uses it to launch additional attacks on the network.
5. **Clearing Tracks**– Once the hacker gains access, they cover their tracks to escape the security personal.
 1. **Threat**– A cyber security threat is a malicious act that seeks to damage data, steal data etc.
 2. **Salami Attack**– It is financial crimes.
 3. **Multipartite Virus**– Hybrid of program virus and boot sector virus.
 4. **Plagiarism**– Stealing the ideas or creations of others.
 5. **Polymorphic Virus**– It is a form of malware that "Mutates" as it propagates to make is more difficult to detect and block.
 6. **Deep Inspection Firewall**– It makes filtering decisions based on application payload.
 7. **Trojan-Horse**– Legimate programs that allow unauthorized access.
 8. **Denial-of-Service Attack**– An attempt to slow down or stop a computer system or network by flooding the system with requests for information.
 9. **Piracy**– Piracy refers to unauthorized duplication of copyrighted content that is the sold at substantially lower prices.
 10. **Public Key**– In public key, two keys are used for encryption and decryption.
 11. **Private Key**– Same key is used for encryption and decryption.
 12. **Firewall**– It is hardware or software used to isolate a private network from public network.
 13. **Cybercrime**– Crime that involves a computer and networks.
 14. **Avalanche Effect**– A small change in either the plain text or the key producing a significant change in the cipher text.
 15. **Substitution and Transposition**– Generally used for transforming plain text to cipher text.
 16. **DES**– Data Encryption Standard (DES) encryption algorithms is based on the Feistel structure.
 17. **SSL** – Secure Socket Layer
 18. **Brute Force Attack**– Try to determine the key by attempting all possible keys.

Important Questions Asked in Previous Years Examinations

1. Which option best describes the truth of the following statement?
- (i) Virus, Trojan and Key logger are examples of utility software.
- (ii) Windows and Linux are examples of system software.
- (a) (i) False (ii) True (b) (i) True (ii) False
- (c) (i) True (ii) True (d) (i) False (ii) False

UPPCL (TG-II) 24-01-2019 (Morning)

Ans : (a) (i) Virus, Trojan and Key logger are example of malware.

(ii) Windows and Linux are examples of system software.

Hence statement (i) is false and statement (ii) is true.

2. Which of the following software collects information from a computer and transmits it to Man-in-the-middle?
- (a) Fork Bomb
 - (b) Boot Sector Virus
 - (c) Memory Resident Virus
 - (d) Spyware

UPPCL JE 31-01-2019 (Batch-02)

Ans: (d) Spyware is a type of Malware that tries to keep itself hidden while it secretly records information and tracks your online activities on your computers. Spyware installed on your device without your knowledge or permission.

3. Which of these is an Anti-Virus software?
- (a) Avira (b) LYFcare
(c) Hangouts (d) Xender

WBPS Instructor-18.09.2021

Ans. (a) : Avira operations GmbH&Co. KG is a German multinational computer security software company mainly known for their antivirus.
--

4. Which shortcut key is used to access the help option in Notepad?
- (a) F2 (b) Ctrl + F1
(c) Ctrl + F2 (d) F1

DSSSB Craft Instructor (ESM) 06.10.2019

MP Electrician Instructor 07.11.2016, Morning

Ans : (d) The F1 to F12 keys are called enhanced function keys.

F1 → Open the help option in Notepad.

5. Which of the following is not antivirus software?
- (a) Symantec Norton (b) FileZilla
(c) Kaspersky (d) McAfee

HSSC wireman Instructor -17.12.2019, Shift-I

Ans. (b) : FileZilla is a free open source file transfer protocol that allows its user to setup an FTP server or connect to another FTP server to exchange files. Whereas Symantec Norton, Kaspersky and McAfee are an antivirus software.

6. **Anti-virus software must be regularly updated else:-**
- (a) New viruses wouldn't be recognized
 - (b) None of these
 - (c) Software will become corrupt
 - (d) Both of these

UKSSSC Tech. Electrical Instructor-21.11.2017

Ans. (a) : Anti-virus software must be regularly updated because computers are regularly threatened by new viruses. The anti-virus updates contain the latest files needed to combat new viruses and protect your computer.

7. Which of the following is antivirus software?
- (a) Java (b) Tally
- (c) Norton (d) None of these

Uttarakhand Lower (Pre) G.S. 2016

Ans : (c) An antivirus product is a program designed to detect and remove viruses your computer laptop. Example- (i) Avast Antivirus (ii) Avira Antivirus (iii) Norton

Norton is an anti-virus or anti-malware software product, developed and distributed by Norton Life Lock since 1991 as a part of its Norton family of computer security product.

8. An antivirus is a/an:
- (a) program code (b) computer
- (c) company name (d) application software

ARO Alld. HC, 14.12.2021, Shift-II

Ans. (a) : Anti virus is a program code that is designed to prevent, search, and delete virus hence it can also called security program.

9. Which of the following is not a type of computer virus?

- (a) Worm (b) Coffee cup
(c) Macro (d) Bootsector

ARO Alld. HC, 06.01.2022, Shift-I

Ans. (b) : Coffee cup virus is not a computer virus. Types of viruses include bootsector, direct action, resident, multipartite, polymorphic, overwight, space-filler, file-infectors, macro, rootkit, Trojan horse, cavity, executable, rabbit, worm, etc. in which worm is different technically from viruses.

10. Which of the following are unsolicited mails?

- (a) Trojan Horse (b) Virus
(c) Spam (d) Worm

UPPCL ARO-18.02.2018

Ans. (c) : Sending messages or advertisements repeatedly to people on the Internet which they have not requested means sending unwanted messages or advertisements to people is called spam.

11. Which of the following email folders keeps junk mail out of sight so that it does not clutter your inbox and prevent you from seeing legitimate email messages?

- (a) Inbox (b) Spam
(c) Outbox (d) Trash

UPPCL Executive Assistant 30.11.2022, Shift-I
Com. Asst. Alld. HC, 21.12.2021, Shift-I

Ans. (b) : Spam email is unsolicited and unwanted junk email sent in bulk to an indiscriminate recipient list. Typically spam is sent for commercial purposes. It can be sent in massive volume by botnets, network of infected computers.

12. Unsolicited e-mail or junk mail is-

- (a) bomb (d) patbot
(c) spam (d) worm

RRB NTPC, (Shift -3) Online, 18.04.2016
S.S.C. Combined Higher Secondary (10+2) Level
Exam, 2012

Ans : (c) Unsolicited e-mail is spam, which is sent by the company to the person's mail account for the promotion of the company or something. It can also contain viruses.

13. _____ refers to unsolicited commercial emails that flood the Internet.

- (a) Spyware (b) Trojan Horse
(c) Malware (d) Spam

RRB NTPC 22.01.2021 (Shift-I) Stage Ist

Ans. (d) : Spam :- It refers to unsolicited commercial emails that flood the Internet.

Spam Folder :- This folder is used to store incoming unwanted commercial e-mails so that it stays out of the user's inbox.

14. A computer virus is a software program which has the essential ability to

- (a) damage data (b) damage program
(c) clone itself
(d) More than one of the above
(e) None of the above

Bihar PGT TRE 2.0, 15.12.2023
APS Alld. HC, 22.12.2021, Shift-I

Ans. (d): Computer virus is software program that damages data and program and it replicates itself as clone.

15.infects the directory of a computer by changing the path that indicates the location of a file.

- (a) Overwrite virus (b) Multipartite virus
(c) Boot Sector virus (d) File System virus

H.C. Ald. (ARO) Exam-2016

Ans : (d) A computer virus is a malicious piece of computer code designed to spread from device to device. File system virus infects the directory of a computer by changing the path that indicates the location of a file. The file infector virus is the most common computer virus, maliciously designed to infect executable files in a computer system.

Overwrite Virus- An overwrite virus after infecting begins overwriting files with its own code.

Multipartite Virus- A multipartite virus, also known as hybrid virus is a fast acting virus that attacks a devices boot sector and executable files simultaneously.

Boot Sector Virus- A boot sector viruses are a type of malware that infects a systems boot partition or the master boot record of a hard disk.

16. Which option best describes the truth of the following statement?

(i) Virus, Trojan and Key logger are examples of utility software.

(ii) Windows and Linux are examples of system software.

- (a) (i) False (ii) True (b) (i) True (ii) False
(c) (i) True (ii) True (d) (i) False (ii) False

UPPCL (TG-II) 24-01-2019 (Morning)

Ans : (a) (i) Virus, Trojan and Key logger are example of malware.

(ii) Windows and Linux are examples of system software.

Hence statement (i) is false and statement (ii) is true.

17. Junk e-mail is also known as

- (a) Spare (b) Spool
(c) Spoof (d) Spam

UPPCL Office Assistant III 24-10-2018 (Mor.)

Ans : (d) Junk email is also called spam, this type of email is not a legitimate email message.

18. "Spam" is a term related to which subject?

- (a) Computer (b) Art
(c) Music (d) Sports

MPPSC (Pre) G.S. Ist Paper, 2016
Chhattisgarh PSC (Pre) G.S. 2004-05

Ans : (a) The term “spam” is related to computers. Unsolicited and illegal messages sent to many people using computers and the Internet are called spam. This is unsolicited and junk e-mail. This is known as network abuse. The vastness of the Internet makes it difficult to track down a spam sender (Spammer).

19. Which of the following is an attack in which a user receives an unsolicited amount of email?

- (a) Spoofing (b) Smurfing
(c) Email Bomb (d) Ping storm

RRB JE (Electrical) 30-08-2019 (Shift-III)

Ans. (c) : Email bomb is an attack in which a user receives an unwanted amount of email.

20. The software which tracks the activities of the user without his knowledge is called

- (a) Virus (b) Spyware
(c) Malware (d) Worm

(AHC RGC 2014)

Ans : (b) Spyware is a type of malicious software that is installed on your device without your permission and knowledge. Spyware tries to keep itself hidden while it secretly records information and tracks your activities on your device. Example of Spyware— Adware, Keyloggers, Infostealers, Ped shell spyware, browser hijackers, Rootkit etc.

21. When a computer virus attaches itself to another computer program, it is known as —.

- (a) Risky program (b) Trojan horse
(c) Host program (d) Backward program

ARO Alld. HC, 20.12.2021, Shift-I

RRB NTPC 03.04.2021 (Shift-II) Stage Ist

Ans. (b) : A Trojan horse is a type of a malicious code that looks legitimate but can take control of your computer. A Trojan is designed to damage, disrupt, steal or some other harmful action on your data or network.

22. Which of the following is not a system software?

- (a) Kaspersky (b) Unix
(c) DOS (d) Windows

UPPCL TG-II 25-01-2019 (Evening)

Ans : (a) Kaspersky is a Russian Multinational Company that provides cyber security and antivirus software.

23. Which of the following software collects information from a computer and transmits it to Man-in-the-middle?

- (a) Fork Bomb
(b) Boot Sector Virus
(c) Memory Resident Virus
(d) Spyware

UPPCL JE 31-01-2019 (Batch-02)

Ans: (d) Spyware is a type of Malware that tries to keep itself hidden while it secretly records information and tracks your online activities on your computers. Spyware installed on your device without your knowledge or permission.

24. Which of these is an Anti-Virus software?

- (a) Avira (b) LYFcare
(c) Hangouts (d) Xender

UPPCL ARO-18.02.2018

Ans. (a) : Avira operations GmbH&Co. KG is a German multinational computer security software company mainly known for their antivirus.

25. Which of the following is not antivirus software?

- (a) Caspersky (b) Linux
(c) Norton (d) Avast

SSC CHSL (Tier-I) -09/07/2019 (Shift-III)

Ans. (b) : Linux is an open source operating system while Caspersky, Norton and Avast is an antivirus.

26. Copying computer program/software without the permission of its authors is called

- (a) larceny
(b) software piracy
(c) highway robbery
(d) More than one of the above
(e) None of the above

Bihar PGT TRE 2.0, 15.12.2023

ARO Alld. HC, 20.12.2021, Shift-II

Ans. (b): Copying a computer program / software without the permission of its author is called software piracy. This is a legal offense and violates the rights of the creators of the software.

27. Software package which provides advertisements is called?

- (a) Spam (b) Adware
(c) Spyware (d) Malware

(UPPCL TG2 11-11-2016)

Ans : (b) Adware or advertising supported software, is software that displays unwanted advertisements on your computer.

28. With reference to computers and the internet, which of the following viruses makes changes to a disk's file system?

- (a) Stealth virus (b) Polymorphic virus
(c) Macro virus (d) Cluster virus

SSC JE Electrical – 24/03/2021 (Shift-II)

Ans. (d) : Cluster virus in the computer change the file system of disk. It can load various directory pointers to make it appear that every program on disk is infected with a virus, when in reality, only one copy of the virus exists.

Example- Dir-2

29. **Malicious software is any program or file that is harmful to a computer user. Which of the following is malicious software?**

- (a) Malware
- (b) Nero Burning ROM
- (c) Bonjour
- (d) CCleaner

ARO Alld. HC, 06.01.2022, Shift-I
SSC JE Mechanical – 22/03/2021 (Shift-I)

Ans. (a) : Malware is a short term used for Malicious software. It is any software developed with an intention to damage hardware devices, steal data or cause any other trouble to the user. Viruses, Worms, Ransoware Trojans and spyware are some of the kinds of malware.

30. **Which of the following is not antivirus software?**

- (a) Symantec Norton
- (b) FileZilla
- (c) Kaspersky
- (d) McAfee

UPPCL Executive Assistant 29.11.2022, Shift-II

Ans. (b) : FileZilla is a free open source file transfer protocol that allows its user to setup an FTP server or connect to another FTP server to exchange files. Whereas Symantec Norton, Kaspersky and McAfee are an antivirus software.

31. **Which of the following is NOT antivirus software?**

- (a) Norton
- (b) McAfee
- (c) Cobol
- (d) Kaspersky

UPPCL ARO-18.02.2018

Ans. (c) : Cobol is a high-level programming language. Cobol stands for common business oriented language. It is imperative, procedural and object- oriented.

32. **Anti-virus software must be regularly updated else:-**

- (a) New viruses wouldn't be recognized
- (b) None of these
- (c) Software will become corrupt
- (d) Both of these

PPCL Asst. Accountant Exam-09.02.2018

Ans. (a): Anti-virus software must be regularly updated because computers are regularly threatened by new viruses. The anti-virus updates contain the latest files needed to combat new viruses and protect your computer.

33. **A malware that secretly collects information about users without their consent is called:-**

- (a) Spyware
- (b) Virus
- (c) Bootware
- (d) Adware

UPPCL Asst. Accountant Exam-09.02.2018

Ans. (a) : Spyware is a type of malicious software that is installed on your computer or mobile device without your consent. It can gain access to your sensitive personal information and forward it to a third party without your consent.

34. **Which of the following is an example of utility program.**

- (a) all of these
- (b) Antivirus software
- (c) Network Manager
- (d) BIOS software

UPPCL TG-2, 09.11.2023, Shift-I
RRB JE CBT-II 28-08-2019 (evening)

Ans : (a) Utility software is software designed to help analyze, configure, optimize or maintain a computer. Example- Antivirus, File Management tool, compression Tool, Disk Cleanup.

35. **The ability to easily add additional users means that a network is:**

- (a) secure
- (b) dedicated
- (c) decentralized
- (d) scalable

ARO Alld. HC, 06.01.2022, Shift-I

Ans. (a) : The ability to easily add additional users means that a network is secure.

36. **Which of the following statements is INCORRECT?**

- (a) Malware leaks personal information.
- (b) Eavesdropping is listening to private communication
- (c) Spoofing is acquiring the user ID and the password.
- (d) Social engineering is of interest to cyber security.

UPPCL Assistant Accountant 31.07.2023, Shift-I

Ans. (c) : Spoofing is often used in phishing attacks and other malicious activities to gain unauthorized access, steal information, or deceive individuals and systems, spoofing is not acquiring the user ID and the password. Malware is a term used to describe any software or code that is designed to harm, exploit or compromise computer systems, networks, or devices without the consent of the user. Malware leaks personal information.

Eavesdropping is the act of secretly listening to a conversation or private communication without the knowledge or consent of the parties involved.

Social engineering is a manipulative technique used to organizations into releasing confidential information, social engineering is of interest to cyber security.

37. **Attackers attempt to trick users to click a link that will download a malware or direct them to a dodgy website. What type of cyber-attack can this be?**

- (a) Phishing
- (b) Man-in-the-middle attack
- (c) Denial-of-service attack
- (d) SQL injection attack

UPPSC APS-2023, 07.01.2024

UPPCL TG-2, 07.11.2023, Shift-I

Ans. (a) : Phishing is an online hacking process in which personal information is stolen from people. In this, attackers attempt to trick the user into clicking on a link that will download malware or direct them to a suspicious website.

38. How many INCORRECT statements regarding PC security are given below?

1. Firewall causes harm.

2. Malware causes harm.

3. Phishing causes harm.

- (a) 3
- (b) 0
- (c) 2
- (d) 1

UPPCL Assistant Accountant 31.07.2023, Shift-I

Ans. (d) : A Firewall is a network security device or software that helps protect a computer or network from unauthorized access and threats. So, firewall is not harmed, while Malware and Phishing causes harm.

39. Which of the following statements is incorrect regarding cyber security?

- (a) Cyber safety and security has become an urgent issue
- (b) Cyber security is executed using malware, viruses, trojans, botnets and social engineering
- (c) Cyber is no longer limited to security only it is now also linked to social economics
- (d) It focus protecting and protecting computer system, network and our digital lives from disruption

UPPCL TG-2, 17.11.2023, Shift-I

APS Alld. HC, 23.12.2021, Shift-I

Ans. (b) : Statement of option (b) given in the context of cyber security is wrong because the purpose of cyber security is not to execute it, but its main purpose is to keep the network, system and data secure so that such attacks can be covered.

40. The following is incorrect step to prevent from mobile security threats

- (a) Update you device software regularly to ensure protection against spyware threats
- (b) Add your data to public server
- (c) Create unique passwords for different accounts created while using mobile devices
- (d) Do not allow forced downloads from browsers

Ans. (b) : Security software acts as the first line of defense against potential threats. It includes antivirus, anti-malware, and firewall applications. By using the following steps, you can prevent from mobile security threats:

- Keep your software updated.
- Create unique password for different accounts
- Beware of apps
- Don't share your data at public server
- Don't allow forced downloads from browsers
- Leverage biometrics
- Download apps from official app stores
- Keep your data on cloud as backup

41. Which of the following is NOT a type of an IoT security threat?

- (a) Social engineering
- (b) Ransomware
- (c) Man-in-the-middle
- (d) Social networking

UPPCL Asst. Account. 22.06.2023, Shift-I

Ans. (d) : Social engineering, Ransomware and Man-in-the-middle are an IoT security threat while social networking is not security threat because it is a social media like Facebook, Instagram and YouTube est.

42. What does DDoS Security Attack in IoT stand for?

- (a) Direct Distraction of Service
- (b) Direct Detention of Software
- (c) Distributed Denial of Service
- (d) Distributed Disturbance of Software

UPPCL Asst. Account. 22.06.2023, Shift-I

Ans. (c) : A Distributed Denial of Service attack is a malicious attempt to disrupt the normal traffic of a targeted server, server or network by overwhelming the target or its surrounding infrastructure with a flood of Internet traffic.

43. What is a network that combines various systems together to remotely take control of a victim's system and distribute malware called?

- (a) Man-in-the-middle
- (b) Identity and data theft
- (c) Botnet
- (d) Denial of service

UPPCL Asst. Account. 22.06.2023, Shift-I

Ans. (c) : The network that combines various system to remotely take control of a victim's system and distribute malware is commonly referred to as a 'botnet'. Botnets are used for a variety of malicious purposes, including distributing malware launching distributed denial-of-service attacks, and stealing sensitive information from compromised systems.

44. The act of secretly listening to the private conversation or communications of others without their consents in order to gather information is known as:

(a) Phishing (b) eavesdropping
(c) Trojan horse (d) surfing

UPPCL Assistant Accountant 22.06.2023, Shift-II

Ans. (b) : Eavesdropping is the unauthorized interception of electronic communications often with the intention of monitoring, capturing or extracting sensitive or confidential information being transmitted over network.

45. A type of social engineering where an attacker sends a fraudulent message designed to trick person into revealing sensitive information is known as:

(a) Phishing attack
(b) ransomware attack
(c) DDOS attack
(d) man-in the middle attack

UPPCL Assistant Accountant 22.06.2023, Shift-II

Ans. (a) : A phishing attack is a type of cyber attack in which the attacker attempts to trick the victim into revealing sensitive information, Such as password, credit card numbers, or social security numbers. Phishing attacks are often carried out via email or text message.

46. Which of the following is true for a logic bomb?

(a) It is a code contained in the malware by the intruder.
(b) All of these
(c) It can be triggered by the presence/absence of a certain file or at a specific data/time.
(d) It remains dormant until a predefined state is achieved

[UPSSSC Lower Mains 21/10/2021 Paper-I]

Ans. (a) : A logic bomb is a type of malware that contains malicious code that is discreetly installed into software, a computer network, or on operating system with the goal of causing harm to a network when certain condition are met it is triggered specific event and used devastate a system by cleaning hard drive, deleting files or corrupting data.

47. Which one of the following is defined as 'a program that runs in the background on your computer, sending information about your browsing habits to the company that installed it on your computer?'

(a) Adware (b) Malware
(c) Spyware (d) Grayware

UPPCL TG-2, 17.11.2023, Shift-I

RRB NTPC 16.02.2021 (Shift-II) Stage Ist

Ans. (c) : Spyware is a type of malware through this information is obtained the without knowledge of the users. This malware is installed on the computer.

48. At the receiving end, it is necessary to have encrypted data _____ so that it can be easily read by the users.

(a) decrypted (b) demodulated
(c) Augmented (d) Encapsulated

APS All. HC, 22.12.2021, Shift-I

UPPCL TG-II 25-01-2019 (Morning)

Ans. (a) : Data encryption translates the data into some other form or code so that it can be read or viewed by the person who has the secret code. Accessing the data at the receiving end through a secret code is called decryption of the data.

49. With respect to passwords, which of the following is considered a bad practice?

(a) Keeping same password for multiple accounts
(b) Encrypting passwords
(c) Changing password periodically
(d) All of these

UPPCL Stenographer Exam-18.02.2018

Ans. (a) : Password is a key personal information. Which information related to particular person or by taking information about his banking account or ATM password. It can be misused. Hence password should be changed.

50. Which of the following is NOT a cause of system hang?

(a) Prescience of virus
(b) None of these
(c) Excess power supply
(d) Execution of corrupted file

UPPCL Accountant 10-02-2018

Ans. (c) : Therefore prescience of virus, and execution of corrupted file are responsible for any system hang and not the extra power supply.

51. A virus is a program designed to interfere with the normal functioning of a computer. Which of the following is not a type of virus?

(a) Boot Sector Virus (b) System virus
(c) File Virus (d) Disk Virus

Legislative Building Guard - 02-12-2018 (shift- I)

Ans. (d) : Disk virus is not a virus the rest three are viruses. Which are created to interfere with the normal functioning of the computer.

52. Which of the following is the system designed to prevent unauthorized access to or from a private network?

- (a) Repeater (b) Packet filter
(c) Firewall (d) Bridge

RRB NTPC 31.01.2021 (Shift-II) Stage Ist

Ans. (c) : A firewall is a system designed to prevent unauthorized access a private network. You can implement a firewall in either hardware or software in a combination of both. Firewalls prevent unauthorized internet users from accessing private networks connected to the internet. Packet filters, application gateways, circuit level gateways and proxy servers are type of firewalls technology.

53. What is the term given to the act of wrongfully obtaining someone's personal information without their permission?

- (a) Identity theft (b) Phishing
(c) Internet time theft (d) Cyber defamation

UPASI 04.12.2021 (Shift-I)

Ans. (a) : The act of obtaining someones personal information wrongly without his permission is called identity theft.

54. In the context of a computer, the manner in which an adversary can enter a system and potentially cause damage is called ____?

- (a) Attack surface (b) Attack signature
(c) Attack pattern (d) Attack path

Village development officer 22-12-2018 (shift- I)

Ans : (a) In the context of a computer, the manner in which an adversary can enter a system and potentially cause damage is called on attack surface. It is a person who can attack other people for their personal gain. Obtains information from individual computer and computer network to harm then illegally. That person is called a hacker.

55. In India, under cyber insurance for individuals, which of the following benefits are generally covered, in addition to payment for the loss of funds and other benefits?

1. Cost of restoration of the computer system in case of malware disrupting access to one's computer.
2. Cost of a new computer if some miscreant willfully damages it, if proved so
3. Cost of hiring a specialized consultant to minimize the loss in case of cyber extortion
4. Cost of defence in the Court of Law if any third party files a suit

Select the correct answer using the code given below:

- (a) 1,2 and 4 only (b) 1,3 and 4 only
(c) 2 and 3 only (d) 1, 2, 3 and 4

UPSC IAS (Pre) 2020

Ans. (b) On taking cyber insurance of a person in India the following benefits are given.

- Compensation for loss of funds.
- If a malware obstructs its access to the computer, the cost of re-operating the computer system.
- If the cyber is forcibly taken is to minimize this loss of cost to hiring expert consultant for cost to hedge online.
- It is transaction in bank account, debit card or credit card prescribed security compensation for fraud.
- Compensation for damage to reputation due to invasion of privacy.

56. Which of the following is used to protect in computer system, in the absence of more complete protection schemes?

- (a) digital certificate (b) digital signature
(c) passwords (d) tokens

(SSC CGL (TIER-1) 11-09-2016, 10 am)

Ans : (c) Password are often used to protect object in the computer system, in the absence of more complete protection schemes. They can be considered a special case of either keys or capabilities. Passwords are the most common approach to authenticating a user identity. Now present time this used computer operating system, mobile phone, etc.

57. Which of the following is a network security system that monitors and controls the incoming and outgoing network traffic based on predetermined security rules?

- (a) Anti-virus (b) Spyware
(c) Firewall (d) Search engine

(UPPCL RO/ARO-2014)

Ans : (c) A Firewall is a network security system that monitors and controls incoming and outgoing network traffic based on predetermined security rule.

58. What is backup?

- (a) Adding more components to your network
(b) Protecting data by copying it from the original source to a different destination
(c) Filtering old data from the new data
(d) Accessing data on tape

(UPPCL TG-2 26.06.2016)

Ans : (b) Backup is process of protecting data by copying it from the original source to a different destination.

59. Which is not true about backup?

- (a) Accurate companying of computer files.
(b) It is a part of the business continuity plan.
(c) PC does not require regular backup.
(d) More backup on site and off site are beneficial.

RRB NTPC, (Shift -1) Online, 19.04.2016

Ans : (c) The purpose of a PC backup is to create a copy of the data that can be recovered in the event of a primary data failure. PC does not require regular backup.

60. Which of the following feature are required for scanning in TV broad cast?

- (a) Visual Activity
- (b) Brightness and Colour Sensation
- (c) Resistance of Vision
- (d) All of these

(DMRC Maintainer Electronic EXAM, 2014)

Ans : (d) It is a features visual activity, brightness for scanning in TV broadcast and color sensation. Resistance of vision is necessary.

61. Which algorithm is used to decide the path to transfer the packets from source to destination?

- (a) Routing
- (b) Pathing
- (c) Selecting
- (d) Directing

(SSC CGL (TIER-1) 31-08-2016, 4.15 pm)

Ans : (a) The set of steps required to solve a task in mathematics, computing and other disciplines is called an algorithm. The routing algorithm is used to decide the route of packets to be transferred from the source point to the destination.

62. Which of the following is not one of the ways, a virus can infect your computer?

- (a) Snaring music, files or image with other users.
- (b) Creating documents and (PDF) files.
- (c) It is opening spam e-mails or e-mail attachments.
- (d) Downloading Games, Toolbars, Media player and other system utilities for free.

Exercise Training - 16-09-2018 (Shift-I)

Ans : (b) Virus cannot infect document and PDF files because PDF is not executable file. While other options run the risk of being infected with a virus.

63. Information Technology Act, 2000, addresses all of the following issues, EXCEPT:

- (a) Legal recognition of digital signatures
- (b) Legal recognition for apartments
- (c) Legal recognition of electronic documents
- (d) Legal recognition transactions

UPPCL Assistant Accountant 22.06.2023, Shift-II

Ans. (b) : Information Technology Act 2000 not addresses legal recognition for apartments.

64. Which Chapters of the Indian IT Act, 2000 mandates the establishment of Cyber Appellate Tribunal?

- (a) Chapter V
- (b) Chapter X
- (c) Chapter IX
- (d) Chapter VII

NVS Junior Secretariat Assit. 09.03.2022 (Shift-I)

Ans. (b) : Chapter X of the Indian IT Act, 2000 mandate the establishment of cyber appellate tribunal. It provide that the control government shall, by notification establish one or more. Appellate tribunal to be known as the cyber regulations appellate tribunal.

65. Offences like tampering with computer source documents, hacking a computer system an publishing information which is obscene in electronic form are defined in ____ of the Indian IT Act, 2000.

- (a) Chapter IX
- (b) Chapter VIII
- (c) Chapter III
- (d) Chapter XI

NVS Junior Secet. Assist. 09.03.2022 (Shift-II)

Ans. (d) : Indian IT Act 2000 for offence such as tampering with computer source documents, hacking computer systems and publishing obsence information in electronic farm defined chapter XI offences.

66. _____ is the illegal reproduction and distribution of software application.

- (a) Sorting
- (b) Piracy
- (c) Cracker
- (d) Virus

SSC JE Electrical 10.12.2020 (Shift-II)

Ans (b) : Piracy is the illegal reproduction and distribution of software application. Piracy is private ends and without authorization by public authority. There are mainly five types of software piracy.

(1) Counterfeiting, (2) Internet Piracy, (3) End User Piracy, (4) Client – Server Overuse, (5) Hard – Disk Loading.

67. A Virus cannot

- (a) Steal hard disk space
- (b) Steal CPU time
- (c) Log keystrokes
- (d) Increase/decrease the word length of CPU

(RRB SSE Secundrabad (Shift-I), 01.09.2015)

Ans : (d) Virus is a software program that infects the host computer without user permission and causes harmful activity on it, such as filling up Hard disc space, destroying the CPU, etc. Stealing time. The virus installs itself in the system and resides in the RAM and overwrites the interrupt handling code and when the operating system tries to access the target file or disc sector the virus code blocks the request. And redirects the control flow to the replication module, this virus infects the CPU. Steals time. Keystroke logging is the act of recording keys pressed on a keyboard in order to steal passwords and log-in IDs from the keyboard user. virus CPU cannot increase/decrease or affect the literal length.

68. Which type of virus attaches with EXE files and the resulting infected EXE file attacks other EXE files and infects them?

- (a) Parasitic Virus
- (b) Boot Sector Virus
- (c) Stealth Virus
- (d) Memory Resident Virus

UPPCL JE 2019 (Batch-02)

Ans: (a) Parasitic virus also known as file virus. It is a computer virus that attacks its self to executable files and infects them and infected executable files attack other executable files and infect them as well.

69. Which one of the following is not a computer virus but is, basically, a computer language?

- (a) Python
- (b) Code Red
- (c) Sasser
- (d) Conficker

RRB NTPC 18.01.2021 (Shift-I) Stage Ist

Ans. (a) : "Python" is a high level programming language interactive, object oriented scripting language while Code Red, sasser and conficker are computer viruses.

70. Which mechanism is used by the computer virus 'worm' to duplicate itself ?

- (a) Swap
- (b) Increment
- (c) Spawn
- (d) Swarm

Uttarakhand RO 2017

MPPSC (Pre) G.S. Ist Paper, 2016

SSC CGL (TIER-I) 31-08-2016, 4.15 pm

RRB JE-2014

MPPSC (Pre) G.S. Ist Paper 2012

Uttarakhand Lower (Pre) 2011

UPPCS (Pre) GS, 2010

S.S.C. Section Off. Exam 2007

UPPCS (Pre.) G.S. 1993

Ans : (c) A computer virus is a program that can copy itself and infect a computer without the users permission. Spawn is used in computer to replicate itself. A virus can spread from one computer to another only when its host is brought from an uninfected computer.

71. A computer Virus is

- (a) A computer program that can replicate itself
- (b) A virus that affects health of human being
- (c) Both of the above
- (d) None of these

UPSSSC JE-2015

Ans : (a) The full name of VIRUS is "Vital Information Resource Under Siege". VIRUS is a computer program that copies itself and moves from one computer to another without your knowledge. All VIRUS are created by programmers.

72. Which of the following is an antivirus?

- (a) CodeRed
- (b) Melissa
- (c) CryptoLocker
- (d) Dr. Web

RRB NTPC, (Shift -2) Online, 06.04.2016

Ans : (d) Out of the given options Dr. Web is an Antivirus while other option include code Red, Melissa, CryptoLocker is a virus.

73. Which of the following is a computer virus not there.

- (a) AIDS
- (b) Anna Kournikova
- (c) Brain
- (d) Don

RRB NTPC, (Shift - 3) Online, 02.04.2016

Ans : (d) AIDS, anna Kournikova and Brain are computer virus, Don is not computer virus.

74. What is the other name for crackers, the malicious hackers who infiltrate secure systems in order to steal information or cause damage?

- (a) Black hats
- (b) Infliterer
- (c) Pirates
- (d) Digital rogues

UPP Computer Operator 21-12-2018 (Batch-01)

Ans : (a) Crackers are malicious hackers who infiltrate secure systems with the aim of stealing or damaging information. They are also known as black hats.

75. A person who uses his or her expertise to gain access to another Person's Computers to get information illegally or to do damage is a?

- (a) Spammer
- (b) Hacker
- (c) Programmer
- (d) Analyst

Com. Asst. Alld. HC, 21.12.2021, Shift-I

MPPCS (J) 2019 Shift-I

Ans. (b) : If a person who uses his expertise to gain access to another person's computer illegally to obtain someone's information or harm then he is called a hacker.

76. A person who breaks into the computer system to get access the information stored there for unauthorised use is called:

- (a) Organiser
- (b) Snatcher
- (c) Hacker
- (d) Blogger

SSC JE Mechanical 27.10.2020 (Shift-II)

Ans. (c) : The person who breaks into the computer system for unauthorized use to get the stored information is called 'hacker'. There are mainly three types of hackers.

- i. White hat hacker
- ii. Black hat hacker
- iii. Gray hat hacker

77. What is meant by hacker?

- (a) a person who walks on the foot path in the streets sells goods
- (b) A person who uses computers to gain unauthorized access to data
- (c) The one who sells computers only online
- (d) The person who records the phone call

RRB NTPC, (Shift -1) Online, 28.03.2016

Ans : (b) See the explanation of the above question.

78. One who gains unauthorized access, destroys vital data, denies legitimate user's service or causes problems for their targets is called.

- (a) White Hat Hacker
- (b) Cracker
- (c) Programmer
- (d) Database Administrator

MPPCS (Pre), 2019

Ans. (b) Cracker gets unauthorized access, destroys important data, device, service to legitimate users or creates problems for their goals.

79. Which of the following is not antivirus software?

- (a) Avira
- (b) Kaspersky
- (c) McAfee
- (d) Firefox

UPPCL TG-II 25-01-2019 (Evening)

Ans : (d) Avira, kaspersky and McAfee are all antivirus while Firefox is web browser.

80. Indian IT act was notified in the year ____.

- (a) 2014
- (b) 2007
- (c) 2000
- (d) 1991

UPPCL ARO-18.02.2018

Ans. (c) : The Indian IT Act was notified in the year 2000 this is the primary law in India which deals with cyber crime and deals with electronics.

81. What is a virus ?

- (a) It is a computer device that can copy itself and infect a computer without permission or knowledge of the user
- (b) It is a computer keylogger that can copy itself and infect a computer with permission or knowledge of the user

- (c) It is a computer device that can copy itself and infect a computer with permission or knowledge of the user
- (d) It is a computer program that can copy itself and infect a computer without permission or knowledge of the user

UPP Computer Operator 21-12-2018 (Batch-01)

Ans : (d) A computer virus is a program that can copy itself and infect the computer without the permission of the user.

82. Which of the following viruses generally found in the hard disk's root directory, but it keeps on changing location?

- (a) Trj.Reboot
- (b) Vienna
- (c) Way
- (d) Trivial.88.D

RRB JE (Shift-1), 02.09.2015

Ans : (b) Vienna is a virus. Which is usually found in the root directory of the hard disk and keeps changing its location.

83. What is Distributed Denial of Service (DDoS) attack?

- (a) A computer game
- (b) A cyber attack
- (c) A military attack system
- (d) None of these

CGPSC (Pre) 2021

Ans. (b) : A Distributed Denial of Service (DDoS) attack is a cyber attacks aimed at disrupting an online server application website, or other. In this attack a large amount of traffic is sent from a network source to the target website. Due to which that website crashes.

84. Which of the following viruses spreads via malicious emails

- (a) Tri-Reboot
- (b) Vienna
- (c) JS. Fortnight
- (d) Trivial, 88.D

(RRB SSE (shift-II), 02.09.2015)

Ans : (c) J.S. Fortnight is a dangerous virus that spreads to the computer through email.

85. In the context of computing, a 'spider' is a/an:

- (a) Program that catalogues websites
- (b) Search engine
- (c) Hacker who breaks into a corporate computer system.
- (d) Application for viewing websites

RRB NTPC 04.02.2021 (Shift-II) Stage Ist

Ans. (a) Spider is a computing program, which generates a catalog of the website i.e. content, image, link and gets it indexed in the indexing page of Google.

86. Which was the first PC boot sector virus?

- (a) Creeper (b) Payload
(c) Bomb (d) Brain

ARO Alld.HC, 19.12.2021, Shift-I

Ans. (d): A boot sector virus is a type of virus that infects a computer's boot partition or the Master Boot Record (MBR) of a hard disk.

Brain was the first PC boot sector virus. The creeper was the first computer virus which replicates itself.

87. This virus usually resides in the floppy disk drive comes from floppy disk?

- (a) Trojan Horse (b) Boot Sector Virus
(c) Script (d) Logic Bomb
(e) None is correct

(SBI (PO) 2008)

Ans : (b) A boot sector virus is a type of virus that infect the boot sector of floppy disks or the Master Boot Record (MBR) of hard disks (some infect the boot sector of the hard disk instead of the MBR).

When the computer turned on all that time it prevent with the loading of the operating system.

88. Which of the following category of viruses does not replicate themselves ?

- (a) Worms (b) Trojan horses
(c) Boot sector viruses (d) Macro viruses

ARO Alld. HC, 14.12.2021, Shift-I

(RRB JE Bhopal Paper-I (Shift-II), 28.08.2015)

Ans : (b) Trojan horse is type of malware. which cannot copy itself. It is a harmful computer program that takes control of our system and locks the system and steals important information and password.

89. Trojan Horse is a form of :

- (a) Virus attack (b) Service attack
(c) Slammer worm (d) Melissa worm

RRB NTPC 23.01.2021 (Shift-I) Stage Ist

Ans. (a) : Trojan horse is a type of virus attacks. It is a harmful computer program that controls the computer and causes harmful effects. It removes files and data from the system. It could delete as well as steal important information and password.

90. Which of the following categories of viruses normally infect executable code, such as .com and .exe files?

- (a) File infector viruses
(b) Boot sector viruses
(c) Master boot record viruses
(d) Macro viruses

(RRB JE (Shift-3), 28.08.2015)

Ans : (a) A file infector virus usually infects the execution code. like .com, .exe etc.

91. Which of the following computer viruses damages the formatting of a document and does not allow it to edit?

- (a) Boot Sector Virus (b) Macro Virus
(c) File Virus (d) Worm

RRB NTPC 03.03.2021 (Shift-II) Stage Ist

Ans. (b) : A macro virus is a type of computer virus that written in the same macro language as software program such as Microsoft Excel and Microsoft Word. It can not only inject your documents but it can also damage your computer software. Macro virus damage the formatting of computer documents. He does not allow editing it. This virus can affect any operating system.

92. Which of the following is not more likely to be a symptom of the virus.

- (a) The existing program file or icon disappears
(b) The CD-ROM stops working
(c) The web browser opens an unusual home page
(d) Unusual messages or pictures appear on the screen
(e) None is correct

(SBI (PO) 2008)

Ans : (b) The speed of a computer infected with virus slow down. It is computer hangs again and again. Web browser opens unusual pages and icons may be missing but CD-ROMs stopping is not symptom of the virus.

93. Which one of the following is not a virus infecting computer?

- (a) Melissa A (b) Trojan horse
(c) Lovgate (d) Norton

RRB NTPC, (Shift -1) Online, 29.04.2016

Ans : (d) Norton is a computer antivirus among the given options.

94. Which of the following is not an anti-virus software

- (a) McAfee (b) Kaspersky
(c) Oracle (d) Norton

RRB JE CBT-II 28-08-2019 (evening)

Ans : (c) Oracle is not an antivirus software. Because it is an example of database.

95. Which of the following is not a valid category of computer viruses?

- (a) Macro viruses
(b) Trojans
(c) Memory resident viruses
(d) Interrupts

(RRB SSE (Shift-II), 01.09.2015)

Ans : (d) Macro virus, Trojan and Memory Resident Viruses is a type of computer virus but interrupt is not comes under category of computer virus.

96. With reference to computers and the internet, which of the following appears to be harmless but actually produces harmful results?

- (a) Worm (b) Trojan horse
- (c) Patch (d) Virus hoax

SSC JE Mechanical – 22/03/2021 (Shift-I)

Ans. (b) : Trojan horse is a type of computer virus which gives harmful results. For example it can delete system files and data, steal important information and password and lock the system.

97. Which of the following malwares is used by an attacker to get unauthorized remote access to a PC by exploiting security vulnerabilities?

- (a) logic bomb (b) back door
- (c) Poverty (d) Self-replicating

UPPCL JE 2019 (Batch-01)

Ans: (b) Back door is a malware using which can attacker can gain unauthorised remote access to a PC. Which can steal or infect computer data.

98. Which of the following computer programs can get root or administrative access on your computer designed by attackers to do?

- (a) Antiware (b) Rootkits
- (c) Backdoor (d) Malware

RRB-JE 30.08.2019, 1st Shift

Ans. (b) : Rootkits are computer programs designed by attackers to gain root or administrative access to their computers.

99. _____ is an attempt to obtain sensitive information such as username, password and credit card details, etc. for malicious reasons, by posing as a trustworthy source in email :

- (a) Peeping (b) Phishing
- (c) Doctoring (d) Cheating

SSC JE Mechanical – 23/03/2021 (Shift-II)

Ans. (b) : Phishing is an attempt to get sensitive information like username, password and credit card details etc. by presenting yourself as a trusted source in the email for malicious reasons.

100. 'StrandHogg' which was in the news in December 2019, is a/an:

- (a) Malware of Android operating systems
- (b) Super- sonic missile of Israel
- (c) Satellite launched by NASA
- (d) Anti-virus software developed by Microsoft

SSC JE Electrical (Exam date 29.10.2020) Shift-II

Ans (a) : StrandHogg is an Android operating system malware through which hackers can steals passwords and other sensitive information of apps used by Android users. A Norwegian company has found out about this stronger.

101. Unknown emails attachment are removed because

- (a) you can go to jail by this
- (b) That person can identify you and injure you
- (c) This is a wrong practice
- (d) It may contain virus which damages the computer can do
- (e) None of these

(UBI (Clerk) 2011)

Ans : (d) Virus on computer mainly email attachment, game and spread through internet files etc. Therefore for security reasons, unknown email attachments are removed because it may contain virus which can harm the computer.

102. If your computer reboots automatically it is likely that ____?

- (a) Virus
- (b) Memory is not enough
- (c) Not a printer
- (d) Lightning fast current
- (e) None of these

(SBI - 2012)

Ans: (a) If the computer hangs frequently works slow or reboots automatically then the chance of getting infected with a virus increase.

103. Which of the following Malicious Software creates new processes in an infinite loop?

- (a) Boot Sector Virus
- (b) Memory Resident Virus
- (c) Stealth Virus
- (d) Fork Bomb

UPPCL-JE 31-01-2019 (Batch -01)

Ans: (d) A Fork bomb (also known as a " rabbit virus") is a Denial of Service (DOS) attack in which the Fort system call is recursively used until all system resources execute a command. Fork bomb is a type of virus that makes malicious software, new processes in an infinite loop.

104. Anti-virus software must be regularly updated else-

- (a) New viruses wouldn't be recognized
- (b) None of these
- (c) Software will become corrupt
- (d) Both of these

UPPCL Accountant 10-02-2018

Ans : (a) The anti-virus software in any system should be updated regularly, otherwise the anti-virus will not be able to identify the new virus.

105. Verification of a login name and password is known as

- (a) Configuration (b) Accessibility
(c) Authentication (d) logging in

(UPPCL TG-2 26.06.2016)

Ans : (c) Verification of a login name and password is called authentication. It is inputted by the user method. Login name and password are verified comparatively.

106. The information technology term used to find the email address of a user is ____

- (a) login (b) Password
(c) Finger (d) Archie

UP UDA/LDA Spl. (Pre) 2010

Ans : (c) The email address of the user is detected by the finger technique of information technology.

107. Which of the following types of attack allows attackers to inject client side script into web pages?

- (a) Cross Client Scripting
(b) Cross Site Scripting
(c) Cross Server Scripting
(d) Cross Sort Scripting

UPPCL JE 2019 (Batch-01)

Ans: (b) Cross-site scripting (XSS) is a security exploit. It allows an attacker to inject into a web site malicious client side code.

108. What is cybercrime

- (a) Hacking
(b) Stocking
(c) Prohibition of device injury
(d) All of the above

MPPSC (Pre) G.S. Ist Paper 2012

Ans : (d) Hacking, stocking and denial to service attack are all three cyber crimes. It is a computers related crime. Which is committed on the internet. It is done with the help of any person, institution, organization etc. by obtaining personal information and misusing it. It comes under the category of cyber crime.

109. Which one is not a physical threat?

- (a) Hacking (b) Storm
(c) Fire (d) Flood

Bihar STET Exam Date : 12.09.2023 (Shift-II)

Ans. (a) : A physical danger to computer systems is a potential cause of an occurrence/event that could result in data loss or physical damage. It can be classified as:

Internal:- Short circuit, fire, non-stable supply of power, hardware failure due to excess humidity etc.

External:- Disasters such as floods, earthquakes, landslide, etc, whereas Hacking is not physical threat.

110. We categorize cyber-crimes in two ways, that is ____.

- (a) crime committed in i) the real world and ii) the computer world
(b) crime committed through i) the www and ii) the internet
(c) crime committed in i) cyberspace and ii) the real world
(d) crime committed where i) a computer is a target and ii) where a computer is a weapon

UPPCL ARO 13-09-2018

Ans : (d) Cyber crime is crime in which a computer and a network are involved. Computer is a tool used and target a computer.

111. The term which is used to describe legal and regulatory aspect of internet is:

- (a) Cyber law
(b) Cyber Space
(c) Citrous Law
(d) Computer Law

MPPCS (J) 2011

Ans. (a) : Cyber law deal with legal aspects of cyber space, internet and computing. Cyber law handles intellectual property, contracts, jurisdiction data protection laws privacy in the digital space. Cyber law in India has been framed in the Indian Penal Code 2000.

112. A malware that secretly collects information about users without their consent is called -

- (a) Spyware (b) Virus
(c) Bootware (d) Adware

UPPCL Accountant 10-02-2018

Ans : (a) Spyware is an unwanted software that steals confidential information by infiltrating a computer device. It is a type of malware.

113. A malware that secretly collects information about users without their consent is called:-

- (a) Spyware (b) Virus
(c) Bootware (d) Adware

GSSSB Supervisor Electronic Instructor 18.01.2014

Ans. (a) : Spyware is a type of malicious software that is installed on your computer or mobile device without your consent. It can gain access to your sensitive personal information and forward it to a third party without your consent.
